(c) The application must contain the assurances, certifications, and other information required by the statutes and regulations applicable to those programs under which funds will be expended. If any of the requirements for these latter programs are substantially the same, they may be met by a single assurance, certification, or narrative, as appropriate. The application need not meet the application or other requirements for programs which are sources of funds for the consolidated grant but under whose authority no funds will be expended.

(d) If after receiving a consolidated grant, an insular area wishes to use funds for a purpose authorized by an eligible program that is not included in the consolidated grant, or by an eligible program that was included in the grant but was not intended as a program under which funds would be expended, the insular area must submit an amended application indicating the proposed change and containing the assurances, certifications and other information applicable to that program.

§ 97.14 How will grant awards be made?

The Secretary, or his designee, will award a consolidated grant to each insular area that applies for a consolidated grant and meets the requirements of this Part and of the statutes and regulations applicable to the programs under whose authority the consolidated grant funds will be expended. As long as the amount requested does not exceed the amount for which the insular area is eligible under the programs that are being consolidated, the amount of the award will equal the amount requested in the application.

§ 97.15 For what purposes can funds be used?

Funds awarded under a consolidated grant must be used for purposes authorized by the statutes and regulations of the programs included in the consolidated grant. In its application for a consolidated grant the insular area is to indicate the amount of funds that will be allocated to the eligible programs.

§ 97.16 What fiscal, matching, and administrative requirements apply to grantees?

(a) An insular area receiving a consolidated grant must comply with the statutes and regulations applicable to the programs under which the funds are to be used, except as otherwise provided in this Part.

(b) In regard to programs included in a consolidated grant, an insular area need not comply with any of the statutory or regulatory provisions requiring recipients to match federal funds with their own or other funds.

(c) A single report may be submitted in lieu of any individual reports that may be required under the programs included in a consolidated grant.

Dated: November 4, 1982.

Richard S. Schweiker,

Secretary.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Rules and Regulations

Federal Register
Vol. 47, No. 243
Friday, December 17, 1982

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 271, 278, and 279

[Amdt. No. 236]

Food Stamp Program: Authorizing House-to-House Trade Routes and Tougher Penalties for Firms Which Break the Rules

AGENCY: Food and Nutrition Service, USDA.

ACTION: Interim rule.

SUMMARY: This rule amends Food Stamp Program Regulations to implement the Food Stamp Act Amendments of 1982. These Amendments tighten the rules for authorization of house-to-house trade routes where necessary to prevent fraud and abuse, and specify a scale of penalities for authorized firms which violate the regulations.

EFFECTIVE DATES: This interim rule is effective on December 17, 1982. To be assured of consideration in the development of the final rule, comments must be received by March 17, 1983.

ADDRESS: Comments should be submitted to Virgil Conrad, Deputy Administrator for Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia 22302. All written comments will be open for public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday), at 3101 Park Center Drive, Alexandria, Virginia, Room 706.

FOR FURTHER INFORMATION CONTACT: Herbert A. Scurlock, Director, Federal Operations Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia 22302; (703) 756–3487.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291. The Department has reviewed this rule under Executive Order 12291 and Secretary's Memorandum No. 1512–1. The rule will affect the economy by less than $100 million a year. The rule will not significantly raise costs or prices for consumers, industries, government agencies or geographic regions. There will not be significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, the Department has classified the rule as "not major".

Justification for Publishing as Interim Rule, Effective on Publication. This rulemaking is being published as an interim rule, effective on publication, consistent with the mandate of Section 193 of the Omnibus Budget Reconciliation Act of 1982 (Pub. L. 97–253, enacted on September 8, 1982). Section 193 mandates that the provisions of Pub. L. 97–253 addressed in this rule are effective as of the date of enactment. For this reason Samuel J. Cornelius, Administrator of the Food and Nutrition Service, pursuant to 5 U.S.C. 553, has determined that prior public comment on this rule is impracticable and contrary to the public interest and that good cause exists for making this rule effective less than 30 days after publication. Public comment is solicited on this rule for 90 days. All comments received will be analyzed and any appropriate changes in the rule will be incorporated in a subsequent publication.

Regulatory Flexibility Act. This rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act, Pub. L. 96–354. The Administrator of the Food and Nutrition Service has certified that this action will not have a significant economic impact on a substantial number of small entities. Only a small number of small entities (trade routes, and firms which violate program regulations) will be affected.

Recordkeeping Requirements. This rule does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget (OMB).

Amendments

House-to-house trade routes. Section 165 of Pub. L. 97–253 requires the Department to limit the participation of house-to-house trade routes to those that are "reasonably necessary to provide adequate access to households" in those areas in which the Secretary, in consultation with the Inspector General, finds evidence that route operations damage the program's integrity.

In the Senate Committee report accompanying the 1982 legislation (S.R. No. 97–504, dated July 26, 1982), the Committee stated that because of two cases in Dade County, Florida, in which fictitious mobile fish markets became authorized to serve as outlets for illegally obtained food stamps, the Department should tighten its application review process for "rolling stores". Since reports of abuse tend to center in urban areas, the Committee thought the Department should concentrate its efforts on those areas. However, the Committee cautioned the Department that it should consider the needs of recipients in areas where restrictions are contemplated, and use caution in limiting house-to-house trade routes which serve housebound recipients and those, such as residents of high crime areas, who have difficulty leaving their homes to buy food. The Committee also directed the Department to reexamine its regulations on "rolling stores" to determine if further verification is needed and if the regulations need further tightening. The Department has tightened its monitoring of "rolling store" through nonregulatory policy changes. We have decided to specify those changes in this rulemaking. (§ 278.1(h)). The Department will also conduct a nationwide study of the effect "rolling stores" have on program integrity.

The term "house-to-house trade route" includes milk routes, bread routes, and mobile markets or "rolling stores". All of these entities have the ability to move easily from place to place. As a result, they are hard to monitor. Therefore, the Department has applied the restriction specified in the Act to all firms which fit the definition of "house-to-house trade route."

Disqualification of retail food stores and wholesale food concerns, and imposition of civil money penalities in lieu of disqualifications. Section 175 of

Pub. L. 97–253 prescribes minimum disqualification periods for firms which violate the Food Stamp Act or the regulations. It mandates that firms be disqualified for 6 months to 5 years for the first sanction; for 12 months to 10 years for a second sanction; and permanently for a third sanction or one based on the purchase of coupons or trafficking in coupons or authorization to participate (ATP) cards. The regulations (§ 278.6(e)) list the new periods of disqualification and the criteria which will be used to determine which period of disqualification should be used. The sliding scale of disqualification is designed to more heavily punish serious violators who were previously advised by FNS that violations were occurring, firms whose practice is to violate, and firms which were previously sanctioned.

Traditionally, the length of the period of disqualification has been based, in part, on whether it was the firm's policy to violate. Because of the difficulty in defining, and confusion surrounding the concept of firm policy, the Department has replaced the "firm's policy" with the new term "firm's practice". This change is intended to render a firm liable for the violative actions of its employees regardless of whether a policy to violate is announced or advocated by firm management.

On September 3, 1982, the Department published in the **Federal Register** a proposed regulation which specified penalties for violations by wholesale food concerns. However, the proposed rule was developed prior to the 1982 Amendments and the penalties it specified conformed to the old set of penalities. The longer periods of disqualification mandated in the 1982 Amendments apply to wholesale food concerns as well as to retail food stores. Accordingly, the Department has changed the penalties that were originally proposed September 3, 1982, in order to bring them into line with the new penalties specified by the amended Act. All comments received on the proposed rule will be considered along with all comments received on this rule.

The new penalties will be applied to any violations which occur after the effective date of these regulations. Firms disqualified or assessed a civil money penalty under the old set of penalties are subject to the escalation provisions in the new penalties for any new sanction based on violations which occur after the effective date of these regulations. Sanctions in effect will not be changed.

The House Committee report specifies that a third sanction "Would result in permanent disqualification * * * regardless of whether earlier violations had resulted in civil money penalties or disqualification periods." Accordingly, the regulations specify that a civil money penalty may not be imposed in lieu of a permanent disqualification. The House Committee Report also notes that the Department is not precluded from disqualifying stores for repeated violations even though the store may meet the criteria for a civil money penalty. To assure an effective penalty and to prevent continued abuse when a firm is inclined to violate, the Department has reserved the right to disqualify a repeat violator and not offer such a firm a civil money penalty.

The regulations implement the maximum civil money penalty of $10,000 per violation as specified in Section 175 of Pub. L. 97–253. The Department has increased the penalty multiplier in the civil money penalty formula from 5 percent to 10 percent of the firm's monthly coupon redemptions. This change in the penalty multiplier will increase the fiscal burden of a civil money penalty and is being made as a result of concern that for many firms the 5 precent penalty on redemptions is a lesser financial penalty than disqualification. The Department believes a 10 percent penalty on redemptons would more nearly maintain comparability between the fine and disqualification.

Administrative review—retail food stores and wholesale food concerns. Currently, the Act and regulations provide that the sanction of disqualification shall be subject to administrative review. Current regulations automatically stay administrative action pending administrative review of that action. The Department believes that when the violations warrant a permanent disqualification, the firm should not be entitled to an automatic stay of the disqualification action during an administrative review of the disqualification action. As the administrative penalty for trafficking or for a third occasion of disqualification is specified in the Act, the penalty is not a matter of discretion. To protect the program from further abuse, the regulations specify that a permanent disqualification may not be automatically stayed. (§ 278.8(a)).

List of Subjects

7 CFR Part 271

Administrative practice and procedure, Food stamps, Grant programs-social programs.

7 CFR Part 278

Administative practice and procedure, Banks, Banking, Claims, Food stamps, Groceries-retail, Groceries, General line-wholesaler, Penalties.

7 CFR Part 279

Administrative practice and procedure, Food stamps, Groceries-retail, Groceries, General line-wholesaler.

For the reasons set out in the preamble, 7 CFR Parts 271, 278 and 279 are amended as follows:

PART 271—GENERAL INFORMATION AND REGULATIONS

1. In § 271.2, definitions of "Firm's practice", "House-to-house trade route", and "Trafficking" are added in alphabetical order, to read as follows:

§ 271.2 Definitions.

* * * * *

"Firm's practice" means the usual manner in which personnel of a firm or store accept food coupons as shown by the actions of the personnel at the time of the investigation.

* * * * *

"House-to-house trade route" means any retail food business operated from a truck, bus, pushcart, or other vehicle which can move easily from place to place.

* * * * *

"Trafficking" means the buying or selling of coupons or ATP cards for cash.

* * * * *

PART 278—PARTICIPATION OF RETAIL FOOD STORES, WHOLESALE FOOD CONCERNS AND INSURED FINANCIAL INSTITUTIONS

2. Section 278.1 is amended by redesignating paragraphs (h) through (n) as (i) through (o). A new paragraph (h) is added, and newly designated paragraph (k) is revised. The new and revised paragraphs read as follows:

§ 278.1 Approval of retail food stores and wholesale food concerns.

* * * * *

(h) *House-to-house trade routes.* FNS may limit the authorization of house-to-house trade routes to those trade routes whose services are needed by participating households in the area in order to obtain food. FNS shall, in consultation with the Department's Office of Inspector General, determine those locations where the operation of trade routes damages the program's integrity. In such areas, the FNS Officer in Charge, in deciding whether

households need a trade route's services, shall consider the volume of food business the trade route does and the availability of alternate sources of comparable food. An FNS official shall inspect any applicant trade route's vehicle to ensure that the trade route is a bonal fide retail food store before authorizing it to accept coupons. An FNS official may require, as a condition of continuing authorization, that the vehicle be reinspected semiannually thereafter to ensure that it continues to qualify to accept coupons.

* * * * *

(k) *Withdrawing authorization.* FNS shall withdraw the authorization of any firm authorized to participate in the program if it determines that the firm's continued participation will not further the purposes of the program, or the firm fails to meet the specifications of paragraph (b), (c), (d), or (e) of this section, or that the firm has been found to be circumventing a period of disqualification or a civil money penalty through a purported transfer of ownership. The FNS officer in charge shall issue a notice to the firm by certified mail or personal service to inform the firm of the determination and of the review procedure. FNS shall remove the firm from the program if the firm does not request review within the period specified in § 279.5.

* * * * *

3. In § 278.6, paragraph (f) is removed, paragraphs (g) through (k) are redesignated as (f) through (j) respectively, and paragraphs (a), (e), and newly designated paragraphs (f) and (g) are revised to read as follows:

§ 278.6 Disqualification of retail food stores and wholesale food concerns, and imposition of civil money penalties in lieu of disqualifications.

(a) *Authority to disqualify or subject to a civil money penalty.* FNS may disqualify any authorized retail food store or authorized wholesale food concern from further participation in the program if the firm fails to comply with the Food Stamp Act or this part. Disqualification shall be for 6 months to 5 years for the firm's first sanction; from 12 months to 10 years for a firm's second sanction; and disqualification shall be permanent for a firm's third sanction or a disqualification based on trafficking in coupons or ATP cards. Any firm which has been disqualified and which wishes to be reinstated at the end of the period of disqualification or at any later time shall file a new application under § 278.1 of this part so that FNS may determine whether reinstatement is appropriate. The application may be filed no earlier than 10 days before the end of the period of disqualification. Except in the case of a permanent disqualification, FNS may, in lieu of a disqualification, subject the firm to a civil money penalty of up to $10,000 for each violation if FNS determines that a disqualification would cause hardship to participating households.

* * * * *

(e) *Penalties.* FNS shall take action as follows against any firm determined to have violated the Act or regulations. For the purposes of assigning a period of disqualification, a warning letter shall not be considered to be a sanction. A civil money penalty and a disqualification shall be considered a sanction for such purposes. The FNS regional office shall:

(1) Disqualify the firm permanently if:

(i) Personnel of the firm have purchased coupons or trafficked in coupons or ATP cards; or

(ii) Violations such as, but not limited to, the sale of ineligible items occurred and the firm had twice before been sanctioned.

(2) Disqualify the firm for 5 years if it is to be the firm's first sanction, the firm had been previously advised of the possibility that violations were occurring and of the possible consequences of violating the regulations, and the evidence shows that:

(i) It is the firm's practice to sell expensive or conspicuous nonfood items, cartons of cigarettes, or alcoholic beverages in exchange for food coupons; or

(ii) The firm's coupon redemptions for a specified period of time exceed its food sales for the same period of time; or

(iii) A wholesale food concern's redemptions of coupons for a specified period of time exceed the redemptions of all the specified authorized retail food stores, nonprofit cooperative food-purchasing ventures, group living arrangements, drug addict and alcoholic treatment programs, and shelters for battered women and children which the wholesale food concern was authorized to serve during that time; or

(iv) A wholesale food concern's stated redemptions of coupons for a particular retail food store, nonprofit cooperative food-purchasing venture, group living arrangement, drug addict and alcoholic treatment program, or shelter for battered women and children exceeded the actual amount of coupons which that firm or organization redeemed through the wholesaler; or

(v) Personnel of the firm knowingly accepted coupons from an unauthorized firm or an individual known not to be legally entitled to possess coupons.

(3) Disqualify the firm for 3 years if it is to be the first sanction for the firm and the evidence shows that:

(i) It is the firm's practice to commit violations such as the sale of common nonfood items in amounts normally found in a shopping basket and the firm was previously advised of the possibility that violations were occurring and of the possible consequences of violating the regulations; or

(ii) Any of the situations described in paragraph (e)(2) of this section occurred and FNS has not previously advised the firm of the possibility that violations were occurring and of the possible consequences of violating the regulations; or

(iii) The firm is an authorized communal dining facility, drug addiction or alcoholic treatment and rehabilitation program, group living arrangement, meal delivery service, or shelter for battered women and children and it is the firm's practice to sell meals in exchange for food coupons to persons not eligible to purchase meals with food coupons and the firm had been previously advised of the possibility that violations were occurring and of the possible consequences of violating the regulations; or

(iv) A wholesale food concern accepted coupons from an authorized firm which it was not authorized to serve and the wholesale food concern had been previously advised of the possibility that violations were occurring and of the possible consequences of violating the regulations; or

(v) The firm is an authorized retail food store and personnel of the firm have engaged in food coupon transactions with other authorized retail stores, not including treatment programs, group living arrangements or shelters for battered women and children, and the firm had been previously advised of the possibility that violations were occurring and of the possible consequences of violating the regulations.

(4) Disqualify the firm for 1 year if it is to be the first sanction for the firm and the ownership or management personnel of the firm have committed violations such as the sale of common nonfood items in amounts normally found in a shopping basket, and FNS has not previously advised the firm of the possibility that violations were occurring and of the possible consequences of violating the regulations.

(5) Disqualify the firm for 6 months if it is to be the first sanction for the firm and the evidence shows that personnel of the firm have committed violations such as but not limited to the sale of common nonfood items due to carelessness or poor supervision by the firm's ownership or management.

(6) Double the appropriate period of disqualification prescribed in paragraphs (e) (2) through (5) of this section as warranted by the evidence of violations if the same firm has once before been assigned a sanction.

(7) Send the firm a warning letter if violations are too limited to warrant a disqualification.

(f) *Criteria for civil money penalty.* FNS may impose a civil money penalty as a sanction in lieu of disqualification only when the firm subject to a disqualification is selling a substantial variety of staple food items, and the firm's disqualification would cause hardship to food stamp households because there is no other authorized retail food store in the area selling as large a variety of staple food items at comparable prices. FNS may disqualify a store which meets the criteria for a civil money penalty if the store had previously been assigned a sanction. A civil money penalty may not be imposed in lieu of a permanent disqualification.

(g) *Amount of civil money penalty.* FNS shall determine the amount of the civil money penalty as follows:

(1) Determine the firm's average monthly redemptions of coupons for the 12-month period ending with the month immediately preceding that month during which the firm was charged with violations.

(2) Multiply the average monthly redemption figure by 10 percent.

(3) Multiply the product arrived at in paragraph (g)(2) of this section by the number of months for which the firm would have been disqualified under paragraph (e) of this section. In any event, the civil money penalty may not exceed $10,000 for each violation.

* * * * *

5. In § 278.8, paragraph (a) is revised to read as follows:

§ 278.8 Administrative review—retail food stores and wholesale food concerns.

(a) *Requesting review.* A food retailer or food wholesaler aggrieved by administrative action under § 278.1, § 278.6 or § 278.7 may, within the period stated in § 279.5, file a written request for review of the administrative action with the review officer. On receipt of the request for review, the questioned administrative action shall be stayed pending disposition of the request for review by the review officer except that a permanent disqualification will not be subject to an automatic stay. An administrative stay of a permanent disqualification may be available upon a showing by the appellant that there is a substantial likelihood that no disqualification is warranted. A disqualification for failing to pay a civil money penalty shall not be subject to an administrative review.

* * * * *

PART 279—ADMINISTRATIVE AND JUDICIAL REVIEW—FOOD RETAILERS AND FOOD WHOLESALERS

6. In § 279.6, paragraph (b) is revised to read as follows:

§ 279.6 Content of request for review.

* * * * * *

(b) *Supporting the request.* The request shall include information in support of the request showing the grounds on which review is being sought, or shall state that supporting information will be filed in writing at a later date. In the latter case, the review officer shall notify the firm of the date by which the information must be filed. The firm requesting review may ask for an opportunity to appear before the review officer in person. However, any information submitted in person shall, if directed by the review officer, be put in writing by the firm and filed with the review officer within a period which the review officer shall specify. Any request for a stay of a permanent disqualification must be submitted with the initial request for review and must include information in support of the request for a stay.

7. In § 279.7, paragraph (a) is revised to read as follows:

§ 279.7 Action upon receipt of a request for review.

(a) *Holding action.* Upon receipt of a request for review of administrative action, the review officer shall notify the appropriate FNS regional office, in writing, of the action under review and, except where a stay is not granted, shall direct that the administrative action shall be held in abeyance until the review officer has made a determination. The review officer may grant a stay of a permanent disqualification only upon a showing by the appellant that there is a substantial likelihood that no disqualification is warranted. The review officer shall, within 15 working days of the receipt of the request for a stay, inform the firm in writing of the review officer's determination as to whether or not to grant a stay. If the questioned administrative action involved a denial of an application to participate in the program or a denial of a claim, the review officer shall direct that the firm shall not be approved for participation or paid any part of the disputed claim until the review officer has made a determination. In any case, notice to the appropriate FNS regional office shall be accompanied by a copy of the request filed by the firm.

BILLING CODE 3410-30-M

Soil Conservation Service

7 CFR Part 610

Technical Assistance

AGENCY: Soil Conservation Service (SCS), USDA.

ACTION: Final rule amendment.

SUMMARY: This document makes editorial and nomenclature changes in 7 CFR 610.4 for the purpose of clarity and ease of understanding. These changes will have no effect on the public.

EFFECTIVE DATE: December 17, 1982.

FOR FURTHER INFORMATION CONTACT: Frances E. Robinson, Soil Conservation Service, USDA, P.O. Box 2890, Washington, D.C. 20013, (202) 447-9157.

SUPPLEMENTARY INFORMATION: This action has been determined to be exempt from the requirements of Executive Order 12291, as the action is an internal agency practice to clarify the rule. This action is administrative in nature, and publication for comment is unnecessary.

The unnumbered paragraph of § 610.4 contains paragraph designations (a), (b), (c), and (d) which are unnecessary and confusing. Also, there is a nomenclature change needed in paragraph (a)(5), as the Department of Health, Education, and Welfare is now the Department of Health and Human Services.

List of Subjects in 7 CFR Part 610

Technical assistance, Soil conservation, Water resources.

PART 610—TECHNICAL ASSISTANCE

§ 610.4 [Amended]

For reasons set out in the preamble, § 610.4 of 7 CFR is amended as follows:

1. By removing the paragraph designations (a), (b), (c), and (d) in the introductory paragraph.

2. By changing the words "Health, Education, and Welfare" to "Health and Human Services" in paragraph (a)(5).

Dated: December 9, 1982.

Peter C. Myers,

Chief, Soil Conservation Service.

BILLING CODE 3410-16-M

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 390; Lemon Reg. 389, Amdt. 1]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes the quantity of California-Arizona lemons that may be shipped to the fresh market during the period December 19–25, 1982, and increases the quantity of lemons that may be shipped during the period December 12–18, 1982. Such action is needed to provide for orderly marketing of fresh lemons for the periods specified due to the marketing situation confronting the lemon industry.

EFFECTIVE DATES: The regulation becomes effective December 19, 1982 and the amendment is effective for the period December 12–18, 1982.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona lemon crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1981–82. The marketing policy was recommended by the committee following discussion at a public meeting on July 6, 1982. The committee met again publicly on December 14, 1982, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified weeks. The committee reports the demand for lemons is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of lemons. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective times.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

PART 910—[AMENDED]

1. Section 910.690 is added as follows:

§ 910.690 Lemon Regulation 390.

The quantity of lemons grown in California and Arizona which may be handled during the period December 19, 1982, through December 25, 1982, is established at 240,000 cartons.

2. Section 910.689 Lemon Regulation 389 (47 FR 55469) is revised to read as follows:

§ 910.689 Lemon Regulation 389.

The quantity of lemons grown in California and Arizona which may be handled during the period December 12, 1982, through December 18, 1982, is established at 270,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 15, 1982.

D. S. Kuryloski,

Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

Agricultural Stabilization and Conservation Service

7 CFR Part 725

[Amdt. 4]

Tobacco Acreage Allotment and Marketing Quota Regulations

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Interim rule.

SUMMARY: This interim rule amends the regulations at 7 CFR Part 725 to implement the provisions of the No Net Cost Tobacco Program Act of 1982 (Pub. L. 97–218, 96 Stat. 197, approved July 20, 1982) with respect to the flue-cured tobacco acreage allotment and marketing quota program. The rule provides for the sale of flue-cured tobacco allotments and quotas, generally places restrictions on lease and transfer of allotments and quotas, and provides for adjustment of farm yields and acreage allotments. In addition, this rule provides for restrictions with respect to the marketing of tobacco by producers, warehousemen and dealers. The rule provides for forfeiture of flue-cured tobacco allotments and quotas under certain conditions. A Notice of Proposed Rulemaking will be published in the **Federal Register** requesting comments with respect to the forfeiture of flue-cured tobacco acreage allotments and marketing quotas by persons other than individuals.

DATES: Effective December 13, 1982. Comments must be received before February 15, 1983 in order to be assured of consideration.

ADDRESS: Send comments to the Director, Tobacco and Peanuts Division, ASCS, Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. All written submissions made pursuant to this notice will be made available for public inspection in Room 5750 South Building, USDA, between the hours of 8:15 a.m. and 4:45 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Jack S. Forlines, Agricultural Program Specialist, Tobacco and Peanuts Division, USDA–ASCS, P.O. Box 2415, Washington, D.C. 20013; (202) 382–0200. The Final Regulatory Impact Analysis

covering this rule will be available on request from Jack S. Forlines.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum 1512–1 and has been classified as "not major." It has been determined that this rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State of local governments, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program to which this rule applies are: Commodity Loan and Purchases; 10.051, as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this rule since the Agricultural Stabilization and Conservation Service (ASCS) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

This interim rule is necessary to implement the provisions of the No Net Cost Tobacco Program Act of 1982 (hereinafter referred to as the "Act"). The 1982–83 marketing year for flue-cured tobacco began on July 1, 1982. Since producers, warehousemen, tobacco dealers and buying companies need to be informed of the provisions of this rule as soon as possible, it has been determined that this interim rule shall become effective upon the date of filing with the Director, Office of the Federal Register without prior opportunity for public comment. However, the public is invited to comment on this interim rule for a period of 60 days after the date of publication in the Federal Register. A final document discussing comments received and any amendments to this interim rule which may be deemed necessary will be published in the Federal Register as soon as possible.

The Act amends the Agricultural Act of 1949 and the Agricultural Adjustment Act of 1938 to provide for the operation of the tobacco price support and production adjustment program in such a manner as to result in "no net cost" to taxpayers, except for administrative expenses. The Act makes other changes to strengthen the operation of the program. The major provisions of this interim rule are as follows:

(1) *Leasing of flue-cured tobacco allotments and quotas.* Unlike prior tobacco programs, this interim rule provides for the elimination of fall leasing, except in the case of natural disasters. Fall leasing of flue-cured allotments and quotas has been the subject of much criticism as the result of the opportunity for speculation and the increase in the cost of leasing allotments and quotas when middlemen are involved in leasing transactions. The involvement of middlemen in spring leasing is also addressed by requiring that any agreement for the leasing of a flue-cured tobacco allotment and quota must be exclusively between the lessor and lessee or an agent who regularly represents the lessor or the lessee in business transactions unrelated to tobacco. The lessor and the lessee of a flue-cured tobacco allotment and quota must certify compliance with all leasing requirements which are specified in this interim rule. If, after a notice and an opportunity for a hearing, it is determined that a lessee or lessor knowingly made a false statement, the lessee will be ineligible for price support or the lessor's allotment and quota will be reduced, as applicable. The total flue-cured tobacco allotment for any farm is limited, after transfer of allotment by either lease or sale, to 50 percent of the tillable cropland on the farm. Subleasing of allotments and quotas is prohibited.

(2) *Sale of tobacco allotments and quotas.* The sale of flue-cured tobacco allotments and quotas is permitted but such sales may only be made to persons who are or will become active tobacco producers within the same county. At the time a transfer agreement is filed with the county ASCS office to transfer allotment and quota by sale, the agreement must specify the farm to which the allotment and quota shall be assigned. This procedure is designed to prevent "hip-pocket" allotments and quotas (i.e., allotments and quotas assigned to persons rather than to farms). It is the responsibility of a purchaser of an allotment and quota who is not the owner of the farm to which the allotment and quota is assigned to take whatever measures are deemed to be necessary to protect the investment in such purchase should the producer fail to remain an active producer on the farm to which the assignment has been made. An allotment and quota which is purchased may not be sold for a period of 5 years, except as may be required to prevent forfeiture. In addition, the owner of the farm to which allotment and quota is assigned is the only person who is authorized to sell such allotment and quota.

(3) *Forfeiture of tobacco allotments and quotas.* Any person owning a farm having a flue-cured tobacco allotment that exceeds 50 percent of the tillable cropland on the person's farm must sell or forfeit the excess allotment. Tillable cropland is land which has been cleared and is capable of cultivation without unusual preparation. Tillable cropland does not include orchards, vineyards and land which has been devoted to trees. A person currently having an allotment that exceeds 50 percent of the farm's tillable cropland may prevent forfeiture by: (a) The acquisition of additional tillable cropland; (b) the sale of excess allotment; or (c) the conversion of nontillable land to tillable cropland status.

Section 201 of the Act amends section 316 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1314b) to provide that if a person purchases a flue-cured tobacco acreage allotment and disposes of an acreage of tillable cropland which results in the total acreage of flue-cured tobacco allotted to such person's farm exceeding 50 percent of the tillable cropland owned by such person, such person will take steps to assure that the total acreage of flue-cured tobacco allotted to such farm does not exceed 50 percent of the tillable cropland owned by such person. Failure of the person to take such action will result in forfeiture of such excess allotment and quota. In addition, if any person owns a farm on or after December 1, 1983, for which the total acreage allotted for the production of flue-cured tobacco exceeds 50 percent of such farm's tillable cropland, such person shall forfeit any acreage allotment representing the excess.

As used in section 201 of the Act, the phrase "owned by such person" indicates that ownership of land is a significant factor in determining allotment which must be forfeited under certain conditions. Accordingly, this interim rule provides that the phrase "owns a farm" means the ownership of: (a) A farm as constituted in accordance with the provisions of 7 CFR Part 719 if the entire farm shares a common ownership; or (b) a tract of land within a farm as constituted in accordance with the provisions of 7 CFR Part 719 if the farm, as constituted, consists of separate ownership tracts.

Thus, when determining the amount of allotment subject to forfeiture because of inadequate tillable cropland, the county ASC committee will consider each ownership tract as though it were a separate farm in those cases where a

farm consists of tracts of land under separate ownership.

Once a flue-cured allotment and quota is purchased, the purchaser must share, for a period of five years, in the risk of production of tobacco produced under the allotment and quota or the allotment and quota shall be sold or forfeited.

(4) *Forfeiture pools.* In each county, a forfeiture pool will be established for forfeited allotments and quotas. Allotments and quotas will be reallocated by the county committee to eligible persons taking into consideration such factors as the size of the current allotment on the farm, the length of time the applicant has been farming tobacco, and the extent to which the applicant has leased allotment and quota. Forfeited allotments and quotas may be reallocated to farms which currently do not have a tobacco allotment and quota.

(5) *Forfeiture of reallocated allotment and quota.* If an applicant fails to share in the risk of production of tobacco during any of the five years beginning with the crop year in which the allotment and quota is reallocated, the allotment and quota shall be forfeited. Mere failure to utilize the allotment and quota will not result in forfeiture but will extend the five-year period one year for each year the allotment and quota is not utilized.

(6) *Periodic adjustment of flue-cured tobacco yields.* In 1983 and at 5-year intervals thereafter, the Secretary of Agriculture shall adjust: (a) The national average yield goal for flue-cured tobacco to the past 5 years' moving national average yield; and (b) the farm acreage allotments and preliminary farm yields for flue-cured tobacco farms to reflect the past 5 years' moving county average yield in order that the expected production from the allotted acres will more accurately reflect the production capability.

Due to advances in agricultural research and technology, producers of flue-cured tobacco are able to obtain larger yields on an acre of tobacco. Therefore, maintaining a constant allotment may result in the production of a quantity of tobacco that exceeds the marketing quota. This provision updates the acreage-poundage ratio with respect to current yields.

(7) *Limitation on the sale of tobacco floor sweepings.* Effective for the 1982 and subsequent crops of flue-cured tobacco, the allowable floor sweepings of flue-cured tobacco which may be marketed without penalty by warehousemen has been reduced to 0.24 percent times the total first sales of tobacco at auction for the season for the warehouse involved. Previously the allowance of flue-cured tobacco was 0.5 percent. Marketing floor sweepings in excess of the allowable amount will result in a penalty of 150 percent of the average market price for flue-cured tobacco for the immediately preceding marketing year.

(8) *Lien for payment of penalty.* This provision authorizing a lien on tobacco sets forth a more efficient mechanism for collecting marketing penalties. If a marketing quota penalty is assessed, there shall be a lien in favor of the United States on the tobacco with respect to which the penalty is to be assessed and on any other tobacco subject to marketing quotas in which the person has an interest until the penalty is paid. Currently, penalties which are reduced to a claim in favor of the United States are deductible only from the proceeds of tobacco which is pledged as collateral for a price support loan.

(9) *False identification of tobacco.* The regulations which are currently applicable for flue-cured tobacco provide for the correction of farm production records when actual marketings are determined to be incorrect because of false identification. In many cases, this actually results in an increase in quota for the producer who falsely identifies tobacco.

This interim rule provides that if a producer falsely identifies tobacco, the quantity of tobacco falsely identified shall be considered for purposes of establishing future farm marketing quotas as having been produced both on the farm for which it was identified as having been produced and on the farm of actual production.

(10) *Warehouseman's records and reports.* This interim rule provides for minor changes in the flue-cured tobacco regulations with respect to the records and reports of warehousemen. The most significant change is the requirement that a notation of "No Price Support" must be entered by the warehouseman on the basket ticket for each lot of tobacco which is identified with a marketing card bearing the same notation.

(11) *Dealer's records and reports.* This interim rule also provides for minor changes in the flue-cured regulations with respect to the records and reports of dealers. The dealer shall make deductions for producer contributions to the No Net Cost Tobacco Fund as provided in 7 CFR Part 1464. For the 1982–83 marketing year, the dealer shall deduct three cents per pound from the price paid to the producer in nonauction purchases, unless the purchase is identified with a marketing card bearing the notation "No Price Support." The amount of such deductions in subsequent marketing years will be announced by the Secretary.

(12) *Limitation on the size of new farm allotments.* The regulations for flue-cured tobacco currently provide that a new farm allotment shall not exceed 50 percent of the average of the acreage allotments established for similar farms in the community. In many cases, this provision would permit flue-cured tobacco acreage allotments to be established for new farms that would be unreasonably high when compared to the average county or national acreage allotment. This interim rule provides that the maximum flue-cured acreage allotment which may be established for any new farm shall be limited to one acre.

(13) *Penalties for marketing certain tobacco that is ineligible for price support.* Effective for any of the 1983 and subsequent crops of flue-cured tobacco for which marketing quotas are in effect, producers shall be subject to a penalty with respect to any marketings of flue-cured tobacco produced on a farm which is ineligible for price support because the farm operator or other producer on the farm has not agreed to contribute to the No Net Cost Tobacco Fund. The penalty per pound will be equal to 75 percent of the preceding marketing year's average market price per pound for flue-cured tobacco.

(14) *Contributions to the No Net Cost Tobacco Fund by the lessor.* Effective with respect to the 1983 and subsequent crops of flue-cured tobacco, a farm owner must, as a condition of eligibility to lease and transfer marketing quota from the farm, contribute to the No Net Cost Tobacco Fund for each pound of quota leased. The lessor's contribution per pound will be equal to that of other producers who qualify for price support with respect to flue-cured tobacco produced.

(15) *Processing and storing 1982 crop carryover tobacco.* Section 201 of the Act amended section 316(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1314b(a)) to eliminate fall leasing (i.e., leasing during the marketing season) for flue-cured tobacco. Prior to enactment of section 201, producers had planted their crops with the expectation of being able to lease quota to their farm if the production exceeded 110 percent of the effective farm marketing quota. In the absence of a carryover program, many producers would be required to store the excess tobacco on their farms until the next marketing season.

This interim rule authorizes Flue-Cured Tobacco Cooperative Stabilization Corporation to process and store 1982 crop producer carryover

tobacco and to act as the producer's marketing agent in marketing the tobacco in the 1983–84 marketing year. The handling of 1982 crop carryover tobacco is limited to the producer-owned and operated Flue-Cured Tobacco Cooperative Stabilization Corporation to assure that the tobacco will be insulated from commercial trade channels and will not be marketed until the subsequent marketing year.

(16) *Approval of transfers of allotment and quota by lease or sale.* This interim rule provides that if a claim for marketing quota penalty has been filed by ASCS against a lessor or seller, a lease or sale of allotment and quota by such lessor or seller will not be approved by the county committee until such time as the claim is satisfied or the proceeds from the lease or sale are applied against such claim.

Acreage allotment, Marketing quota, Penalties, Report requirements, Tobacco.

Interim Rule

PART 725—[AMENDED]

Accordingly, 7 CFR Part 725 is amended as follows:

1. The table of contents is amended by revising or adding the following entries:

* * * * *

725.72 Transfer of tobacco marketing quotas by lease or by sale.

* * * * *

725.74 Forfeiture of allotment and quota.

* * * * *

725.85 Identification of tobacco subject to quota.

725.86 Lien for penalty.

* * * * *

725.109 Duties of Kansas City ASCS Field Office.

* * * * *

725.110 [Reserved]

2. The authority citation is revised to read:

Authority: Sec. 301, 313, 314, 316, 316A, 317, 363, 372–375, 377, 378, 52 Stat. 38, as amended, 47, as amended, 48, as amended, 75 Stat. 469, as amended, 96 Stat. 205, 79 Stat. 66, as amended, 52 Stat. 63, as amended, 65–66, as amended, 70 Stat. 206, as amended, 72 Stat. 995, as amended, 7 U.S.C. 1301, 1313, 1314, 1314b, 1314b–1, 1314c, 1363, 1372–75, 1377, 1378, Sec. 401, 63 Stat. 1054, as amended, 7 U.S.C. 1421.

3. In § 725.51, the introductory paragraph is revised; paragraphs (a–1), (a–2), (jj–1), and (ll–1) are added; and paragraphs (e–1), (h), (m), (p), (s), and (dd) are revised to read as follows:

§ 725.51 Definitions.

In determining the meaning of the provisions of this subpart, unless the context indicates otherwise, words importing the singular include and apply to several persons or things, words importing the plural include the singular, words importing the masculine gender include the feminine as well, and words used in the present tense include the future as well as the present. As used in this subpart and in all instructions, forms, and documents in connection therewith, the words and phrases defined in this section shall have the meanings herein assigned to them unless the context or subject matter otherwise requires. References contained herein to other parts of this title or chapter shall include current and later amendments to the referenced parts. Unless defined in this section the words or phrases defined in § 719.2 of this chapter shall have the same meaning when used in this part.

* * * * *

(a–1) *Active flue-cured tobacco producer.* (1) Any person who shared in the risk of producing a crop of flue-cured tobacco in at least one of the three years preceding the current year, or

(2) Any person who intends to become a flue-cured tobacco producer in the current year by sharing in the risk of producing the crop and who provides a certification of such intention on a form approved by the Deputy Administrator.

(a–2) *Allowable floor sweepings.* The quantity of floor sweepings determined by multiplying 0.0024 times the total producer first sales of flue-cured tobacco at auction for the season for the warehouse involved.

* * * * *

(e–1) *Considered planted credit.* Credit assigned in the current year for an old farm as follows:

* * * * *

(h) *Director.* The Director, or Acting Director, Tobacco and Peanuts Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture.

* * * * *

(m) *Farm acreage allotment.* The allotment determined in accordance with § 725.58.

* * * * *

(p) *Floor sweepings.* The scraps or leaves of tobacco which accumulate on the warehouse floor in the regular course of business.

* * * * *

(s) *Leaf account tobacco.* The quantity of tobacco purchased or otherwise acquired by or for the account of a warehouse (except floor sweepings which accumulate on the warehouse floor), as adjusted by the debits and credits to the buyers corrections account, and including floor sweepings purchased from another warehouse or dealer.

* * * * *

(dd) *Preliminary farm acreage allotment.* The allotment determined in accordance with § 725.58.

* * * * *

(jj–1) *Shared in risk of production.* Involvement in the production of flue-cured tobacco by a person who meets all of the conditions as set forth in either paragraph (jj–1) (1) or (2) of this section:

(1) *Investing producer.* A person who:

(i) Invests in the production of a crop of flue-cured tobacco in an amount which is not less than 20 percent of the proceeds of the sale of the crop;

(ii) Depends solely on a share of the proceeds from the marketing of the tobacco for the return on the investment;

(iii) Waits until such crop of flue-cured tobacco is marketed to receive any return on the investment; and

(iv) Maintains records, for a period of three years after the end of the marketing year in which the tobacco is sold, which may be used to verify that the provisions of paragraph (jj–1)(1) of this section have been met.

(2) *Lessor.* A person who:

(i) Owns a farm having a flue-cured tobacco allotment and quota;

(ii) Leases such allotment and quota to another person for use in producing a crop of flue-cured tobacco (the tobacco may be produced on the lessor's farm or on a farm operated by the lessee);

(iii) Depends solely on a specified share of the proceeds from the marketing of such crop of flue-cured tobacco (the tobacco which is produced using the leased allotment and quota) for payment of the rental for such allotment and quota;

(iv) Waits until such crop of flue-cured tobacco is marketed to receive any payment of the rental for such allotment and quota; and

(v) Maintains records, for a period of three years after the end of the marketing year in which the tobacco is sold, which may be used to verify that the provisions of paragraph (jj–1)(2) of this section have been met.

* * * * *

(ll–1) *Tillable cropland.* Cropland (excluding orchards, vineyards, land devoted to trees, and land being prepared for non-agricultural uses) which the county committee determines can be planted to crops without unusual preparation or cultivation.

* * * * *

4. Section 725.56 is revised to read as follows:

§ 725.56 Determination of preliminary farm acreage allotments.

(a) *Farms requiring a determination.* A preliminary farm acreage allotment shall be determined for the current year for each farm which has tobacco history acreage for the base period as determined in accordance with the provisions of § 725.73.

(b) *Preliminary farm acreage allotment.* The preliminary farm acreage allotment shall be the same as the farm acreage allotment established for the preceding year: *Provided,* That in 1983 and at five-year intervals thereafter, the preliminary farm acreage allotment shall be the farm acreage allotment for the preceding year divided by a factor determined by averaging the yields for the county, as determined by the Deputy Administrator, Program Planning and Development, for the most recent five-year period and dividing the result by the average of the yields for the county as determined by the Deputy Administrator, Program Planning and Development, for the five years 1959 through 1963. If the computed factor is outside the range of 1.0000 to 1.3500, the factor shall be increased to 1.0000 or decreased to 1.3500, as applicable: *Provided further,* That in the fifth year of any five-year period beginning with 1983 the factor shall be divided by the factor which resulted from the computation made in accordance with the first proviso of this paragraph for the previous five-year period.

5. In § 725.57, paragraph (a) is revised to read as follows:

§ 725.57 Determination of preliminary farm yields.

(a) *Old farms.* The preliminary farm yield for an old farm for the current year shall be determined as follows:

(1) *Farm having preliminary farm acreage allotment.* The preliminary farm yield established for the farm shall be the same preliminary farm yield as was in effect for the preceding year. However, for 1983 and at five-year intervals thereafter, the preliminary farm yield shall be the yield determined by multiplying the preliminary farm yield for the farm for the preceding year by the factor which is used in determining preliminary farm acreage allotments, as provided for in § 725.56.

(2) *Farm not having preliminary farm acreage allotment.* The preliminary farm yield shall be determined by dividing the farm yield which is determined in accordance with the provisions of § 725.59 by the national yield factor for the current year.

* * * * *

6. Section 725.58 is revised to read as follows:

§ 725.58 Determination of farm acreage allotments and effective farm acreage allotments.

(a) *Farm acreage allotments.* The farm acreage allotment shall be determined by multiplying the national acreage factor as determined by the Secretary for the current year by the preliminary farm acreage allotment for the current year and adjusting the result as follows:

(1) *Upward adjustment.* Add the:

(i) Acreage approved in accordance with the provisions of § 725.66 in order to adjust for an inequity or to correct an error;

(ii) Acreage determined by dividing the pounds of quota which are purchased in the current year by the farm yield; and

(iii) Acreage determined by dividing the pounds of forfeited quota which are approved for adjustment from the forfeiture pool by the farm yield.

(2) *Downward adjustment.* Subtract the:

(i) Acreage determined by dividing the pounds of quota sold in the current year by the farm yield; and

(ii) Acreage of forfeited allotment.

(b) *Effective farm acreage allotment.* The effective farm acreage allotment for the current year shall be determined by dividing the effective farm marketing quota by the farm yield.

7. In § 725.59, paragraph (a) is revised to read as follows:

§ 725.59 Determination of farm yields.

(a) *Old farms.* The farm yield for an old farm shall be:

(1) *Farm with preliminary farm yield.* Determined by multiplying the preliminary farm yield by the national yield factor for the current year.

(2) *Farm without preliminary farm yield.* Determined in the same manner as the farm yield for a new farm as provided in paragraph (b) of this section.

* * * * *

8. Section 725.60 is revised to read as follows:

§ 725.60 Determination of effective farm marketing quotas.

The effective farm marketing quota shall be the farm marketing quota adjusted as follows:

(a) *Upward adjustment.* Add:

(1) The smaller of (i) the undermarketings from the preceding marketing year, or (ii) farm marketing quota for the preceding year plus the pounds of quota which are transferred to the farm by lease in the preceding year; and

(2) The pounds of quota which are transferred to the farm by lease in the current year.

(b) *Downward adjustment.* Subtract:

(1) The pounds of quota which are overmarketed from the preceding marketing year;

(2) The pounds of quota which are overmarketed from any year before the preceding year which have not been subtracted when determining the effective farm marketing quota in a prior year;

(3) The pounds of quota which are transferred from the farm by lease in the current year; and

(4) The pounds of quota which are reduced in the current year as a result of a violation in a prior year as provided for in § 725.98.

9. In § 725.63 paragraph (b) is revised to read as follows:

§ 725.63 Determination of allotments and yields for divided farms.

* * * * *

(b) *Preliminary farm yields.* The preliminary farm yields for the tracts resulting from a division of a parent farm shall be the same as the preliminary farm yield established for the parent farm: *Provided,* That if the contribution method of division is used and a preliminary farm yield was established for a tract before the tract become a part of the parent farm, the preliminary farm yield shall be the preliminary farm yield established for the tract, as adjusted by the factor(s) applied to the preliminary farm yield of the parent farm, which is determined in accordance with the provisions of § 725.57, after the tract became a part of the parent farm.

* * * * *

10. In § 725.69, the introductory paragraph and paragraph (c)(3) are revised and paragraph (b)(6) is added to read as follows:

§ 725.69 Determination of acreage allotments for new farms.

The acreage allotment for a new farm shall be that acreage which the county committee, with approval of the State committee, determines is fair and reasonable for the farm, taking into consideration the past tobacco experience of the farm operator; the land, labor, and equipment available for the production of tobacco; crop rotation practices; and the soil and other physical factors affecting the production of tobacco: *Provided,* That the acreage allotment so determined shall not exceed the smaller of one acre or 50

percent of the average of the acreage allotments established for not less than two nor more than five old farms which are similar with respect to land, labor, and equipment available for the production of tobacco, crop rotation practices, and the soil and other physical factors affecting the production of tobacco.

* * * * *

(b) * * *

(6) *Operator has not sold or forfeited allotment.* During the current or the four preceding years the operator has not sold or forfeited any flue-cured tobacco allotment from any farm.

(c) * * *

(3) *Farm includes land formerly having tobacco allotment.* A farm shall not be eligible for a new farm tobacco allotment if, during the current year or the four preceding years: (i) The farm had a tobacco allotment and the owner sold all of the allotment, or (ii) some of the land which comprises the farm was part of an old farm prior to a reconstitution and the owner of the old farm retained no tobacco allotment for such land when the tobacco allotment for the old farm was reconstituted by the designation method of division.

* * * * *

11. Section 725.72 is revised to read as follows:

§ 725.72 Transfer of tobacco marketing quotas by lease or by sale.

(a) *General.* Effective with respect to the 1982 crop year for a lease and to the 1983 crop year for a sale, a flue-cured tobacco marketing quota (including quota which has been pooled in accordance with the provisions of part 719 of this chapter) may be transferred between farms within a county by sale or by lease. A flue-cured marketing quota also may be transferred by lease to a farm in an adjoining county within the same State when the State committee authorizes the county committee to approve the transfer of quota after June 15 if the lessor has suffered a loss of flue-cured tobacco as a result of a flood, hail, wind, tornado, or other natural disaster.

(b) *Sale.* If the transfer is by sale, the transfer shall be based on part or all of the farm poundage quota. The maximum quota that may be transferred is the farm poundage quota.

(c) *Lease.* If the transfer is by lease, the transfer shall be based on a portion or all of the effective farm poundage quota. The maximum quota that may be transferred is the effective farm poundage quota.

(d) *Transfer provisions.* (1) *Accumulation of quota.* A transfer shall not be approved if the county committee determines that the primary purpose of the transfer is to accumulate the quota on the farm (i.e., alternately leasing to and from the farm for two or more years to maintain the quota without satisfactory evidence of plans for producing the quota on the receiving farm).

(2) *Subleasing.* In order to determine whether there is any subleasing of an allotment and quota, the current year is divided into two periods, the period up to and including June 15 and the period after June 15. The county committee shall not appprove a transfer during either period if the effect would be both a transfer to and from the farm during the same period: *Provided,* That a transfer may be approved within any such period if an allotment and quota is transferred from a farm for one or more years and the farm subsequently is combined with another farm that otherwise is eligible to receive allotment and quota by lease.

(3) *Lessor farm.* A transfer of quota from a farm by lease shall not be approved:

(i) *Purchased and/or reallocated quota.* If the pounds of quota being transferred exceed the difference obtained by subtracting from the effective farm marketing quota the total pounds of quota purchased and/or reallocated from forfeited quota in the current and two preceding years, as adjusted to reflect both changes in county farm yields as provided in § 725.56 and changes in national acreage factors which have occurred since each respective purchase and/or reallocation of quota: *Provided,* That this provision shall not apply to a transfer which is filed after June 15 under the natural disaster provisions of this section.

(ii) *New farm.* If the farm is a new farm.

(iii) *Reduction pending.* If consideration of an indicated violation is pending which may result in an allotment and quota reduction for the farm for the current year. However, if the county committee determines that a decision will not be made on the pending case on or before April 1, a 1-year transfer may be approved.

(iv) *Filed after June 15.* If the transfer agreement is filed after June 15 unless the county committee in the county in which the farm is located for administrative purposes is authorized to permit leasing after June 15 in accordance with the natural disaster provisions of this section and the county committee determines that the:

(a) Farm has suffered a loss of 10 percent or more of the expected production from the acreage of flue-cured tobacco planted for harvest in the current year.

(b) Producer made reasonable and customary efforts to produce the effective farm marketing quota.

(c) Producers on the farm qualify for price support in accordance with the provisions of Part 1464 of this title.

(v) *Consent of lienholder.* For a multiple year lease if the farm is subject to a lien, unless the lienholder agrees in writing to the transfer.

(vi) *No Net Cost Tobacco Fund contribution.* Unless the contribution required by § 1464.10 of this title is made to the No Net Cost Tobacco Fund, in accordance with instructions issued by the Deputy Administrator.

(vii) *Claim for tobacco marketing quota penalty.* If a claim has been filed against the lessor for a tobacco marketing quota penalty and the claim remains unpaid: *Provided,* That this provision shall not apply if the claim is paid or the entire proceeds of the lease of the allotment and quota are applied against the claim and the county committee determines that the amount paid for the lease represents a reasonable price for the pounds of quota being leased.

(viii) *Forfeiture pending.* To the extent that forfeiture of such allotment and quota is expected to become final before April 15.

(4) *Lessee farm.* A transfer of quota to a farm by lease shall not be approved:

(i) *Tillable cropland limitation.* If the pounds of quota being transferred plus the pounds of quota previously transferred to the farm by lease exceed the difference between the farm marketing quota and one-half the result obtained by multiplying the acres of tillable cropland by the farm yield: *Provided,* That this provision shall not be applicable to a transfer of quota which is filed after June 15 in accordance with the natural disaster provisions of this section.

(ii) *Current allotment.* Unless the farm has a current flue-cured tobacco farm acreage allotment (i.e., old farm or new farm allotment). The effective quota on the farm may be zero pounds before the transfer of quota to the farm.

(iii) *Filed after June 15.* If the transfer agreement is filed after June 15:

(a) Unless the producers on the farm qualify for price support under the provisions of Part 1464 of this title; and

(b) The pounds of quota to be transferred to the lessee farm exceed the difference obtained by subtracting the effective farm marketing quota (before the filing of the transfer agreement) for the lessee farm from the total pounds of tobacco marketed and/or available for

marketing (based on estimated pounds of tobacco on hand and/or in the process of being produced) from the farm in the current year.

(5) *Selling farm.* A transfer of quota from a farm by sale shall not be approved:

(i) *Previous purchases and/or reallocated quota.* If the farm marketing quota includes quota that was bought, and/or reallocated from quota which has been forfeited and the purchase and/or reallocation became effective during the current year or in the four preceding years: *Provided,* That this provision shall not be applicable if the quota being sold was purchased in such period, if forfeiture of such quota may be required by § 725.74, and if the pounds of quota being transferred do not exceed the pounds of quota for which forfeiture otherwise is required in accordance with the provisions of § 725.74 (c) and (d).

(ii) *Reduction pending.* If consideration of an indicated violation is pending which may result in an allotment and quota reduction for the farm for the current year. However, if the county committee determines that a decision will not be made on the pending case on or before April 1, a transfer may be approved.

(iii) *Forfeiture pending.* If the agreement for transfer by sale is filed subsequent to the final date which is permitted for the sale of the allotment and quota in order to prevent forfeiture.

(iv) *Consent of lienholder.* If the farm is subject to a lien unless the lienholder agrees in writing to the transfer: *Provided,* That consent of a lienholder is not required for a transfer of the pounds of quota for which forfeiture otherwise is required in accordance with the provisions of § 725.74 (c) and (d).

(v) *Claim for tobacco marketing quota penalty.* If a claim has been filed against the seller for a tobacco marketing quota penalty and the claim remains unpaid: *Provided,* That this provision shall not be applicable if the claim for such penalty is paid or the entire proceeds of the sale of the allotment and quota are applied against the claim and the county committee determines that the amount paid represents a reasonable selling price for the pounds of quota being sold.

(6) *Buying farm.* A transfer of quota to a farm by purchase shall not be approved:

(i) *Active producer.* Unless the buyer is an active flue-cured tobacco producer.

(ii) *Tillable cropland limitation.* If the sum of the pounds of quota being transferred, plus the pounds of quota previously transferred to the farm in the current year by lease, exceeds the difference between the farm marketing quota and one-half the result obtained by multiplying the acres of tillable cropland by the farm yield.

(iii) *Quota previously sold.* If the farm owner sold quota from the farm during the current or any of the four preceding years or two years if such sale was to prevent a forfeiture of the quota.

(e) *Transfer agreement.* In order for a transfer of allotment and quota by lease or sale to be approved in the current year the transfer must be:

(1) *Form.* Recorded on Form ASCS–375.

(2) *Signatures.* Agreed upon and signed by:

(i) *Lease.* The owner of the transferring farm and the owner or operator of the receiving farm.

(ii) *Sale.* The owner of the selling farm and an active flue-cured tobacco producer who is the buyer. If the buyer is neither owner or operator of the farm to which the allotment and quota will be assigned, the owner or operator of the farm must give written consent for the allotment and quota to be assigned to the farm.

(3) *Where to file.* Filed in the county ASCS office which serves the county in which the transferring farm is located for administrative purposes.

(4) *When to file.* Filed on or before:

(i) *Lease.* April 15: *Provided,* That a transfer agreement filed on or before June 15 may be considered to have been filed on April 15 if the county committee, with concurrence of the State committee, determines that on or before April 15 the lessee and lessor agreed to transfer the quota but the transfer agreement was not filed timely as the result of conditions beyond the control of either the lessee or lessor: *Provided further,* That a transfer may be approved if the transfer agreement is filed on or before November 15 in accordance with the natural disaster provisions of this section.

(ii) *Sale.* June 15.

(f) *Period of lease.* A transfer by lease may be for a period of one to five years: *Provided,* That the lease shall be limited to one year if the transfer agreement is filed after June 15 in accordance with the natural disaster provisions of this section.

(g) *Compliance statement for lease.* Only the lessor and lessee (or the lessor or lessee and any attorney, trustee, bank, or other agent or representative, who regularly represents either the lessor or lessee in business transactions unrelated to the production or marketing of tobacco) may be parties to, or involved in the arrangements for, a transfer of flue-cured tobacco allotment and quota. In order for a transfer of allotment and quota by lease to be valid, both the lessor and the lessee shall file a statement, on a form approved by the Deputy Administrator, in the county ASCS office of the county in which the lease is filed certifying that the lease is in compliance with the provisions in this section. If, after the lease agreement is approved, information is brought to the attention of the county committee which indicates that either the lessor or the lessee, or both, knowingly filed a false certification, the county committee shall schedule a hearing and notify such person of the time and place of the hearing, and afford such person an opportunity to be present and present evidence at the hearing with respect to the allegation of a false certification. If, as a result of the evidence presented, the county committee determines that such person knowingly made a false certification, the county committee shall notify the person of the determination and afford such person 15 days after mailing of the notice to request a review of the determination by a review committee as provided by Part 711 of this chapter. If it is determined that a lessor knowingly made a false certification, the following shall occur:

(1) *Lessor.* The next flue-cured tobacco allotment established for the lessor farm shall be reduced by thatpercentage which the leased quota was of the flue-cured tobacco farm marketing quota for the farm in the year of the lease.

(2) *Lessee.* The lessee shall be ineligible for price support and a "No Price Support" marketing card shall be issued for the farm for marketing the current year crop of flue-cured tobacco which is marketed after the determination is made: *Provided,* That a "No Price Support" marketing card shall be issued in a year subsequent to the first year such card is issued if the cumulative pounds of tobacco marketed with the "No Price Support" marketing card are less than the pounds leased as the result of a false certification: *Provided further,* That after the cumulative marketings identified with the "No Price Support" marketing card issued for the farm are equal to or greater than the pounds leased as a result of a false certification, the marketing card may be exchanged at the county ASCS office for a marketing card without such notation if the farm and producer are otherwise eligible for price support.

(h) *Approval or disapproval of a transfer agreement.* The county committee shall approve or disapprove each transfer agreement. The county committee shall approve each transfer agreement which meets the eligibility

conditions as set forth in this section: *Provided,* That the county committee may delegate authority to the county executive director or other county office employee to act on behalf of the county committee and approve a transfer agreement which meets the eligibility conditions as set forth in this section. Such delegation of authority may authorize the county executive director or county office employee to approve any transfer agreement or the delegation of authority may be limited to approval of either transfers by lease or transfers by sale. Only the county committee shall disapprove a transfer agreement.

(1) *Time for determination.* Any approval or disapproval by the county committee of a transfer agreement should be made within 30 days after the transfer agreement is filed with the county committee unless additional time is required as the result of conditions beyond the control of the county committee. However, if an agreement is filed after June 15 which provides for the sale of an allotment and quota, a transfer agreement shall not be approved until the next year's allotment and quota is computed for the selling farm. In addition, if a marketing quota referendum will be conducted to determine whether or not quotas will be in effect for the crop, a transfer agreement shall not be approved until the Secretary announces that quotas have been approved by referendum.

(2) *Effective date.* An approved transfer agreement shall become effective during the current crop year, except that if an agreement to sell an allotment and quota is filed after June 15 of the current year, such agreement shall become effective for the next crop year.

(i) *Allotment and quota after transfer by lease.* The effective farm marketing quota and the effective farm acreage allotment shall be determined for both the lessee farm and the lessor farm in accordance with the provisions of §§ 725.58 and 725.60.

(j) *Apportionment of data and determination of allotment and quota after transfer of quota by sale.*—(1) *Apportionment of data for the selling farm.* The pounds of farm marketing quota retained on the selling farm after the sale of quota shall be divided by the farm marketing quota established for the selling farm before the sale to determine a factor for apportioning farm data for the current year and for the base period. The data to be retained on the selling farm shall be determined by multiplying the factor by the following data:

(i) The planted and considered planted acres for the base period;

(ii) The history acres for the base period;

(iii) The farm acreage allotment for the current year and for the base period;

(iv) The amount of any overmarketings which have not been subtracted when a determination is made of the effective farm marketing quota of the selling farm;

(v) The pounds of quota which have been transferred from the selling farm by lease in the current year;

(vi) The acres of allotment which have been reduced in the current year as the result of a marketing quota violation in a prior year;

(vii) The pounds of quota transferred to the farm by lease in the previous year;

(viii) The previous year's farm marketing quota;

(ix) The previous year's effective farm marketing quota; and

(x) The previous year's marketings.

(2) *Apportionment of data for the buying farm.* The pounds of farm marketing quota which have been purchased shall be divided by the farm yield for the buying farm in order to determine the farm acreage allotment for the buying farm. The buying farm's share of other farm data shall be determined by subtracting the acres or pounds, as applicable, which are retained on the selling farm from the acres or pounds which were established for the selling farm before the current sale of quota: *Provided,* That the acres computed for the acres of reduction resulting from a marketing quota violation for the buying farm shall be multiplied by a factor determined by dividing the farm yield of the selling farm by the farm yield of the buying farm in order to determine the acres of reduction from the buying farm for the current year: *Provided further,* That the pounds of quota transferred from the selling farm by lease and/or the acres of allotment reduction resulting from a marketing quota violation on the selling farm may be apportioned between the farms in accordance with a written agreement between the buyer and the seller if the farm marketing quota retained on the selling farm is sufficient to satisfy the pounds of quota which are leased, the pounds of quota which have been reduced as the result of a marketing quota violation, and the overmarketings for the farm, if any. The data determined in accordance with this paragraph shall be added to any previous data for the buying farm.

(3) *Allotment and quota.* After adjusting the data in accordance with the provisions of this section, the farm acreage allotment, the effective farm acreage allotment, and the effective farm marketing quota shall be determined in accordance with §§ 725.58 and 725.60 for both the buying farm and the selling farm.

(k) *Effect on price support eligibility.* If a lease agreement is filed after the farm operator reports the acreage of tobacco on the farm in the current year, the effective farm acreage allotment which has been determined prior to the approval of the transfer will be used in determining price support eligibility for the farm.

(l) *Natural disaster.*—(1) *State committee authorization.* Notwithstanding any other provision of this section, the State committee may authorize the county committee to approve a transfer of quota by lease which is filed after June 15 if:

(i) *County committee determination.* The county committee of the county in which the lessor farm is located determines that as a result of drought, hail, wind, excessive rain, tornado, or other natural disaster, the county has suffered a loss of 10 percent or more of the expected yield from the acreage of flue-cured tobacco planted for harvest in the current year and the State committee concurs in such determination.

(ii) *County committee recommendation.* The county committee of the county in which a natural disaster loss occurred recommends to the State committee that the county committee be authorized to approve a transfer of a quota by lease when filed after June 15, if the agreement otherwise complies with the provisions of this section.

(iii) *Tobacco program not impaired by transfer.* The State committee determines that transfer of quota after June 15 will not impair the effective operation of the tobacco marketing quota or price support program.

(2) *Eligible farms.* In any county for which a transfer of quota is authorized after June 15 because of disaster conditions, a lessor farm may transfer quota by lease after June 15 to a lessee farm in the same county or in an adjoining county within the State if such farms otherwise meet the eligibility requirements specified in this section.

(3) *Adjoining county.* As used in this section, the phrase "adjoining county" means a county having a common border with another county in the same State if such common border is more than the point at which intersecting lines meet.

(m) *Carryover tobacco.* If tobacco is marketed after the entire farm marketing quota of the producing farm has been transferred by sale, the tobacco shall be considered as having been marketed on each farm to which farm marketing quota was transferred by sale in accordance with a transfer agreement

filed after June 15 of the last year in which a farm marketing quota was established for the producing farm. Such marketing shall be prorated to each farm in proportion to the pounds of farm poundage quota purchased by each farm. If there was more than one farm to which a farm marketing quota was transferred by sale, the marketing quota may be assigned to the farms in the manner agreed to in writing by each of the buyers of such farm marketing quota.

(n) *Farm division after transfer by lease.* If a farm is divided after there has been a transfer of a marketing quota to the farm by lease, the transferred quota shall be divided in the manner which is designated in writing by the lessee. In the absence of a written designation, the leased quota shall be apportioned in the same manner as the farm acreage allotment of the parent farm.

(o) *Multiple year lease.* (1) The acreage allotment and/or marketing quota on the lessee farm having a multiple-year lease shall be adjusted for each year for which a transfer agreement is in effect to reflect any change in the farm yield or to reflect any decrease in the national acreage factor which causes the farm marketing quota established for the lessor farm to be less than the pounds of quota which have been transferred to the lessee farm.

(2) Notwithstanding any other provisions of this section, a previously approved multiple-year lease shall not be effective in the current year unless the contribution required by § 1464.10 of this title to the No Net Cost Tobacco Fund is made for the current year in accordance with instructions issued by the Deputy Administrator.

(p) *Cancellation of transfer.* (1) A transfer of allotment and quota under this section which was approved in error or on the basis of incorrect information furnished by the parties to the agreement shall be canceled by the county committee. For the purpose of determining any overmarketings and undermarketings from the farms, and for the purpose of determining eligibility for price support and marketing quota penalties, the cancellation shall be effective as of the date of approval. However, such cancellation shall not be effective for the current marketing year for price support and marketing quota penalties purposes if: (i) The transfer approval was made in error or on the basis of incorrect information which had been unknowingly furnished by the parties to the agreement; and (ii) the parties to the transfer agreement were not notified of the cancellation before the marketing for the receiving farm exceeded the correct effective farm marketing quota. The provisions of this paragraph shall not preclude any application of the provisions with respect to erroneous notice which are set forth in § 725.70.

(2) If a transfer of an allotment and quota is canceled because of fraud on the part of the owner of the transferring farm but no fraud is attributable to either the owner or operator of the receiving farm, such cancellation shall be effective as of the date of approval of the transfer except for purposes of determining eligibility for price support and marketing quota penalties for the receiving farm. In such case, the overmarketings shall be charged against the farm from which the transfer of allotment and quota was made if the farm, after any reconstitution which may be necessary as a result of the fraud, is assigned an allotment and quota against which the overmarketings could be charged. Otherwise, the overmarketings shall be charged against any other farm involved in the fraud having an allotment and quota after any reconstitution required by such fraud. Notwithstanding the foregoing, any overmarketings on the receiving farm which are in excess of the amount of quota involved in the canceled transfer shall be charged against the receiving farm.

(q) *Dissolution or revision of a transfer agreement.* A transfer agreement may be dissolved or minor revisions made with respect to such agreement if a written request by all parties to the agreement is made to the county committee by November 15 of the current crop year. After any such dissolution or revision of a transfer agreement, an official notice of the acreage allotment and marketing quota shall be issued by the county committee to each of the operators involved in the transfer agreement. If a request to dissolve or revise a multiple-year lease is made after November 15 of the current crop year, but before the last crop year for which the transfer agreement is effective, the next allotments and quotas established for the farms shall reflect the dissolution or revision.

(r) *Considered planted credit—lessor farm.* Considered planted credit shall be given to the lessor farm for the tobacco acreage allotment which is deducted as the result of the transfer of quota from the farm by lease.

12. In § 725.73, paragraph (c) is added to read as follows:

§ 725.73 Determining tobacco history acreages.

* * * * *

(c) *History acreage reduced to zero.* Notwithstanding any other provisions of this section, the history acres for the current year and for each year of the base period shall be reduced to zero if:

(1) A new farm allotment was canceled;

(2) The allotment was in a pool established in accordance with the eminent domain provisions of Part 719 of this chapter and the period of eligibility to transfer the allotment from the pool has expired; or

(3) The county committee determines that the farm has been retired from agricultural production and the allotment is not eligible for pooling in accordance with the eminent domain provisions of Part 719 of this chapter.

13. Section 725.74 is revised to read as follows:

§ 725.74 Forfeiture of allotment and quota.

(a) *Determination of allotment and quota subject to forfeiture.* (1) For purposes of paragraphs (b) and (c) of this section, the phrase "owns a farm" means ownership of:

(i) A farm as constituted under Part 719 of this chapter if the entire farm shares a common ownership; or

(ii) All of the land within a farm which shares common ownership (commonly referred to as a "tract") if the parent farm consists of separate ownership tracts of land.

(2) For purposes of paragraphs (b) and (c) of this section, the county committee shall apportion, in accordance with the provisions of Part 719 of this chapter, the flue-cured tobacco allotment and quota assigned to a farm between the various tracts of land which are separately owned by:

(i) A person which is not significantly involved in the management or use of land for agricultural purposes, as may be described in paragraph (b) of this section.

(ii) An individual, or owned by a person which is significantly involved in the management or use of land for agricultural purposes.

(3) An allotment and quota shall be determined for a tract under paragraph (a)(2)(ii) of this section only to the extent that records are available to show the contribution which the tract made to the flue-cured tobacco allotment of the parent farm.

(4) The farm acreage allotment and farm marketing quota determined under this section for each farm or tract, as applicable, will be the amount of allotment and quota subject to forfeiture under this section.

(b) [Reserved.]

(c) *Flue-cured tobacco farm acreage allotment exceeds 50 percent of tillable cropland.* If any person owns a farm for which the flue-cured tobacco farm acreage allotment assigned to the land owned by the person exceeds 50 percent of the tillable cropland on such farm, the person shall take steps, such as the sale of allotment, the purchase of tillable cropland, or conversion of land to tillable cropland status, which will result in elimination of the excess or the person shall forfeit flue-cured tobacco farm acreage allotment equal to the amount of such excess that remains on or after:

(1) *Farm owned on or before December 1, 1983.* December 1, 1983: *Provided,* That if the farm is acquired after September 1, 1983 the date may be extended by the county committee to July 1, 1984 if before December 1, 1983 the owner requests such extension in writing.

(2) *Farm acquired after December 1, 1983.* July 1 of the year after the year of acquisition.

(3) *Farm includes purchased allotment.* Notwithstanding the provisions of paragraphs (c) (1) and (2) of this section, if the flue-cured tobacco farm acreage allotment includes acreage of purchased allotment and the flue-cured tobacco farm acreage allotment exceeds 50 percent of the tillable cropland because the owner disposed of an acreage of tillable cropland after purchasing the allotment, the forfeiture shall not take place until July 1 of the year after the year of such disposal.

(4) *Increase in allotment resulting from changes in county yields or change in national acreage factor.* July 1 of the year after the crop year for which the change(s) become effective.

(d) *Buyer of allotment fails to share in risk of production.*—(1) *Forfeiture required.* If any person buys a flue-cured acreage allotment and quota under the provisions of § 725.72 and such person fails to share in the risk of producing the tobacco which was planted under such allotment and quota during any of the five crop years beginning with the crop year for which the purchase became effective, such person shall forfeit the purchased allotment and quota which is not sold on or before December 31 of the year after the crop year in which such crop was planted.

(2) *Failure to utilize purchased allotment and quota.* Failure to utilize purchased allotment and quota shall not subject such allotment and quota to forfeiture, but the five year period of paragraph (d)(1) of this section shall be extended one year for each year in which the allotment and quota is not utilized.

(3) *Reduction for failure to share in risk of production.* The effective allotment and quota shall be reduced, but not below zero acres or pounds, for planting, leasing, and marketing quota purposes only, to the extent of purchased allotment and quota for each crop year after the crop year in which the buyer of such allotment and quota fails to share in the risk of producing a crop of tobacco planted under such allotment and quota.

(4) *Determining forfeited amount.* If only part of the allotment and quota on a farm resulted from purchased allotment and quota, the amount of farm marketing quota which must be forfeited under paragraph (d) of this section shall be determined by:

(i) Increasing or decreasing each respective purchase of farm acreage allotment for the farm to reflect changes in county farm yields as provided in § 725.56 and changes in national acreage factors.

(ii) Adding the amounts determined in paragraph (d)(4)(i) of this section, multiplying the result by the farm yield for the farm, and subtracting the pounds of quota which have been sold to prevent forfeiture.

(e) *Hearing.* Before any forfeiture of allotment and quota becomes effective under the provisions of this section, the county committee shall:

(1) Schedule a hearing for the affected person.

(2) Notify the affected person of the hearing at least 10 days in advance of the hearing.

(3) Make a determination, on the basis of the evidence presented at the hearing, as to whether or not the affected person knowingly failed to take steps to prevent forfeiture of allotment and quota.

(4) Notify the affected person of the county committee determination and, if forfeiture of allotment and quota is to be required, afford such person an opportunity to appeal to a review committee under the provision of Part 711 of this chapter.

(5) Wait until the period has passed for the affected person to appeal the county committee or review committee determination that allotment and quota must be forfeited under the provisions of this section.

(f) *Apportionment of data and determination of allotment and quota after forfeiture.*—(1) *Apportionment of data.* The pounds of farm marketing quota retained on the forfeiting farm after the forfeiture shall be divided by the farm marketing quota established for the forfeiting farm before the forfeiture to determine a factor for apportioning farm data for the current year and for the base period. The data to be retained on the forfeiting farm shall be determined by multiplying the factor by the following data of the forfeiting farm:

(i) The planted and considered planted acres for the base period.

(ii) The history acres for the base period.

(iii) The farm acreage allotment for the base period.

(iv) The overmarketings which have not been subtracted when determining the effective farm marketing quota of the forfeiting farm.

(v) The pounds of quota transferred from the forfeiting farm by lease in the current year.

(vi) The acres of allotment reduced in the current year for a marketing quota violation in a prior year.

(vii) The previous year's effective farm marketing quota.

(viii) The previous year's marketings.

(ix) The previous year's farm marketing quota.

(x) The pounds of quota transferred to the farm by lease in the previous year.

The portion of the forfeiting farm data which shall be included in a forfeiture pool for the county shall be determined by subtracting the acres of pounds which are retained on the forfeiting farm from the acres or pounds established for the forfeiting farm before the forfeiture.

(2) *Forfeiture pool data.* The data for the forfeiture pool shall be added to any previous data in the forfeiture pool.

(3) *Allotment and quota after forfeiture.* After adjustment of data, the farm acreage allotment, the effective farm acreage allotment and the effective farm marketing quota shall be determined according to §§ 725.58 and 725.60 for the forfeiting farm.

(g) *Forfeiture pool.* (1) *Forfeiture pool required.* A forfeiture pool shall be established in each county in which a forfeiture of allotment and quota occurs. The forfeiture pool shall be increased to include data for each forfeiture and shall be decreased for each reallocation so as to reflect forfeiture or reallocated amounts of:

(i) The farm acreage allotment for the current year and for the base period.

(ii) The farm marketing quota for the current year and for the base period.

(iii) The acres reduced for violation.

(iv) The quota transferred from the forfeiting farm by lease.

(v) The planted and considered planted acres for the base period.

(vi) The history acres for base period.

(vii) The previous year's effective farm marketing quota.

(viii) The previous year's marketings.

(2) *Farm yield for forfeiture pool.* For each year, the farm yield for the forfeiture pool shall be determined by

dividing the farm marketing quota in the forfeiture pool by the farm acreage allotment in the forfeiture pool. The preliminary farm yield for the forfeiture pool shall be determined by dividing the farm yield by the national yield factor.

(3) *Adjustment of data in forfeiture pool.* At the beginning of the current year, the data in the forfeiture pool shall be adjusted by the factors used in determining yields, allotments, and quotas for old farms. Acreage and quota data in the forfeiture pool shall be decreased each time quota is reallocated from the forfeiture pool, such decrease to be made in the same proportion as the pounds of quota reallocated from the pool are to the pounds of quota in the pool before the reallocation.

(h) *Reallocation of allotment and quota from forfeiture pool.*—(1) *Application.* In order to establish eligibility to receive allotment and quota from the forfeiture pool in the current year, an application must be made on a form approved by the Deputy Administrator. Such application must be filed:

(i) *Who may file.* By an active producer.

(ii) *When to file.* On or before March 31: *Provided,* That the State committee may establish an earlier date if notice is given to such earlier date in time for interested applicants to file by such date.

(iii) *Where to file.* At the county ASCS office which serves the farm for which the application is filed.

(2) *Eligibility of applicant.* In order for an applicant to be eligible for allotment and quota from the forfeiture pool the county committee must determine that:

(i) The application was filed timely.

(ii) The applicant is an active producer.

(iii) During the current year or during the four years preceding the current year the applicant has not:

(*a*) Sold or forfeited allotment and quota from any farm.

(*b*) Used the designation method of division to retain less allotment than the farm would have retained by another method of division.

(3) *Time to reallocate.* The county committee shall:

(i) Not reallocate any allotment and quota from the forfeiture pool until the time has passed for filing an application for forfeited allotment and quota for the current year.

(ii) Reallocate any allotment and quota from the forfeiture pool only during the 30-day period beginning on the day after the final date for filing an application for allotment and quota from the forfeiture pool.

(4) *Reallocation by county committee.* Reallocation of any allotment and quota shall be by the county committee. In making its determination of the amounts to reallocate, the county committee may consider the size of the current allotments on the farms of the eligible applicants, the length of time the applicants have been farming tobacco, the type of farming done by the applicants, (i.e., livestock, grain, or other commodities), previous leasing history of applicant, and other factors which in the judgment of the county committee should be considered. Allotment and quota may be reallocated to a farm which currently does not have a flue-cured tobacco allotment. A factor shall not be used to reallocate allotment and quota between all eligible applicants.

(5) *Basis for reallocation from forfeiture pool.* Reallocation from the forfeiture pool shall be on the basis of pounds of farm marketing quota.

(6) *Amount of quota to reallocate.* The county committee may reallocate all or part of the quota in the forfeiture pool. The minimum and maximum amounts of quota which may be reallocated to an eligible applicant are:

(i) *Minimum.* The total amount of quota in the pool or 200 pounds, whichever is less.

(ii) *Maximum.* 1,000 pounds; *Provided,* That with State committee approval up to 2,500 pounds may be reallocated.

(7) *Data for receiving farm.* All quota data for the forfeiture pool shall be apportioned to the receiving farm in the proportion that the reallocated farm marketing quota is to the total farm marketing quota in the forfeiture pool before the reallocation. The pounds of farm marketing quota reallocated to a farm shall be divided by the farm yield for the farm to determine the amount of reallocated farm acreage allotment. The data determined for the receiving farm in accordance with the provisions in this paragraph shall be added to any previous data for the receiving farm.

(8) *Allotment and quota for receiving farm.* After any adjustments which are made in accordance with the provisions of this section, the farm acreage allotment, the effective farm acreage allotment, and the effective farm marketing quota shall be determined for the receiving farm in accordance with §§ 725.58 and 725.60.

(i) *Forfeiture of reallocated allotment and quota.* Allotment and quota which is reallocated to a farm under the provisions of this section shall be forfeited if the applicant to whom the allotment and quota is reallocated fails to share in the risk of production of tobacco produced under such allotment and quota during any of the five years beginning with the crop year during which the allotment and quota is reallocated. The amount of farm marketing quota which must be forfeited shall be determined in the same manner as is provided in paragraph (d)(4) of this section for forfeiture of purchased quota. Forfeiture shall occur on December 1 of the year in which the applicant fails to share in the risk of production of tobacco produced under such allotment and quota: *Provided,* That while the failure to utilize such allotment and quota shall not subject such allotment and quota to forfeiture, the five year period, as provided for in this paragraph, shall be extended by a year for each year in which the allotment and quota is not utilized.

(j) *Successor-in-interest.* The successor-in-interest shall be subject to the provisions in this section in the same manner and to the same extent as would be applicable to the person whose interest was assumed.

(1) *New owner of farm.* The new owner of a farm on which a portion or all of the farm acreage allotment and farm marketing quota was purchased shall become the successor-in-interest to the buyer of the allotment and quota.

(2) *Buyer no longer shares in risk of production.* The owner of a farm shall become the successor-in-interest to the buyer of allotment and quota which was transferred to a farm which was not owned by such buyer if the buyer ceases to share in the risk of production of tobacco produced on the farm.

14. Section 725.86 is added to read as follows:

§ 725.86 Lien for penalty.

(a) *Lien on tobacco.* Until the amount of any penalty which is imposed in accordance with section 314 of the Act (7 U.S.C. 1314) is paid, a lien on the tobacco with respect to which such penalty is incurred, and on any other tobacco which is marketed in the same or a subsequent marketing year which is subject to marketing quotas in which the person liable for payment of the penalty has an interest, shall exist in favor of the United States for the amount of the penalty.

(b) *Lien precedence.* The lien on any other tobacco attaches at the time the debt is entered on a debt record in:

(1) *Indebted producers.* The county ASCS office for the county in which a subsequent crop of tobacco is grown.

(2) *Indebted warehouseman.* The State ASCS office for the State in which the warehouse is located.

(3) *Indebted dealer.* The State ASCS Office for the State to which the dealer is required to file reports.

(c) *List of tobacco marketing penalty debts.* Each county and State ASCS office shall maintain a list of tobacco marketing penalty debts which have been entered on the debt record for the respective office. The list shall be available for examination upon written request by any interested person.

15. In § 725.87, paragraph (d) is revised to read as follows:

§ 725.87 Issuance of marketing cards.

* * * * *

(d) *"No Price Support."* The notation "No Price Support" shall be entered on each marketing card issued for the use of:

(1) *Farm.* Any producer on the farm if the producers on the farm are ineligible for price support under the provisions of Part 1464 of this title.

(2) *Producer.* A producer on a farm if the producer is ineligible for price support under the provisions of Part 1464 of this title.

* * * * *

16. In § 725.88, paragraph (a) is revised to read as follows:

§ 725.88 Claim stamping and replacing marketing cards.

(a) *Claim stamping.* If a person is indebted to the United States and such indebtedness has been recorded on the county debt record, any marketing card issued for the farm on which the person has a producer interest shall bear the notation "U.S. Claim" followed by the amount of the indebtedness. The name of the debtor-producer, if different from the farm operator, shall be recorded directly under the claim notation. The notation "TMQ" indicating tobacco marketing quota as the type of indebtedness shall constitute notice to any buyer that until the amount of penalty is paid, the United States has a lien with respect to any crop of tobacco in which the debtor-producer has an interest. A claim notation other than "TMQ" shall constitute notice to any buyer that subject to prior liens, the net proceeds from any tobacco placed under price support loan shall be paid to the "Agricultural Stabilization and Conservation Service, USDA" to the extent of the indebtedness shown. The acceptance and use of a marketing card bearing a notation and information concerning an indebtedness to the United States shall not constitute a waiver by the debtor-producer of any right to contest the validity of such indebtedness by appropriate appeal. As claim collections are made, the amount of the claim shown on the card shall be revised to show the claim balance. If requested by the producer, the county executive director who issued the marketing card shall issue a claim-free marketing card when the claim has been paid.

* * * * *

17. In § 725.94, paragraph (c) is amended by removing the second sentence and a new paragraph (h) is added to read as follows:

§ 725.94 Penalties considered to be due from warehousemen, dealers, buyers, and others excluding producers.

* * * * *

(h) *Floor sweepings.* Effective for the 1982 and subsequent crops of tobacco, any person who markets floor sweepings in excess of allowable floor sweepings shall be subject to a civil penalty of 150 percent of the average market price, as specified in § 725.92, for the immediately preceding marketing year. The calculated penalty rate shall be rounded to the nearest whole cent. Any floor sweepings on hand more than 15 days after the warehouse closes for the auction season shall be considered as marketed. The floor sweepings on hand shall be weighed by the warehouseman and the weight shall be certified by the warehouseman, such weighing to be done in the presence of a representative of either the county committee or the State committee. Floor sweepings which are destroyed in the presence of a representative of the county committee within 15 days after the warehouse closes for the season shall not be considered as marketed when determining the quantity of floor sweepings marketed. If the county committee determines, after the warehouse has been closed for the auction season for more than 15 days, that the cumulative quantity of floor sweepings marketed and considered marketed in the current marketing year is in excess of the allowable floor sweepings, the person responsible for such marketings shall be given notice of the determination and shall be afforded an opportunity to request reconsideration of such determination in accordance with the provisions of Part 780 of this chapter. A determination that a civil penalty is due for marketing floor sweepings in excess of the allowable floor sweepings shall not become final and shall not be assessed until such person has been afforded an opportunity to a hearing and such person has exhausted the applicable administrative remedies. The notice of assessment shall require such person to pay the civil penalty to the "Agricultural Stabilization and Conservation Service, USDA" within 15 days after the date of mailing of the notice.

18. In § 725.95, paragraph (d) is corrected by removing "(c)" in the first sentence after the proviso and inserting "(d)" in its place, and paragraph (f) is added ro read as follows:

§ 725.95 Producer penalties; false identification; failure to account; canceled allotments; overmarketing proportionate share.

* * * * *

(f) *Ineligible for price support.* Effective for the 1983 and subsequent crops, a penalty at the basic rate as specified in § 725.92 for the current marketing year shall be assessed on any marketings of flue-cured tobacco by any producer on a farm if such producer is ineligible for price support because the farm operator or other producer on the farm has not agreed to make contribution to the No Net Cost Fund as provided in Part 1464 of this title.

19. In § 725.98, paragraph(g) is amended by removing the word "effective" from the first sentence, paragraph (n) is revised, and paragraph (p) is added to read as follows:

§ 725.98 Producer's records and reports.

* * * * *

(n) *Correction of farm records.* If the farm marketing records for a farm are determined to be incorrect, the records shall be corrected.

* * * * *

(p) *Effect of false identification on establishing future farm marketing quotas.* Notwithstanding any other provision of this section, if a producer falsely identifies tobacco as having been produced on or marketed from a farm, the quantity of the tobacco which is falsely identified shall be considered, for the purpose of establishing future farm marketing quotas, as having been produced on both the farm for which it was identified as having been produced and the farm of actual production, if known, or, as the case may be, such quantity of tobacco shall be considered as actually marketed from the farm.

20. In § 725.99, paragraph (a)(4)(xvii) is amended by removing the words "Data Systems Field Office (DSFO)" and inserting, in their place, the words "Kansas City Field Office (KCFO)"; paragraph (d)(2) is amended by removing "DSFO" and inserting, in its place, "KCFO"; and paragraphs (g)(12) and (k) are revised to read as follows:

§ 725.99 Warehouseman's records and reports.

* * * * *

(g) * * *

(12) The totals of the resales column on Form MQ–79 representing the nonauction resales (including floor

sweepings nonauction sales) by the warehouse.

* * * * *

(k) *Basket ticket and bill-out invoice.* At the time tobacco is weighed for marketing, the warehouseman shall record the weight of the basket or sheet of tobacco on the tobacco sale bill and on the basket ticket. The sale bill number on which the basket or sheet of tobacco is recorded shall be recorded on the basket ticket. If the marketing card which is presented to identify the tobacco at weigh-in bears the notation "No Price Support", the same notation shall be entered by the warehouseman on the basket ticket for each basket or sheet of tobacco which is identified with the same marketing card. When the tobacco has been sold at auction, the bill-out invoice to the buyer shall include the warehouse registration number (warehouse code), sale bill number, and line number on which the basket or sheet of tobacco was recorded on the sale bill.

* * * * *

21. In § 725.100, paragraphs (a), (b), (c)(1), (c)(2) and (c)(3) are revised and paragraph (c)(7) is added to read as follows:

§ 725.100 Dealer's records and reports.

* * * * *

(a) *Record of marketings.* A dealer shall keep records which provide the following information for each lot of tobacco, including scrap tobacco, purchased or sold by the dealer:

(1) *Purchases.* (i) The name of:

(*a*) The warehouse through which the tobacco was purchased, if purchased at a warehouse auction; or

(*b*) The operator of the farm on which the tobacco was produced, if purchased from a producer as a nonauction purchase, and the name of the producer of the tobacco, if different from the operator; or

(*c*) The seller if purchased as a nonauction purchase from a warehouseman or dealer.

(ii) The identification number of the warehouse, farm, or dealer, as applicable, at/from which the tobacco was purchased.

(iii) The address, FC number if known, and percentage share of the proceeds of the farm operator and any other producer from whom tobacco was purchased as a nonauction purchase.

(iv) The date of purchase.

(v) The pounds of tobacco purchased.

(vi) The gross purchase price.

(vii) The amount of penalty.

(viii) The amount deducted for the "No Net Cost Tobacco Fund".

(ix) The quantity of tobacco purchased from a prior crop and carried over for marketing in a subsequent crop year.

(2) *Sales.* (i) The name and identification number of:

(*a*) The warehouse through which the tobacco was sold, if sold at a warehouse auction, or

(*b*) The buyer if the tobacco was sold as a nonauction sale.

(ii) The date of sale.

(iii) The pounds of tobacco sold.

(iv) The gross sale price.

(b) *Nonauction purchase.* Each purchase of tobacco from a flue-cured tobacco producing area shall be identified by a marketing card issued for the farm on which the tobacco was produced unless an AMS inspection certificate is obtained prior to purchase which shows that the tobacco being offered for sale is a kind of tobacco which is not subject to marketing quotas.

(1) After each nonauction purchase, the dealer shall enter a declining balance of "110 percent of quota" on the reverse side of the marketing card. The declining balance shall be determined by reducing the previous "110 percent of quota" entry on the marketing card by the number of pounds of tobacco purchased. The date the tobacco was purchased also shall be entered on the marketing card at the time each lot of tobacco is purchased.

(2) After each nonauction purchase, the dealer shall prepare a Form MQ–72–2 which shall set forth the following:

(i) The date of the purchase.

(ii) The registration number of the dealer.

(iii) The name and address of the person selling the tobacco.

(iv) The identification number (farm number, warehouse code, or dealer number, as applicable) of the person selling the tobacco.

(v) The pounds of tobacco purchased.

(vi) The amount of penalty collected.

(vii) The method (estimating or weighing) of determining the pounds of tobacco marketed.

(viii) The signature of the seller and the date signed.

(3) The dealer shall make deductions for producer contributions to the No Net Cost Tobacco Fund as provided for in Part 1464 of this title. For nonauction purchases during the 1982–83 marketing year, the dealer shall deduct three cents per pound from the price paid to the producer for the tobacco, except for a purchase which is identified with a marketing card bearing the notation "No Price Support." For nonauction purchases from producers during the 1983–84 and subsequent marketing years, the dealer shall make a deduction in accordance with Part 1464 of this title from the price paid to the producer for the tobacco; however, a deduction shall not be made if the original "110 percent of quota" entry on the marketing card used to identify the tobacco was zero pounds. The amount of the deduction which is applicable to flue-cured tobacco marketed during each marketing year will be that amount per pound which is approved and announced by the Secretary as the producer contribution to the No Net Cost Tobacco Fund for each such marketing year.

(c) *Record and report of purchases and resales.* (1) Each dealer shall keep a record and make reports on Form MQ–79 showing all purchases and resales of tobacco made by or for the dealer and, in the event of a purchase or resale of tobacco which is purchased by the dealer from a crop of tobacco produced prior to the current crop, the fact that such tobacco was so purchased and carried over from a crop produced prior to the current crop.

(2) Form MQ–79 shall be prepared and a copy, together with executed copies of Form MQ–72–2 for all nonauction purchases, shall be forwarded to the State ASCS office not later than the end of the calendar week in which such tobacco was purchased or resold. However, if tobacco is purchased prior to the opening of the local auction market, a Form MQ–79 shall be prepared and a copy, together with executed copies of Form MQ–72–2 for all nonauction purchases, shall be forwarded to the State ASCS office not later than the end of the calendar week which would include the first sale date of the local auction markets. In addition, if tobacco is resold in a State other than where the tobacco is produced and the auction markets at such location open earlier than the auction market where the tobacco normally would be sold at auction by farmers, reports together with executed copies of Form MQ–72–2 for all nonauction purchases shall be prepared and forwarded to the State ASCS office not later than the end of the calendar week which would include the first sale day of the local auction market where the resale takes place.

(3) The data to be entered on Form MQ–72 for nonauction purchases from a producer shall be the data which is enumerated in accordance with the provisions of paragraph (b)(2) of this section.

* * * * *

(7) In addition to Form MQ–79 and MQ–72–2, a Form MQ–79 (Supplemental) shall be executed to record information relating to each

purchase of tobacco for which a contribution to the No Net Cost Tobacco Fund is deducted from the price paid to the producer for the tobacco. The Form MQ–79 (Supplemental) shall be forwarded to the State ASCS office at the same time the Form MQ–79 on which the purchase is recorded is forwarded. A check, draft, or money order in the amount of the deduction recorded on Form MQ–79 (Supplemental) and drawn payable to Flue-Cured Stabilization Corporatio shall be forwarded to the State ASCS office at the same time as Forms MQ–79 and MQ–79 (Supplemental).

* * * * *

§ 725.102 [Amended]

22. Section 725.102 is amended by removing, in paragraphs (a) and (b), the words "Director, Production Adjustment Division" and inserting, in their place, the word "Director."

23. In § 725.103, the first sentence in paragraph (a) is revised to read as follows:

§ 725.103 Recordkeeping and reporting requirements for processed producer carryover tobacco.

(a) *General.* This section shall not be applicable to 1979 and subsequent crops of tobacco, except for the 1982 crop for which the Flue-Cured Tobacco Cooperative Stabilization Corporation may process and store producer carryover tobacco and may act as the producer's marketing agent in marketing the producer's tobacco during the 1983–84 marketing year.

* * * * *

24. Section 725.109 is revised to read as follows:

§ 725.109 Duties of Kansas City ASCS Field Office.

The Kansas City ASCS Field Office (KCFO) has responsibility for processing certain data and making such reports as may be required by the Deputy Administrator.

§ 725.110 [Amended]

25. Section 725.110 is amended by removing the words "Program Operations, Division and".

26. Section 725.112 is revised to read as follows:

§ 725.112 Information confidential.

All data reported to or acquired by the Secretary pursuant to the provisions of this subpart shall be kept confidential by all officers and employees of the U.S. Department of Agriculture, by all members of county and community committees, and all county office employees. Only such data so reported or acquired as the Deputy Administrator deems relevant shall be disclosed by them, and then only in a suit or administrative hearing under title III of the Act. Nothing in this section shall be deemed to prohibit the issuance of general statements based upon the report of a number of parties which statements do not identify the information furnished by any person.

§ 725.116 [Removed]

27. Part 725 is amended by removing § 725.116.

Signed at Washington, D.C., on December 3, 1982.

Everett Rank,

Administrator, Agricultural Stabilization and Conservation Service.

BILLING CODE 3410–05–M

Agricultural Marketing Service

7 CFR Parts 1046 and 1098

[Docket Nos. AO–123–A48, and AO–184–A43]

Milk in the Louisville-Lexington-Evansville and Nashville, Tenn., Marketing Areas; Order Amending Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action amends the Louisville-Lexington-Evansville Federal milk order to permit operators of country supply plants to count shipments directly from farms to pool city distributing plants toward meeting up to one-half of the shipments required to maintain pool status for country plants. Also, the Nashville, Tennessee, order is amended to allow diversions of milk between pool plants and to provide a procedure whereby proprietary handlers can make payments to independent producers rather than having such payments made by the market administrator.

These changes, which are based on the record of a public hearing held at Louisville, Kentucky, October 21–23, 1981, are necessary to maintain orderly conditions for the marketing of milk in these areas.

EFFECTIVE DATE: January 1, 1983.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, (202/447–4829).

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

Prior documents in this proceeding:

Notice of Hearing: Issued September 4, 1981; published September 11, 1981 (46 FR 45354).

Correction: Published September 22, 1981 (46 FR 46813).

Notice of Rescheduled Hearing: Issued September 24, 1981; published September 29, 1981 (46 FR 47588).

Suspension of Rule: Issued November 24, 1981; published November 30, 1981 (46 FR 58064).

Emergency Partial Final Decision: Issued January 15, 1982; published January 21, 1982 (47 FR 2999).

Final Order: Issued January 26, 1982, published January 29, 1982 (47 FR 4228).

Recommended Decision: Issued June 14, 1982; published June 21, 1982 (47 FR 26656).

Extension of Time: Issued July 6, 1982; published July 12, 1982 (47 FR 30080).

Final Decision: Issued November 5, 1982; published November 10, 1982 (47 FR 50888).

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth below.

The following findings are hereby made with respect to each of the aforesaid orders:

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the respective marketing areas.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand

for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending each of the aforesaid orders effective not later the January 1, 1983. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of this order are known to handlers. The recommended decision of the Acting Deputy Administrator, Agricultural Marketing Service, was issued June 14, 1982 (47 FR 26656), and the decision of the Assistant Secretary containing all amendment provisions of this order was issued November 5, 1982 (47 FR 50888). The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending each of the aforesaid orders effective January 1, 1983, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the Federal Register. (Sec. 553(d), Administrative Procedure Act, 5 U.S.C. 551–559).

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within each of the respective marketing areas, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending each of the specified orders, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the respective orders;

(3) The issuance of the order, amending the order, regulating the handling of milk in the Nashville, Tennessee, marketing area is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area; and

(4) The issuance of the order, amending the order, regulating the handling of milk in the Louisville-Lexington-Evansville marketing area is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period were engaged in the production of milk for sale in the Louisville-Lexington-Evansville marketing area.

List of Subjects in 7 CFR Parts 1046 and 1098

Milk marketing orders, Milk, Dairy products.

Order Relative to Handling

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Louisville-Lexington-Evansville and Nashville, Tennessee, marketings areas shall be in conformity to and in compliance with the following terms and conditions of each of the aforesaid orders, as amended, and as hereby further amended, as follows:

PART 1046—MILK IN LOUISVILLE-LEXINGTON-EVANSVILLE MARKETING AREA

1. Section 1046.7(b) is revised to read as follows:

§ 1046.7 Pool plant.

* * * * *

(b) A country plant during any of the months of September through February from which not less than 50 percent, and during other months not less than 40 percent, of milk from persons described in § 1046.12(a)(1) and from handlers described in § 1046.9(c) that is physically received at such plant (except by diversion from other plants), or diverted therefrom pursuant to § 1046.13, is shipped to and received at a city plant(s) in the form of milk or skim milk. The operator of a country plant may include milk diverted pursuant to § 1046.13(b) from such plant to a city plant as qualifying shipments in meeting up to one-half of the shipping percentage(s) specified in this paragraph.

* * * * *

§ 1046.13 [Amended]

2. In paragraph (b) of § 1046.13, the section reference "1046.7(a)" is changed to "1046.7(a), (b), or (c)".

PART 1098—MILK IN NASHVILLE, TENNESSEE, MARKETING AREA

§ 1098.7 [Amended]

1. In § 1098.7(a), add the words "pool or" before the word "nonpool".

2. In § 1098.7(b), add the words "pool or" before the words "nonpool plant pursuant to § 1098.12".

§ 1098.13 [Amended]

3. In § 1098.13(a), insert the parenthetical phrase "(excluding such milk that is diverted from another pool plant)" after the words "dairy farmer".

4. In § 1098.13, the introductory text of paragraph (b) and paragraph (b)(1) are revised to read as follows:

§ 1098.13 Producer milk.

* * * * *

(b) Diverted by the operator of a pool plant or a cooperative association from a pool plant to another pool plant without limit during the month, or to a nonpool plant that is not a producer-handler plant, subject to the following conditions:

(1) Such milk shall be accounted for as received by the diverting handler at the location of the plant to which diverted;

* * * * *

§ 1098.31 [Amended]

5. In § 1098.31, paragraph (c) is redesignated as paragraph (d) and a new paragraph (c) is added to read as follows:

§ 1098.31 Payroll reports.

* * * * *

(c) On or before the 21st day after the end of each month, each handler who elects pursuant to § 1098.73(d) to pay producers shall report to the market administrator the following information with respect to the handler's partial and final payments for producer milk received during the month:

(1) The name and address of each producer;

(2) The amounts paid each producer; and

(3) The dates such payments were made.

* * * * *

§ 1098.41 [Amended]

6. In § 1098.41(b)(2), insert the words "and in milk diverted to such plant from another pool plant" after the phrase "a handler described in § 1098.9(c)".

7. Section 1098.42(a) is revised to read as follows:

§ 1098.42 Classification of transfers and diversions.

(a) *Transfers and diversions to pool plants.* Skim milk or butterfat

transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classsification of such transfers or diversions shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant or divertee-plant after the computations pursuant to § 1098.44(a)(12) and the corresponding step of § 1098.44(b);

(2) If the transferor-plant or divertor-plant received during the month other source milk to be allocated pursuant to § 1098.44(a)(7) or the corresponding step of § 1098.44(b), the skim milk or butterfat so transferred or diverted shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler or divertor-handler received during the month other source milk to be allocated pursuant to § 1098.44(a) (11) or (12) or the corresponding steps of § 1098.44(b), the skim milk or butterfat so transferred or diverted, up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant or divertee-plant.

* * * * *

§ 1098.73 [Amended]

8. In § 1098.73, paragraph (d) is redesignated as paragraph (e) and a new paragraph (d) is added to read as follows:

§ 1098.73 Payments to producers and to cooperative associations.

* * * * *

(d) In making payments to producers pursuant to paragraphs (a) and (b) of this section, the market administrator, on or before the second day prior to the dates specified in such paragraphs, shall pay to each handler who so requests for milk received by the handler from producers for whom a cooperative association is not collecting payments pursuant to paragraph (c) of this section an amount equal to the sum of the individual payments otherwise due such producers pursuant to paragraphs (a) and (b) of this section. The handler then shall pay the individual producers the amounts due them by the respective dates specified in paragraphs (a) and (b) of this section. Any handler who the market administrator determines is or was delinquent with respect to any payment obligation under this order shall not be eligible to participate in this payment arrangement until the handler has met all prescribed payment obligations for three consecutive months. In making payments to producers pursuant to this paragraph, the handler shall furnish each producer the following information:

(1) The identity of the handler and the producer and the month to which the payment applies;

(2) The total pounds and the average butterfat content of milk for which payment is being made, including for the months in which base and excess prices apply, the pounds of base and excess milk;

(3) The minimum rate(s) at which payment to the producer is required by the order and the rate(s) of payment used if such rate(s) is other than the applicable minimum rate(s);

(4) The amount and nature of any deductions from the amount otherwise due to the producer, including the amount and rate per hundredweight of deductions made pursuant to § 1098.86; and

(5) The net amount of payment to the producer.

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: January 1, 1983.

Signed at Washington, D.C., on December 13, 1982.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services

BILLING CODE 3410-02-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 214

Nonimmigrant Classes; Employment Authorization for Dependents of Foreign Government Officials; Special Agreements

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule expands the employment opportunities for dependents of foreign government personnel assigned to duties within the United States. The rule recognizes the special reciprocal agreements entered into between the United States and certain foreign states which allow for these employment opportunities. In addition, the rule provides a clearer understanding of the NATO classifications of nonimmigrants and describes which NATO dependents are eligible for employment authorization.

EFFECTIVE DATE: January 17, 1983.

FOR FURTHER INFORMATION CONTACT:

For General Information: Stanley J. Kieszkiel, Acting Instructions Officer, Immigration and Naturalization Service, 425 I Street NW., Washington, D.C. 20536, Telephone: (202) 633–3048.

For Specific Information: Bert C. Rizzo, Immigration Examiner, Immigration and Naturalization Service, 425 I Street NW., Washington, D.C. 20536, Telephone: (202) 633–3946.

SUPPLEMENTARY INFORMATION: This final rule revises 8 CFR 214.2(a)(3) to improve readability and to implement new agreements between the United States and other foreign states on reciprocal employment opportunities for nationals of each country. The regulation formerly provided special employment opportunities only for dependents of employees of the government of Canada who are stationed within the United States; this special provision resulted from an agreement entered into between the United States and Canada to provide employment opportunities on a reciprocal basis. The United States has since entered into similar agreements with several other foreign states and is in the process of negotiating with others. A list of all foreign states which are party to reciprocal employment agreements with the United States will be available at all times from the Department of State, Office of Consular Affairs, and the District Offices of the Service. Changes in the list will be announced. Currently the United States has reciprocal employment agreements with Bolivia, Canada, France, New Zealand, Norway, Sweden, and the United Kingdom.

8 CFR 214.2(m) is revised to clarify the various classifications of NATO aliens and to clearly state which dependents of NATO countries are eligible for employment authorization in the United States.

Compliance with 5 U.S.C. 553 as to notice of proposed rule making is not required because the rule deals with agency practice and procedure dictated by international agreement.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that the rule will not have significant impact on a substantial number of small entities.

This rule is not a major rule as defined in section 1(b) of E.O. 12291.

List of Subjects in 8 CFR Part 214

Administrative practice and procedure, Aliens, Crime, Employment, Passports and visas.

PART 214—NONIMMIGRANT CLASSES

Accordingly, Title 8, Chapter I, of the Code of Federal Regulations is amended as follows:

In § 214.2, paragraphs (a)(3) and (m) are revised to read as follows:

§ 214.2 Special requirements for admission, extension, and maintenance of status.

* * * * *

(a)* * *

(3) *Special requirements.* (i) Notwithstanding the provisions of paragraph (a)(2) of this section, dependents of employees assigned to official duty in the United States may accept unrestricted employment based on agreements entered into between the Department of State and foreign states if the following conditions are met:

(A) The embassy of the foreign state in Washington, D.C. has made an official request to the Office of Protocol of the Department of State;

(B) The Office of Protocol recognizes the person as a dependent of an official employee; and

(C) The Office of Protocol has informed the embassy of the state that the dependent has permission to accept employment.

(ii) Dependents who obtain employment under this paragraph are responsible for payment of income taxes and Social Security contributions on any remuneration received. Further, immunity from civil or administrative jurisdiction in accordance with Article 37 of the Vienna Convention on Diplomatic Relations is waived for these dependents with respect to all matters arising out of their employment. The term "dependents" in this paragraph means the employee's:

(A) Spouse;

(B) Unmarried dependent children under 21 years of age;

(C) Unmarried dependent children under 25 years of age who are in full-time attendance at postsecondary educational institutions; or

(D) Unmarried children who are physically or mentally disabled.

* * * * *

(m) *NATO aliens.*—(1) *General.* Aliens classified as NATO–1 through NATO–4 are members of the armed forces of a country signatory to Article III of the Status of Forces Agreement (NATO). They are normally exempt from inspection under 8 CFR 235.1(c). Aliens classified as NATO–5 or –6 are civilian employees of the armed forces of a NATO member and may be authorized admission not to exceed one year. Aliens classified as NATO–7 are employed by NATO–1 through NATO–4 aliens and may be admitted for duration of status; if employed by NATO–5 or –6 aliens, admission may be authorized not to exceed one year.

(2) *Extension of Stay.* Any alien classified as a NATO–5 through NATO–7 may be granted extensions of stay in increments not to exceed one year.

(3) *Employment.* The dependents of an alien classified NATO–1 through NATO–7 may request authorization for employment if the state of their nationality has a reciprocal employment agreement with the Department of State. The names of the foreign states which have reciprocal employment agreements are available from the Department of State, Office of Consular Affairs, and the District Offices of the Service.

(Secs. 103, 214 of the Immigration and Nationality Act, as amended; 8 U.S.C. 1103, 8 U.S.C. 1184)

Dated: December 1, 1982.

Andrew J. Carmichael, Jr.,

Associate Commissioner, Examinations, Immigration and Naturalization Service.

BILLING CODE 1505-01-M

---

21 CFR Part 444

[Docket No. 82N-0355]

Antibiotic Drugs; Gentamicin Sulfate Injection

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the antibiotic drug regulations to provide for the inclusion of accepted standards for several new strengths of gentamicin sulfate injection. The manufacturer has supplied sufficient data and information to establish its safety and efficacy.

DATES: Effective December 17, 1982; comments, notice of participation, and request for hearing by January 17, 1983; data, information, and analyses to justify a hearing by February 15, 1983.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joan M. Eckert, National Center for Drugs and Biologics (HFN–140), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4290.

SUPPLEMENTARY INFORMATION: FDA has evaluated data submitted in accordance with regulations promulgated under section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357), as amended, with respect to a request for approval of several new strengths (0.4, 0.6, 0.8, 1.2, 1.6, and 2.4 milligrams per milliliter) of gentamicin sulfate injection. The agency has concluded that the data supplied by the manufacturer concerning this antibiotic drug are adequate to establish its safety and efficacy when the drug is used as directed in the labeling and that the regulations should be amended in Part 444 (21 CFR Part 444) to provide for the inclusion of accepted standards for the product.

The agency has determined pursuant to 21 CFR 25.24(b)(22) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Lists of Subjects in 21 CFR Part 444

Antibiotics, Oligosaccharide.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 507, 701(f) and (g), 52 Stat. 1055–1056 as amended, 59 Stat. 463 as amended (21 U.S.C. 357, 371 (f) and (g))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), § 444.220 is amended by revising the second

sentence in paragraph (a)(1) to read as follows:

PART 444—OLIGOSACCHARIDE ANTIBIOTIC DRUGS

§444.220 Gentamicin sulfate injection.

(a) * * *

(1) * * * Each milliliter contains gentamicin sulfate equivalent to either 0.4, 0.6, 0.8, 1.0, 1.2, 1.6, 2.0, 2.4, 10.0, or 40 milligrams of gentamicin. * * *

* * * * * *

This regulation announces standards that FDA has accepted in a request for approval of an antibiotic drug. Because this regulation is not controversial and because when effective it provides notice of accepted standards, notice and comment procedure and delayed effective date are found to be unnecessary and not in the public interest. The amendment, therefore, is effective December 17, 1982. However, interested persons may, on or before January 17, 1983, submit written comments on this rule to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may file objections to it and request a hearing. Reasonable grounds for the hearing must be shown. Any person who decides to seek a hearing must file (1) on or before January 17, 1983, a written notice of participation and request for hearing, and (2) on or before February 15, 1983, the data, information, and analyses on which the person relies to justify a hearing, as specified in 21 CFR 430.20. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that no genuine and substantial issue of fact precludes the action taken by this order, or if a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the person(s) who request(s) the hearing, making findings and conclusions and denying a hearing. All submissions must be filed in three copies, identified with the docket number appearing in the heading of this order and filed with the Dockets Management Branch.

The procedures and requirements governing this order, a notice of participation and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and grant or denial of a hearing are contained in 21 CFR 430.20.

All submissions under this order, except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall be effective December 17, 1982.

(Secs. 507, 701 (f) and (g), 52 Stat. 1055–1056 as amended, 59 Stat. 463 as amended (21 U.S.C. 357, 371 (f) and (g)))

Dated: December 10, 1982.

James C. Morrison,

Acting Assistant Director for Regulatory Affairs.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 7862]

Income Tax; Taxable Years Beginning After December 31, 1953; Foreign Bribes and International Boycotts

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to foreign bribes and international boycotts. Changes to the applicable tax law were made by the Tax Reform Act of 1976 and the Tax Equity and Fiscal Responsibility Act of 1982. These regulations affect controlled foreign corporations and Domestic International Sales Corporations paying bribes or making other illegal payments, or participating in or cooperating with certain international boycotts, and the shareholders of those corporations. These regulations also provide guidance to officers and employees of the Internal Revenue Service with respect to the treatment of those payments or that participation.

EFFECTIVE DATE: The regulations are effective for illegal payments paid after November 3, 1976, and for participation in or co-operation with an international boycott after November 3, 1976.

FOR FURTHER INFORMATION CONTACT: Charles C. Saverude of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3289).

SUPPLEMENTARY INFORMATION:

Background

On February 3, 1981, the Federal Register published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 952, 964, and 995 of the Internal Revenue Code of 1954 (46 FR 10510). The amendments were proposed to conform the regulations to sections 1062, 1063, and 1065 of the Tax Reform Act of 1976 (90 Stat. 1650, 1653-4). A public hearing was not held. After consideration of all comments regarding the proposed amendments, the amendments are adopted as revised by this Treasury decision.

Summary of Changes and Public Comments

Minor revisions of the proposed regulations have been made by the final regulations in response to public comments. A number of revisions have also been made to conform the regulations to a portion of section 288 of the Tax Equity and Fiscal Responsibility Act of 1982, relating to the new standard for determining the legality of payments to government officials or employees. Several commentators requested that the sentence appearing in the proposed regulations under sections 952 and 995 describing those persons having some relation to the corporation (officers, directors, employees, shareholders,

agents) whose payment of a bribe would be deemed to be payment by the corporation should be more limited in its application. Specifically, the commentators suggested that the sentence state that such payments by such persons must be made for the benefit of the corporation in order to be imputed to the corporation. That sentence has been revised accordingly.

A commentator suggested that the proposed regulations should reflect the additions to the Code of section 995(b)(1)(D) and (E). The changes in the regulations under section 995 relating to the above new statutory provisions are expected to be made in a separate regulation project and it is for this reason that final regulation § 1.995–2(a) has reserved subparagraphs (4) and (5).

A commentator was concerned that the proposed regulations under sections 952 and 995 provided only for the international boycott factor method of section 999(c)(1) for computing subpart F income and a deemed distribution from a DISC resulting from international boycott operations. The commentator requested that the proposed regulations under sections 952 and 995 clarify that the specifically attributable calculation of section 999(c)(2) was an alternative method of computation of international boycott income if certain conditions were met. The regulations referred to have been so revised.

Special Analyses

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is, therefore, not required. Although a notice of proposed rulemaking which solicited public comments was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure requirement of 5 U.S.C. 553 did not apply. Accordingly, the final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Drafting Information

The principal author of these regulations is Charles C. Saverude of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing these regulations both on matters of substance and style.

Adoption of Amendments to the Regulations

PART 1—[AMENDED]

Accordingly, the amendments to 26 CFR Part 1 are as follows:

Paragraph 1. Section 1.952–1 is amended as follows:

1. Paragraph (a)(1) is amended by removing the word "and".

2. Paragraph (a)(2) is amended by removing the period at the end of the subparagraph and inserting in lieu thereof a comma.

3. Paragraphs (a)(3) and (a)(4) are added immediately after subparagraph (2). The new subparagraphs read as follows:

§ 1.952–1 Subpart F income defined.

(a) *In general.* * * *

(3)(i) An amount equal to the product of—

(A) The income of such corporation other than income which—

(*1*) Is attributable to earnings and profits of the foreign corporation included in the gross income of a United States person under section 951 (other than by reason of this paragraph) (determined in accordance with the provisions of section 951 and § 1.951–1), or

(*2*) Is described in section 952(b), multiplied by

(B) The international boycott factor determined in accordance with the provisions of section 999(c)(1), or

(ii) In lieu of the amount determined under paragraph (a)(3)(i) of this section, the amount described under section 999(c)(2) of such international boycott income, and

(4) The sum of the amount of any illegal bribes, kickbacks, or other payments paid after November 3, 1976, by or on behalf of the corporation during the taxable year of the corporation directly or indirectly to an official, employee, or agent in fact of a government. An amount is paid by a controlled foreign corporation where it is paid by an officer, director, employee, shareholder or agent of such corporation for the benefit of such corporation. For purposes of this section, the principles of section 162(c) and the regulations thereunder shall apply. In the case of payments made after September 3, 1982, a payment is illegal if the payment would be unlawful under the Foreign Corrupt Practices Act of 1977 if the payor were a United States person. The fair market value of an illegal payment made in the form of property or services shall be considered the amount of such illegal payment.

* * * * * * *

Par. 2. Section 1.964–1 is amended by revising the flush language in paragraph (a) and revising paragraph (f) to read as follows:

§ 1.964–1 Determination of the earnings and profits of a foreign corporation.

(a) *In general.* * * *

The computation described in the preceding sentence may be made by following the procedures described in paragraphs (a) (1) through (5) of this section in an order other than the one listed, as long as the result so obtained would be the same. In determining earnings and profits, or the deficit in earnings and profits, of a foreign corporation under section 964, the amount of any illegal bribe, kickback, or other payment (within the meaning of section 162(c), as amended by section 288 of the Tax Equity and Fiscal Responsibility Act of 1982 in the case of payments made after September 3, 1982, and the regulations thereunder) paid after November 3, 1976, by or on behalf of the corporation during the taxable year of the corporation directly or indirectly to an official, employee, or agent in fact of a government shall not be taken into account to decrease such earnings and profits or to increase such deficit. No adjustment shall be required under subparagraph (2) or (3) of this paragraph unless it is material. Whether an adjustment is material depends on the facts and circumstances of the particular case, including the amount of the adjustment, its size relative to the general level of the corporation's total assets and annual profit or loss, the consistency with which the practice has been applied, and whether the item to which the adjustment relates is of a recurring or merely a nonrecurring nature. For the treatment of earnings and profits whose distribution is prevented by restrictions and limitations imposed by a foreign government, see section 964(b) and the regulations thereunder.

* * * * *

(f) *Determination of earnings and profits as if a domestic corporation*—(1) *In general.* If the books of account regularly maintained by a foreign corporation for the purpose of accounting to its shareholders are kept in U.S. dollars and in accordance with accounting principles generally accepted

in the United States, and if it is so elected by or on behalf of such corporation, the earnings and profits of the foreign corporation for a taxable year shall, except as otherwise provided in paragraph (f)(2) of this section, be determined in every respect as if it were a domestic corporation. Such election shall be effective only for the taxable year with respect to which the election is made. Once made, such election shall be irrevocable. See paragraph (c)(3) of this section for the time and manner in which an election may be made on behalf of a foreign corporation.

(2) *Illegal payments.* The amount of any illegal bribe, kickback, or other payment (within the meaning of section 162(c), as amended by section 288 of the Tax Equity and Fiscal Responsibility Act of 1982 in the case of payments made after September 3, 1982, and the regulations thereunder) paid after November 3, 1976, by or on behalf of the corporation during the taxable year of the corporation directly or indirectly to an official, employee, or agent in fact of a government shall not be taken into account to decrease earnings and profits or increase the deficit in earnings and profits otherwise determined under paragraph (f)(1) of this section.

Par. 3. Section 1.995–2 is amended as follows:

1. The introductory text of paragraph (a) is revised.

2. Paragraph (a)(4) is removed.

3. Paragraph (a)(5) of the current regulations is redesignated as paragraph (a)(7).

4. Paragraph (a)(4) and (a)(5) are reserved.

5. A new paragraph (a)(6) is added.

6. Paragraph (b) is amended as follows:

a. The words "paragraph (a) (1) through (a) (4)" are removed from paragraph (b)(1), paragraph (b)(2) (i), the flush material following paragraph (b)(2) (ii) and paragraph (b)(3) each time they appear and the words "paragraph (a) (1) through (a) (6)" are inserted in lieu thereof.

b. The words "paragraph (a) (5) are removed from that portion of paragraph (b)(2) which precedes paragraph (b)(2)(i) and from the flush material following paragraph (b)(2) (ii) each time they appear and the words "paragraph (a) (7)" are inserted in lieu thereof.

c. By striking out all that follows the final semicolon in paragraph (b)(3) and adding in lieu thereof "and so forth, and finally to the amount described in paragraph (b)(6) of this paragraph."

These revised and added provisions read as follows:

§ 1.995–2 Deemed distributions in qualified years.

(a) *General rule.* Under section 995 (b) (1), each shareholder of a DISC shall be treated as having received a distribution taxable as a dividend with respect to his stock on the last day of each taxable year of the DISC, in an amount which is equal to his pro rata share of the sum (as limited by paragraph (b) of this section), of the following seven items:

* * * * *

(4) [Reserved].

(5) [Reserved].

(6) The sum of—

(i) An amount equal to one-half of the excess (if any) of the taxable income of the DISC for such year (computed as provided in § 1.991–1 (b) (1)) over the sum of the amounts deemed distributed for the taxable year in accordance with paragraphs (a)(1), (2), (3), (4) and (5) of this section,

(ii) (A) An amount equal to the amount under subdivision (i) of paragraph (a) (6) of this section multiplied by the international boycott factor as determined under section 999 (c) (1) , or

(B) In lieu of the amount determined under subdivision (ii) (A) of paragraph (a) (6) of this section, the amount described under section 999 (c) (2) of such international boycott income, and

(iii) An amount equal to the sum of any illegal bribes, kickbacks, or other payments paid by or on behalf of the DISC directly or indirectly to an official, employee, or agent in fact of a government. An amount is paid by a DISC where it is paid by any officer, director, employee, shareholder, or agent of the DISC for the benefit of such DISC. For purposes of this section, the principles of section 162 (c) and the regulations thereunder shall apply. The fair market value of an illegal payment made in the form of property or services shall be considered the amount of such illegal payment.

(7) * * *

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: December 7, 1982.

John E. Chapoton,

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 901

Permanent State Regulatory Program of Alabama

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: The Secretary of the Interior is extending the deadline for the State of Alabama to meet certain conditions of approval of its State permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

On October 7, 1982, the Alabama Surface Mining Commission requested an extension for meeting those conditions necessitating amendments to Alabama's regulations. The conditions affected by Alabama's request are those found at 30 CFR 901.11(b)–(m) and are set forth at 47 FR 22057–22058, (May 20, 1982).

OSM proposed a rule on November 1, 1982 (47 FR 49411–49412), that would extend the deadline to September 1, 1983. After considering all the information contained in the Administrative Record, including public comments, the Secretary has decided to grant Alabama's request. The Secretary hereby publishes amendments to the Federal rules contained in 30 CFR 901.11 to effect this action.

EFFECTIVE DATE: December 17, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. John T. Davis, Director, Alabama Field Office, Office of Surface Mining, 228 West Valley Avenue, 3rd Floor, Homewood, Alabama 35209, Telephone: (205) 254–0890.

SUPPLEMENTARY INFORMATION:

I. Background on the Alabama State Program

Information regarding the general background on the Alabama State program, including the Secretary's Findings, the disposition of comments and a detailed explanation of the conditions of approval of the Alabama program can be found in the May 20, 1982 **Federal Register** (47 FR 22030–22058).

II. Background on Conditional Approval

Under 30 CFR 732.13(j), the Secretary may conditionally approve a State permanent regulatory program which contains minor deficiencies where the

deficiencies are of such a size and nature as to render no part of the program incomplete, the State is actively proceeding with the steps to correct the deficiencies, and the State agrees to correct the deficiencies according to a schedule set in the notice of conditional approval.

III. Discussion of the Extension Request

The Alabama program was conditionally approved on May 20, 1982 (47 FR 22030–22058). In the notice of approval, the Secretary published the schedule for Alabama to resolve each of the 13 conditions on the approval of that State's regulatory program. In a letter to the Director, OSM, dated October 7, 1982, the Alabama Surface Mining Commission requested an extension for meeting those conditions necessitating amendments to Alabama's regulations. The State requested that the deadline be extended to September 1, 1983. The conditions affected by Alabama's request are those found at 30 CFR 901.11(b)–(m) and are set forth at 47 FR 23057–23058 (May 20, 1982).

The State indicated that it needed additional time to comply with new requirements of the Alabama Administrative Procedures Act (AAPA), including providing an opportunity for the Alabama Legislature to review the proposed changes to the State's rules during the next session of the Alabama Legislature in 1983.

On November 1, 1982 (47 FR 49411–49412), the Secretary announced that he was seeking public comment on the proposed extensions of the deadline for Alabama to meet the conditions found at 30 CFR 901.11(b)–(m). The comment period closed on December 1, 1982.

IV. Secretary's Findings

The Secretary has carefully reviewed Alabama's extension request. Based on the information contained in the administrative record, including the public comments, the Secretary makes the following findings:

1. Alabama's request for an extension of the deadline to meet those conditions necessitating changes to the State's rules is premised on the need for additional time to complete new rulemaking procedures prescribed by the AAPA.

2. One of the requirements of the AAPA is that the Alabama Legislature have an opportunity to review the proposed changes to Alabama's surface and underground coal mining rules. This cannot occur until the 1983 session of the Alabama Legislature.

3. Based on the above information, the Secretary is satisfied that Alabama is proceeding to act in good faith and that the granting of an additional extension of time will not change the classification of any of the affected conditions from being minor.

V. Disposition of Comments

Although public comments were requested, no substantive comments were received.

VI. Secretary's Decision

Based on the above findings, the Secretary hereby grants Alabama's request for an extension to September 1, 1983, of the deadline for Alabama to meet the conditions found at 30 CFR 901.11(b)–(m).

VII. Procedural Matters

Paperwork Reduction Act. There are no information collection requirements in 30 CFR 901.11 requiring approval by the Office of Management and Budget under 44 U.S.C. 3507.

National Environmental Policy Act. The Secretary has determined that pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no Environmental Impact Statement need be prepared on this rulemaking.

Executive Order 12291. On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

Regulatory Flexibility Act. Pursuant to the Regulatory Flexibility Act, Pub. L. 96–354, I have certified that this proposed rule will not have a significant economic impact on a substantial number of small entities.

EPA Concurrence

On May 13, 1982, the Administrator of the Environmental Protection Agency transmitted a written concurrence on the Alabama permanent program. The deadline extension approved in this document is not an aspect of the Alabama program which relates to air or water quality standards promulgated under the authority of the Federal Clean Water Act, as amended (33 U.S.C. 1151–1175), and the Clean Air Act, as amended (42 U.S.C. 1857) *et seq.*

List of Subjects in 30 CFR Part 901

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: December 10, 1982.

Daniel N. Miller, Jr.,

Assistant Secretary for Energy and Minerals.

PART 901—ALABAMA

Accordingly, 30 CFR Part 901 is amended as set forth herein.

1. The authority citation for Part 901 is:

Authority: Sec. 503, Pub. L. 95–87, 91 Stat. 407 (30 U.S.C. 1253).

§ 901.11 [Nomenclature change]

2. In Part 901, § 901.11, paragraphs (b) through (m) are amended by substituting "September 1, 1983" for "December 1, 1982," each time the latter date appears.

BILLING CODE 4310-05-M

---

30 CFR Part 914

Removal of One of the Conditions of Approval of the Indiana Permanent Program Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: This document amends 30 CFR Part 914 by removing one of the conditions of approval of the Indiana permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The specific condition concerned in this rulemaking is 30 CFR 914.11(b)(2), which required Indiana to amend its permit application forms to require the applicant to certify that all reclamation fees due under 30 CFR 870.12 have been paid.

On September 1, 1982, Indiana submitted its revised permit application forms to satisfy this condition. After providing the public an opportunity to review and comment on the State's amended permit application forms, the Secretary has decided that Indiana has now met the requirements of 30 CFR 914.11(b)(2). Accordingly, the Secretary hereby publishes amendments to the Federal rules contained in 30 CFR Part 914 to effect this action.

EFFECTIVE DATE: December 17, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Richard D. McNabb, Director, Indiana Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204, Telephone: (317) 269–2600.

SUPPLEMENTARY INFORMATION:

I. Background on the Indiana Program

Information pertinent to the general background on the Indiana State program, including the Secretary's Findings, the disposition of comments and a detailed explanation of the conditions of approval of the Indiana program can be found in the July 26, 1982, **Federal Register** (47 FR 32071–32108).

II. Background on the Secretary's Conditional Approval and Indiana's Program Amendment

One of the conditions of the Secretary's approval, 30 CFR 914.11(b)(2), stated that Indiana must amend its permit application forms to require the applicant to certify that all reclamation fees due under 30 CFR 870.12 have been paid.

On September 1, 1982, Indiana submitted its revised permit application forms to satisfy the condition set forth in 30 CFR 914.11(b)(2). *See* IN–0290.

OSM published a notice in the **Federal Register** on October 29, 1982, announcing receipt of these modified permit application forms and inviting public comment on whether the proposed program amendment corrected the deficiency (47 FR 49301–49032). The comment period closed on November 29, 1982. A public hearing scheduled November 19, 1982, was not held because no one expressed a desire to present testimony.

III. Secretary's Findings

The Secretary finds that the amended permit application forms submitted by Indiana on September 1, 1982, address the requirements of the condition set forth at 30 CFR 914.11(b)(2). The Secretary finds further that the revised permit application forms coupled with the permit approval requirements of Indiana rule 310 IAC 12–3–112(m) provide for the assurance that the applicant submit proof that all reclamation fees have been paid. Therefore, the Secretary finds that Indiana's program is now no less effective than 30 CFR 786.19(h). The modified permit application forms require the applicant to affirm that all reclamation fees due as required by 30 CFR 870.12 have been paid to the U.S. Department of the Interior, Office of Surface Mining.

IV. Public Comments

While public comments were requested, no substantive comments were received.

V. Secretary's Decision

Accordingly, the Secretary hereby approves Indiana's amended permit application forms and the condition set forth at 30 CFR 914.11(b)(2) is removed.

VI. Procedural Matters

Paperwork Reduction Act. There are no information collection requirements in 30 CFR 914.11(b) requiring approval by the Office of management and Budget under 44 U.S.C. 3507.

National Environmental Policy Act. The Secretary has determined that pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no Environmental Impact Statement need be prepared on this rulemaking.

Executive Order 12291. On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

Regulatory Flexibility Act. Pursuant to the Regulatory Flexibility Act, Pub. L. 96–354, I have certified that this proposed rule will not have a significant economic impact on a substantial number of small entities.

EPA Concurrence. On July 9, 1982, the Administrator of the Environmental Protection Agency transmitted a written concurrence on the Indiana program. The condition being addressed in this document is not an aspect of the Indiana program which relates to air or water quality standards promulgated under the authority of the Federal Clean Water Act, as amended (33 U.S.C. 1151–1175), and the Clean Air Act, as amended (42 U.S.C. 1857, *et seq.*).

List of Subjects in 30 CFR Part 914

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, Part 914 of Title 30 is amended as set forth herein.

Dated: December 10, 1982.

Daniel N. Miller, Jr.,

Assistant Secretary for Energy and Minerals.

PART 914—INDIANA

Accordingly, Part 914 of Title 30 is amended as follows:

1. The authority citation for Part 914 is:

Authority: Pub. L. 95–87; Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

2. 30 CFR 914.10 is revised to read as follows:

§ 914.10 State regulatory program approval

The Indiana State program, as submitted on March 3, 1980, as amended and clarified on June 4, 1980, as resubmitted on September 28, 1981, and clarified on December 8, 1981, April 8, 1982, May 18–19, 1982, and May 26, 1982, is conditionally approved, effective July 29, 1982. Beginning on that date, the Indiana Department of Natural Resources shall be deemed the regulatory authority in Indiana for all surface coal mining and reclamation operations and all coal exploration operations on non-Federal and non-Indian lands. Only surface coal mining and reclamation operations on Non-Federal and non-Indian lands shall be subject to the provisions of the Indiana permanent regulatory program. Beginning on December 17, 1982, the program includes program amendments submitted on September 1, 1982.

Copies of the approved program, together with copies of the letter of the Department of Natural Resources agreeing to the conditions of 30 CFR 914.11, are available at:

Office of Surface Mining, Room 5315, 1100 L Street, NW., Washington, D.C. 20240

Office of Surface Mining, 46 East Ohio Street Indianapolis, Indiana 46204

Indiana Department of Natural Resources, Suite 202, 309 W. Washington Street, Indianapolis, Indiana 46204

3. Section 914.11 is amended by removing and reserving paragraph (b)(2).

§ 914.11 Conditions of State regulatory approval.

BILLING CODE 4310–05–M

SELECTIVE SERVICE SYSTEM

32 CFR Part 1662

Selective Service Regulations; Freedom of Information Act Procedures

AGENCY: Selective Service System.

ACTION: Final rule.

SUMMARY: Fees for the processing of Freedom of Information Act requests are revised to assure the recovery of costs of such processing.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Henry N. Williams, General Counsel, Selective Service System, Washington, D.C. 20435 Phone: (202) 724–1167.

SUPPLEMENTARY INFORMATION: This amendment to Selective Service Regulations was published for comment pursuant to 5 U.S.C. 552 on November 5, 1982 at 47 FR 50310. We received comments from three persons, and, in light of these comments, we have clarified the text of the rule.

As required by Executive Order 12291, I have determined that this proposed rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub.L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612). I have determined that these regulations do not have significant economic impact on a substantial number of small entities.

List of Subjects in 32 CFR Part 1662

Freedom of Information.

Dated: December 13, 1982.

Thomas K. Turnage,

Director.

PART 1662—[AMENDED]

32 CFR 1662.6 is revised to read:

§ 1662.6 Fees.

(a) Following is the fees schedule for the search and reproduction of information available under the Freedom of Information Act (5 U.S.C. 552), as amended.

(1) Search for records—the product of the time used in the search, in units of ¼ hour (a fraction thereof to be counted a ¼ hour) X the hourly pay of the employee making the search. $5.00 of the cost of each search will be waived.

(2) Duplication of records. The charge for office copy reproduction is 25 cents per page. The charge for shelf stock is 10 cent per page.

(3) Other—When no specific fee has been established for a service, or the request for a service does not fall under one of the above categories due to the amount or type thereof, the Associate Director for Administration is authorized to establish an appropriate fee based on "direct costs" as provided in the Freedom of Information Act and in accordance with Office of Management and Budget Circular No. A–25, "User Charges." Examples of services covered by this provision include searches involving computer time or special travel, transportation, or communications costs.

(b) If records requested under this part are stored elsewhere than the headquarters of the Selective Service System (SSS) at Washington, D.C., the special costs of retrieving and returning such records to the headquarters for review will be added to the search costs.

(c) A search will not be undertaken until the requester pays the estimated cost thereof in excess of $5.00. No other service will be rendered until the requester pays the estimated cost thereof.

(d) Fees must be paid in full prior to issuance of requested copies. In the event the requester is in arrears for previous requests, copies of records will not be provided for any subsequent request until the arrears have been paid in full.

(e) Remittances shall be in the form either of a personal check or bank draft drawn on a bank in the United States, or a postal money order. Remittances shall be made payable to the order of the Selective Service System and mailed or delivered to the Records Manager, Selective Service System, Washington, D.C. 20435.

(f) A receipt for fees paid will be given upon request. Refund of fees paid for services actually rendered will not be made. Payments of estimated costs in excess of actual costs will be refunded when the excess payment exceeds 99 cents.

(g) The Associate Director for Administration or an officer designated by the Associate Director for Administration shall, in accordance with the Freedom of Information Act, waive all or part of any fee provided for in this section when the Associate Director for Administration or the designated officer "* * * determines that waiver or reduction of the fee is in the public interest because furnishing the information can be considered as primarily benefiting the general public."

[FR Doc. 82–34237 Filed 12–16–82; 8:45 am]

BILLING CODE 8015–01–M

POSTAL SERVICE

39 CFR Parts 3, 4, 6, and 8

Bylaws of Board of Governors; Miscellaneous Changes

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The bylaws of the Board of Governors are revised to reorganize the Board's administrative staff function and to clarify matters requiring notification to, or approval by, the Board.

EFFECTIVE DATE: December 7, 1982.

FOR FURTHER INFORMATION CONTACT: Louis A. Cox, (202) 245–4632.

SUPPLEMENTARY INFORMATION: Staff administration for the Board is reorganized: to establish an Office of the Board of Governors; to require the Chairman of the Board to set the agenda for meetings; to provide that the Secretary of the Board is appointed by the Board, serves at its pleasure, and is responsible for carrying out the functions of the Office of the Board of Governors; and to make it clear that regular meetings may be held outside of Washington, D.C. The list of decisions reserved to the Board is revised to include approval of official statements concerning major policy changes, positions concerning Postal Service petitions to the Supreme Court, the annual financial statements, and the annual comprehensive statement to Congress on postal operations. Advance notice is required concerning the candidates which the Postmaster General is considering for appointment to fill vacancies in the officer positions within postal management. Information is required concerning Equal Employment Opportunity performance, major litigation activities, significant accounting changes, and other matters with important policy implications.

List of Subjects in 39 CFR Parts 3, 4, 6 and 8

Organization and functions (Government agencies), Administrative practice and procedure, Reporting and recordkeeping requirements, Postal Service.

Accordingly, 39 CFR is amended as follows:

PART 3—BOARD OF GOVERNORS [ARTICLE III]

1. In § 3.4 redesignate paragraphs (f) through (q) as paragraphs (g) through (r); redesignate paragraphs (r) through (u) as paragraphs (u) through (x); revise paragraph (c) and add new paragraphs (f), (s), and (t) to read as follows:

§ 3.4 Matters reserved for decision by the Board.

* * * * *

(c) Election of the Chairman of the Board of Governors (by the Governors, 39 U.S.C. 202 (a)), the Vice Chairman of the Board, and the appointment of the Secretary of the Board.

* * * * *

(f) Approval of the annual financial statements of the Postal Service following receipt of the annual report of

the Postal Service's independent, certified public accounting firm.

* * * * *

(s) Approval of official statements adopting major policy positions or departing from established major policy positions, and of official positions on legislative proposals having a major impact on the Postal Service.

(t) Approval of all positions taken with the Department of Justice on petitioning the Supreme Court of the United States for writs of certiorari.

2. In § 3.7 redesignate paragraph (b) as paragraph (d) and add new paragraphs (b) and (c) to read as follows:

§ 3.7 Information furnished to Board—Program review.

* * * * *

(b) To enable the Board to review the effectiveness of the Postal Service's equal employment opportunity program, performance data relating to this program shall be furnished to the Board at least quarterly. This data shall be categorized in such manner as the Board, from time to time, specifies.

(c) To enable the Board to consider candidates before the fact, the Postmaster General shall furnish information to the Board in advance of each calendar quarter of any vacancies that are anticipated during that quarter in the positions of:

Senior Assistant Postmasters General
Assistant Postmasters General
Regional Postmasters General
General Counsel
Chief Inspector
Controller
Treasurer
Consumer Advocate
Executive Assistant to the Postmaster General
Judicial Officer

The Postmaster General shall also furnish written information on the candidates for such appointments. In the event of unanticipated vacancies, the Postmaster General shall furnish similar candidate information to the Board, not less than thirty days prior to any appointment action.

* * * * *

3. Section 3.8 is revised, and new § 3.9 is added to read as follows:

§ 3.8 Information furnished to Board—Special reports.

To insure that the Board receives significant information of developments meriting its attention, postal management shall bring to the Board's attention the following matters:

(a) Major developments in personnel areas, including but not limited to equal employment opportunity, career development and training, and grade and salary structures.

(b) Major litigation activities. Postal management shall also notify the Board in a timely manner whenever it proposes to seek review by any United States Court of Appeals of an adverse judicial decision.

(c) Any significant changes proposed in the Postal Service's system of accounts or methods of accounting.

(d) Matters of special importance, including but not limited to important research and development initiatives, major changes in Postal Service organization or structure, major law enforcement activities, and other matters having a significant impact upon the relationship of the Postal Service with its employees, with any major branch of Government, or with the general public.

(e) Other matters having important policy implications.

§ 3.9 Office of the Board of Governors.

There shall be located in Washington, D.C. an Office of the Board of Governors of the United States Postal Service. It shall be the function of this Office to provide staff support for the Board, as directed by the Chairman of the Board, to enable the Board to carry out effectively its duties under the Reorganization Act. To further assist the Board in discharging its responsibilities, the Office of the Board, upon the request of any Governor, shall provide for staff support at that Governor's place of work. Such on-site support shall be limited to those services directly relating to a Governor's duties under the Reorganization Act that cannot reasonably be performed at postal headquarters and shall be provided in the most efficient manner possible.

PART 4—OFFICERS [ARTICLE IV]

4. In § 4.1 paragraph (a) is revised to read as follows:

§ 4.1 Chairman.

* * * * *

(a) Shall preside at all regular and special meetings of the Board, and shall set the agenda for such meetings;

* * * * *

5. Section 4.6 is revised to read as follows:

§ 4.6 Secretary of the Board.

The Secretary of the Board of Governors is appointed by the Board and serves at the pleasure of the Board. The Secretary shall be responsible for carrying out the functions of the Office of the Board of Governors, under the direction of the Chairman of the Board. The Secretary shall also issue notices of meetings of the Board and its committees, keep minutes of these meetings, and monitor compliance with all statutes and regulations dealing with public observation of meetings. The Secretary shall perform all those duties incident to this office, including those duties assigned by the Board or by the Chairman of the Board. The Chairman may designate such assistant secretaries as may be necessary to perform any of the duties of the Secretary.

PART 6—MEETINGS [ARTICLE VI]

6. Section 6.1 is revised to read as follows:

§ 6.1 Regular meetings, annual meeting.

The Board shall neet regularly on the first Tuesday of each month. The first regular meeting of each calendar year is designated as the annual meeting. Consistent with the provisions of § 7.5 of these bylaws, the time or place of a regular or annual meeting may be varied by action of the Chairman, or by a recorded vote of a majority of the members of the Board, with the earliest practicable notice to the other members of the Board and to the Secretary. If the Chairman varies the time or place of a meeting, he shall give not less than 8 days' notice to the other members of the Board and to the Secretary. The Secretary shall distribute to the members an agenda setting forth the proposed subject matter for any regular or annual meeting in advance of the meeting.

PART 8—REPORTS AND RECORDS [ARTICLE VIII]

7. Section 8.2 is revised to read as follows:

§ 8.2 Reports to the executive and legislative branches.

(a) No later than the annual meeting of the Board, the Postmaster General shall give to the Board an annual report concerning the operations of the Postal Service, as required by 39 U.S.C. 2402. Upon approval of this report, or after making any changes it considers appropriate, the Board shall transmit this report to the President and the Congress. The Postmaster General shall make the necessary arrangements for the printing of the report and its sale to the public.

(b) Prior to the submission of the annual budget to the Congress, the Postmaster General shall submit to the Bord a comprehensive statement on postal operations containing the information required under 39 U.S.C.

2401(g). Upon approval of this statement, or after making any changes the Board considers appropriate, the statement shall be transmitted to the Congress, as required by 39 U.S.C. 2401(g).

(39 U.S.C. 202, 205, 401)

Louis A. Cox,

General Counsel.

BILLING CODE 7710-12-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Docket No. NH-543; A-1-FRL 2246-4]

Approval and Promulgation of Implementation Plans—New Hampshire; Group I VOC Compliance Schedules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving, in part, State implementation plan (SIP) revisions submitted by the State of New Hampshire. These revisions will ensure reduced emissions from major sources of volatile organic compounds (VOC). The intended effect of this action is to satisfy conditions for Part D plan requirements for nonattainment areas under Section 172(b)(2) of the Clean Air Act.

EFFECTIVE DATE: January 17, 1983.

FOR FURTHER INFORMATION CONTACT: Alan E. Dion, (617) 223-5130.

SUPPLEMENTARY INFORMATION: EPA conditionally approved New Hampshires' VOC regulations in the April 11, 1980 **Federal Register** (45 FR 24869) and required submittal of permits with compliance schedules for 9 major sources of VOC. Region I gave Immediate Final approval to 6 of these sources in the June 7, 1982 **Federal Register** (47 FR 24552). No action was taken on the other three sources since we felt their permits were still not complete, and there was some question whether they were in compliance. EPA decided to utilize an Immediate Final Notice for the six permits because we did not anticipate that the rulemaking would generate any comments or controversy. In that rulemaking we stated that we would withdraw our approval and publish a Notice of proposed Rulemaking (NPR) if anyone commented on the action. We received comments form the Conservation Law Foundation (CLF) regarding approval of the permits for Oak Materials Group and Markem Corporation, and therefore withdrew our approval on August 31, 1982 (47 FR 38321). We then proposed approval of these 6 schedules in the same day's **Federal Register** (47 FR 38364). No additional public comments were received on the NPR.

The State has notified EPA that Oak Materials and Markem have altered their compliance schedules and requested revisions to their permits. Since the state Air Resources Agency has not yet issued revised permits for these sources, it would not be appropriate for us to take final action on the existing schedules at this time. Once we receive the revised compliance schedules for Markem and Oak materials we will evaluate them, and if appropriate, repropose approval. Since the issues raised by CLF deal only with these two sources, EPA will defer any evaluation and response to CLF's comments until after we have received and reviewed the revised schedules.

Action

EPA is approving compliance schedules for Mobil Oil Corporation; ATC Petroleum, Inc.; Velcro USA, Inc.; and Nashua Corporation's facility at Nashua, EPA is taking no action on Ideal Tape, Essex Group, Nashua Corporation's Merrimack Facility, Oak Materials Group and Markem Corporation.

Under Executive Order 12291, today's action is not "Major". It has been submitted to the Office of Management and Budget (OMB) for review. Any comments from OMB to EPA, and any EPA response, are available for public inspection at Room 2111, JFK Federal Building, Boston, MA 02203.

Under Section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 15, 1983. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

(Sec. 110(a) and Sec. 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410(a) and 7601(a)).)

Note.—Incorporation by reference of the State Implementation Plan for the State of New Hampshire was approved by the Director of the Federal Register on July 1, 1982.

Dated: December 10, 1982.

Anne M. Gorsuch,

Administrator.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart EE—New Hampshire

1. Section 52.1520 is amended by adding paragraph (c)(21) as follows:

§ 52.1520 Identification of plan.

* * * * *

(c) * * *

(21) Operating permits with compliance schedules for VOC sources were submitted May 2, 1980, May 16, 1980, November 20, 1981 and January 8, 1982. Approved are operating permits for Mobil Oil Corporation; ATC Petroleum, Inc.; Velcro USA, Inc.; and Nashua Corporation's facility at Nashua.

2. Section 52.1527 is amended by adding paragraphs (c)(4)–(8) as follows:

§ 52.1527 Rules and regulations.

* * * * *

(c) Part D—No Action—EPA is neither approving nor disapproving the following elements of the revisions:

(4) Markem Corporation, submitted May 2, 1980.

(5) Oak Materials Group, submitted May 2, 1980.

(6) Ideal Tape, submitted May 16, 1980.

(7) Essex Group, submitted May 16, 1980.

(8) Nashua Corporation's Merrimack facility, submitted May 16, 1980.

[FR Doc. 82-34297 Filed 12-16-82; 8:45 am]

BILLING CODE 6560-50-M

40 CFR Part 52

[A-10-FRL-2248-6]

Revision to Washington State Implementation Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rulemaking addresses State Implementation Plan (SIP) revisions submitted by the State of Washington Department of Ecology (DOE) pursuant to the requirements of Part D of the 1977 Clean Air Act (hereafter referred to as the Act). In today's action, EPA is approving revisions to the ozone (O_3) attainment plan for the Vancouver portion of the

Portland, Oregon-Vancouver, Washington nonattainment area.

EFFECTIVE DATE: February 15, 1983.

ADDRESSES: Copies of the materials relevant to the SIP may be examined during normal business hours at:

Central Docket Section (10A–82–10), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460

Air Programs Branch, M/S 532, Environmental Protection Agency Region 10, 1200 Sixth Avenue, Seattle, Washington 98101

State of Washington, Department of Ecology, PV–11, 4224 Sixth Avenue, Southeast, Rowe Six, Building #4, Lacey, Washington 98504

Copy of the State's submittal may be examined at: The Office of Federal Register, 1100 L Street, NW, Room 8401, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Richard F. White, Air Programs Branch, M/S 532, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, WA 98101, Telephone No. (206) 442–4016; FTS: 399–4016.

SUPPLEMENTARY INFORMATION:

I. Background

The Clean Air Act requires any area which has requested and received an attainment date extension for O_3 or carbon monoxide to submit by July 1, 1982 a revised SIP containing all measures needed to provide for attainment by 1987. Section 172(c), 42 U.S.C. 7502(c), and Section 129(c) (uncodified), Pub. L. 95–95.

On July 16, 1982, the State of Washington DOE officially submitted the 1982 Vancouver O_3 SIP revisions to EPA. On September 30, 1982 (47 FR 43083) EPA proposed to approve the revisions. Today's action gives final approval to the Vancouver O_3 SIP revisions, including DOE revisions to WAC 173–490 (Control of Volatile Organic Compounds). Additional background information on today's action can be found in the September 30, 1982 proposed rulemaking.

II. Response to Comments

A 30-day public comment period was provided on the proposed rulemaking. No comments were received.

III. Plan Review

Requirements for SIP revisions for areas with attainment date extensions are described in a policy notice published on January 22, 1981 (46 FR 7182). EPA reviewed the revised Vancouver O_3 SIP for conformity with these requirements. The results of EPA's review are contained in a technical support document which is available at the offices listed under "Addresses" above.

Briefly, EPA found that the Vancouver O_3 SIP revisions provide for attainment of the O_3 standard by December 31, 1987 and require "reasonable further progress" (RFP) in the period before attainment. The SIP includes a contingency plan to be implemented in the event that RFP is jeopardized. The principal control measure in the SIP is DOE regulation WAC 173–490 (Control of Volatile Organic Compounds). This regulation will reduce emissions of O_3 precursors from stationary sources. The plan also provides for emission reductions from transportation sources.

IV. Summary of Rulemaking Action

EPA approves the revised Vancouver O_3 attainment plan as meeting the requirements for areas with attainment date extensions.

Under Executive Order 12291, today's action is not "major". It has been exempted from review by the Office of Management and Budget.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this section must be filed in the United States Court of Appeals for the appropriate circuit by February 15, 1983. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2)).

(Secs. 171 through 173 of the Clean Air Act, as amended (42 U.S.C. 7407(d), 7410(a), 7501 through 7503, and 7601(a)))

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Carbon monoxide, Nitrogen dioxide, Lead, Particulate matter, Hydrocarbons, Intergovernmental relations.

Note.—Incorporation by reference of the Implementation Plan for the State of Washington was approved by the Director of the Office of Federal Register in November 1982.

Dated: December 10, 1982.

Anne M. Gorsuch,

Administrator.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40 Code of Federal Regulations is amended as follows:

Subpart WW—Washington

1. In § 52.2470, paragraph (c)(32) is added as follows:

§ 52.2470 Identification of plan.

* * * * *

(c) * * *

(32) On July 16, 1982 the State of Washington Department of Ecology submitted implementation plan revisions which build upon those submitted in May 1979. The revisions include of the following elements:

(i) An ozone attainment plan for the Vancouver, Washington, nonattainment area.

(ii) Amendments to WAC 173–490—Volatile Organic Compounds (VOC). On December 17, 1982 EPA published final rulemaking action on the Washington SIP as described below:

(A) Approval

(1) Vancouver Ozone SIP

(2) Amendments to WAC 173–490

2. Section 52.2472 is amended by revising paragraph (d) to read as follows:

§ 52.2472 Extension.

* * * * *

(d) The Administrator hereby extends the attainment date for ozone in the Vancouver portion of the Portland, Oregon-Vancouver, Washington nonattainment area to December 31, 1987.

3. Section 52.2478 is amended by revising the Portland Interstate AQCR (Washington portion) part of the Table and adding footnote "n."

§ 52.2478 Attainment dates for national standards.

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101-47

[FPMR Amdt. H-135]

Utilization of Excess Real Property; Reimbursement for Excess Real Property Transfers

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This regulation requires that Federal agencies be charged 100 percent of estimated fair market value for excess real property transferred to them. In keeping with the Administration's policy of reducing Federal spending and encouraging the optimum use of Federal real property, this regulation imposes a 100 percent reimbursement requirement, with very limited exceptions. This requirement is intended to encourage Federal agencies to scrutinize their real property needs more thoroughly and to develop more meaningful utilization plans, to aid in accomplishing the Administration's objectives.

DATE: Effective December 17, 1982.

FOR FURTHER INFORMATION CONTACT: James H. Pitts, Office of Real Property (202-535-7067).

SUPPLEMENTARY INFORMATION: GSA has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

Current regulations require that Federal agencies be charged 50 percent of the appraised fair market value of excess real property transferred to them, but provide for an exception to that requirement under certain circumstances. In keeping with the Adminstration's policy of reducing Federal spending and encouraging the optimum use of Federal real property, this regulation imposes a 100 percent reimbursement requirement, with very limited exceptions. This requirement is intended to encourage Federal agencies to scrutinize their real property needs more thoroughly and to develop more meaningful utilization plans, to aid in accomplishing the Administration's objectives.

List of Subjects in 41 CFR Part 101-47

Surplus Government property, Government property management.

Accordingly, 41 CFR Part 101-47 is amended as follows:

Subpart 101-47.2—Utilization of Excess Real Property

Paragraphs (f)(1) and (f)(2) of § 101-47.203-7 are revised to read as follows:

§ 101-47.203-7 Transfers.

* * * * *

(f) * * *

(1) Where the transferor agency has requested the net proceeds of the transfer pursuant to section 204 (c) of the Act, or where either the transferor or transferee agency (or organizational unit affected) is subject to the Government Corporation Control Act (31 U.S.C. 841) or is a mixed-ownership Government corporation, or the municipal government of the District of Columbia, reimbursement for the transfer shall be in an amount equal to the estimated fair market value of the property requested as determined by the Administrator: *Provided,* That where the transferor agency is a wholly owned Government corporation, the reimbursement shall be either in an amount equal to the estimated fair market value of the property requested, or the corporation's book value thereof, as may be agreed upon by GSA and the corporation.

(2) Reimbursement for all other transfers of excess real property shall be:

(i) In an amount equal to 100 percent of the estimated fair market value of the property requested, as determined by the Administrator, or if the transfer is for the purpose of upgrading facilities (i.e., for the purpose of replacing other property of the transferee agency which because of the location, nature, or condition thereof, is less efficient for use), the reimbursement shall be in an amount equal to the difference between the estimated fair market value of the property to be replaced and the estimated fair market value of the property requested, as determined by the Administrator.

(ii) Without reimbursement when the transfer is to be made under either of the following conditions:

(A) Congress has specifically authorized the transfer without reimbursement, or

(B) The Administrator with the approval of the Director, Office of Management and Budget, has approved a request for an exception from the 100 percent reimbursement requirement.

(1) A request for exception from the 100 percent reimbursement requirement shall be endorsed by the head of the executive department or agency requesting the exception.

(2) A request for exception from the 100 percent reimbursement requirement will be submitted to GSA for referral to the Director, Office of Management and Budget, and shall include an explanation of how granting the exception would further essential agency program objectives and at the same time be consistent with Executive Order 12348, dated February 25, 1982. The unavailability of funds alone is not sufficient to justify an exception. The above required data and documentation shall be attached to GSA Form 1334 by the transferee agency on submission of that form to GSA.

(3) If the Administrator with the approval of the Director, Office of Management and Budget, approves the request for an exception, the Administrator may then complete the transfer. A copy of the Office of Managment and Budget approval will be sent to the Property Review Board.

(4) The agency requesting the exception will assume responsibility for protection and maintenance costs where the disposal of the property is deferred for more than 30 days because of the consideration of the request for an exception to the 100 percent reimbursement requirement.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Dated: November 24, 1982.

Ray Kline,

Acting Administrator of General Services.

[FR Doc. 82-34286 Filed 12-16-82; 8:45 am]

BILLING CODE 6820-RR-M

Proposed Rules

Federal Register
Vol. 47, No. 243
Friday, December 17, 1982

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 915

Avocados Grown in South Florida; Proposed Amendment to Subpart—Rules and Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule invites written comment on a proposal to modify voting procedures at grower nomination meetings to limit proxy voting to growers residing outside the production area. Such action is designed to encourage more active grower participation at meetings held to nominate grower members of the Avocado Administrative Committee.

DATE: Comments must be submitted on or before January 3, 1983.

ADDRESS: Sent two copies of comments to Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities; and will not substantially affect costs for the directly regulated handlers.

This proposed rule is issued under the marketing agreement, as amended, and Order No. 915, as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Avocado Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

The proposed rule would modify voting procedures by limiting proxy voting at grower nomination meetings to those growers who reside outside the production area. Currently, all growers are permitted to vote by proxy at such nomination meetings, including growers residing in the production area. The committee is of the opinion that it is not necessary to extend the privilege of proxy voting to growers residing in the production area. Such growers live relatively close to the place where nomination meetings are held, and should not find it difficult or burdensome to attend such meetings in person. The proposed rule is designed to encourage more active participation at such meetings where growers nominate fellow growers to serve on the committee.

Under the proposal, § 915.115 *Nomination procedure*, would be amended in accordance with § 915.22 *Nomination*, which provides for the establishment of procedural rules for the conduct of nominations.

List of Subjects in 7 CFR Part 915

Marketing agreements and orders, Avocados, Florida.

The proposal would revise paragraph (a) of § 915.115 *Nomination procedure*, under Subpart-Rules and Regulations, to read as follows:

§ 915.115 Nomination procedure.

(a) Any grower who resides outside the production area and desires to be represented in a nomination meeting by a duly authorized agent and to have such grower's vote cast by such agent in the nomination and election of nominees for grower members and alternate members to fill positions on the Avocado Administrative Committee, as provided in § 915.22(b)(2), shall submit to the committee, not later than January 20, a written statement containing the following:

(1) Name of grower;

(2) Mailing address;

(3) Location of each avocado grove (either legal or from established landmarks);

(4) Number of avocado trees owned;

(5) Number of 55-pound units of avocados marketed to date during the current season;

(6) Name of the handler of the fruit marketed;

(7) Authorization, including the name and address, of the person who is to represent said grower at the nomination meeting.

* * * * *

Dated: December 13, 1982.

D. S. Kuryloski,

Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 82-34228 Filed 12-16-82; 8:45 am]

BILLING CODE 3410-02-M

Commodity Credit Corporation

7 CFR Part 1430

Dairy Price Support Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule sets forth additional procedures for implementing recent changes in the dairy price support program. These changes are authorized by amendments to the Agricultural Act of 1949 by section 101 of the Omnibus Budget Reconciliation Act of 1982 (Pub. L. 97–253, 96 Stat. 763, approved September 8, 1982). The provisions which have already been implemented on December 1, 1982, provide that during the period of October 1, 1982, through September 30, 1985, the Secretary of Agriculture may provide for the deduction of 50 cents per hundredweight from the proceeds of the sale of all milk marketed commercially by producers. Deductions are to be remitted to the Commodity Credit Corporation (CCC) to offset a portion of the cost of the price support program. The deductions also are intended to encourage a reduction in milk production. Because of the substantial purchases of dairy products by the CCC under the price support program, the Secretary determined that the deductions should become effective on December 1, 1982, and regulations implementing this phase of the dairy collection plan were published in the

Federal Register on November 30, 1982 (47 FR 53831).

The amendments made to the 1949 Act by the Omnibus Budget Reconciliation Act of 1982 also provide that an additional deduction of 50 cents per hundredweight from the proceeds of all milk marketed by producers may be made during the period of April 1, 1983, through September 30, 1985. However, this additional deduction must be coupled with a program for refunding to producers who reduce their milk marketings the money collected under the second 50-cent deduction. To prepare for the possible implementation of this second phase of the dairy collection plan, proposed regulations to carry out this phase of the plan have been developed by the Department. The proposed regulations are a modification of the regulations already in effect. Comments are invited on the operation of this second phase in the manner set forth in this proposed rule.

DATE: Comments should be received by the Department by February 15, 1983, to be assured of consideration.

ADDRESS: Written comments should be sent to the Director, Analysis Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Charles N. Shaw, Leader, Dairy and Sweeteners Group, Analysis Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013, (202) 447-7601. The Final Regulatory Impact Analysis describing the action to be taken in this proposed rule and its impact is available from Charles N. Shaw.

SUPPLEMENTARY INFORMATION:

This proposed rule has been reviewed in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512-1 and has been classified as a "major" action since the rule would result in an annual effect on the economy of $100 million more.

The title and number of the federal assistance program to which this proposed rule applies are: Title—Commodity Loans and Purchases; Number—10.051, as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this proposed rule since the Commodity Credit Corporation (CCC) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this proposed rule.

Statutory Authority for Proposed Rule

Section 201 of the Agricultural Act of 1949 was amended by section 101 of the Omnibus Budget Reconciliation Act of 1982 to specify that during the period of October 1, 1982, through September 30, 1985, the Secretary of Agriculture may provide for a deduction of 50 cents per hundredweight from the proceeds of the sale of all milk marketed commercially by producers. These deductions are to be remitted to the Commodity Credit Corporation to offset a portion of the cost of the price support program. This authority does not apply for any fiscal year for which the Secretary projects that the annual price support purchases will be less than 5 billion pounds milk equivalent. If at any time during a fiscal year the Secretary estimates that the net price support purchases during that year will be less than 5 billion pounds, the authority for making deductions does not apply for the balance of the year.

Section 201 of the 1949 Act was also amended by the Omnibus Budget Reconciliation Act of 1982 to specify that during the period of April 1, 1983, through September 30, 1985, the Secretary may provide for an additional deduction of 50 cents per hundredweight from the proceeds of the sale of all milk marketed commercially by producers if (1) a program is established whereby the money collected under this second 50-cent deduction would be refunded to producers who reduce their milk marketings by a specified amount, and (2) the Secretary estimated that price support purchases of dairy products will be at least 7.5 billion pounds milk equivalent during the fiscal year. If at any time during a fiscal year the Secretary estimates that the net price support purchases during that year will be less than 7.5 billion pounds, the authority for making the additional deduction does not apply for the balance of such year.

Summary of Proposed Rule

The proposed rule sets forth the administrative procedures for collecting an additional deduction of 50 cents per hundredweight on all milk sold commercially by producers, which is authorized to begin on April 1, 1983. The collections would be made in the same manner, and in addition to, the initial 50-cent deduction which became applicable on December 1, 1982.

The proposed rule also sets forth the administrative procedures for refunding the second 50-cent deduction to those producers who reduce their marketing of milk by a specified amount. The refund program would be administered by the Agricultural Stabilization and Conservation Service county committees.

Under the provisions of the 1949 Act, the base period for determining the amount of any reduction which is specified may be either the fiscal year beginning October 1, 1981, or the average of the two fiscal years beginning October 1, 1980. In order to present a more balanced picture of milk marketings and to reduce the effects on total marketings with respect to those producers who may have increased their milk marketings in order to obtain the highest base possible, it is proposed that the base period for determining the amount of any specified reduction shall be the average of the producer's marketings for the two marketing years beginning October 1, 1980. Producers would have to furnish evidence of their monthly marketings of milk to the ASCS county committees in order to establish a producer base. A producer's marketings would be averaged by calendar months and the monthly averages would be totaled for an annual average so that if a refund program is to be in effect for less than a year, the required reduction can be based on the comparable months of the producer's base period. Refunds would be made only to those producers who reduce their marketings from the established base by the percentage reduction specified by the Secretary. There would be no partial refunds for any reduction in marketings by producers relative to the established base for less than the specified percentage reduction.

Under the proposed rule, a transfer of producer base would be permitted with respect to dairy farm operations only where there has been a change of ownership and operation of the entire farm since the beginning of the base period and where a continuity of the enterprise can be traced by the county committee, such as those situations where a farm is inherited or a complete dairy operation is sold. While this proposal would allow a transfer of producer bases under limited circumstances, the calculation of a producer base for a producer who has acquired only a portion of a dairy farm operation since the beginning of the base period would not take into consideration the history of the marketings from that portion of the dairy operation which the producer has acquired.

The provisions of the 1949 Act specify that the Secretary may not require that producers, as a condition for receiving refunds, reduce their marketings in excess of a reduction equivalent to the ratio that the total amount of surplus

milk production, as estimated by the Secretary for the fiscal year, bears to the total milk production estimated for such period.

Any accounting and refund resulting from a reduction by a producer in milk marketings would be made after the end of the fiscal year (i.e., the concurrent marketing year) when evidence is submitted to the ASCS county office of the milk which is marketed by the producer, and the deductions made from those marketings during the year. During any period when the refund program is in effect for less than a fiscal year, producers would have to submit evidence of milk marketings and the deductions from the sales proceeds for such period to the county office after the last month during which the refund program is in effect in order to be eligible to receive a refund for such period.

List of Subjects in 7 CFR Part 1430

Milk, Agriculture, Price support programs, Dairy products.

Proposed Rule

Accordingly, it is proposed that in 7 CFR Part 1430, the subpart titled "Regulations Governing Certain Deductions on Milk Marketings of Producers" be revised to read as follows:

Subpart—Regulations Governing Certain Deductions on Milk Marketings of Producers

Sec.

Authority: Sec. 201(d) Agricultural Act of 1949, as amended, (7 U.S.C. 1446); Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714 et seq.).

Subpart—Regulations Governing Certain Deductions on Milk Marketings of Producers

§ 1430.291 General statement.

This subpart provides for the implementation of the following provisions of the dairy price support program as authorized by section 201 of the Agricultural Act of 1949, as amended (referred to hereafter as the "Act"):

(a) Section 201(d)(2) of the Act provides that during the period of October 1, 1982, through September 30, 1985, the Secretary may provide for a deduction of 50 cents per hundredweight from the proceeds of the sale of all milk marketed commercially by producers, including producers who market milk of their own production directly to consumers. The deductions are to be remitted to the Commodity Credit Corporation to offset a portion of the cost of the dairy price support program. The Act also provides that the Secretary's authority for requiring such deductions shall not apply for any fiscal year for which the Secretary estimates that the net price support purchases of milk or the products of milk will be less than 5 billion pounds milk equivalent. In addition, if at any time during a fiscal year the Secretary should estimate that such net price support purchases during the fiscal year will be less than 5 billion pounds milk equivalent, the Secretary's authority for requiring such deductions shall not apply for the balance of the fiscal year.

(b) Section 201(d)(3) of the Act provides that during the period of April 1, 1983, through September 30, 1985, the Secretary may provide for an additional deduction of 50 cents per hundredweight from the proceeds of the sale of all milk marketed commercially by producers, including producers who market milk of their own production directly to consumers. The deductions are to be remitted to the Commodity Credit Corporation to offset a portion of the cost of the dairy price support program. The Act provides, however, that such deductions shall be implemented only if the Secretary establishes a program whereby the funds resulting from such deductions are refunded to producers who reduce their commercial marketings from such marketings during a base period, and if the Secretary estimates that the net price support purchases of milk or the products of milk will be at least 7.5 billion pounds milk equivalent during the applicable fiscal year. The Act also provides that if at any time during a fiscal year the Secretary should estimate that such net price support purchases during the fiscal year will be less than 7.5 billion pounds milk equivalent, the Secretary's authority for requiring such deductions shall not apply for the balance of the fiscal year.

§ 1430.292 Definitions.

For purposes of this subpart, the terms listed below shall have the following meanings:

(a) *"United States"* means the 50 states of the United States of America, the District of Columbia, Puerto Rico, and the affected territories of the United States of America.

(b) *"Department"* means the United States Department of Agriculture.

(c) *"Secretary"* means the Secretary of Agriculture of the United States or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated to act in his stead.

(d) *"CCC"* means the Commodity Credit Corporation.

(e) *"ASCS"* means the Department's Agricultural Stabilization and Conservation Service.

(f) *"State committee"* means an ASCS State committee.

(g) *"County committee"* means an ASCS county committee.

(h) *"Dairy Division"* means the Dairy Division of the Department's Agricultural Marketing Service.

(i) *"Person"* means any individual, partnership, corporation, association, or other business or governmental unit.

(j) *"Responsible person"* means:

(1) Any person who pays a producer for milk marketed commercially by the producer. This shall include a handler regulated under a Federal milk order to the extent of any payments for milk that are transmitted by the handler to the market administrator for transmittal by the market administrator to individual producers.

(2) Any producer with respect to milk of his own production that he markets commercially in the form of milk or milk products to consumers, either directly or through retail or wholesale outlets.

(k) *"Producer"* means any person within the United States who produces milk from cows.

(l) *"Participating producer"* means a producer who reduces his milk marketings and claims a refund.

(m) *"Deduction"* means that amount which is deducted in accordance with §1430.291 from the proceeds of the sale of all milk marketed commercially by producers.

(n) *"Marketing year"* means the 12-month period beginning October 1 and ending September 30.

(o) *"Base period"* means the 24–month period beginning October 1, 1980, and ending September 30, 1982.

(p) *"Producer base"* means the 2–year average of the amount of milk marketed during the months of the base period which are comparable to the months for which a producer is requesting a refund.

(q) *"Surplus"* means the milk equivalent of the dairy products which the Secretary estimates will be purchased by the CCC during the applicable marketing year.

(r) *"Required reduction"* means the amount of reduction in the milk marketed commercially by a producer in order for the producer to be eligible to receive a refund of the deductions described in §1430.291(b).

(s) *"Refund"* means the money that is returned to a producer who reduces his marketings by the required reduction announced by the Secretary.

§1430.293 Period of applicability.

The provisions of this subpart shall apply only to the milk that is marketed commercially by producers in the United States during those months for which the Secretary has announced that the deductions described in §1430.291 are required.

§1430.294 Responsibility for administration of regulations.

(a) The Dairy Division shall have the responsibility for administering the provisions of this subpart which relate to the collection of the deductions described in §1430.291.

(b) The county committees shall have the responsibility for administering the provisions of this subpart which relate to the establishment of bases and the refund of the deductions described in §1430.291(b).

§1430.295 Remittance of producer deductions to CCC.

The following procedures shall apply with respect to remitting to the CCC the deductions described in §1430.291:

(a) Each responsible person who pays a producer for milk marketed commercially during the month shall remit to the CCC by the last day of the following month, or at the time of making final payment to the producer for such milk, whichever is earlier, an amount equal to the quantity of milk for which payment to the producer is being made times the following amount:

(1) 50 cents per hundredweight if only the deductions described in §1430.291(a) are applicable.

(2) $1.00 per hundredweight if the deductions described in both paragraphs (a) and (b) of §1430.291 are applicable.

(b) Each responsible person who markets milk of his own production to consumers (either directly or through retail or wholesale outlets) in the form of milk or milk products during the month shall remit to the CCC by the last day of the following month an amount equal to the quantity of such person's own production used in such marketings times the following amount:

(1) 50 cents per hundredweight if only the deductions described in §1430.291(a) are applicable.

(2) $1.00 per hundredweight if the deductions described in both paragraphs (a) and (b) of § 1430.291 are applicable.

(c) When remitting money to the CCC in accordance with paragraphs (a) and (b) of this section, each responsible person shall file a report prescribed by the Dairy Division showing:

(1) The identity of the responsible person, including such person's business address;

(2) The month in which the applicable producer marketings occurred; and

(3) The total pounds of milk to which the remittance applies.

(d) Money remitted to the CCC shall be in the form of a check made payable to "Commodity Credit Corporation."

(e) Checks and reports required under this section shall be mailed to the location designated by the Dairy Division.

§ 1430.296 Procedures for establishing producer bases.

(a) Each producer who desires a refund shall be responsible for establishing his monthly marketings of milk during the base period with the county committee for the county where the producer's dairy farm is headquartered. From the producer's marketing records, the county committee shall determine 2-year monthly averages and a 2-year 12-month average of the producer's marketings during the base period.

(b) In an marketing year in which the deductions described in § 1430.291(b) are in effect for a period of less than 12 months, only the comparable months of the base period shall be used to determine the producer's base.

(c) If a producer has acquired a complete dairy operation (i.e., land, equipment, and dairy cattle) from another producer, the producer base of the acquiring producer may be increased by the producer base of the former owner. Such a transfer of producer base will be reviewed by the county committee in the county where the acquiring producer's dairy farm is located and will be approved by the committee only if there are adequate records to establish the base of the former owner.

§ 1430.297 Determination of required reduction.

The required reduction for any marketing year shall be the milk equivalent of the estimated CCC net removals of dairy products compared with the estimated production of milk in the United States for the marketing year, or portion thereof, in which the deductions described in § 1430.291(b) are in effect. The required reduction percentage shall be announced by the Secretary in a notice published in the **Federal Register** prior to the beginning of any marketing year, or portion thereof, in which the deductions described in § 1430.291(b) are in effect. The required reduction shall not be larger than the ratio that the estimated surplus milk production bears to the estimated milk production for the applicable marketing year, or portion thereof.

§ 1430.298 Refund procedure.

(a) A refund of the amount deducted from a producer's proceeds in accordance with § 1430.291(b) shall be made only if the producer has reduced his milk marketings relative to his producer base by the required reduction which is determined and announced in accordance with § 1430.297.

(b) A refund may be requested only after the end of the applicable marketing year, or portion thereof, in which the deductions described in § 1430.291(b) are in effect.

(c) A refund shall be made only if a producer provides the county committee with records that adequately show (1) the producer's milk marketings during the applicable marketing year, or portion thereof, in which the deductions described in § 1430.291(b) are in effect and (2) the amount of the deduction actually withheld during the period for which he is applying for a refund.

§ 1430.299 Responsibility for records and facilities.

(a) *Records to be maintained.* Each responsible person, as well as each producer who is granted a refund, shall maintain records in a manner that will demonstrate compliance with the provisions of this subpart.

(b) *Availability of records and facilities.* Each responsible person, as well as each producer who is granted a refund, shall make available all records and facilities pertaining to such person's or producer's operations that are necessary to determine compliance with the provisions of this subpart.

(c) *Retention of records.* All records required under this subpart shall be retained by each responsible person, as

well as each producer who was granted a refund, for a period of three years that shall begin at the end of the month to which such records pertain, unless the Department notifies the responsible person or producer that such records are necessary in connection with litigation for a longer period. In such case, the records shall be retained until the litigation is terminated or a waiver is granted by the Department.

§ 1430.300 Adjustment of accounts for responsible persons.

Whenever the Department determines through an audit of a responsible person's reports, records, books or accounts or through some other means that additional money is due the CCC or that money is due such person from the CCC, the responsible person shall be notified of the amount due. The responsible person shall then remit any amount due the CCC by the next date for remitting deductions as provided in § 1430.295. Overpayments shall be credited to the account of the responsible person remitting the overpayment and shall be applied against amounts due in succeeding months or refunded if this subpart is not applicable in succeeding months.

§ 1430.301 Charges and penalties.

(a) *Charge for dishonored checks.* Each responsible person who issues a check to the CCC that is not honored because of insufficient funds shall be assesssed a charge of $25.00.

(b) *Late-payment charge.* Any unpaid obligation of a responsible person that is due the CCC in accordance with § 1430.295 shall be increased by a late-payment charge which shall be applied on the first day after the date such obligation was due and on the same day of each succeeding month until such obligation is paid. The total obligation due from such person shall include any unpaid charges computed previously under this paragraph. The charge shall be an amount equal to one-twelfth (rounded to the nearest one-hundredth of one percent) of the annual rate of interest announced by the CCC under 7 CFR 1403.5. The timeliness of a payment to the CCC shall be based on the applicable postmark date.

(c) *Penalties.* Any responsible person who willfully violates any provision of this subpart, including the willful failure or refusal to remit any amounts due the CCC, shall be liable, in addition to payment of the full amount due plus the applicable late-payment charge, for a penalty to be assessed by the Secretary of not more than $1,000 for each such violation and also remedies otherwise provided by law or in equity.

§ 1430.302 Continuing obligations.

Obligations of any responsible person, as well as any producer who was granted a refund, that arise under this subpart shall continue in effect until the final disposition of such obligations even though the deductions described in § 1430.291 may no longer be required.

§ 1430.303 Limitation of authority.

(a) State and county committees or their designees do not have authority to modify or waive any of the provisions of the regulations in this subpart.

(b) A State committee may take any action authorized or required by the regulations in this subpart to be taken by a county committee when such action has not been taken by the county committee. A State committee may also: (1) Correct, or require a county committee to correct, any action taken by such county committee which is not in accordance with the regulations in this subpart, or (2) require a county committee to withold taking any action which is not in accordance with the regulations in this subpart.

(c) No delegation herein to a State or county committee shall preclude the ASCS Deputy Administrator, State and County Operations, or his designee from determining any question arising under the regulations in this subpart or from reversing or modifying any determination made by a State or county committee.

§ 1430.304 Estates and trusts; minors.

(a) A receiver of an insolvent debtor's estate and the trustee of a trust estate shall, for the purpose of this subpart, be considered to represent an insolvent participating producer and the beneficiaries of a trust, respectively, and the production of the receiver or trustee shall be considered to be the production of the producer such receiver or trustee represents. Program documents executed by the receiver or trustee will be accepted only if they are legally valid and such person has the authority to sign the applicable documents.

(b) A participating producer who is a minor shall be eligible for a refund pursuant to the regulations in this subpart only if he meets one of the following requirements: (1) The right of majority has been conferred on him by court proceedings or by statute; (2) a guardian has been appointed to manage his property and the applicable program documents are signed by the guardian; or (3) a bond is furnished under which the surety guarantees any loss incurred for which the minor would be liable had he been an adult.

§ 1430.305 Appeals.

The appeal regulations found at 7 CFR Part 780 shall be applicable to appeals by participating producers from determinations made pursuant to the regulations in this subpart.

§ 1430.306 Setoffs.

(a) If a participating producer is indebted to any agency of the United States and such indebtedness is listed on the county debt record, any refund which is due such producer under the regulations in this subpart shall be applied to such indebtedness in accordance with the provisions of 7 CFR Part 713, Setoff and Withholdings.

(b) Compliance with the provisions of this section shall not deprive a participating producer of any right which such participating producer would otherwise have to contest the indebtedness involved in the setoff action, either by administrative appeal or by legal action.

§ 1430.307 Overdisbursement.

If a refund is disbursed to a participating producer which exceeds the amount of such refund which is authorized to be disbursed to the participating producer under the regulations in this subpart, the participating producer shall be personally liable for repayment of the amount of such excess.

§ 1430.308 Death, incompetency, or disappearance.

In the case of the death, incompetency, or disappearance of any participating producer who is entitled to a refund, such refund may be made to the person or persons who are specified in the regulations which are found at 7 CFR Part 707. The person requesting such refund shall file Form ASCS–325, "Application for Payment of Amounts Due Persons Who Have Died, Disappeared, or Have Been Declared Incompetent," as provided in that part.

§ 1430.309 Assignment.

Any producer who may be entitled to a refund may assign his rights to such refund in accordance with the regulations governing assignment of payment as set forth in 7 CFR Part 709.

§ 1430.310 Instructions and forms.

The ASCS Deputy Administrator, State and County Operations, shall cause to be prepared such forms and instructions as are necessary for establishing bases and making refunds as described in § 1430.291(b). Participating producers may obtain from the county ASCS office the information which is necessary to make application

for a refund in accordance with the provisions of this subpart.

Signed at Washington, D.C, on: December 14, 1982.

Everett Rank,

Executive Vice President, Commodity Credit Corporation.

Rural Electrification Administration

7 CFR Part 1700

REA Bulletins; Proposed Codification

AGENCY: Rural Electrification Administration, USDA.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Rural Electrification Administration (REA) proposes to add material to 7 CFR Part 1700. The material to be added represents the codification of the agency's existing bulletins which have been issued to implement the procedures set forth in Part 1700 and the loan and security instruments which provide for and secure REA loans. These bulletins are currently approved for "incorporation by reference" and are listed in Appendix A—REA Bulletins to 7 CFR Part 1700.

DATE: Comments by January 3, 1983.

FOR FURTHER INFORMATION CONTACT: Blaine D. Stockton, Jr., Assistant Administrator, Management, Room 4063, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone number (202) 382-9552.

SUPPLEMENTARY INFORMATION: REA currently issues a series of publications entitled "bulletins" which serve to implement the policy, procedures and requirements for administering its loans and loan guarantee programs and the security instruments which provide for and secure REA financing. At the present time, these bulletins have been approved by the Director, Office of the Federal Register, for incorporation by reference (IBR) to 7 CFR Part 1700 and are listed in Appendix A—REA Bulletins to Part 1700. Upon review, the Director, Office of the Federal Register, has notified REA that several of its bulletins are no longer appropriate material for incorporation by reference. REA has decided to review its bulletins and codify those bulletins which are the Agency's "* * * statement of general or particular applicability and future effect designed to implement, interpret, or prescribe law or policy or describing the organization, procedure, or practice requirements * * *" REA anticipates that this review and codification process will take approximately 12 months. Therefore, REA will be initiating the process as soon as possible.

REA intends to solicit comments on any proposed substantive changes to any bulletin and encourages public participation in all proposals published in the **Federal Register.** However, it should be noted that some bulletins will only be reformatted for publication in the **Federal Register** and will be published as final rules.

Interested persons are invited to submit comments concerning this notice to the address shown in **"FOR FURTHER INFORMATION CONTACT."**

Dated: December 10, 1982.

Jack Van Mark,

Acting Administrator.

BILLING CODE 3410-15-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 170

Proposed Revision of License Fee Schedules; Correction

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a proposed rule published in the Federal Register on November 22, 1982 (47 FR 52454), that would revise license fee schedules. The action is necessary to correct typographical errors and omissions.

FOR FURTHER INFORMATION CONTACT: William O. Miller, License Fee Management Branch, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (301) 492-7225.

SUPPLEMENTARY INFORMATION: The proposed rule entitled "Proposed Revisions of License Fee Schedules" that would amend 10 CFR Part 170 was published on pages 52454 through 52466 of the **Federal Register** on November 22, 1982. The following corrections to this proposed rule are listed, by page, table number, category, and item as applicable:

1. Page 52456, Table 5, an "x" should appear in the "Excluded" column for the Offices of Inspector and Auditor, etc.

2. Page 52458, Table 9—

(a) The description of the second item under Category 1A is corrected to read ">5 Kg U-235 for fuel fabrication (<20 pct)."

(b) The description of the third item under Category 1A is corrected to read ">2 Kg Pu for fuel fabrication."

(c) The description of the fourth item under Category 1A is corrected to read ">5 Kg U-235 or >2 Kg U-233 other than fuel fabrication."

(d) For the seventh item under Category 1A, "Safety," the amount shown in the third column under routine inspection should read "$3,600" rather than "$360."

3. Page 52458, Materials Licenses—In the first paragraph, the last sentence beginning with "Fees for applications" should be replaced with the following sentence: Fees for applications for new licenses and approvals which are not currently based on actual costs and fees for applications for renewals and amendments which are on file with the Commission and pending review at the time the proposed rule becomes effective will be limited to the maximum fees prescribed in the March 23, 1978 schedule.

4. Page 52459, Table 10—

(a) The description of the third item under Category 1A should read ">2 Kg Pu for fuel fabrication" rather than "1>2 Kg for fuel fabrication."

(b) The description of item 6 under Category 1A is corrected to read "200 grams to <2 Kg of Pu."

(c) For item 2 under Category 4A—"Low level waste storage at power reactor sites," the footnote designator shown in the column under the heading "Renewals—Current March 1978 schedule" should read footnote "2" rather than footnote "3".

(d) The first sentence in footnote 2 at the end of Table 10 should read "Special Projects based on actual cost" rather than "Special project on actual cost."

5. Page 52464, 10 CFR 170.31—

(a) Category 3F—The application fee should read "$580" rather than "$580. P$350. P$230.". The renewal fee should be added to read "$350"; the amendment fee should be added to read "$230."

(b) Category 3G—The application fee should read "$2,300" rather than "$930"; the renewal fee should read "$930" rather than "$230"; and the amendment fee should be added to read "$230."

(c) Category 3I—The amendment fee should read "$80" rather than "$30."

6. Pages 52465 and 52466, 10 CFR 170.32—

(a) Category 2A—In the second line the word "or-buying" should be corrected to read "ore-buying," and the word "ource" should be corrected to read "source."

(b) Category 3B—Footnote designator "3" should be added to the nonroutine inspection fee of $900.

(c) Category 4A—Footnote designator "2" rather than footnote "1" should appear after the words "Actual Cost" for both routine and nonroutine inspections.

(d) Category 7—The second "of" in the heading should be corrected to read "or."

(3) Category 7A—The nonroutine inspection fee should read "$850" rather than "$830."

Dated at Washington, D.C., this 8th day of December 1982.

For the Nuclear Regulatory Commission.

William J. Dircks,

Executive Director for Operations.

BILLING CODE 7590-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR Part 929

[Docket No. 21116-229]

Key Largo National Marine Sanctuary

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Proposed rule.

SUMMARY: These regulations make minor revisions and clarifications to the present interim-final regulations defining which activities are allowed and which are prohibited within the Key Largo National Marine Sanctuary, the procedures by which persons may obtain permits for research or activities normally prohibited, and the penalties for committing prohibited acts without a permit. The regulations also revise the format of the existing regulations to make them more consistent with regulations in more recently designated national marine sanctuaries.

DATE: Comments will be accepted until January 1983. After the close of the comment period and review of comments received, final regulations will be published in the Federal Register.

ADDRESS: Send comments to: Dr. Nancy Foster, Deputy Director, Sanctuary Programs Office, Office of Coastal Zone Management, NOAA, 3300 Whitehaven Street, NW., Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT: Franklin D. Christhilf (202) 634-4236.

SUPPLEMENTARY INFORMATION: Title III of the Marine Protection, Research, and Sanctuaries Act of 1972, 16 U.S.C. 1431-1434 (the Act) authorizes the Secretary of Commerce, with Presidential approval, to designate ocean waters as far seaward as the outer edge of the continental shelf as marine sanctuaries to preserve or restore distinctive conservation, recreational, ecological, or aesthetic values. Section 302(f)(1) of the Act directs the Secretary to issue necessary and reasonable regulations to control any activities permitted within a designated marine sanctuary. The authority of the Secretary to administer the provisions of the Act has been delegated to the Assistant Administrator for Coastal Zone Management within the National Oceanic and Atmospheric Administration, U.S. Department of Commerce (the Assistant Administrator).

On December 18, 1975, the Key Largo National Marine Sanctuary (the Sanctuary) was designated, and on January 13, 1976, NOAA published interim-final regulations (41 FR 2379) pursuant to the authorities of Sections 302(f), 302(g) and 303 of the Act. Since NOAA never issued final rules, these regulations are being published as proposed rules to allow interested parties the opportunity to comment. These regulations respond to comments received on certain sections of the interim-final regulations and certain issues that have arisen since designation. Following the 60 day comment period, these proposed rules may be amended at the Assistant Administrator's discretion to reflect comments received. The Assistant Administrator shall then publish final regulations in the Federal Register.

Discussion of Issues

(a) *Boundaries:* One reviewer of the interim-final regulations called attention to an apparent error in the description of the boundaries of the Sanctuary. The apparent discrepancy results from an error on NOAA chart 11462 (formerly C&GS 1249) and has been corrected in the 14th Edition, August 1977, NOAA Chart 11462, to be consistent with the boundary description as published in the rules and regulations for the Sanctuary.

(b) *Removal or Damaging of Natural Features and Marine Life—Taking of Spiny Lobster:* Although NOAA has not received formal comments, it understands that many recreational divers believe that the existing interim regulation which prohibits taking spiny lobster by hand is unfair and discriminatory. There is concern among resource managers that lobster stocks in the Sanctuary are low and may not withstand additional harvest pressure. NOAA does not have enough scientific evidence to support either claim and therefore proposes to conduct a baseline population study to gather information on stock abundance and natural fluctuation. Until adequate data are available, NOAA intends to rely upon regulations implemented pursuant to the Spiny Lobster Fishery Management Plan in the Gulf of Mexico and South Atlantic.

(c) *Use of Harmful Fishing Methods—Wire Fish Traps:* NOAA has been requested by the Superintendent of the adjacent John Pennekamp Coral Reef State Park and others to clarify that the taking of fish by means of wire traps is prohibited, a prohibition that is consistent with State park regulations and Federal regulations at the nearby Biscayne National Park. NOAA has rewritten § 929.7 to clarify that taking by this method is prohibited. It should be noted that the new language merely clarifies the prohibition under the existing regulations and does not add any new restriction.

(d) *Use of Harmful Fishing Methods—Nets:* NOAA also has been requested to clarify the prohibition on taking of fish by means of nets. NOAA has rewritten § 929.7 to clarify that taking of fish by bottom trawls, dredges, fish sleds, or other similar vessel-towed or anchored fishing gear or net that comes in contact with the seafloor is prohibited. A prohibition on the use of the hand-held nets to collect tropical fish is covered under § 929.7(1)(c). It should be noted that the new language merely clarifies what is a prohibition under the existing regulations and does not add new restrictions.

(e) *Utilization of Certain Living Resources for Scientific and Educational Purposes:* The principal comment on the interim-final regulations, submitted by six commentors, was that taking of tropical fish and certain invertebrates except "for the purpose of research related to the resources of the Sanctuary" was precluded, thus preventing taking for public display or educational purposes at public aquaria or universities. These commentors agreed that commercial taking of large numbers of these resources should be prohibited, but agreed that the wording of the regulations was too restrictive. NOAA appreciates these concerns and has rewritten § 929.10 to make the language consistent with regulations for other established sanctuaries where taking for scientific and educational purposes includes taking for legitimate public display and other related purposes and is allowed by permit.

(f) *Appeals of Administrative Actions:* Section 929.11 has been rewritten to provide that any interested party can

appeal a permit decision to the Administrator of NOAA, also to establish that a hearing is discretionary. These changes are in line with the permit appeals procedure established for the sanctuary program generally.

(g) *Format;* The regulations have been revised for purposes of clarity by using separate sections to define permitted and prohibited uses and by adding a purpose section (929.2).

Other Matters

Executive Order 12291 (E.O. 12291) defines a "major rule" as "any regulation that is likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in cost or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete in domestic or export markets." The economic activity supported by the area within the Sanctuary consists of a diversity of commercial and recreational activities.

The economic impacts on affected activities in the Sanctuary are minor and regulations do not restrict recreational activities. Fishing with traps, spearfishing, and "tropical fish" taking are already prohibited by regulation.

Because the majority of the activities are already regulated by other authorities, not regulated at all, or regulated by Sanctuary authority consistent with those proposed to take effect, the Acting Assistant Administrator has determined that this is not a "major rule" under Executive Order 12291. For the same reasons, the Acting Assistant Administrator has determined that the proposed rules will not have a significant economic impact on small entities in the Sanctuary under the Regulatory Flexibility Act. These regulations will impose no information collection requirements of the type covered by Pub. L. 96–511 on affected State governments. Publication does not constitute a major Federal action significantly affecting the quality of the human environment. Therefore, an environmental impact statement is not required.

List of Subjects in 15 CFR Part 929

Administrative practice and procedure, Environmental protection, Marine resources, and Natural resources.

(Federal Domestic Assistance Catalog Number 11.419 Coastal Zone Management Program Administration)

Dated: November 1, 1982

William Matuszeski,

Acting Assistant Administrator for Coastal Zone Management.

Accordingly, it is proposed to revise Part 929 to read as follows:

PART 929—KEY LARGO NATIONAL MARINE SANCTUARY PROPOSED REGULATIONS

Sec.

929.1 Authority
929.2 Purpose.
929.3 Boundaries.
929.4 Definitions.
929.4 Management and enforcement.
929.6 Allowed activities.
929.7 Activities prohibited or controlled.
929.8 Other authorities.
929.9 Penalties for commission of prohibited acts.
929.10 Permit procedures and criteria.
929.11 Appeals of administrative action.

Authority: Secs. 302f, 302g, 303, Pub. L. 92–532, 86 Stat. 1061, 1062 (16 U.S.C. 1431–1434).

§ 929.1 Authority.

The Sanctuary has been designated by the Secretary of Commerce pursuant to the authority of Section 302(a) of the Marine Protection, Research and Sanctuaries Act of 1972 as amended (the Act). The following regulations are issued pursuant to the authorities of Sections 302(f), 302(g) and 303 of the Act.

§ 929.2 Purpose.

The purpose of designating the Key Largo National Marine Sanctuary is to protect and preserve the coral reef ecosystem in its natural state and to regulate uses within the Sanctuary to insure the health and well-being of the coral and associated flora and fauna.

§ 929.3 Boundaries.

The Sanctuary consists of a portion of the Atlantic Ocean beginning at approximately three miles east of Key Largo, Florida adjacent to the John Pennekamp Coral Reef State Park. The coordinates for the Sanctuary are: the point of beginning (POB) is at geographic coordinates 25° (degrees), 19.45′ (minutes) north latitude, 80°, 12.0′ west longitude, said point being the northeast boundary corner of John Pennekamp Coral Reef State Park. From said POB run thence southeasterly to geographic coordinates 25°, 16.2′ north latitude 80°, 8.7′ west longitude, said point also being on the 300 foot isobath, thence in a southwesterly direction to geographic coordinates 25°, 07.5′ north latitude, 80°, 12.5′ west longitude, thence again run in a southwesterly direction to geographic coordinates 24°, 58.3′ north latitude 80°, 19.8′ west longitude, thence leaving said 300 foot isobath run northwesterly to geographic coordinates 25°, 2.2′ north latitude 80°, 25.25′ west longitude, said point being the southeast boundary corner of John Pennekamp Coral Reef State Park, thence in a northeasterly direction along said easterly boundary of said State Park to the POB.

§ 929.4 Definitions.

(a) "Administrator" means the Administrator of the National Oceanic and Atmospheric Administration (NOAA).

(b) "Assistant Administrator" means the Assistant Administrator for Coastal Zone Management (OCZM), National Oceanic and Atmospheric Administration or his/her successor, or designee.

(c) "Persons" means any private individual, partnership, corporation, or other entity; or any officer, employee, agent, department, agency or instrumentality of the Federal government, or any State or local unit of the government.

(d) "The Sanctuary" means the Key Largo National Marine Sanctuary.

(e) "Tropical fish" means fish and invertebrates of minimal sport and food value, usually brightly colored, often used for aquaria purposes and which live in a close interrelationship with corals and coral reef substrates.

§ 929.5 Management and enforcement.

The National Oceanic and Atmospheric Administration (NOAA) has primary responsibility for the management of the Sanctuary pursuant to the Act. The Florida Department of Natural Resources (FDNR), Division of Recreation and Parks, assists NOAA in the administration of the Sanctuary, and acts as the onsite manager, in conformance with a cooperative agreement between the State of Florida and NOAA. The U.S. Coast Guard and Division of Recreation and Parks (FDNR) shall conduct surveillance and enforcement of these regulations pursuant to 14 U.S.C. 89, 16 U.S.C. 1432(f)(4), 16 U.S.C. 7421(b), 16 U.S.C. 3375(a), or other appropriate legal authority.

§ 929.6 Allowed activities.

All activities except those specifically prohibited by § 929.7 may be carried on within the Sanctuary subject to all prohibitions, restrictions, and conditions imposed by other authorities.

§ 929.7 Activities prohibited or controlled.

(a) Unless permitted by the Assistant Administrator in accordance with § 929.10, or as may be necessary for the national defense, or to respond to an

emergency threatening life, property or the environment, the following activities are prohibited or controlled within the Sanctuary. All prohibitions and controls must be applied consistently with international law. Refer to § 929.9 for penalties for commission of prohibited acts.

(i) *Removal or damaging of natural features and marine life.* (A) No person shall destroy, injure, harmfully disturb, break, cut or similarly damage or remove any coral or other marine invertebrate, or any plant, soil, rock, or other material. Divers are prohibited from handling coral formations, standing on coral formations, or otherwise disturbing the corals.

(ii) Commercial taking of stone crab, crawfish, and spiny lobster by trap and recreational taking of spiny lobster by hand which is consistent with both the applicable regulations under the appropriate Fishery Management Plan and these regulations is allowed.

(iii) No person shall catch or collect any tropical fish.

(iv) There shall be a rebuttable presumption that any items listed in these paragraphs found in the possession of a person within the Sanctuary have been collected or removed from within the Sanctuary.

(2) *Dredging, filling, excavating and building activities.* No person shall dredge, excavate, fill or otherwise alter the seabed in any way nor construct any structure of any kind, whether permanent or temporary, with the exception of navigation aids.

(3) *Discharges.* No person shall deposit or discharge any materials or substance of any kind into the waters of the Sanctuary. The only exceptions are:

(i) Indigenous fish or fish parts and chumming materials;

(ii) Cooling waters from vessels; and

(iii) Effluent from marine sanitation devices approved by the United States Coast Guard.

(4) *Removal or damage of archaeological and historical resources.* No person shall remove, deface, damage, or tamper with archaeological or historical resources or the cargo of any submerged wrecks or other historical resources within the boundaries of the Sanctuary.

(5) *Tampering with markers.* No person shall mark, deface or damage in any way whatsoever, or displace, remove or tamper with any signs, notices or placards, whether temporary or permanent, or with any monuments, stakes, posts or other boundary markers installed by the Sanctuary Manager, or trap floats placed for the purpose of lobster fishing.

(6) *Use of harmful fishing methods.* No person shall carry or possess, except while passing through the Sanctuary or for law enforcement purposes, the following firearms or weapons: pole spears, air rifles, bows and arrows, slings, Hawaiian slings, rubber-powered arbalists, pneumatic and spring loaded guns, explosive powered guns or similar devices known as spearguns. No person shall use within the Sanctuary:

(i) Wire fish traps;

(ii) Bottom trawls, dredges, fish sleds, or similar vessel-towed or anchored bottom fishing gear or net; or

(iii) Poisons, electric charges, explosives or similar devices.

(7) *Operation of watercraft and anchoring.* All watercraft shall be operated in accordance with applicable Federal rules and regulations. The following additional regulations apply within the boundaries of the Sanctuary.

(i) Watercraft shall be operated to avoid striking or otherwise causing damage to the natural features of the Sanctuary.

(ii) No anchor shall be cast or dragged in such a way as to damage any coral reef formations. Anchors shall be dropped on sand flats off the reefs and placed to avoid dragging into the coral formations.

(iii) Watercraft must use mooring buoys, stations or anchoring arms when such facilities and areas have been designated and are available.

(iv) Within 100 yards of divers, sightseeing boats or fishermen, no watercraft shall be operated at greater than 4 knots or in any manner to create a wake, except by law enforcement officials while in the performance of their official duties.

(v) All watercraft from which diving operations are being conducted shall fly in a conspicuous manner, the red and white "divers down" flag. Divers shall stay withing 100 yards of their diving flag.

(8) *Use of dangerous weapons.* Except for law enforcement purposes, no person shall use or discharge explosives or weapons of any description within the Sanctuary boundaries. Distress signaling devices, necessary and proper for safe vessel operation, and knives generally used by fishermen and swimmers are not considered weapons for purposes of this Subsection.

(b) The Sanctuary may be closed to public use in the event of emergency conditions endangering life or property. The Assistant Administrator or his/her representative may also close certain areas in order to: (i) Permit recovery of the living resources from overuse, or (ii) provide for scientific research relating to protection and management. However, the total closed area shall not exceed a size necessary to accomplish these purposes. Public notice of closures will be through the local news media and posting of placards at the John Pennekamp Coral Reef State Park, if deemed necessary.

(c) The regulation of activities within the Sanctuary shall not prohibit any activity conducted by the Department of Defense that is essential for national defense or because of emergency. Such activities shall be conducted consistently with all regulations to the maximum extent possible.

(d) The prohibitions in this Section are not based on any claim of territoriality and will be applied to foreign persons and vessels only in accordance with recognized principles of international law, including treaties, conventions and other international agreements to which the United States is signatory.

§ 929.8 Other authorities.

No license, permit or other authorization issued pursuant to any other authority may validly authorize any activity prohibited by § 929.7 unless such activity meets the criteria stated in § 929.10 (c) and (d), and is specifically authorized by the Assistant Administrator.

§ 929.9 Penalties for commission of prohibited acts.

Section 303 of the Act authorizes the assessment of a civil penalty of not more than $50,000 for each violation of any regulation issued pursuant to the Act, and further authorizes a proceeding *in rem* against any vessel used in violation of any such regulation. Procedures are set out in Subpart D of Chapter 15 CFR Part 922. Subpart D is applicable to any instance of a violation of these regulations.

§ 929.10 Permit procedures and criteria.

(a) Any person in possession of a valid permit issued by the Assistant Administrator in accordance with this section may conduct the specific activity in the Sanctuary including any activity specifically prohibited under § 929.7, if such activity is: (1) Research related to the resources of the Sanctuary, (2) to further the educational value of the Sanctuary, or (3) for salvage or recovery operations.

(b) Permit applications shall be addressed to the Assistant Administrator, Attn: Sanctuary Programs Office, National Oceanic and Atmospheric Administration, 3300 Whitehaven Street, NW., Washington, D.C. 20235. An application shall include a description of all activities proposed,

the equipment, methods, and personnel (particularly describing relevant experience) involved, and a timetable for completion of the proposed activity. Copies of all other required licenses or permits shall be attached.

(c) In considering whether to grant a permit, the Assistant Administrator shall evaluate such matters as: (1) The general professional and financial responsibility of the applicant; (2) the appropriateness of the methods being proposed to the purpose(s) of the activity; (3) the extent to which the conduct of any permitted activity may diminish or enhance the value of the Sanctuary as a source of recreation, education, or scientific information; and (4) the end value of the activity.

(d) Permits may be issued by the Assistant Administrator for activities otherwise prohibited under § 929.7. In addition to meeting the criteria in 929.10 (c), the applicant must also satisfactorily demonstrate to the Assistant Administrator: (1) That the activity shall be conducted with adequate safeguards for the environment, and (2) that the environment shall be returned to the condition which existed before the activity occurred. A permit issued according to the provisions for an otherwise prohibited activity shall be appropriately conditioned, and the activity monitored to ensure compliance.

(e) In considering an application submitted pursuant to this section, the Assistant Administrator may seek and consider the views of Fishery Management Councils and any other person or entity, within or outside of the Federal Government, and may hold a public hearing, as he/she deems appropriate.

(f) The Assistant Administrator may, at his/her discretion, grant a permit which has been applied for pursuant to this section, in whole or in part, and subject to such condition(s) as deemed necessary, and shall attach to any permit granted for research related to the Sanctuary stipulations to the effect that: (1) The Assistant Administrator or a designated representative may observe any activity permitted by this section; and (2) any information obtained in the research site shall be made available to the public; and/or the submission of one or more reports of the status of progress of such activity may be required.

(g) A permit granted pursuant to this section is nontransferrable.

(h) The Assistant Administrator may amend, suspend or revoke a permit granted pursuant to this Section, in whole or in part, temporarily or indefinitely if, in his/her view, the permit holder (the Holder) had acted in violation of the terms of the permit or of the applicable regulations; or the Assistant Administrator may do so for other good cause shown. Any such action shall be communicated in writing to the Holder, and shall set forth the reason(s) for the action taken. The Holder in relation to whom such action has been taken may appeal the action as provided for in § 929.11.

§ 929.11 Appeals of Administrative Action.

(a) The applicant for a permit, the Holder, or any other interested person (hereafter Appellant) may appeal the granting, denial, conditioning or suspension of any permit under § 929.10 to the Administrator of NOAA. In order to be considered by the Administrator, such appeal shall be in writing, shall state the action(s) appealed and the reason(s) therefor, and shall be submitted within 30 days of the action(s) by the Assistant Administrator. The Appellant may request an informal hearing on the appeal.

(b) Upon receipt of an appeal authorized by this Section, the Administrator may request the Appellant, and the permit applicant or Holder if other than the Appellant, to submit such additional information and in such form as will allow action upon the appeal. The Administrator shall decide the appeal using the criteria set out in § 929.10(c), any information relative to the application of file, any information provided by the Appellant, and such other consideration as is deemed appropriate. The Appellant shall notify the Appellant of the final decision and the reason(s) therefor, in writing normally within 30 days of the date of the receipt of adequate information required to make the decision.

(c) If a hearing is requested or, if the Appellant determines that one is appropriate, the Administrator may grant an informal hearing before a Hearing Officer designated for that purpose, after first giving notice of the time, place, and subject matter of the hearing in the **Federal Register**. Such hearing shall normally be held no later than 30 days following publication of the notice in the **Federal Register** unless the Hearing Officer extends the time for reasons deemed equitable. The Appellant, the applicant or permit holder, if different, and, other interested persons may appear personally or by counsel at the hearing and submit such material and present such arguments as determined appropriate by the Hearing Officer. Within 30 days of the last day of the hearing, the Hearing Officer shall recommend a decision in writing to the Administrator.

(d) The Administrator may adopt the Hearing Officer's recommended decision, in whole or in part, or may reject or modify it. In any event, the Administrator shall notify the interested persons of his/her decision, and the reason(s) therefor in writing within 30 days of receipt of the recommended decision of the Hearing Officer. The Administrator's decision shall constitute final action for the Agency for the purposes of the Administrative Procedures Act.

(e) Any time limit prescribed in this Section may be extended by the Administrator for good cause for a period not to exceed 30 days, either upon his/her own motion or upon written request from the Appellant, permit applicant or Holder, stating the reason(s) therefor.

BILLING CODE 3510-08-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 270

[Release No. IC-12888; S7-955]

Advance Notice and Request for Comment on Mutual Fund Governance

AGENCY: Securities and Exchange Commission.

ACTION: Advance notice and requests for comments on mutual fund governance.

SUMMARY: The Commission is considering whether to propose rules or recommend legislation to enable all or certain types of registered open-end investment companies to be organized and operated without shareholder voting, or without either shareholder voting or boards of directors. The major goal of such action would be to reduce the expenses of fund operations without sacrificing investor protections. In addition to seeking guidance generally on the advisability of such action, the Commission is also requesting commentators to focus on certain specified questions. The comments received will be considered in connection with the development of any rulemaking proposals or legislative recommendations.

DATE: Comments must be received on or before March 10, 1983.

ADDRESS: Persons wishing to submit written comments on the matters discussed in the release should file five copies thereof with George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549.

Comments should refer to File No. S7–955 and will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT: Bruce Mendelsohn, Chief (202–272–2048) or Elizabeth Norsworthy, Special Counsel (202–272–2048), Office of Regulatory Policy, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20539.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission today announced that it is considering the advisability of proposing rules or recommending legislation to enable all or certain types of registered open-end investment companies to be organized and operated without shareholder voting, or without shareholder voting and boards of directors. Both shareholder voting and boards of directors are presently required under the Investment Company Act of 1940 ("Act") (15 U.S.C. 80a–1 *et seq.*). This release summarizes two alternatives to the existing regulatory system which have been proposed by industry observers, as well as certain issues involved in the implementation of those alternatives. After a short discussion of the historical development of a corporate model for investment companies, the release discusses the possibility that the corporate model, or certain of its components, might be unnecessary, and requests general comment as to whether the existing regulatory system for open-end investment companies should be modified. The appendix to this release discusses in detail the historical development, the two alternatives to the existing regulatory system which have been proposed, requests general comment with respect to whether either of those approaches, or some other alternativie, should be pursued further, and asks for specific comment with respect to the implementation of those approaches. A copy of the appendix may be obtained directly from the Commission by contacting the above-mentioned contact persons. All comments and suggestions received will be considered by the Commission in determining whether to develop rulemaking proposals or legislative recommendations in this area.

I. Background

In recent years, some commentators have expressed skepticism about the effectiveness of shareholder voting and boards of directors in a mutual fund context, especially in view of dramatic changes in the investment company industry over the past decade. Open-end or mutual funds, a relatively new phenomenon in 1940, have dominated the industry for many years. In contrast to investors in other types of companies who must sell their shares at a market price which may not, in their opinion, reflect the value of their investment, mutual fund shareholders may sell their shares back to the fund at net asset value. While the predominance of mutual funds over closed-end companies prompted the Commission and Congress to re-examine the regulatory framework of investment companies in the 1960's, the 1970 amendments to the Investment Company Act of 1940 ("Act") (15 U.S.C. 80a–1 *et seq.*) which resulted from that re-examination were designed to buttress, not dismantle, the existing framework. In deciding to adhere to the same regulatory scheme, Congress relied on finding of the Wharton School and the Commission that, although a mutual fund shareholder could redeem shares at net asset value, that shareholder was still reluctant to do so because mutual funds charged redemption fees or sales loads considerably higher than customary brokerage commissions and because shareholders incurred tax liability whenever the redemption of their share resulted in a capital gain.

Over the past decade, however, industry changes have removed these financial disincentives for the majority of mutual fund shareholders. Most mutual funds are now no-load, and do not have redemption fees. Moreover, the preponderant portion of the industry's assets is now in money market funds which seek to maintain a stable net asset value, thereby enabling investors to redeem their shares without incurring tax consequences. In view of the ease with which investors in no-load funds, particularly money market funds, may now redeem their shares, it seems appropriate to invite public comment on the continuing necessity for approval of management decisions by shareholders and directors.[1] Comment is requested as to whether alternative regulatory approaches should be pursued and on related issues discussed below.

[1] The Commission does not mean to imply in any way that it contemplates that shareholders of companies other than open-end investment companies could be adequately protected if their ability to elect directors or otherwise exercise voting rights were eliminated. Investors in other types of companies do not have the freedom to redeem their investment at current net asset value. Moreover, other types of companies usually have unique assets. Thus, even assuming that a market is available in which such companies' securities could be easily sold, such investors must sell at a market price which may not, in their opinion, reflect the value their investment might have if the company's management were different.

II. Discussion

A. Adoption of Rules Exempting Mutual Funds From the Act's Shareholder Voting Requirements

Recent commentators have suggested that the Commission should exercise its rulemaking authority under section 6(c) to extend exemptive relief from the Act's shareholder voting requirements. Proponents of adopting such exemptions argue that the costs which companies incur in complying with those provisions now outweigh any benefits which shareholders may derive from voting their shares. Mutual fund shareholders appear to be passive participants in the management process, rarely attending shareholder meetings and infrequently returning proxies. In fact, because of such shareholder apathy, companies often incur re-solicitation expenses in order to achieve a quorum.

On the other hand, it can be argued, as was the case when similar objections were raised to shareholder voting requirements in the 1960's, that shareholder voting gives shareholders a means of communicating with management without litigation. Since material information concerning a fund's management and operations must be disclosed in proxy material distributed to shareholders, management is often deterred from effecting changes which will adversely affect the fund and its shareholders.

A further objection which has been voiced with respect to adopting an approach which would exempt funds from the shareholder voting provisions is that such exemptions would create a self-perpetuating board of directors, thereby disrupting the delicate system of checks and balances created by the Act to deter both internal and external managers from acting in their own best interests.

However, conditions to affording funds exemptive relief from the Act's shareholder voting requirements could be fashioned which would, at least in part, answer some of the objections which have been raised. In particular, such conditions could require adequate notice to shareholders, ease of redeemability, maintenance of a higher ratio of disinterested directors to interested directors on the board and some type of shareholder referendum procedure.

As a condition to obtaining exemptive relief, it appears that, at a minimum, management should furnish

shareholders with adequate notice of any action on which they would otherwise be entitled to vote. A number of issues are involved, of course, in exactly what would constitute adequate notice. Should shareholders receive notice before or after action is taken? If advance notice is required, how much in advance should the notice be sent? If subsequent notice is required, how soon after the action is taken should the notice be sent? Could the notice be incorporated in periodic reports with respect to certain types of changes, such as the election of a new director or the selection of independent public accountants? How much information should be contained in a notice to shareholders—the equivalent of the present proxy disclosure requirements or something more or something less?

Similarly, it appears that shareholders should be in a position to react ot management actions which they dislike by readily redeeming their holdings. The question becomes, then, what conditions would create sufficient ease of redeemability. Should exemptions be made available only: To money market funds? to no-load funds? to no-load funds which do not charge redemption fees? to funds which would permit shareholders to recapture a portion of the sales load paid, depending upon the length of time they have held their shares?

A condition which could at least mitigate the dangers inherent in a self-perpetuating board would be a requirement that a higher ratio of disinterested to interested directors on the board be maintained, for example, a majority or 75%. The question is, however, how would those disinterested directors be selected: by committing their selection shareholders at three-to-five-year intervals? by committing their selection to other disinterested directors? by requiring that the nominating committee be composed exclusively of disinterested directors?

Finally, a means of permitting shareholders to communicate with management without litigation could be preserved if shareholders were given referendum rights comparable to the rights conferred upon shareholders of pre-existing common law trusts by section 16(c) [15 U.S.C. 80a–16(c)].

Even if commentator concerns with respect to preserving adequate shareholder recourse and avoiding a self-perpetuating board can be resolved, it has been suggested that exempting mutual funds from federal shareholder voting provisions would effect only a cosmetic change because most funds are organized in corporate form and would therefore still be subject to state law requirements that the shareholders annually elect members of the board of directors. However, adoption of exemptions from federal shareholder voting requirements would give such funds the flexibility of reorganizing in non-corporate form, such as common law trust or limited partnership or taking other steps, such as the creation of a class of non-voting stock to be issued to public shareholders. The question is, then, whether funds would use such exemptive rules, given the costs of re-organization and the costs of complying with the conditions outlined above.

B. Creation of an Alternative Type of Investment Company—the Unitary Investment Fund

Another school of thought would create by legislation an alternative type of investment company—a unitary investment fund ("UIF"). This legislative approach, premised upon a view that directors are as superfluous as voting shareholders in a mutual fund context, would create a UIF having neither voting shareholders nor a board of directors. Proponents of this approach believe that an open-end investment company should be permitted to reorganize as a unitary investment fund sponsored and managed by an investment manager.

Draft legislation which has been submitted to the staff for consideration provides that each investment manager, including a bank acting in that capacity, would be required to register under the Investment Advisers Act of 1940 (15 U.S.C. 80b–1 *et seq.)*. A management contract between the investment manager and the fund would set forth, among other things, the fund's investment objectives, management fees and charges to shareholder accounts. The investment manager would not be permitted to amend those provisions during an initial start-up period (probably five years) and thereafter only upon adequate notice to investors. A new subsection of section 36 (15 U.S.C. 801a–35) would declare that a UIF investment manager has no fiduciary duty regarding the receipt of compensation by such manager and its affiliates.

As contemplated, the Commission would play a far more active role in regulating UIFs. A UIF's registration statements under both the Securities Act of 1933 (15 U.S.C. 77a *et seq.*) and the Investment Company would have to be declared effective by the Commission before shares could be sold, thereby giving the staff the opportunity to comment on the investment management contract as well as the disclosure to be furnished to investors in the fund's prospectus. To the extent that exemptive rules would not be available, a UIF investment manager would have to file an application for relief from the Act's prohibitions on an individual basis. To the extent that a UIF investment manager needed to amend the management contract during the initial start-up period, an application would have to be filed for an order permitting such amendment. The Commission would also be empowered to seek the liquidation of a UIF in a U.S. District Court in the event of the insolvency or bankruptcy of the investment manager.

In evaluating the unitary investment fund contemplated, the same considerations described above with respect to affording shareholders with adequate notice, ease of redeemability and some form of referendum procedure would be applicable. In addition, the following difficult question is presented: Should directors as well as voting shareholders be dispensed with?

In support of this approach, some proponents might question the utility of the independent directors, arguing that these directors are unwilling to spend significant time or energy on functions for which they are paid only a minimal amount; having been nominated by the adviser in virtually every case, they are unlikely to exercise any degree of control over the adviser; and, since they rarely have an independent staff, they must rely on the inside directors, officers, and investment adviser's staff for information and analysis. According to some commentators, court and Commission cases show that the independent directors have not challenged successfully, or even attempted to challenge, management abuses. Similarly, commentators contend that reported cases show that the independent directors have rarely persuaded, or even attempted to persuade, the other directors to maintain shareholder derivative suits alleging management abuses. Commentators have also speculated that, where the adviser is paying increased directors' fees to compensate for the increased responsibilities assigned to the independent directors by the recent series of exemptive rules adopted by the Commission, those directors have become even more susceptible to control by the adviser.

On the other hand, it has been observed that to an increasing extent the independent directors serve as a meaningful counterweight to the entrepreneurial spirit of investment advisers. The presence of independent directors has caused investment

advisers to temper fee proposals and to rectify administrative problems and investment strategies in anticipation of board disapproval. Moreover, albeit infrequently, there have been cases where a mutual fund has severed its advisory relationship at the instigation of its independent directors.

It should also be noted that the initiatives taken by the Commission over the past four years have been premised on a belief that exemptive relief from the Act's prohibitions is appropriate where the directors (and in cases where there is a potential conflict of interest, the independent directors) are willing to assume responsibility for finding a contemplated action to be in the best interests of the fund. If directors are eliminated from a UIF, a dilemma is posed as to whether such funds would be eligible to rely on the exemptive rules. Where an exemptive rule (or section of the Act) addresses a potential conflict of interest situation, a UIF would either have to apply on an individual basis for an exemptive order or the role played by the independent directors would have to be assigned to an appropriate third party, such as the fund's independent public accountants. One issue is then where the Commission should focus its efforts in the investment company area. Would it be more beneficial to mutual funds and their shareholders if the Commission continues its exemptive rulemaking program, pursuing perhaps even more aggressively the goal of transferring oversight responsibilities to the independent directors where this can be done consistent with investor protection? Or, would mutual funds and their investors benefit more from the creation of an alternative type of investment company which would be subject to greater Commission scrutiny?

Some proponents of the UIF concept argue that section 36(b) should not be applicable to UIFs primarily because the advisory fee and shareholder charges payable to the UIF investment manager would be set in advance in the investment contract and could be readily compared to the fees charged by other UIFs. Instead of filing suit under section 36(b) to protest fees which they believe to be excesssive, investors would have the option of simply redeeming their shares and, in any event, market competition should induce managers to keep their fees reasonable. In general criticism of section 36(b), commentators contend that litigation under the section has only generated substantial litigation expenses which are ultimately passed on to shareholders, without resulting in any significant modification of fee structures. It might also be argued that section 36(b) imposes an unrealistic fiduciary duty on an adviser for, in negotiating its compensation, the adviser must necessarily be acting in its own self-interest.

It is the Commission's preliminary judgment, however, that section 36(b) should be applicable to UIFs. Reliance on the market in a UIF context could be misplaced. Since mutual fund investors have not appeared to be expense conscious in the past, it is doubtful that they would focus upon one element of expenses, the management fee, in comparing UIFs with other funds. Even assuming that investor "comparison shopping" would make UIF investment managers sensitive to market signals, those managers would not be free to lower fees in response to market conditions during the fund's initial start-up period.

It can also be argued that, because investment advisers or investment managers are obviously acting in their own interests in negotiating management fees, that is all the more reason to retain a shareholder cause of action in section 36(b). If anything, because the UIF structure would eliminate director and shareholder approval of the advisory contract, the danger is greater that the investment manager may act in its own best interests by establishing an excessively high fee structure.

Finally, while it is true that plaintiffs in section 36(b) have suffered recent setbacks, litigation under that section is still basically a new phenomenon, and the decisions which have been handed down stress the importance of the role played by the independent directors in evaluating adviser compensation. Further, far from exposing funds to limitless liability, section 36(b) was carefully drafted to circumscribe that liability. If UIF shareholders were forced to challenge management fees in state court, it would appear difficult to attack even an unusually high management fee which has been set forth in the trust instrument.

III. Conclusion

These approaches to restructuring investment companies can of course be modified. For example, exemptions from shareholder voting requirements or UIF legislation could be limited to money market funds, at least initially, until the Commission and the industry gain more experience with a new regulatory framework. Alternatively, the UIF concept could be modified to provide, not for a new category of investment company, but rather for procedures whereby any open-end fund could dispense with shareholder voting, boards of directors, or both, if appropriate conditions were met.

A significant issue to be considered in evaluating these alternatives is whether, if any of these changes is considered desirable, it should be effected by administrative action or by legislation. At the present time, the Commission is predisposed to believe that changes of this magnitude should be effected legislatively. It can be argued that the administrative approach, unlike the legislative approach, has the advantage of allowing initiatives to be implemented as they are developed, rather than requiring the development of a complete "package" of amendments for legislative consideration. Moreover, the administrative approach gives the Commission more flexibility to "fine-tune" changes. However, the legislative approach has the advantage of adopting all contemplated changes simultaneously, not in piecemeal fashion, and eliminates any risk of possible challenges to those changes as an over-extension of the Commission's exemptive authority under section 6(c) of the Act (15 U.S.C. 80a–6(c)).

Another significant issue involved in evaluating these alternatives, and possible modifications thereof, is the extent to which adoption of one of these approaches would reduce mutual fund operating expenses. The Commission, extrapolating from published cost data,[2] has been able to estimate only roughly the aggregate current costs which mutual funds appear to incur in complying with the Act's corporate governance requirements. These estimates indicate that, for fiscal years ended in 1982, funds may have incurred costs as high as $13.5 million to conduct proxy solicitations[3] and costs as high as $28 million to pay directors' fees and expenses (including the cost of hiring outside counsel for the directors). The Commission currently has no basis for estimating costs which might be incurred by funds in re-organizing or operating under either contemplated regulatory framework, such as the cost of complying with shareholder notice conditions if a fund were to rely on shareholder voting exemptions or the cost of assigning certain director responsibilities to other independent parties if a fund were to become a UIF. Request is made, therefore, for commentators to furnish the

[2] Lipper Directors' Analytical Data (Aug. 1982).

[3] These costs may be marginal, however, insofar as funds may already be obligated to hold an annual meeting of shareholders to elect directors under state law.

Commission with as much concrete cost information as possible, both with respect to costs which are presently incurred in complying with the Act's corporate governance requirements and costs which could be incurred if regulatory alternatives were implemented.

The approaches outlined above, as well as possible modifications thereof, are discussed in more detail in the appendix. The Commission wishes to emphasize that, by asking for public comment and setting forth arguments, pro and con, with respect to the questions addressed in this release and appendix, it has not taken any firm position on those questions or on the broader issues of whether these changes are desirable.

List of Subjects in 17 CFR Part 270

Investment companies, Reporting requirements, Securities.

By the Commission.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 82-34330 Filed 12-16-82 8:45 am]
BILLING CODE 8010-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 182 and 184

[Docket No. 81N-0381]

Manganese Salts; Proposed Affirmation and Removal of GRAS Status as Direct Human Food Ingredients

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to affirm that manganese chloride and manganese sulfate are generally recognized as safe (GRAS) as direct human food ingredients. In addition, FDA is proposing not to affirm manganese citrate, manganese gluconate, and manganous oxide as GRAS as direct human food ingredients and to remove them from the list of substances that are GRAS. The safety of these ingredients has been evaluated under the comprehensive safety review conducted by the agency. The proposal would take no action on the listing of these ingredients as GRAS substances for use in dietary supplements.

DATE: Comments by February 15, 1983.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John W. Gordon, Bureau of Foods (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, D.C. 20204, 202-426-5487.

SUPPLEMENTARY INFORMATION: FDA is conducting a comprehensive review of human food ingredients classified as GRAS or subject to a prior sanction. The agency has issued several notices and proposals (see the **Federal Register** of July 26, 1973 (38 FR 20040)) initiating this review, under which the safety of certain manganese salts has been evaluated. In accordance with the provisions of § 170.35 (21 CFR 170.35), the agency proposes to affirm the GRAS status of manganese chloride for use in infant formula and manganese sulfate for use as a nutrient supplement in conventional foods [1] and infant formula, and to remove manganese citrate, manganese gluconate, and manganous oxide from GRAS status.[2]

The GRAS status of the use of manganese chloride, manganese citrate, manganese gluconate, manganese sulfate, and manganous oxide in dietary supplements (i.e., over-the-counter vitamin preparations in forms such as capsules, tablets, liquids, wafers, etc.) is not affected by this proposal. The agency did not request consumer exposure data on dietary supplement uses when it initiated this review. Without exposure data, the agency cannot evaluate the safety of the uses of these ingredients in dietary supplements. The use of these ingredients in dietary supplements will continue to be permissible under Subpart F of Part 182 (21 CFR Part 182).

Manganese is an essential nutrient. It occurs naturally in many foods of both plant and animal origin. However, manganese reportedly is added to food in the form of manganese chloride and manganese sulfate. These salts are generally prepared as follows:

Manganese chloride (tetrahydrate) is prepared by leaching selected grades of reduced manganese ore with hydrochloric acid. The manganese chloride solution is treated to remove impurities, then filtered. Anhydrous manganese chloride is made by the action of dry HCl gas on the metal (manganese), manganese carbonate, or manganous oxide. Pink translucent crystals, produced by these reactions, are isolated by filtering the recrystallization.

Manganese sulfate (monohydrate) is prepared by treating finely ground manganese dioxide with sulfuric acid in the presence of a reducing agent. It is also obtained as a byproduct in the manufacture of hydroquinone. It is isolated as a pale pink, granular, odorless powder.

Manganous oxide is prepared by the reduction of a higher manganese oxide with a reducing gas such as carbon monoxide or hydrogen with carbonaceous matter followed by quenching in an inert atmosphere. It can also be prepared by thermal decomposition of manganese carbonate or oxalate in the absence of air.

FDA has not been able to obtain manufacturing information for manganese citrate amd manganese gluconate. If these ingredients are used in food, interested persons should submit such information to the agency as comments on this proposal.

Manganese chloride, manganese citrate, manganese gluconate, manganese sulfate, and manganous oxide were listed as GRAS for use as nutrients and dietary supplements in a regulation published in the **Federal Register** of January 31, 1961 (26 FR 938). However, in recodification published in the **Federal Register** of September 5, 1980 (45 FR 58837), FDA divided the nutrient and dietary supplement category into separate listings for GRAS dietary supplements and GRAS nutrients. As a consequence, manganese chloride, manganese citrate, manganese gluconate, manganese sulfate, and manganous oxide, respectively, are currently listed as GRAS in §§ 182.5446, 182.5449, 182.5452, 182.5461, and 182.5464 as dietary supplements. Nutrient uses of these ingredients are covered under §§ 182.8446, 182.8449, 182.8452, 182.8461,

---

[1] FDA is using the term "conventional food" to refer to food that would fall within any of the 43 categories listed in § 170.3(n) (21 CFR 170.3(n)).

[2] The manganese ion can exist in a variety of oxidation states. Technically the term "manganous" refers to the divalent form of the manganese cation. Traditionally, however, the terms manganese and manganous have been used interchangeably. (See "The Condensed Chemical Dictionary," 9th Ed. by Gessner G. Hawley (1977) pp. 534-536.) Moreover, the Food Chemicals Codex uses the term manganese but unequivocally defines the salts as the divalent manganese salts, as is evident from the empirical formulas listed in the monographs. Further, the Select Committee on GRAS Substances (the Select Committee) used the terms manganous and manganese interchangeably in their report to FDA but reviewed only the safety of divalent salts because this was the only form of the salts reported to be used in food. To minimize confusion and to be consistent with current listings in the Code of Federal Regulations and the Food Chemicals Codex, the agency will continue to use the terms manganese chloride, manganese gluconate, and manganese sulfate. The citrate and oxide salts are not defined in the Food Chemicals Codex, and to be consistent with current listings in the Code of Federal Regulations, the agency will continue to list them as manganese citrate and manganous oxide.

and 182.8464, respectively. Section 412(g) of the Federal Food, Drug, and Cosmetic Act (the act) lists manganese as a required nutrient in infant formula, subject to level restrictions. FDA is reviewing all nutrient levels in infant formulas under a contract with the American Academy of Pediatrics. Any necessary modifications in the nutrient level of manganese in infant formula regulations will be proposed by a separate rulemaking under section 412(a)(2) of the act. The agency has addressed the GRAS status of two other manganese salts, manganese glycerophosphate (21 CFR 182.5455) and manganese hypophosphite (21 CFR 182.5458) in proposed regulations on glycerophosphates and hypophosphites, respectively, and FDA will not discuss these substances in this proposal.

In 1971, the National Academy of Sciences/National Research Council (NAS/NRC) surveyed a representative cross-section of food manufacturers to determine the specific foods in which manganese salts were used and the levels of usage. NAS/NRC combined this manufacturing information with information on consumer consumption of foods to obtain an estimate of consumer exposure to these ingredients. The NAS/NRC survey information indicates that manganese sulfate is used as a nutrient in a variety of foods including infant formulas, baked goods, alcoholic beverages, dairy product analogs, fish products, meat products, milk products, and poultry products. The survey found that manganese chloride is used only in infant formulas. FDA estimates from the NAS/NRC survey that, in 1970, the total amount of manganese chloride added to food was 17 pounds and the total amount of manganese sulfate added to food was 5,717 pounds. The NAS/NRC survey did not report any poundage data for manganese citrate, manganese gluconate, or manganous oxide.

Manganese salts were the subject of a search of the scientific literature from 1920 to the present. The criteria used in the search were chosen to discover any articles that considered (1) chemical toxicity, (2) occupational hazardss, (3) metabolism, (4) reaction products, (5) degradation products, (6) carcinogenicity, teratogenicity, or mutagenicity, (7) dose response, (8) reproductive effects, (9) Histology, (10) embryology, (11) behavorial effeects, (12) detection, and (13) processing. A total of 280 abstracts on manganese salts was reviewed, and 108 particularly pertinent reports from the literature survey have been summarized in a scientific literature review.

Information from the scientific literature review and other sources has been summarized in a report to FDA by the Select Committee on GRAS Substances, which is composed of qualified scientists chosen by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology (FASEB). The members of the Select Committee have evaluated all the available safety information on manganese salts.[3] In the Select Committee's opinion:

> The available information indicates that a wide margin exists between present intake levels of manganese as manganous salts and those levels that have been reported to produce harmful effects. Manganese is an essential nutrient that is required for the optimal functioning of several metabolic systems largely through its role as a prosthetic group or as an essential cofactor. Divalent manganese is among the least toxic of the trace elements. As was indicated in the review of the experiments involving manganous chloride and manganous sulfate, the oral toxicity of manganese is low largely because of restricted absorption and the existence of a relatively efficient mechanism regulating intestinal excretion.
>
> Manganese interacts metabolically with several other minerals including calcium, phosphorus, iron, and copper. Under most dietary conditions, however, it is unlikely that the ratio of manganese to these elements is distorted enough to produce an adverse effect.
>
> The only manganese salts known by the Select Committee to be in use as ingredients of foods for human consumption are the chloride and the sulfate. Despite the nearly complete lack of scientific reports on the biologic effects of manganous citrate and gluconate, the relatively low toxicity of the manganous ion and the innocuous nature of citrates and gluconates when used as food ingredients suggest that no health hazard would result from similar uses of manganous citrate and gluconate.
>
> While there is good evidence of the short-term tolerance of manganous oxide as an added feed ingredient for poultry and livestock, no acute oral toxicity studies or long-term feeding studies of manganous oxide have been reported. In addition, the Select Committee has no information on the amounts of manganous oxide, if any, that may be used in foods for human consumption in this country.[4]

The Select Committee concludes that no evidence in the available information on manganese citrate, manganese chloride, manganese gluconate, and manganese sulfate demonstrates, or presents reasonable grounds to suspect, a hazard to the public when these substances are used at levels that are now current or that might reasonably be expected in the future. However, in view of the lack of relevant biological studies and the lack of information on consumer exposure, the Select Committee states that it has insufficient data upon which to base an evaluation of manganous oxide when it is used in food for human consumption.[5]

FDA has undertaken its own evaluation of the available information on manganese salts and concurs with the conclusions of the Select Committee. FDA therefore is proposing to take the following actions as justified below:

1. There is sufficient usage and toxicological information to affirm the GRAS status of manganese chloride and manganese sulfate as nutrients. Therefore, the agency proposes to affirm the GRAS status of manganese chloride for use in infant formula and manganese sulfate for use in conventional foods and in infant formula.

2. In the absence of sufficient safety data on manganous oxide, the agency proposes to remove it from the list of nutrients that are GRAS for use in food.

3. In the absence of data on consumer exposure or current use, the agency is proposing not to affirm manganese citrate and manganese gluconate as GRAS and to remove them from the list of nutrients that are GRAS for use in food. However, if FDA receives appropriate usage and manufacturing information in response to this proposal, the agency will reconsider this action before issuing a final rule.

4. Because the 1971 NAS/NRC industry use survey did not request data on dietary supplement uses, there are insufficient data to assess exposure from these uses. Without such exposure data, the agency cannot evaluate the safety of the use of these substances as dietary supplements. These uses of manganese salts will continue to be permissible under Subpart F of Part 182 consistent with the policy expressed in the **Federal Register** of September 5, 1980 (45 FR 58857).

Additionally, FDA is proposing not to include in the GRAS affirmation regulations for manganese chloride and manganese sulfate the levels of use reported in the NAS/NRC 1971 survey for these ingredients. Both FASEB and

---

[3] "Evaluation of the Health Aspects of Manganous Salts As Food Ingredients," Life Sciences Research Office, Federation of American Societies For Experimental Biology, 1979, pp. 8–18. In the past, the agency presented verbatim the Select Committee's discussion of the biological data it reviewed. However, because the Select Committee's report is available at the Dockets Management Branch and from the National Technical Information Service, and because it represents a significant savings to the agency in publication costs, FDA has decided to discontinue presenting that discussion in the preamble to proposals that affirm GRAS status in accordance with current good manufacturing practice.

[4] *Ibid.*, p. 19.

[5] *Ibid.*, pp. 19–20.

the agency have concluded that a large margin of safety exists for the use of these substances, and that any reasonably foreseeable increase in the level of consumption of manganese chloride and manganese sulfate will not adversely affect human health. Therefore, the agency is proposing to affirm the GRAS status of manganese chloride and manganese sulfate when they are use under current good manufacturing practice (CGMP) conditions of use in accordance with § 184.1(b)(1) (21 CFR 184.1(b)(1)). To make clear, however, that the affirmation of the GRAS status of manganese chloride and manganese sulfate is based on the evaluation of limited uses, the proposed regulations set forth the technical effects and food categories that FDA evaluated.

In the **Federal Register** of September 7, 1982 (47 FR 39199), FDA proposed to adopt a general policy restricting the circumstances in which it will specifically describe conditions of use in regulations affirming substances as GRAS under 21 CFR 184.1(b)(1) or 186.1(b)(1). The agency proposed to amend its regulations to indicate clearly that it will specify one or more of the CGMP conditions of use in regulations for substances affirmed as GRAS with no limitations other than CGMP only when the agency determines that it is appropriate to do so.

Copies of the scientific literature review, a report on the teratogenic evaluation of manganese sulfate, and the report of the Select Committee on manganous salts are available for review at the Dockets Management Branch (address above), and may be purchased from the National Technical Information Service, 5285 Port Royal Rd., Springfield, VA 22161, as follows:

Title	Order No.	Price code	Price [1]
Manganese salts (scientific literature review).	PB 228-553/AS..	A08	$11.00
Manganous salts (Select Committee report).	PB 301-404/AS..	A03	[illegible]00
Manganous sulfate (teratogenic evaluation).	PB 223-813/AS..	A04	7.00

[1] Price subject to change.

The format of the proposed regulations is different from those in previous GRAS affirmation regulations. FDA has modified paragraph (c) of §§ 184.1446 and 184.1461 to make clear the agency's determination that GRAS affirmation is based upon CGMP conditions of use, including the technical effects and food categories listed. This change has no substantive effect but is made merely for clarity.

This proposed action does not affect the current use of manganous salts in pet food or in animal feed.

The agency has determined under 21 CFR 25.24(d)(6) (proposed December 11, 1979; 44 FR 71742) that this proposed action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

FDA, in accordance with the Regulatory Flexibility Act, has considered the effect that this proposal would have on small entities including small businesses and has determined that the effect of this proposal is to maintain current known uses of the substances covered by this proposal by both large and small businesses. Therefore, FDA certifies in accordance with section 605(b) of the Regulatory Flexibility Act that no significant economic impact on a substantial number of small entities will derive from this action.

In accordance with Executive Order 12291, FDA has carefully analyzed the economic effects of this proposal, and the agency has determined that the final rule, if promulgated, will not be a major rule as defined by the Order.

List of Subjects

21 CFR Part 182

Generally recognized as safe (GRAS) food ingredients, Spices and flavorings.

21 CFR Part 184

Direct food ingredients, Food ingredients, Generally recognized as safe (GRAS) food ingredients.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348, 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), it is proposed that Parts 182 and 184 be amended as follows:

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

§§ 182.8446, 182.8449, 182.8452, 182.8461, and 182.8464 [Removed]

1. Part 182 is amended by removing § 182.8446 *Manganese chloride,* § 182.8449 *Manganese citrate,* § 182.8452 *Manganese gluconate,* § 182.8461 *Manganese sulfate,* and § 182.8464 *Manganous oxide.*

PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

2. Part 184 is amended:

a. By adding new § 184.1446, to read as follows:

§184.1446 Manganese chloride.

(a) Manganese chloride ($MnCl_2 \cdot 4H_2O$, CAS Reg. No. 7773-01-5), also referred to as manganese dichloride, is a pink, translucent, crystalline product. It is prepared by dissolving manganous oxide, pyrolusite ore (MnO_2), or reduced manganese ore in hydrochloric acid. The resulting solution is neutralized to precipitate heavy metals, filtered, concentrated, and crystallized.

(b) The ingredient meets the specifications of the Food Chemicals Codex, 3d Ed. (1981), p. 186, which is incorporated by reference. Copies are available from the National Academy Press, 2101 Constitution Ave. NW., Washington, DC 20418, or available for inspection at the Office of the Federal Register, 1100 L St. NW., Washington, DC 20408.

(c) In accordance with § 184.1(b)(1), the ingredient is used in food with no limitation other than current good manufacturing practice. The affirmation of this ingredient as generally recognized as safe (GRAS) as a direct human food ingredient is based upon the following current good manufacturing practice conditions of use:

(1) The ingredient is used a nutrient supplement as defined in § 170.3(o)(20) of this chapter.

(2) The ingredient may be used in infant formulas in accordance with section 412(g) of the Federal Food, Drug, and Cosmetic Act (the act) or with regulations promulgated under section 412(a)(2) of the act.

b. By adding new § 184.1461, to read as follows:

§ 184.1461 Manganese sulfate.

(a) Manganese sulfate ($MnSO_4 \cdot H_2O$, CAS Reg. No. 7785-87-7) is a pale pink, granular, odorless powder. It is obtained by reacting manganese compounds with sulfuric acid. It is also obtained as a byproduct in the manufacture of hydroquinone. Other manufacturing processes include the action of sulfur dioxide, on a slurry of manganese dioxide in sulfuric acid, and the roasting of pyrolusite (MnO_2) ore, with solid ferrous sulfate and coal, followed by leaching and crystallization.

(b) The ingredient meets the specifications of the Food Chemicals Codex, 3d Ed. (1981), p. 188, which is incorporated by reference. Copies are available from the National Academy

Press, 2101 Constitution Ave. NW., Washington, DC. 20418, or available for inspection at the Office of the Federal Register, 1100 L St. NW., Washington, DC 20408.

(c) In accordance with § 184.1(b)(1), the ingredient is used in food with no limitation other than current good manufacturing practice. The affirmation of this ingredient as generally recognized as safe (GRAS) as a direct human food ingredient is based upon the following current good manufacturing practice conditions of use:

(1) The ingredient is used as a nutrient supplement as defined in § 170.3(o)(20) of this chapter.

(2) The ingredient is used in the following foods at levels not to exceed current good manufacturing practice: baked goods as defined in § 170.3(n)(1) of this chapter; alcoholic beverages as defined in § 170.3(n)(2) of this chapter; dairy product analogs as defined in § 170.3(n)(10) of this chapter; fish products as defined in § 170.3(n)(13) of this chapter; meat products as defined in § 170.3(n)(29) of this chapter; milk products as defined in § 170.3(n)(31) of this chapter; and poultry as defined in § 170.3(n)(34) of this chapter. The ingredient may be used in infant formulas in accordance with section 412 (g) of the Federal Food, Drug, and Cosmetic Act (the act) or with regulations promulgated under section 412(a)(2) of the act.

The agency is unaware of any prior sanction for the use of these ingredients in foods under conditions different from those identified in this document. Any person who intends to assert or rely on such a sanction shall submit proof of its existence in response to this proposal. The action proposed above will constitute a determination that excluded uses would result in adulteration of the food in violation of section 402 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 342), and the failure of any person to come forward with proof of an applicable prior sanction in response to this proposal constitutes a waiver of the right to assert or rely on it later. Should any person submit proof of the existence of a prior sanction, the agency hereby proposes to recognize such use by issuing an appropiate final rule under Part 181 (21 CFR Part 181) or affirming it as GRAS under Part 184 or 186 (21 CFR Part 184 or 186), as appropriate.

Interested persons may, on or before February 15, 1983, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy.

Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-5-FRL 2228-3]

Approval and Promulgation of Implementation Plans; Illinois

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rulemaking.

SUMMARY: This notice proposes rulemaking and solicits public comment on the incorporation of an alternate control strategy (ACS) or "bubble" into the Illinois State Implementation Plan (SIP). This proposed revision, if approved, will allow the Granite City Steel Division of National Steel, located in Granite City, Illinois, to use an ACS to control open dust fugitive sources such as parking lots and roadways in lieu of controlling its blast furnace casthouse. This proposed SIP revision was submitted to the Environmental Protection Agency (EPA) by the State of Illinois on September 30, 1982, pursuant to Section 110 of the Clean Air Act (Act).

DATE: Comments on this revision and on the proposed EPA action must be received by January 17, 1983.

ADDRESSES: Copies of the SIP revision are available at the following addresses for review: (It is recommended that you telephone Randolph O. Cano, at (312) 886-6035, before visiting the Region V office).

Environmental Protection Agency, Region V, Air Programs Branch, 230 South Dearborn Street, Chicago, Illinois 60604

Illinois Environmental Protection Agency, Division of Air Pollution Control, 2200 Churchill Road, Springfield, Illinois 62706

Comments on this proposed rule should be addressed to: Gary Gulezian, Chief, Regulatory Analysis Section, Air Programs Branch, USEPA, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Randolph O. Cano, Air Programs Branch, Region V Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886-6035.

SUPPLEMENTARY INFORMATION: On April 7, 1982 (47 FR 15076), the Environmental Protection Agency issued a proposed Emissions Trading Policy Statement which sets forth general principles for the creation, banking and use of emission reduction credits. This statement indicated that it is the policy of EPA to encourage use of emissions trades to achieve more flexible, rapid and efficient attainment of national ambient air quality standards (NAAQS). It describes emissions trading, sets out general principles EPA will use to evaluate emissions trades under the Act, and expands opportunities for States and industry to use these less costly control approaches. The April 7, 1982, notice noted that, until EPA takes final action on its policy statement, State actions involving emission trades would be evaluated under the provisions set forth in the proposed statement.

On September 30, 1982, the Illinois Environmental Protection Agency (IEPA) submitted a proposed revision to the Illinois SIP in the form of an approved ACS permit.

This ACS would, if finally adopted, give credit to the Granite City Steel Division of National Steel Corporation (GCS) for providing greater control of fugitive particulate emissions from the facility's unpaved roadways and parking lots than is required by State regulations. This extra reduction in emissions from the roads and parking lots will be substituted for control of emissions from the blast furnace casthouse. This SIP revision, if approved, would waive installation of casthouse control equipment until 1986 and would require implementation of the ACS by December 31, 1982.

After EPA takes final action to approve the SIP, the March 18, 1981, Consent Decree among EPA, IEPA and GCS will be modified to reflect the requirements of the ACS. This Consent Decree was entered after negotiations among the parties in order to resolve continuing violations by GCS of Illinois Pollution Control Board (IPCB) Rules 202 and 203 which are part of the existing federally approved Illinois SIP. An amendment to this Consent Decree has been drafted and was submitted to EPA. In this amendment, the section requiring control of casthous emissions has been revised; and a new section has been added which sets forth specific open dust control requirements.

Background

According to the State, without air pollution controls, particulate emissions from unpaved roads, parking lots, and the blast furnace casthouse at GCS are estimated to total 3,281 tons per year (tpy): (a) Unpaved roads (2,662 tpy), (b) parking lots (322 tpy), and (c) blast furnace casthouse (307 tpy). Existing State compliance programs require that these emissions be reduced to 1,671 tpy by December 31, 1982.

Fugitive particulate emissions from the unpaved roads and parking lots are governed by IPCB Rules and Regulations, Chapter 2: Air Pollution. Rule 203(f)(3)(C) states that all normal traffic pattern roads must be paved or treated on a regular basis with water, oil or chemicals. Rule 203(f)(3)(F) requires submission of a plant-specific operating program designed to significantly reduce fugitive particulate emissions. Granite City Steel's program, as required by that rule, is estimated to control particulate emissions with 50 percent efficiency and would, accordingly, reduce particulate emissions by 1,487 tpy by December 31, 1982. This reflects a 50 percent reduction from the uncontrolled rate of 2,974 tpy for these sources.

Particulate emissions from the blast furnance casthouse are regulated by the State of Illinois under IPCB Rule 203(d)(5)(D)(i) or (ii). Rule (i) requires a quantitative evaluation of emissions against a numerical limit. Rule (ii) requires installation of air pollution control equipment on the casthouse. According to the IEPA, installation and operation of control equipment required by Rule 203(d) at the casthouse would reduce particulate emissions by 123 tpy from the uncontrolled rate of 307 tpy.

To summarize, IEPA believes that compliance with existing State regulatory requirements for GCS would reduce particulate emission by 1,610 tpy: (1,487 tpy from roads and parking lots and 123 tpy from the casthouse).

Comparison Between Granite City Steel's Alternative Control Strategy (ACS) Proposal and Existing State Requirements.

According to IEPA, the State's existing regulatory requirements provide for: (a) Control of fugitive particulate emissions from roadways and parking lots at 50 percent effectiveness, and (b) control of particulate emissions from the blast furnace casthouse. In the ACS, GCS is proposing to increase control of emissions from roadways and parking lots to 75 percent effectiveness in exchange for not installing casthouse control equipment. Under the State's requirement, this trade must produce environmentally equivalent reductions in particulate emissions to be an acceptable ACS.

GCS claims that fugitive particulate emissions can be reduced by 75 percent by using a chemical dust suppressant (Coherex or equal). This would amount to a 25 percent increase in control for these sources or 744 tpy in addition to the 1,487 tpy provided by the existing compliance programs.

According to IEPA, the required frequency of application to achieve a 75 percent reduction in particulate emissions was determined using information from other steel mills which use chemical applications and from an in-plant traffic survey. Some areas of the plant will have the chemical dust suppressant applied once a month, while the more traveled routes will have four applications per month. An additional 290 tpy of reduction in particulate emissions will be achieved by paving 1.57 miles of roadways and two of the larger parking lots. While the paving program will not be completed until December 1983, those areas to be paved will be controlled with a chemical dust suppressant until the paving is completed. Coupled with the 744 tpy from using a chemical dust suppressant, total additional reductions in open dust emission from the ACS proposal amount to 1,034 tpy.

According to IEPA, the net reduction in particulate emissions gained from the ACS proposal is 911 tpy or approximately a 7 to 1 reduction ratio when compared with reducing emissions at the casthouse by 123 tpy.

The State's analysis to determine the acceptability of the emissions trade used IPCB Rule 203(d)(5)(D) to determine the emissions baseline for the casthouse. Since this rule has been disapproved by EPA, EPA found it necessary to perform an independent analysis of the emissions reductions required under RACT and the proposed emission reductions in the ACS. The April 7, 1982, proposed Emission Trading Policy Statement requires a RACT baseline to be used as the basis for such an analysis. EPA's analysis is consistent with the proposed policy statement.

The differences between EPA's independent analysis and IEPA's analysis, as summarized above, involve the following: uncontrolled emission factor for casthouse; controlled, RACT-level emission factor for casthouse; open dust control efficiency for use of dust suppressant chemical; and control efficiency for paving plus cleaning. The EPA regional office has determined for this specific facility that RACT is 50 percent control effectiveness. The differences are discussed in detail in the technical support document which is available for inspection at the Region V office listed in the front of this notice. The accompanying Table summarizes the results of EPA's analysis. Despite the use of different assumptions, EPA agrees with IEPA's conclusion that the ACS provides for an emissions trade (i.e., open dust emission reductions below the RACT level for casthouse emissions above the RACT level) that results in greater reduction of TSP than would occur under Illinois current SIP limitations. Therefore, EPA agrees with IEPA's conclusion that the emissions trade is acceptable, although it does not accept certain assumptions used by IEPA in the latter's analysis of this bubble proposal.

COMPARISON OF EMISSION LEVELS REQUIRED BY RACT AND THE ACS

[illegible]	RACT (tpy)	Alternative control strategy (tpy)
Open Dust Fugitive Sources:		
BOF Roads	[illegible]	49.1
Steel Works Roads	[illegible]	79.1
Blast Furnance Roads	223.7	44.7
North Plant Roads	336.2	53.8
South Plant Roads	54.5	10.9
Wastewater Treatment Plant Roads	9.4	6.6
Parking Lots	158.2	29.3
Subtotal From Open Dust Fugitive Sources	1484.2	261.4
Casthouse	51	511
Total emissions	1535.2	784.5
Net Difference: (ACS Emissions Reduction Benefit)		750.7

In developing the comparison of emission levels required by RACT and the ACS, U.S. EPA has determined 50% control to represent the RACT baseline for unpaved roads at this plant.

As explained in EPA's Emission Trading Policy Statement, EPA will pursue a post approval monitoring network with the state agency which can be used to evaluate the impact of the ACS. Monitoring data from additional sites, if determined to be necessary, will supplement post approval data from existing monitoring sites. If the results of monitoring indicate that the ACS does not produce the predicted air quality impact, further enforceable emission reductions will be required.

EPA's proposed Emissions Trading Policy Statement also requires that each "bubble" application make a demonstration of ambient "equivalence." Because the ACS would not result in an increase in applicable baseline emissions and the ACS emission levels were not expected to significantly degrade air quality in the area of highest impact, only a screening

modeling analysis (limited to the specific sources involved in the trade) was required. GCS provided an air quality analysis (using the Industrial Source Complex-Long Term Model) which shows a net air quality improvement due to the ACS at the model receptor of highest impact.

However, the Granite City Steel modeling analysis did not directly address the 24-hour averaging period. Consequently, EPA is requiring that a short term ambient equivalence demonstration be performed which, per the EPA emission trading policy statement, must show that the ACS will not result in a significant air quality impact (i.e., 10 $\mu g./m^3$, 24-hour average). The modeling analysis is scheduled to be completed during the public comment period for this proposed rulemaking. There will be adequate opportunity for the public to review the results of the short-term modeling prior to EPA's final rulemaking on the GCS AECP. Anyone who wishes to be notified of the availability of the short-term modeling analysis should call the contact person listed at the beginning of this notice. Based on results of the annual air quality analysis, EPA has preliminarily determined that the ACS will not interfere with measures in the Illinois TSP SIP which are designed to lead to attainment and maintenance of the annual TSP NAAQS in the Granite City primary nonattainment area.

EPA believes that the proposed ACS is consistent with EPA's proposed Emission Trading Policy Statement. EPA is proposing to approve GCS's ACS since it should lead to a reducion in particulate levels and will not interfere with measures in the Illinois TSP SIP which are designed to lead to attainment and maintenance of the TSP NAAQS in the Granite City primary TSP nonattainment area. According to EPA's analysis, the ACS provides an emissions offset greater than 1 to 1 in relation to the level of emissions reduction required by RACT-level controls. The ACS will, according to EPA's analysis, provide an emissions reduction of nearly 763 tons per year below the RACT baseline.

EPA's final action on this proposal will consider the results of the short-term ambient equivalence demonstration and all public comments. The September 7, 1982, technical support document contains a description of the required short-term modeling procedures.

EPA, therefore, proposes approval of this ACS. Public comment is invited on this proposed SIP revision, on the issues discussed in the technical support document, and on EPA's proposed approval.

Comments should be submitted to the address listed in the front of this notice. Public comments received on or before January 17, 1983, will be considered in EPA's final rulemaking action. All comments received will be available for inspection at Region V: Air Programs Branch, 230 South Dearborn Street, Chicago, Illinois 60604.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709)

Under Executive Order 12291, today's action is not "Major". The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

(Sec. 110 of the Act, as amended)

[A-5-FRL 2219-6]

Michigan; Approval and Promulgation of Implementation Plans

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rulemaking.

SUMMARY: On June 24, 1982, the State of Michigan submitted Consent Order No. 16-1982 for Great Lakes Steel (GLS), a Division of National Steel Corporation (National Steel), as a revision to the Michigan State Implementation Plan (SIP). The Consent Order provides an alternate emissions control plan (AECP) or "bubble" which will result in reductions of particulate emissions in the Detroit (Wayne County) primary nonattainment area. The Consent Order requires that all controls be implemented by December 31, 1982. At the request of the State of Michigan, EPA is today proposing approval of this action and soliciting public comment on this revision.

DATE: Comments must be submitted on or before January 17, 1983.

ADDRESSES: Copies of this SIP revision are available for review during normal business hours at the following addresses:

U.S. Environmental Protection Agency, Air Programs Branch, 230 South Dearborn Street, Chicago, Illinois 60604

Michigan Department of Natural Resources, Air Quality Divsion, State Secondary Government Complex, General Office Building, 7150 Harris Drive, Lansing, Michigan 48917

Written Comments Should Be Sent To: Gary Gulezian, Chief, Regulatory Analysis Section, Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Toni Lesser, Regulatory Analysis Section, Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604 (312) 886-6037.

SUPPLEMENTARY INFORMATION: In the May 22, 1981, **Federal Register** (46 FR 27923), EPA published a notice of final rulemaking on Michigan's Part D SIP revision for iron and steel sources in the Detroit primary total suspended particulates (TSP) nonattainment area. This final rule approved, conditionally approved, and disapproved various provisions in Michigan's SIP and conditionally approved the State's overall control strategy for the Detroit primary TSP nonattainment area. The State of Michigan has committed itself to satisfy all conditions promulgated in the May 22, 1981, notice by December 31, 1982.

GLS, a Division of National Steel, operates integrated iron and steel making facilities in Ecorse and Zug Island, River Rouge, Michigan. These plants are located in the Detroit TSP nonattainment area.

The Ecorse facilities consist of:

- Two basic oxygen process (BOP) shops
- An electric are furnace (EAF) shop
- Steel rolling facilities

The Zug Island facilities consist of:

- Three coke oven batteries
- Four blast furnaces
- A sinter plant and associated support facilities
- Raw material storage and handling operations

In order to bring these facilities into compliance with all applicable State and County air pollution control regulations, abatement programs were developed and incorporated into two consent judgments: "U.S. v. National Steel Corporation, Civil Action No. 79-73214, U.S. District Court, Eastern District of Michigan," entered March 31, 1981, and

"Wayne County Department of Health v. National Steel Corporation, Civil Action No. 71–187905–CE, Wayne County Circuit Court," originally entered October 2, 1972, with the latest revision entered September 8, 1978. In part, the abatement programs included in these judgments require the company to cease operation of the DAF shop and to install secondary particulate emission capture and control systems at the No. 2 BOP shop and theblas furnace casthouse operations. Consent Judgement No. 71–187905–CE includes an industrial fugitive dust (i.e., open dust) control program which the Michigan Department of Natural Resources (MDNR) has indicated will fulfill the requirements of Michigan's Rule 336.1371. EPA proposed approval of this rule as requiring reasonably available control technology (RACT) on June 29, 1982 (47 FR 28112).

In August, 1981, National Steel proposed its AECP or "bubble," to the Wayne County Air Pollution Control Division. Under the AECP, GLS would pave and clean certain plant roadways beyond the RACT level of control reflected in Michigan's SIP for TSP and control the EAF shop to the New Source Performance Standards (NSPS) level. Greater than RACT-level control on the roadways and EAF shop would be traded for less than RACT-level control at the No. 2 BOP shop and the blast furnace casthouses.

On April 7, 1982, USEPA proposed an "Emissions Trading Policy Statement" (47 FR 15076). In that notice, EPA stated its intention to use the principles of the proposed policy to evaluate trading activities which become ripe for decision prior to the policy's final promulgation. The policy requires the use of a RACT baseline to determine the quantities of emissions to be traded in a bubble in areas that do not have a modeled demonstration of attainment of the TSP primary standard by December 31, 1982 (47 FR 15080). For the Detroit area, MDNR did not demonstrate attainment of the TSP national ambient air quality standards (NAAQS) through dispersion modeling. However, the approved Michigan TSP SIP for that area will include, when finalized, RACT-based requirements for industrial process fugitive and open dust emissions. The Emissions Trading Policy requires use of this RACT baseline in reviewing and approving bubbles for Michigan's primary TSP nonattainment areas. In addition, the Emissions Trading Policy also requires that a demonstration of ambient "equivalence" be made prior to approval.

At Region V's request, Wayne County reviewed specific portions of its open dust control requirements. Wayne County and the MDNR in June, 1982, obtained commitments from National Steel to pave additional road footage under a revised AECP in order to obtain reduced open dust emissions below the RACT baseline.

On June 24, 1982, the State of Michigan submitted Consent Order No. 16–1982 for GLS, National Steel Corporation, as a revision to the Michigan SIP. On July 19, 1982; July 27, 1982; and July 28, 1982, National Steel sent results of an air quality modeling analysis intended to meet the requirements of an equivalency demonstration for a "bubble."

Consent Order No. 16–1982 for National Steel establishes alternative emission limitations and contains TSP emission limitation changes for the following sources:

(1) Electric Arc Furnace Shop,

(2) Roadways,

(3) No. 2 Basic Oxygen Process Shop, and

(4) Blast Furnaces A, B, C, and D (Zug Island).

Specifically, additional control will not be required for the blast furnace casthouses. However, National Steel may operate only two of its four casthouses at GLS at any time (except during the period for startup of a replacement blast furnace; not to exceed two weeks). For the No. 2 BOP shop, capture and cleaning of secondary emissions presently required by the Federal Consent Judgment would be replaced by changes in operating practices affecting hot metal charging. In addition, the No. 1 BOP shop will close down.

Increased emissions, over a RACT baseline for the No. 2 BOP shop and blast furnace casthouses will be more than offset by controls beyond RACT requirements at the EAF Shop and from roadway open dust sources. That is, secondary emissions from the GLS EAF Shop will be controlled to the level required by the NSPS. Currently, charging and tapping emissions are uncontrolled and the direct shell evacuation system for melting and refining has a low capture efficiency. In addition, 90 percent control will be achieved by paving and sweeping 1400 feet of unpaved roads (sections of the Raw Materials Storage Road and the No. 5 Coke Battery Road) and 50 percent control will be achieved by vacuum sweeping 1200 feet of the paved Zug Island Road. In developing the comparison of the emission levels required by RACT and the AECP, U.S. EPA has determined 50% control to represent the RACT baseline for unpaved roads at this plant.

To calculate uncontrolled secondary emissions for charging and tapping from the No. 2 BOF shop, the U.S. EPA used emission factors based on an average of recent test data from two other BOF facilities. A control credit of 50% was given for charging based on operating practices which would be required under the AECP. In addition a control credit of 67% was given to reflect existing tapping controls. EPA solicits comments on this calculation as presented in more detail in the associated Technical Support Document.

In summary, the AECP provides over 262 tons per year greater emission reduction at the GLS plant than would be required by RACT for the sources covered by the AECP.

EPA's proposed Emissions Trading Policy Statement requires that each "bubble" application make a demonstration of ambient "equivalence." Because the AECP will not result in an increase in applicable baseline emissions and the AECP emission levels were not expected to significantly degrade air quality in the area of highest impact, only a screening modeling analysis (including only the specific sources involved in the trade) was required. GLS provided an air quality analysis (using the Industrial Source Complex—Long Term Model) which shows a net air quality *improvement* due to the AECP at the model receptor of highest impact.

As explained in EPA's Emission Trading Policy Statement, EPA will pursue a post approval monitoring network with the state and local agencies which can be used to evaluate the impact of the AECPs. Monitoring data from additional sites, if determined to be necessary, will supplement post approval data from existing monitoring sites. If the results of monitoring indicate that the AECP does not produce the predicted air quality impact, further enforceable emission reductions will be required.

However, GLS's modeling analysis did not directly address the 24-hour averaging period. Consequently, EPA is requiring that a short term ambient equivalence demonstration be performed which, per EPA's Emission Trading Policy Statement, must show that the AECP will not result in a significant air quality impact (i.e. 10 μg./m^3, 24-hour average). The modeling analysis is scheduled to be completed during the public comment period for this proposed rulemaking.

There will be adequate opportunity for the public to review the results of the short-term modeling prior to EPA's final rulemaking on the GLS AECP. Anyone who wishes to be notified of the availability of the short-term modeling analysis should call the contact person listed at the beginning of this notice.

Based on results of the annual air quality analysis, EPA has preliminarily determined that the AECP will not interfere with measures in the Michigan TSP SIP which are designed to lead to attainment and maintenance of the annual TSP NAAQS in the Detroit primary nonattainment area.

EPA believes that National Steel's Consent Order No. 16–1982, which incorporates the "bubble" concept, is consistent with EPA's proposed Emission Trading Policy Statement. EPA is proposing to approve National Steel's AECP since it should lead to a reduction in particulate levels and will not interfere will measures in the Michigan TSP SIP which will lead to attainment and maintenance of the TSP NAAQS in the Detroit primary TSP nonattainment area. EPA's final action on this proposal will consider the results of the short term ambient equivalence demonstration and all public comments. The Consent Order requires all controls to be implemented by December 31, 1982. EPA's rationale for approval, dated September 10, 1981, contains a further analysis of National Steel's AECP and a description of the required short-term modeling procedures. EPA is providing a thirty-day comment period on this notice of proposed rule-making. Public comment received on or before January 17, 1983, will be considered in EPA's final rulemaking. When possible, comments should be submitted in triplicate. All comments will be available for inspection during normal business hours at the Region V office listed at the beginning of this notice. Please call the contact person listed at the beginning of this notice, before visiting the Region V office.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709)

[W–2–FRL 2269–5]

New Jersey Department of Environmental Protection; Underground Injection Control; Primacy Application

AGENCY: Environmental Protection Agency.

ACTION: Notice of public comment period and of public hearing.

SUMMARY: The purpose of this notice is to announce that: (1) The Environmental Protection Agency (EPA) has received a complete application from the New Jersey Department of Environmental Protection requesting approval of its Underground Injection Control Program; (2) the application is available for inspection and copying; (3) public comments are requested; and (4) a public hearing will be held.

This notice is required by the Safe Drinking Water Act as a part of the response to the States complying with the statutory requirement that there be an Underground Injection Control program in designated States.

The proposed comment period and public hearing will provide EPA the breadth of information and public opinion necessary either to approve, disapprove, or approve in part and disapprove in part the application from the New Jersey Department of Environmental Protection to regulate Classes I, II, III, IV, and V injection wells.

DATES: Requests to present oral testimony should be filed by January 10, 1983. A public hearing will be held January 19, 1983, at 10:00 a.m. and will continue until the end of testimony. Written comments must be received by February 2, 1983. EPA reserves the right to cancel the hearing should there be no significant public interest. Those informing EPA of their intention to testify will be notified of the cancellation.

ADDRESSES: Comments and requests to testify may be mailed to Leon Lazarus, Water Supply Branch, Environmental Protection Agency, Region II, 26 Federal Plaza, New York, New York 10278. Copies of the application and pertinent material are available at the following locations:

Environmental Protection Agency, Water Supply Branch, Room 824, 26 Federal Plaza, New York, New York 10278, (212) 264–1800

New Jersey Department of Environmental Protection, Division of Water Resources, Bureau of Ground Water Management, 1474 Prospect Street, Trenton, New Jersey 08625, (609) 292–5262.

The hearing will be held in the Archives Room, first floor State Library, 185 West State Street, Trenton, New Jersey.

FOR FURTHER INFORMATION CONTACT: Peter Acker, Water Supply Branch, Environmental Protection Agency, Region II, 26 Federal Plaza, New York, New York 10278, (212) 264–3279. Comments should also be sent to this address.

SUPPLEMENTARY INFORMATION: The application from the New Jersey Department of Environmental Protection is for the regulation of all injection wells in the State. The main goal of the New Jersey program is to protect underground sources of drinking water. To this end the State program includes elements for permitting, inspection, monitoring and enforcement of underground injection control activities. Twenty-five Class V wells that are used for gas storage will be permitted. The remaining one thousand two hundred and twenty-four Class V wells that have been identified will be authorized by rule. The State regulations are being changed to allow for both authorization by permit and rule. All permitted wells must demonstrate mechanical integrity at least once every five years. New Jersey is not proposing to exempt any aquifer at this time.

This application includes a description of the State Underground Injection Control program, copies of all applicable regulations and forms, a statement of legal authority, and the memorandum of agreement between the new Jersey Department of Environmental Protection and the Region II office of the Environmental Protection Agency.

Department Hearings and Appeals Procedures

AGENCY: Office of Hearings and Appeals, Interior.

ACTION: Withdrawal of proposed rules.

SUMMARY: This Office had proposed revisions to certain of its procedural regulations governing administrative hearings and appeals within the Department of the Interior. Further consideration of the proposed changes has resulted in the conclusion that they are unnecessary and should be withdrawn.

EFFECTIVE DATE: December 16, 1982.

FOR FURTHER INFORMATION CONTACT: F. Christopher Bockmon (703) 235-3750.

SUPPLEMENTARY INFORMATION: On May 27, 1980 (45 FR 35351), this Office proposed revisions to 43 CFR Part 4, Subpart A. The minor changes proposed to these regulations have been determined to be unnecessary and are being withdrawn. For a document withdrawing proposed revisions to 43 CFR Part 4, Subpart I (published at 45 FR 35351, May 27, 1980), see 47 FR 27067, June 23, 1982, and for a document removing 43 CFR Part 4, Subpart H (proposed at 45 FR 35351, May 27, 1980), see 47 FR 42574, September 28, 1982.

Dated: December 9, 1982.

John N. Stafford,

Director, Office of Hearings and Appeals.

PART 4—DEPARTMENT HEARINGS AND APPEALS PROCEDURES

The revisions to 43 CFR Part 4, Subpart A, proposed on May 27, 1980 (45 FR 35351), are withdrawn.

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Notice of Proposed Determinations.

SUMMARY: The Secretary of Agriculture is required by the Agricultural Adjustment Act of 1938, as amended, to determine and announce by February 1, 1983, the amounts of the national marketing quotas for fire-cured (types 22–23) and dark air-cured tobacco for the 1983–84 marketing year. In addition, the Secretary is required to conduct referenda to determine whether producers prefer marketing quotas on an acreage basis or a poundage basis. The public is invited to submit written comments, views and recommendations concerning the determination of the national marketing quotas for such kinds of tobacco, the referenda to be held, and other related matters.

DATE: Comments must be received on or before January 17, 1983 in order to be assured of consideration.

ADDRESSES: Send comments to the Director, Analysis Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. All written submissions made pursuant to the notice will be made available for public inspection from 8:15 a.m. to 4:45 p.m. Monday through Friday, in room 3741-South Building, 14th and Independence Avenue, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Robert L. Tarczy, Economist, Analysis Division, ASCS, Room 3736 South Building, P.O. 2415, Washington, D.C. 20013, (202) 447–5187. The Preliminary Regulatory Impact Analysis describing the options considered in developing this notice and the impact of implementing each option is available on request from Robert L. Tarczy.

SUPPLEMENTARY INFORMATION: This notice has been reviewed in conformity with Executive Order 12291 and Secretary's Memorandum 1512–1 and has been classified as "not major." It has been determined that the implementation of these determinations will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs for consumers, individual industries, Federal, State and local government agencies or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program that this notice applies to are: Title—Commodity Loan and Purchases, Number—10.051, as set forth in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to the notice since the Agricultural Stabilization and Conservation Service (ASCS) is not required by 5 U.S.C. 553 or any provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

Since the national marketing quotas for dark air-cured tobacco and fire-cured tobacco are required by statute to be proclaimed by February 1, 1983, comments with respect to this notice of proposed determination must be received not later than 30 days after publication of this notice in the **Federal Register** in order to be assured of consideration.

The Agricultural Adjustment Act of 1938, as amended by the No Net Cost Tobacco Program Act of 1982 (hereinafter referred to as the "Act"), requires that with respect to fire-cured (types 22–23) and dark air-cured (types 35–36) tobacco, the Secretary of Agriculture must, by February 1, 1983, proclaim national marketing quotas for such kinds of tobacco for the three marketing years beginning October 1, 1983, and determine and announce the amount of the marketing quota for such kinds of tobacco for the marketing year beginning October 1, 1983. In addition, the Secretary is required to conduct within 30 days after the announcement of such national marketing quotas, a referendum of producers engaged in the 1982 production of each of such kinds of tobacco to determine whether they favor farm marketing quotas on a poundage basis for the three marketing years beginning October 1, 1983, instead of quotas on an acreage basis for the two marketing years beginning October 1, 1983. If 50 percent or more of the producers voting in such referenda approve marketing quotas on a poundage basis, such quotas will be in effect for the three marketing years beginning October 1, 1983. If poundage quotas are not approved by at least 50 percent of the producers voting in such referenda, quotas on an acreage basis will be in effect for the two marketing years beginning October 1, 1983.

If marketing quotas on an acreage basis are in effect for any such kind of tobacco, and a referendum to determine whether producers favor marketing quotas on a poundage basis has not been held for at least three marketing years and if the Secretary, after conducting public hearings, determines that producers and other interested persons favor marketing quotas on a poundage basis for such kind of tobacco, the Secretary shall, at the time of the next announcement of the amount of the national marketing quota, announce national marketing quotas for the next three succeeding marketing years. Within 30 days of such proclamation, the Secretary will conduct a referendum to determine whether producers favor marketing quotas on a poundage basis for the next three succeeding marketing years. If more than 50 percent of the producers voting in such referendum approve marketing quotas on a poundage basis, such quotas shall be in effect for the next three succeeding marketing years and the marketing quotas on an acreage basis shall cease to be in effect at the beginning of such three-year period. If marketing quotas on a poundage basis are not approved by more than 50 percent of the producers voting in the referendum, then marketing quotas on an acreage basis will continue.

If marketing quotas on a poundage basis are in effect for any such kind of

tobacco for three consecutive marketing years, the Secretary shall determine and announce, not later than February 1 preceding the second and third marketing years, the amount of the national marketing quota for such kind of tobacco for each of such years. If marketing quotas on a poundage basis have been in effect for such kind of tobacco, the Secretary shall, not later than February 1 of the last of three consecutive marketing years for which such quotas are in effect for such kind of tobacco, proclaim a national marketing quota for such kind of tobacco for the next three succeeding marketing years. In addition, the Secretary shall conduct public hearings to determine whether producers favor national marketing quotas on an acreage basis or on a poundage basis and shall proclaim the quota on the basis he determines most producers of such kind of tobacco favor. Within 30 days of the proclamation, the Secretary shall conduct a referendum of producers engaged in the production of such kind of tobacco harvested immediately prior to the holding of the referendum to determine if such quotas are favored for the next three succeeding marketing years. If more than 50 percent of the producers voting in such referendum oppose the national marketing quotas, then the Secretary shall announce the results and no marketing quotas or price support will be in effect for such kind of tobacco and the national marketing quotas so proclaimed will not be in effect for the next three succeeding marketing years. If at least 50 percent of the producers voting in such referendum favor the national marketing quotas, such quotas will be in effect and price support will be available to eligible producers.

Marketing quotas on an acreage or poundage basis, less any reserves, shall be apportioned among old farms. Reserves shall be apportioned for use in (1) Establishing acreage allotments or poundage quotas for new farms, and (2) making corrections and adjusting inequities in old farm allotments or poundage quotas.

Quotas were previously proclaimed, marketing quota referenda conducted, and quotas approved by growers for fire-cured (types 22–23) and dark air-cured (types 35–36) tobacco for the 1982–83, 1983–84, and 1984–85 marketing years (47 FR 20167). Producers of such kinds of tobacco will be entitled to participate in the tobacco price support program.

Section 301(b)(15) of the Act (7 U.S.C. 1301(b)(15)) defines "tobacco" as each one of the kinds of tobacco listed below comprising the types specified as classified in Service and Regulatory Announcement Number 118 (7 CFR Part 30) of the former Bureau of Agricultural Economics of the Department:

Flue-cured tobacco, comprising types 11, 12, 13 & 14;
Fire-cured tobacco, comprising type 21;
Fire-cured tobacco, comprising types 22, 23, & 24;
Dark air-cured tobacco, comprising types 35 & 36;
Virginia sun-cured tobacco, comprising type 37;
Burley tobacco, comprising type 31;
Maryland tobacco, comprising type 32;
Cigar-filler and cigar-binder tobacco, comprising types 42, 43, 44, 45, 46, 51, 52, 53, 54 & 55; and
Cigar-filler tobacco, comprising type 41.

Section 301(b)(15) of the Act also provides that any one or more of the types comprising any such kind of tobacco shall be treated as a "kind of tobacco" for the purposes of the Act if the Secretary finds that there is a difference in supply and demand conditions among such types of tobacco which results in a difference in the adjustments needed in the marketings thereof in order to maintain supplies in line with demand. Pursuant to this authority, the Secretary has issued a determination (15 FR 8214) that type 46 tobacco shall be treated as a separate kind of tobacco for purposes of marketing quotas and price support. Also pursuant to such authority, the Secretary has issued a determination (22 FR 367) that beginning with the 1957–58 marketing year, cigar-binder (types 51–52) shall be treated as a separate kind of tobacco for purposes of marketing quotas and price support. Type 45 tobacco is no longer grown. No further action under this section is contemplated at this time.

Since producers have a choice between marketing quotas on an acreage basis or a poundage basis, and because acreage allotment determinations differ slightly from poundage quota determinations, both methods of determinations are discussed below.

Acreage Determination

Section 312(b) of the Act (7 U.S.C. 1312(b)) provides that the Secretary shall determine and announce, not later than the first day of February 1983, with respect to kinds of tobacco other than flue-cured tobacco, the amount of the national marketing quota which will be in effect for the 1983–84 marketing year in terms of the total quantity of tobacco which may be marketed which will make available during such marketing year a supply of each kind of tobacco equal to the reserve supply level. Section 312(b) provides further that the amount of the 1983–84 national marketing quota so announced may, not later than March 1, 1983, be increased by not more than 20 percent if the Secretary determines that such increase is necessary in order to meet market demands or to avoid undue restrictions of marketings in adjusting the total supply to the reserve supply level.

Section 313(g) of the Act (7 U.S.C. 1313(g)) authorizes the Secretary to convert the national marketing quota into a national acreage allotment by dividing the national marketing quota by the national average yield for the five years immediately preceding the year in which the national marketing quota is proclaimed and to apportion through local committees the national acreage allotment to tobaco producing farms (less a reserve not to exceed 1 percent thereof for new farms and for making corrections and adjusting inequities in old farm allotments) among old farms.

Poundage Determination

Section 319(c) of the Act (7 U.S.C. 1314e(c)) defines "national marketing quota" for various kinds of tobacco including fire-cured (types 22–23) and dark air-cured (types 35–36) for a marketing year as the amount of that kind of tobacco produced in the United States which the Secretary estimates will be used domestically and will be exported during the marketing year, adjusted upward or downward in such amount as the Secretary, in his discretion, determines is desirable for the purpose of maintaining an adequate supply or for effecting an orderly reduction of supplies to the reserve supply level. The maximum downward adjustment is 5 percent of estimated domestic use and exports.

For the 1983–84 marketing year, total use for fire-cured (types 22–23) and dark air-cured (types 35–36) tobaccos is estimated to be 34 million pounds and 16 million pounds, respectively.

National Average Yield Goal

The Act provides that when a marketing quota program for these kinds of tobacco is first established under section 319(c), such farm yields determined with respect to fire-cured (types 22–23) and dark air-cured (types 35–36) tobaccos shall be adjusted proportionately so that the weighted average of the farm yield is equal to the national average yield goal of each respective tobacco.

Since different methods are used to determine marketing restrictions and different determinations are made with respect to marketing quotas on an

acreage basis or on a poundage basis, the amount of such quotas would normally be different. However, in order to avoid influencing the outcome of the referenda with regard to an election by producers between marketing quotas on an acreage or poundage basis, the national average yield goal will be used to adjust yields with respect to the marketing quotas on a poundage basis so that the amount of tobacco which could be marketed without penalty under either an acreage or poundage basis would be similar. Such calculations do not take into consideration the 10 percent which could be marketed under a poundage basis and which would otherwise be excluded from the succeeding year's quota.

Section 319(e) of the Act (7 U.S.C. 1314e(e)) provides, in part, that each farm marketing quota shall be determined by miltiplying the previous year's farm marketing quota by a national factor. The national factor is obtained by dividing the national marketing quota determined under subsection 319(c) (7 U.S.C. 1314e(c)) (less the national reserve) by the sum of the farm marketing quotas for the immediately preceding year for all farms for which tobacco marketing quotas will be determined for such succeeding marketing year: *Provided,* that such national factor shall not be less than 95 percent.

A national reserve of 65 acres bas been established for fire-cured (types 22–23) tobacco for the 1982–83 marketing year. A national reserve of 40 acres has been established for dark air-cured (types 35–36) tobacco for the 1982–83 marketing year (47 FR 5916). It is proposed that a national reserve be established for the 1983–84 marketing year.

Section 301(b)(14)(B) of the Act defines "reserve supply level" as the normal supply, plus 5 percent thereof, to insure a supply adequate to meet domestic consumption and export needs in years of drought, flood, or other adverse conditions, as well as in years of plenty. The term "normal supply" is defined in section 301(b)(10)(B) of the Act as a normal year's domestic consumption and exports, plus 175 percent of a normal year's domestic consumption and 65 percent of a normal year's exports as an allowance for a normal year's carryover. A "normal year's domestic consumption" is defined in section 301(b)(11)(B) of the Act as the yearly average quantity of such tobaccos that was produced and consumed in the United States during the 10 marketing years immediately preceding the marketing year in which such consumption is determined (1982–83), adjusted for current trends in such consumption.

A "normal year's exports" is defined in section 301(b)(12) of the Act as the yearly average quantity produced in and exported from the United States during the 10 marketing years immediately preceding the marketing year in which such exports are determined (1982–83), adjusted for current trends in such exports.

Section 301(b)(16)(B) of the Act defines "total supply" as the carryover at the beginning of the marketing year (October 1) plus the estimated production in the United States during the calendar year in which the marketing year begins. The total supply for fire-cured (types 22–23) tobacco for the 1982–83 marketing year is 103.5 million pounds, based on 1982 marketings of 41.0 million pounds and carryover stocks of 62.5 million pounds. The total supply for dark air-cured (types 35–36) tobacco for the 1982–83 marketing year is 55.7 million pounds, based on 1982 marketings of 17.8 million pounds and carryover stocks of 37.9 million pounds.

Proposed Determinations

Accordingly, the Secretary proposes to make the following determinations for fire-cured (types 22–23) and dark air-cured (types 35–36) tobaccos for the 1983–84 marketing year:

1. With respect to fire-cured (types 22–23) tobacco.

a. A national marketing quota on a poundage basis within the range of 38 to 48 million pounds, and a national acreage allotment within the range of 21,000 to 27,000 acres;

b. A reserve supply level within the range of 80 million to 105 million pounds;

c. A national reserve within the range of 50,000 to 150,000 pounds and 25 to 100 acres.

2. With respect to dark air-cured (types 35–36) tobacco.

a. A national marketing quota on a poundage basis within the range of 18 to 22 million pounds and a national acreage allotment within the range 9,600 to 12,000 acres;

b. A reserve supply level within the range of 40 million to 55 million pounds.

c. A national reserve within the range of 50,000 to 100,000 pounds and 25 to 50 acres.

The Secretary of Agriculture also proposes to announce the dates or periods of the referenda on the type of marketing restrictions for these tobaccos and whether the referenda should be conducted at polling places rather than by mail ballot as prescribed in 7 CFR Part 717.

Signed at Washington, D.C., on December 15, 1982.

Everett Rank,

Administrator, Agricultural Stabilization and Conservation Service.

Forest Service

Salmon National Forest; Idaho, Lemhi, and Valley Counties, Idaho; Revised Notice of Intent To Prepare an Environmental Impact Statement for Proposed Forest Land and Resource Management Plan

A Notice of Intent to Prepare an Environmental Impact Statement for the Salmon National Forest Land Resource Management Plan was published in the **Federal Register,** Volume 45, No. 198, Thursday, October 9, 1980 which was later amended as published in the **Federal Register,** Volume 46, No. 91 Tuesday, May 12, 1981 and Volume 47, No. 42, Wednesday, March 3, 1982.

The estimated dates for filing the Draft and Final Environmental Impact Statements with the Environmental Protection Agency and release to the public have been further postponed. The Draft Environmental Impact Statement is now expected in August 1983, and the Final Environmental Impact Statement is proposed for release in March 1984.

All other conditions of the original Notice of Intent remain the same.

Dated: December 7, 1982.

George H. Robinson,

Regional Forester.

BILLING CODE 3410-11-M

Rural Electrification Administration

Oglethorpe Power Corp.; Environmental Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA) pursuant to the National Environmental Policy Act of 1969, the Council on Environmental quality guidelines (40 CFR Parts 1500–1508), and REA's Bulletin 20–21:320–21, Environmental Policies and Procedures, has made a Finding of No Significant Impact with respect to proposed financing assistance to Oglethorpe

Power Corporation (OPC) of Atlanta, Georgia, for construction of a 230/25 kV substation at Deshong and 3.75 miles of 230 kV transmission line from this substation to Snellville, all in Ginnett County, Georgia.

FOR INFORMATION CONTACT: REA's Finding of No Significant Impact and Environmental Assessment (EA) along with OPC's Borrower's Environmental Report (BER) and other related material can be reviewed in or requested from the Office of the Director, Southeast Area-Electric, Room 0268, South Agriculture Building, REA, Washington, D.C. 20250, telephone (202) 382–8437, or the offices of OPC, (Mr. F. F. Stacy, Jr., Manager) 2888 Woodcock Boulevard, Tuland Building, Atlanta, Georgia 30348, telephone (404) 455–1121.

SUPPLEMENTARY INFORMATION: REA reviewed the BER submitted by OPC and determined that it represents an accurate evaluation of the environmental impacts of the proposed project.

REA has determined that the proposed project will have no affect on cultural resources or threatened or endangered species and no significant adverse affect to prime farmland, floodplains or wetlands. A small portion of the transmission right-of-way crosses prime farmland which is now in woodland use. In addition, the right-of-way crosses approximately 1.1 km (.68 mi) of the floodplains and 0.06 km (0.035 mi) of wetlands. To the extent practicable these areas will be spanned. Most impacts will be restricted to the construction phase of the project and, overall, the construction and operation will have no unacceptable impacts to the environment.

A number of alternatives were considered, including no action, conservation, and various transmission line routes and substation sites. REA finds that the proposed alternative is acceptable since it meets the needs of consumer members with a minimum of adverse impact.

Based upon the BER and other related data, REA prepared an EA and Finding of No Significant Impact concerning the proposed construction. It is REA's view that the proposed financing assistance will not be a major Federal action that will affect significantly the quality of the human environment.

In accordance with REA's Bulletin 20–21:320–21, dated January 21, 1980, OPC advertised the availability of the BER in the Gwinnett Daily News and the Atlanta Journal. Comments were solicited and the public was given 30 days to reply. No comments were received.

This program is listed in the Catalog of Federal Domestic assistance as 10.850—Rural Electrification Loans and Loan Guarantees.

Dated: December 10, 1982.

Jack Van Mark,

Acting Administrator.

BILLING CODE 3410–15–M

Soil Conservation Service

Pt. Mugu Outlet, Revolon Watershed, Calif; Environmental Statement

AGENCY: Soil Conservation Service.

ACTION: Withdrawal of notice of intent to prepare an environmental impact statement.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement will not be prepared for the Pt. Mugu Outlet, Revolon Watershed, Ventura County, California.

FOR FURTHER INFORMATION CONTACT: Eugene Andreuccetti, State Conservationist, Soil Conservation Service, 2828 Chiles Road, Davis, California 95616, telephone (916) 758–2200.

SUPPLEMENTARY INFORMATION: The preliminary environmental assessment of this federally assisted action had indicated that the project may cause significant local, regional, or national impacts on the environment. Therefore, a Notice of Intent to prepare an Environmental Impact Statement was published in the **Federal Register** on April 17, 1981. However, later studies have indicated that project purposes can be served without causing adverse damages to the environment. As a result of these findings, Eugene Andreuccetti, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

North Concordia Watershed, La.; Deauthorize Federal Funding

AGENCY: Soil Conservation Service.

ACTION: Notice of intent to deauthorize federal funding.

SUMMARY: Pursuant to the Watershed Protection and Flood Prevention Act, Pub. L. 83–566, and the Soil Conservation Service Guidelines (7 CFR 622), and the Soil Conservation Service gives notice of intent to deauthorize Federal funding for the North Concordia Watershed project, Concordia and Catahoula Parishes, Louisiana.

FOR FURTHER INFORMATION CONTACT: Harry S. Rucker, State Conservationist, Soil Conservation Service, 3737 Government Street, Alexandria, Louisiana 71301, telephone (318) 473–7751.

SUPPLEMENTARY INFORMATION: A determination has been made by Harry S. Rucker that the proposed works of improvement for the North Concordia Watershed project will not be installed. The sponsoring organizations have concurred in this determination and agree that Federal funding should be deauthorized for the project. Information regarding this determination may be obtained from Harry S. Rucker, State Conservationist, at the above address and telephone number.

No administrative action on implementation of the proposed deauthorization will be taken until 60 days after the date of this publication in the **Federal Register.**

CIVIL AERONAUTICS BOARD

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed under Subpart Q of the Board's Procedural Regulations; Week Ended December 10, 1982

Subpart Q Applications

The due date for answers conforming application, or motions to modify scope are set forth below for each application. Following the answer period the board may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases final order without further proceedings (See, 14 CFR 302.1701 et seq.).

Date filed	Docket No.	Description
Dec. 6, 1982	41128	Western Air Lines, Inc., P.O. Box 92005, World Way Postal Center Los Angeles, California 90009. Application of Western Air Lines, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests an amendment of its certificate of public convenience and necessity for Route 52 authorizing it to engage in foreign air transportation with respect to persons, property and mail: Between the terminal point Los Angeles, California, the intermediate point Salt Lake City, Utah, and the coterminal points Calgary and Edmonton, Alberta, Canada. Western requests it be authorized to integrate this new authority with its other Canada authority on Route 52 subject, of course, to such route authority integration being consistent with applicable local regulations and bilateral agreements. Conforming Applications, Motions to Modify Scope, and Answers may be filed by January 3, 1983.
Dec. 6, 1982	41129	Western Air Lines, Inc., P.O. Box 92005, World Way Postal Center Los Angeles, California 90009. Application of Western Air Lines, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests for an amendment of its certificate of public convenience and necessity for Route 52 authorizing it to engage in foreign air transportation with respect to persons, property and mail. Between the terminal point San Francisco, California, the intermediate point Salt Lake City, Utah, and the coterminal points Toronto, Ontario and Montreal, Quebec, Canada Western requests it be authorized to integrate this new authority with its other Canada authority on Route 52 subject of course, to such route authority integration being consistent with applicable local regulations and bilateral agreements. Conforming Applications, Motions to Modify Scope, and Answers may be filed by January 3, 1982.
Dec. 6, 1982	41132	Guy-America Airways, Inc. c/o Michael Goldman, Verner, Liipfert, Bernhard and McPherson, Suite 1100, 1660 L Street, N.W., Washington, D.C. 20036. Application of Guy-America Airways, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests issuance of an amended certificate of public convenience and necessity for Route 290 authorizing it to engage in foreign air transportation of persons, property and mail between all points in the United States and points in Costa Rico as follows: "1. Between a point on points in the United States (except Miami, Fla., and New Orleans, La.) and a point or points in Costa Rica." Conforming Applications, Motions to Modify Scope, and Answers may be filed by January 3, 1983.
Dec. 6, 1982	41139	Global International Airways Corp., c/o James M. Burger, Shaw, Pittman, Potts & Trowbridge, 1800 M Street, N.W., Suite 900 South, Washington, D.C. 20036. Application of Global International Airways Corp. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests authority to provide scheduled foreign air transportation of persons, property, and mail as follow: Between Los Angeles, California and Toronto/Montreal, Ontario. Between San Francisco, California and Toronto/Montreal, Ontario. Between Honolulu, Hawaii and Vancouver, Canada. Conforming Applications, Motions, to Modify Scope, and Answers may be filed by January 5,1983.
Dec. 10, 1982	41142	Ceskoslovenske Aerolinie, c/o Allan I, Mendelsohn, Ward & Mendelsohn, 1725 Eye Street, N.W., Suite 310, Washington, D.C. 20006. Application of Ceskoslovenske Aerolinie pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations applies for the amendment and/or renewal of its Foreign Air Carrier Permit so as to permit it to continue its on-going operations in scheduled foreign air transportation between the United States of America and the Czechoslovak Socialist Republic. Answers may be filed by January 7, 1983.
Dec. 10, 1982	41032	Jet USA Airlines, Inc., c/o Edwin O. Bailey, Kirkland & Ellis, 1776 K Street, N.W., Washington, D.C. 20006. Second Amendment to Applications of Jet USA Airlines, Inc. containing additional information to be considered in the record of this proceeding. Answer may be filed by January 6, 1982.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320–01–M

Orders Concerning Subsidy and Mail Rates

Order 82–12–28, December 1982, Docket 40817, proposing subsidy rates for Alaskan Airlines, Inc. for the provision of essential air service at Cordova, Yakutat, Petersburg, Wrangler, Gustavus, Bosewell Bay, Cape Yakataga, Chisana, Chitina, Gulkana, Iay Bay, May Creck and McCarthy Alaska.

Order 82–12–29, December 9, 1982, Dockets 40807 and 35351, proposing subsidy rates for Wien Air Alaska, Inc. for the provision of essential air service at 36 Alaskan Bush points.

Order 82–12–33, December 9, 1982, proposes new intra-Hawaii final service mail rates for the first half of calendar year 1983.

Order 82–12–34, December 9, 1982, Docket 37294, proposes new final

domestic service mail rates for the first half of calendar year 1983.

Order 82–12–35, December 9, 1982, Docket 37392, proposes new final international service mail rates for the first half of calendar year 1983.

FOR FURTHER INFORMATION CONTACT: Concerning Orders 82–12–34 and 35, James E. Gardner, Bureau of International Aviation, (202) 673–5391, and for orders 82–12–28 and 29, James M. Craun, Bureau of Domestic Aviation, (202) 673–5428.

Copies of the orders are available from the C.A.B. Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the Washington metropolitan area may send a postcard request.

By the Civil Aeronautics Board: December 9, 1982.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320–01–M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 23–82; Foreign-Trade Zone 50]

Long Beach, California; Application for Subzone at Toyota Truck Cargo Body Plant, Long Beach

The period for comments on the above case involving a special-purpose subzone for the truck cargo body manufacturing plant of Toyota in Long Beach, California (47 FR 44128, October 6, 1982) is extended until February 4, 1983.

Further general comments are invited until January 5, 1983. Because there has been no public hearing on the proposal, interested parties may include questions involving nonproprietary information, which after review by the FTZ Staff might be posed to the applicant.

The period after January 5 and until February 4 shall be used only for rebuttal comments. Answers to any questions asked of the applicant will be expected by January 25. The answers will be available for inspection together with other record material.

Submissions shall include 5 copies. The material submitted will be available to the public at the: Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1872, 14th and Pennsylvania, NW., Washington, D.C. 20230.

Dated: December 13, 1982.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510–25–M

International Trade Administration

Certain Stainless Steel Products From the United Kingdom; Postponement of Countervailing Duty Preliminary Determinations

AGENCY: International Trade Administration, Commerce.

ACTION: Postponement of Countervailing Duty Preliminary Determinations.

SUMMARY: The countervailing duty preliminary determinations involving certain stainless steel products (see Appendix A) from the United Kingdom are being postponed as the investigations have been determined to be extraordinarily complicated. We intend to issue the countervailing duty preliminary determinations not later than February 4, 1983.

EFFECTIVE DATE: December 17, 1982.

FOR FURTHER INFORMATION CONTACT: Vincent P. Kane, Office of Investigations, Import Administration, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230, telephone (202) 377–5414.

SUPPLEMENTARY INFORMATION: On November 2, 1982, we announced our initiation of countervailing duty investigations to determine whether producers, manufacturers, or exporters of certain stainless steel products from the United Kingdom receive any benefits from the government of the United Kingdom or the European Community, as appropriate, that constitute subsidies (47 FR 49692). The notice stated that we would issue preliminary determinations by December 31, 1982.

As detailed in the notice of initiation of the countervailing duty investigations, the petition alleges that the government of the United Kingdom and the European Community provide various programs which constitute subsidies to producers, manufacturers, or exporters of certain stainless steel products. The alleged subsidy practices are numerous amd raise complex issues. These cases are further complicated because of the need to determine the extent to which particular subsidies are used by individual manufacturers, producers, or exporters. We have determined that the government of the United Kingdom and the other parties concerned are cooperating and that additional time is necessary to make the countervailing duty preliminary determinations. For these reasons we determine that these cases are extraordinarily complicated in accordance with section 703(c)(1)(B) of the Tariff Act of 1930, as amended ("the Act"), and we intend to issue countervailing duty preliminary determinations not later than February 4, 1983.

This notice is published pursuant to section 703(c)(2) of the Act.

Dated: December 10, 1982.

Leonard M. Shambon,

Director, Office of Compliance.

Appendix A—Description of Products

For purposes of these investigations:

(1) The term "*stainless steel sheet, and strip*" covers hot or cold-rolled stainless steel sheet or strip products, excluding hot or cold-rolled stainless steel strip not over 0.01 inch in thickness, as currently provided for in items 607.7610, 607.9010, 607.9020, 608.4300, and 608.5700 of the *Tariff Schedules of the United States Annotated* (TSUSA).

Hot-rolled stainless steel sheet covers hot-rolled stainless steel sheet whether or not corrugated or crimped and whether or not pickled; not cold-rolled; not cut, not pressed and not stamped to non-rectangular shape; not coated or plated with metal; and under 0.1875 inch in thickness and over 12 inches in width.

Hot-rolled stainless steel strip is a flat-rolled stainless steel product, whether or not corrugated or crimped, and whether or not pickled; not cold-rolled; not cut, not pressed, and not stamped to non-rectangular shape; and under 0.1875 inch in thickness and not over 12 inches in width. Hot-rolled stainless steel strip, including razor blade strip, not over 0.01 inch in thickness is not included.

Cold-rolled stainless steel sheet covers cold-rolled stainless steel sheet products whether or not corrugated or crimped and whether or not pickled; not cut, not pressed and not stamped to non-rectangular shape; not coated or plated with metal; and under 0.1875 inch in thickness and over 12 inches in width.

Cold-rolled stainless steel strip is a flat-rolled stainless steel product, whether or not corrugated or crimped, and whether or not pickled; not cut, not pressed, and not stamped to non-rectangular shape; and under 0.1875 inch in thickness and over 0.50 inch but not over 12 inches in width. Cold-rolled stainless steel strip, including razor blade strip, not over 0.01 inch in thickness is not included.

(2) The term "stainless steel plate" covers stainless steel plate products as provided for in items 607.7605 and 607.9005 of the TSUSA. Stainless steel plate is a flat-rolled product, whether or not corrugated or crimped, in coils or cut to length, 0.1875 inches or more in thickness and over 8 inches in width or if cold-rolled over 12 inches in width.

BILLING CODE 3510–25–M

Preliminary Affirmative Countervailing Duty Determination: Frozen Concentrated Orange Juice From Brazil

AGENCY: International Trade Administration, Commerce.

ACTION: Preliminary Affirmative Countervailing Duty Determination.

SUMMARY: We preliminarily determine that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Brazil of frozen concentrated orange juice. The estimated net subsidy is 2.655 percent *ad valorem*. Therefore, we are directing the U.S. Customs Service to suspend liquidation of all entries of frozen concentrated orange juice from Brazil which are entered, or withdrawn from warehouse, for consumption, and to require a cash deposit or bond on these products in the amount equal to the estimated net subsidy.

If this investigation proceeds normally, we will make our final determination by February 24, 1983.

EFFECTIVE DATE: December 17, 1982.

FOR FURTHER INFORMATION CONTACT: Francis R. Crowe, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, telephone: (202) 377–3003.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based upon our investigation, we preliminarily determine that there is reason to believe or suspect that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act, of 1930, as amended (the Act), are being provided to manufacturers, Producers, or exporters in Brazil of frozen concentrated orange juice. For purposes of this investigations, the following programs are preliminarily found to confer subsidies:

- Preferential working capital financing for exports.
- Income tax exemption for export earnings.

We estimate the net subsidy to be 2.655 percent ad valorem.

Case History

On July 14, 1982, we received a petition from Florida Citrus Mutual, filed on behalf of the U.S. growers of oranges for processing into frozen concentrated oranges juice. The petition alleged that certain benefits which constitute subsidies within the meaning of section 701 of the Act are being provided, directly or indirectly, to the manufacturers, producers, or exporters in Brazil of frozen concentrated orange juice.

We found the petition to contain sufficient grounds upon which to initiate a countervailing duty investigation, and on August 2, 1982, we initiated a countervailing duty investigation (47 FR 37172). We stated that we expected to issue a preliminary determination by October 7, 1982. We subsequently determined that the investigation is "extraordinarily complicated," as defined in section 703(c) of the Act, and postponed our preliminary determination for 65 days until December 13, 1982 (47 FR 45896).

Since Brazil is a "country under the Agreement" within the meaning of section 701(b) of the Act, an injury determination is required for this investigation. Therefore, we notified the U.S. International Trade Commission (ITC) of our initiation. On September 9, 1982, the ITC preliminarily determined that there is a reasonable indication that these imports are materially injuring, or threatening to materially injure, a U.S. industry (47 FR 39740).

We presented a questionnaire concerning the allegations to the government of Brazil in Washington, D.C. On December 1, 1982, we received the response to that questionnaire.

Scope of the Investigation

The product covered by this investigation is frozen concentrated orange juice as provided for in item 165.3500 of the *Tariff Schedules of the United States Annotated*. This amends the product description contained in the notice of initiation which stated that the product under investigation was "oranges used for production into frozen concentrated orange juice." The tariff classification was correct in that notice.

There are nine known producers and exporters in Brazil of frozen concentrated orange juice to the United States. We have received information from the government regarding three of these companies, Cargill Industrial Ltda. (CARGILL), Citrosuco Paulista S.A. (CITROSUCO) and Sucocitrico Cutrale S.A. (CUTRALE), which represented over 85 percent of exports of this product to the United States during a recent, representative period—calendar year 1981. The period for which we are measuring subsidization is the most recently completed fiscal year for each company. CARGILL operates on a fiscal year which runs from March 1 to February 28. The fiscal years for CITROSUCO and CUTRALE run from May 1 to April 30. Therefore, the period for which we are measuring subsidization for CARGILL is March 1, 1981 to February 28, 1982; for CITROSUCO and CUTRALE the period is May 1, 1981 to April 30, 1982. This period corresponds to the 1981 fiscal year for all three companies.

Analysis of Programs

In its response, the government of Brazil provided data for the applicable periods. Based upon our analysis to date of the petition and the response to our questionnaire, we preliminarily determine the following.

I. Programs Preliminarily Determined To Confer Subsidies

We preliminarily determine that subsidies are being provided to manufacturers, producers, or exporters in Brazil of frozen concentrated orange juice under the following programs.

A. *Preferential working capital financing for exports: Resolution 674.* Under this program, companies are declared eligible to receive working capital loans by the Department of Foreign Commerce of the Banco Central do Brasil (CACEX). These loans may have a duration of up to one year. Firms in the frozen concentrated orange juice industry can obtain this financing at preferential rates for up to 12 percent of the net f.o.b. value of the previous year's exports. The maximum dollar eligibility under this program is established by CACEX and is stated on the "Certificado de Habilitacao" issued to recipients. We preliminarily determine that such financing is an export subsidy.

The net export value is calculated by taking numerous deductions from the export value of the merchandise, including agent commissions, contractual penalties or refunds, exports denominated in cruzeiros, imported imputs over 20 percent of the export value, and a deduction for the company's trade deficit as a percentage of the value of its exports.

To determine the value of loans in existence under this program during the 1981 fiscal year, we prorated any loans that straddled other fiscal years. For loans taken out in fiscal year 1980, only that portion extending into fiscal year 1981 was included in our calculation. Any fiscal year 1981 loans extending into fiscal year 1982 were similarly adjusted. We then divided the total value of these loans by the total value of exports of the three companies under investigation to calculate the amount of preferential financing they received.

As in previous Brazilian countervailing duty cases, we are using

the rate established by the Banco do Brasil for discounting sales of accounts receivable as the commercial rate for the acquisition of short-term working capital. We have used this comparison because information provided by the government of Brazil indicates that, within the Brazilian financial system, working capital is normally raised through the sale of accounts receivable. Currently, the annual rate for discounting sales of accounts receivable is 59.6 percent plus a 6.9 percent tax on financial transactions (IOF).

The interest rate on loan under Resolution 674 is 40 percent, with interest payable semiannually and the principal fully payable on the due date of the loan. The effective rate of interest for these loans is 44 percent. These loans are also exempt from the IOF. Therefore, the differential between these two types of financing is 22.5 percent. When multiplying this differential by the amounty of preferential financing received as a percent of exports, we calculated an *ad valorem* export subsidy of 1.527 percent.

B. *Income tax exemption for export earnings.* Exporters of frozen concentrated orange juice are eligible to participate in this program, under which the percentage of their profit attributable to export revenue is exempt from income tax. To arrive at this percentage, export revenue is divided by total revenue. The amount of profit exempt from the income tax is then multiplied by the 35 percent corporate income tax rate to determine the amount of the benefit.

In a program of this kind, benefits cannot be determined with finality until the books are closed sometime in the following year. Therefore, we must look at fiscal year 1980 income tax returns to determine if any benefit was received in fiscal year 1981. All three companies received benefits under this program in fiscal year 1981. By dividing the benefit received by the value of exports of the companies under investigation, we calculated an *ad valorem* export subsidy of 1.128 percent.

II. Programs Preliminarily Determined Not To Confer Subsidies

We preliminarily determine subsidies are not being provided to manufacturers, producers, or exporters in Brazil of frozen concentrated orange juice under the following programs:

A. *Exemption from State value-added tax (ICM).* The State value-added tax (ICM) is applicable only to domestic sales of frozen concentrated orange juice. Export transactions are exempt from such taxation. The exemption of indirect taxes on exported goods does not constitute a countervailable benefit under either section 303 or section 701 of the Tariff Act of 1930, as amended.

B. *Exemption from Federal industrialized products tax (IPI).* The Federal IPI value-added tax is applicable only to domestic sales of frozen concentrated orange juice. Export transactions are exempt from such taxation. The exemption of indirect taxes on exported goods does not constitute a countervailable benefit under either section 303 or section 701 of the Tariff Act of 1930, as amended.

III. Program Preliminarily Determined Not To Be Used

We preliminarily determine that the following program was not used by the manufacturers, producers, or exporters in Brazil of frozen concentrated orange juice.

A. *Federal industrialized products tax (IPI) export credit premium.* The IPI export credit premium program was suspended on December 7, 1979. When the IPI export credit premium was reinstated on April 1, 1981, the orange-concentrate industry was specifically excluded from receiving the benefits of this program (Ministry of Finance Ordinance No. 78).

Program Preliminarily Determined To Be No Longer in Existence

We preliminarily determine that the following program is no longer in existence.

A. *State value-added tax (ICM) export credit premium.* This program, which provided Brazilian companies an overrebate of a state value-added tax on goods destined for export, was eliminated by Convention 01–79, published January 12, 1979.

Verification

In accordance with section 776(a) of the Act, we will verify data used in making our final determination.

Suspension of Liquidation

In accordance with section 703(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of frozen concentrated orange juice from Brazil which are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register** and to require a cash deposit or bond for each such entry of this merchandise in the amount of 2.655 percent *ad valorem.* This suspension will remain in effect until further notice.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

Public Comment

In accordance with section 355.35 of the Commerce Department Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on January 20, 1983, at the U.S. Department of Commerce, Room 3080, 14th Street and Constitution Avenue, NW, Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room 3099B, at the above address within ten days of this notice's publication.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least ten copies must be submitted to the Deputy Assistant Secretary by January 13, 1983. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 355.34, within thirty days of this notice's publication, at the above address and in at least ten copies.

Dated: December 13, 1982.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

[FR Doc. 82-34308 Filed 12-16-82; 8:45 am]

BILLING CODE 3510-25-M

Preliminary Determination of Sales at Less Than Fair Value; Certain Stainless Steel Sheet and Strip Products From the Federal Republic of Germany

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Determination of Sales at Less than Fair value: Certain Stainless Steel Sheet and Strip Products from the Federal Republic of Germany.

SUMMARY: We have preliminarily determined that certain stainless steel

sheet and strip products from the Federal Republic of Germany (FRG) are being sold, or are likely to be sold, in the United States at less than fair value. Therefore, we have notified the U.S. International Trade Commission (ITC) of our determination, and we have directed the U.S. Customs Service to suspend liquidation of all entries of the subject merchandise which are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice and to require a cash deposit or bond for each such entry in an amount equal to the estimated dumping margins as described in the "Suspension of Liquidation" section of this notice.

If this investigation proceeds normally, we will make a final determination within 75 days of the publication of this notice in the **Federal Register.**

EFFECTIVE DATE: December 17, 1982.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone (202) 377–2438.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

As provided in section 733 of the Tariff Act of 1930, as amended (the Act), we have preliminarily determined that there is a reasonable basis to believe or suspect that certain stainless steel sheet and strip products from the FRG are being sold, or are likely to be sold, in the United States at less than fair value.

The estimated margins for individual products investigated are given in the "Suspension of Liquidation" section of this notice.

The estimated margins for Thyssen AG (Thyssen), Krupp Stahl AG (Krupp) and Vereinigte Deutsche Metallwerke AG (VDM) are based on the best information available as explained in the section of this notice which describes our fair value comparisons. These margins could change substantially in the final determination if verifiable information is furnished in a timely fashion.

If this investigation proceeds normally, we will make a final determination within 75 days of the publication of this notice in the **Federal Register.**

Case History

On April 26, 1982, we received a petition filed by counsel on behalf of eleven U.S. specialty steel producers and on behalf of the United Steelworkers of America. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports from the Federal Republic of Germany of certain stainless steel sheet and strip products are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act and that these imports are materially injuring, or are threatening to materially injure, a U.S. industry.

After reviewing the petition, we determined it contained sufficient grounds to initiate an antidumping investigation. We notified the ITC of our action and initiated such investigation on May 17, 1982 (47 FR 22132). On June 10, 1982, the ITC found that there is a reasonable indication imports of stainless steel sheet and strip products are materially injuring, or are threatening to materially injure, a U.S. industry. We determined this case to be "extraordinarily complicated", as defined in section 733(c) of the Act. Therefore, we extended the period for making a preliminary determination by 50 days until November 22, 1982 (47 FR 41800).

Questionnaires were presented to Krupp and Thyssen on June 3, 1982. Their responses were received on August 9, 1982 and August 13, 1982. VDM requested a questionnaire on June 25, 1982 and submitted its response on August 13, 1982. Our review of the responses revealed numerous deficiencies and we requested additional information and non-confidential summaries which were submitted in part on various dates from October 4 through November 18, 1982. Some deficiencies have not been corrected. The deficiencies and submission of additional information are described in detail in the "Supplemental Information Required" section of this notice.

Scope of Investigation

The certain stainless steel sheet and strip products covered by this investigation are:

- Hot-rolled stainless steel sheet
- Hot-rolled stainless steel strip
- Cold-rolled stainless steel sheet
- Cold-rolled stainless steel strip.

For a further description of these products see the appendix appearing with this notice.

Since Krupp, Thyssen and VDM manufacture and export virtually all of the certain stainless steel sheet and strip products exported from the FRG to the United States, we limited our investigation to them.

This investigation covers the period from July 1 to December 31, 1981, for purchase price sales and from October 1, 1981 to March 31, 1982, for exporter's sales price transactions.

Fair Value Comparison

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we used the best information available as required by section 776(b) of the Act to make fair value comparisons. We used the best information available for each manufacturer because adequate responses were not submitted in time to allow analysis of the information and/or the respondents failed to provide adequate non-confidential summaries of confidential information or permission for release under administrative protective order (APO). A full discussion of the reasons for using the best information available is contained in the "Supplemental Information Requested" section of this notice. The best information available for purposes of this preliminary determination was the information on fair value margins, based on alleged selling prices in the United States and the FRG, contained in the petition. We used the simple average of the margins contained in the petition.

Supplemental Information Requested

Section 776(b) of the Act states that whenever any party refuses or is unable to produce information requested, the Commerce Department may use the best information otherwise available for determining the existence of sales at less than fair value. We did so with respect to the following companies for purposes of this preliminary determination for the reasons indicated below:

1. *Thyssen.* Thyssen submitted a response to our questionnaire on August 9, 1982. Our review of that response revealed numerous deficiencies. By letter dated September 21, 1982, we requested additional information, concerning a large portion of Thyssen's home market sales, extensive further information on various aspects of the data on home market and U.S. sales in its response, and a non-confidential summary or permission for release under an APO of its confidential sales data. The letter stated that failure to provide data and summaries by October 1, 1982, would require us to use the best information otherwise available, according to section 776(b) of the Act.

Some additional information was filed on October 5 and 18, 1982. The additional essential sales information and a non-confidential summary,

however, were filed only on November 3, 1982. The summary was incomplete. Thyssen gave permission for release of its confidential price data only on November 15, 1982. At this time we have not determined whether the additional sales data are adequate. The information is currently being reviewed.

In addition, on August 9, 1982, Thyssen submitted computer tapes with overlapping data bases. A new tape was submitted only on November 12, 1982. We found further deficiencies in the data contained on that computer tape. These deficiencies related to a substantial number of home market sales which were deleted from the tape. We requested a further tape which was submitted only on November 18, 1982, which did not allow sufficient time for our analysis prior to this preliminary determination.

If the above information is not adequate, we will ask Thyssen once again to provide additional information before verification. If this information is not submitted by December 30, 1982, we will be unable to verify it. Where information is not furnished, or is furnished too late to verify, we may use the best information available for our final determination. The analysis and verification of Thyssen's response could substantially change the sales at less than fair value margins calculated for our preliminary determination for Thyssen.

2. *Krupp.* Krupp submitted a response to our questionnaire on August 9, 1982. Our review of that response revealed numerous deficiencies. By letter dated September 14, 1982, we requested that Krupp provide us with a non-confidential summary of its sales data and additional information on its home market and U.S. sales. The letter stated that failure to provide this information by October 1, 1982, would require us to use the best information otherwise available, according to section 776(b) of the Act. The additional information requested was submitted in usable form, in part on October 4, 1982, and in part on October 28, 1982, which did not allow sufficient time for proper analysis prior to this preliminary determination. This information is currently being reviewed for possible use for our final determination.

The verification of Krupp's response could subtantially change the sales at less than fair value margins calculated for our preliminary determination for Krupp.

3. *VDM.* VDM submitted a partial response to our questionnaire on August 13, 1982. Our review of the response revealed numerous deficiencies. By letter dated September 22, 1982, we requested that VDM provide us with additional sales data including exporter's sales price information, and a non-confidential summary or permission to release confidential information under APO by October 1, 1982 (19 CFR 353.28). The letter stated that failure to provide this information by October 1, 1982, would require us to use the best information otherwise available, according to section 776(b) of the Act. The corrected information, including the original exporter's sales price response, was furnished on October 28, 1982 and November 5, 1982. The non-confidential summary, however, was not submitted until November 8, 1982. Therefore, we have not had sufficient time to analyze the above information for purposes of this preliminary determination. We are currently reviewing this information.

If the above information is not adequate, we will ask VDM once again to provide additional information before verification. If this information is not furnished by December 30, 1982, we will be unable to verify it. Where the information is not furnished, or furnished too late to verify, we may use best information available for our final determination. The analysis and verification of VDM's response could substantially change the sales at less than fair value margins calculated for our preliminary determination for VDM.

Verification

We will verify all data used in reaching the final determination in this investigation, as provided in section 776(a) of the Act.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the U.S Customs Service to suspend liquidation of all entries of stainless steel sheet and strip products. This suspension of liquidation applies to all merchandise entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the Federal Register. the Customs Service shall require a cash deposit or the posting of a bond equal to the estimated margin amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price. The suspension of liquidation will remain in effect until further notice. The estimated antidumping duty margins are as follows:

Product	Margin (percent)
Hot-rolled stainless steel sheet and strip	11
Cold-rolled stainless steel sheet	27
Cold-rolled stainless steel strip	43

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC or our determination. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Scretary for Import Administration.

The ITC will determine whether these imports are materially injuring or threatening to materially injure a U.S. industry, before the latter of 120 days after the Department made its preliminary affirmative determination or 45 days after the Department made its final affirmative determination.

Public Comment

In accordance with § 353.47 of the Commerce Department Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on January 13, 1983, at the U.S. Department of Commerce, Room B841, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room 3099B, at the above address within ten days of this notice's publication. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least ten copies must be submitted to the Deputy Assistant Secretary by January 6, 1983. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within thirty days of this notice's publication,

at the above address and in at least ten copies.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

December 14, 1982.

Appendix—Product Description: Certain Stainless Steel Sheet and Strip Products

For the purpose of this investigation, the term "certain stainless steel sheet and strip products" covers hot or cold-rolled stainless steel sheet or strip, excluding hot or cold-rolled stainless steel strip not over 0.01 inch in thickness, as currently provided for in items 607.7610, 607.9010, 607.9020, 608.4300, and 608.5700 of the *Tariff Schedules of the United States Annotated.*

Hot-rolled stainless steel sheet covers hot-rolled stainless steel sheet products whether or not corrugated or crimped and whether or not pickled; not cold-rolled; not cut, not pressed, and not stamped to non-rectangular shape; and under 0.1875 inch in thickness and over 12 inches in width.

Hot-rolled stainless steel strip is a flat-rolled stainless steel product whether or not corrugated or crimped and whether or not pickled; not cold-rolled; not cut, not pressed, and not stamped to non-rectangular shape; and under 0.1875 inch in thickness and not over 12 inches in width. Hot-rolled stainless steel strip, including razor blade strip, not over 0.01 inch in thickness is not included.

Cold-rolled stainless steel sheet covers cold-rolled stainless steel sheet products whether or not corrugated or crimped and whether or not pickled; not cut, not pressed, and not stamped to non-rectangular shape; not coated or plated with metal; and under 0.1875 inch in thickness and over 12 inches in width.

Cold-rolled stainless strip is flat-rolled stainless steel strip product whether or not corrugated or crimped and whether or not pickled; not cut, not pressed, and not stamped to non-rectangular shape; under 0.1875 inch in thickness and over 0.50 inch in width but not over 12 inches in width. Cold-rolled stainless steel strip, including razor blade strip, not over 0.01 inch in thickness is not included in this investigation.

BILLING CODE 3510-25-M

Railcars From Canada; Amendments to Notice of Preliminary Affirmative Countervailing Duty Determination

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Amendment to Notice of Preliminary Affirmative Countervailing Duty Determination.

SUMMARY: On November 22, 1982, the Department of Commerce signed the preliminary countervailing duty determination on railcars from Canada.

Since the publication of that notice the information in the public comment section has changed. The public hearing was scheduled for 10:00 a.m. on January 3, 1983 at the U.S. Department of Commerce, Room 3080, 14th and Constitution Avenue, NW., Washington, D.C. 20230. The prehearing briefs were due to be submitted to the Deputy Assistant Secretary by December 27, 1982.

The hearing for railcars from Canada is now scheduled for 10:00 a.m. on January 6, 1983 at the U.S. Department of Commerce, Room 6802, 14th and Constitution Avenue, NW., Washington, D.C. 20230. The prehearing briefs are due to be submitted to the Deputy Assistant Secretary by December 30, 1982.

FOR FURTHER INFORMATION CONTACT: Michael J. Altier, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230, telephone (202) 377-1276.

December 14, 1982.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

[FR Doc. 82-34319 Filed 12-16-82; 8:45 am]

BILLING CODE 3510-25-M

Wool From Argentina; Postponement of Preliminary Countervailing Duty Determination

AGENCY: International Trade Administration, Commerce.

ACTION: Postponement of Preliminary Countervailing Duty Determination.

SUMMARY: The preliminary countervailing duty determination involving wool from Argentina is being postponed as the investigation has been determined to be extraordinarily complicated. We intend to issue the preliminary determination not later than January 14, 1983.

EFFECTIVE DATE: December 17, 1982.

FOR FURTHER INFORMATION CONTACT: G. Leon McNeill, Office of Investigations, Import Administration, U.S. Department of Commerce, 14th & Constitution Avenue, NW., Washington, D.C. 20230, telephone (202) 377-1273.

SUPPLEMENTARY INFORMATION: On October 18, 1982, we initiated a countervailing duty investigation to determine whether producers, manufacturers or exporters of wool from Argentina receive any benefits that constitute bounties or grants (47 FR 46349). The notice stated that we would issue a preliminary determination by December 15, 1982.

The product covered by this investigation is wool, finer than 44s, not on the skin, from Argentina. The imported merchandise is currently provided for in items 306.3132, 306.3152, 306.3172, 306.3253, 306.3273, 306.3334, 306.3354, and 306.3374 of the *Tariff Schedules of the United States Annotated* (TSUSA).

As detailed in the notice of initiation of the countervailing duty investigation, the petition alleges that the government of Argentina provides various programs which constitute bounties or grants to producers, manufacturers, or exporters of wool. The alleged subsidy practices are numerous and raise complex issues. Moreover, it is difficult to determine the extent of utilization of the programs by the manufacturers, producers or exporters. We have determined that the government of Argentina and the other parties concerned are cooperating and that additional time is necessary to make the preliminary countervailing duty determination. For these reasons we determine that this case is extraordinarily complicated in accordance with section 703(c)(1)(B)(i) and that additional time is necessary to make the preliminary determination in accordance with section 703(c)(1)(B)(ii) of the Tariff Act of 1930, as amended ("the Act"). We intend to issue the preliminary determination not later than January 14, 1983.

This notice is published pursuant to section 703(c)(2) of the Act.

Dated: December 13, 1982.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

University of Arizona et al.; Applications for Duty-Free Entry of Scientific Instruments

The following are notices of the receipt of applications for duty-free entry of scientific instruments published pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the instrument is intended to be used is being manufactured in the United States.

Comments must be filed in accordance with sections 301.5(a)(3) and (4) of the regulations. They are to be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register.**

A copy of each application is on file in the Department of Commerce, and may be examined between 8:30 a.m. and 5:00 p.m., Monday through Friday, Room 2097, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 83–41. Applicant: University of Arizona, College of Medicine, Department of Physiology, Arizona Health Sciences Center, Tucson, AZ 85724. Instrument: Puller, Glass Micro-Electrode, Model PD–5 and Micro Forge with Stereo Microscope, Model MF–79. Manufacturer: Narishige Scientific Products, Japan. Intended use of instrument: The instrument is intended to be used for the investigation of the single-channel properties of the acetylocholine receptor of nerve or muscle cell in culture. The experiment will consist of filling the glass micro-electrode, after pulling by the puller and shaping with microforge, with a dilute solution of acetylcholine. The electrode is then placed on a nerve or muscle cell surface. The electrode is connected to a special custom-built circuit and the single channel receptor properties are then electronically monitored. In addition, the instrument will be used to teach medical/graduate students principles of cell and organ functions. Application received by Commissioner of Customs: November 8, 1982.

Docket No. 83–45. Applicant: National Hansen's Disease Center, Carville, LA 70721. Instrument: Electron Microscope, Model EM 410. Manufacturer: Philips Electronic Instruments, The Netherlands. Intended use of instrument: The instrument is intended to be used for leprosy research. Application received by Commissioner of Customs: November 8, 1982.

Docket No. 83–55. Applicant: Texas A & M University, Department of Chemistry, College Station, TX 77843. Instrument: High Resolution Mass Spectrometer, MS–50. Manufacturer: Kratos Scientific Instruments, United Kingdom. Intended use of instrument: The instrument is intended to be used by a large number of faculty members for research projects. These research projects include:

(1) High resolution mass spectrometry of biologically important molecules.
(2) Mass spectrometry studies of organometallics.
(3) Autoxidation of cobalt dioxygen complexes.
(4) Reaction pathways in polynuclear metal carbonyls.
(5) Stereoselective synthesis of polyfunctional Amines.
(6) Synthetic and biosynthetic studies of *B*-Lactam antibiotics.
(7) Applications of high resolution mass spectroscopy. (Chemical characterization of Texas Lignites and characterization of organoarsenic and orgnoselenium compounds in nature).

The instrument will also be used as an educational tool in a number of graduate and undergraduate laboratory classes including Chemistry 691, Chemistry 685, Chemistry 617, Chemistry 491. Application received by Commissioner of Customs: November 9, 1982.

Docket No. 83–57. Applicant: University of Rochester, School of Medicine, Box 605, Strong Memorial Hospital, 601 Elmwood Avenue, Rochester, NY 14642. Instrument: EM Micro-Dosage Focusing System. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: The instrument is an accessory to an existing microscope that is intended to be used as an aid in the study of the ultrastructure of antigen-antibody complexes. The instrument will allow critical focusing without concommitant specimen degradation, thereby improving the ultrastructural characterization of the antigen-antibody complexes. Application received by Commissioner of Customs: November 9, 1982.

Docket No. 83–64. Applicant: St. Mary's Medical Center, 3700 Washington Avenue, Evansville, IN 47750. Instrument: #7809 III Gamma Med III Afterloading Irradiation Device for Interstitial Therapy and 2 #7809 SC Source Containers. Manufacturer: Isotopen Technik, GmbH, West Germany. Intended use of instrument: The instrument is intended to be used for research and clinical objectives in the treatment of human cancer. The objectives of this research effort will be to optimize the irradiation delivery technique and dose distribution for the treatment of malignant tumors. Application received by Commissioner of Customs: November 9, 1982.

Docket No. 83–66. Applicant: University of Southern California, Department of Electrical Engineering, Mail Code 0484, University Park, Los Angeles, CA 90089. Instrument: Excimer Laser, EMG 50E with Extended Gas Lifetime Option Complete with Optics. Manufacturer: Lambda Physik, West Germany. Intended use of instrument: The instrument is intended to be used to photolytically prepare small polyatomic free radicals in low lying excited states. These species will then be monitored via their IR emissions using a sensitive InSb detector, thereby enabling the measurement of their removal rates in the environments of concern. These rate coefficient measurements are one of the experimental methods which will be used in determining the mechanistic metals of the kinetic processes of concern. The instrument will be used by two graduate students working toward the Ph.D degree. Application received by Commissioner of Customs: November 9, 1982.

Docket No. 83–67. Applicant: SRI International, 333 Ravenswood Avenue, Menlo Park, CA 94025. Instrument: Excimer Pumped Dye Laser FL 2002 complete with Accessories. Manufacturer: Lambda Physik Incorporated, West Germany. Intended use of instrument: The instrument is intended to be used for studies of variable wavelength photolysis of stratospherically important molecules at low pressures. Application received by Commissioner of Customs: November 19, 1982.

Docket No. 83–69. Applicant: University of Wisconsin-Madison, 1115 Engineering Research Building, 1500 Johnson Drive, Madison, WI 53706. Instrument: Electron Microscope, Model HB501. Manufacturer: VG Microscopes, United Kingdom. Intented use of instrument: The instrument is intended to be used for the following research areas:

(1) Metallurgical, physical, superconducting, and potential industrial applications of Nb-Ti and other alloys.
(2) Radiation damage—candidate alloys for possible fusion reactor applications include stainless steels and other complex high-temperature alloys which swell as a result of irradiation.

(3) Interaction of platinum and iridium with graphite in hydrogen and criteria for stable nickel particle size under methanation conditions.

Substantial use of the new microscope will be made by faculty in polymer science, physical metallurgy, and surface science. Application received by Commissioner of Customs: November 18, 1982.

Docket No. 83–70. Applicant: North Carolina State University, P.O. Box 5935, Raleigh, NC 27650. Instrument: Electron Microscope, Model H–800 and Accessories. Manufacturer: Hitachi, Japan. Intended use of instrument: The instrument is intended to be used to study microstructure and chemical composition of crystalline materials, interfaces and inclusions in a variety of metals, ceramics and electronic materials. Application received by Commissioner of Customs: November 18, 1982.

Docket No. 83–73. Applicant: Maine Department of Environmental Protection, State House, #17, Augusta, ME 04333. Instrument: Two Man-Variable Depth Non-Earth Contact Resistivity Meter, Model EM 34–3. Manufacturer: Geonics Limited, Canada. Intended use of instrument: The instrument is intended to be used for hydrogeologic investigations which will include a mapping program to delineate high yield sand and gravel aquifers in the state, and emergency spill responses, when a quick assessment of the direction of contaminant flow within the ground water system is needed. Application received by Commissioner of Customs: November 9, 1982.

Docket No. 83–75. Applicant: University of California at Los Angeles, Laboratory of Biomedical & Environmental Sciences, 900 Veteran Avenue, Los Angeles, CA 90024. Instrument: Medical Cyclotron, Orbit Pert Cyclotron System, Model 270. Manufacturer: ANAC, Limited, New Zealand. Intended use of instrument: The instrument is intended to be used to produce short-lived radio-active isotopes for basic and clinical research in Nuclear medicine. The principal raw products will be carbon-11, nitrogen-13, oxygen-15, and fluorine-18. These radioisotopes can be incorporated into chemical compounds. When these compounds are administered to a human they distribute to various organs and tissues. Their specific locations and movements can be determined with positron-emission tomographic techniques. Abnormal distributions and movements indicate locations and nature of pathologic conditions and thereby support diagnosis of disease states. The basic objective is to develop the smallest, most economical system for rapid, reliable production of compounds labeled with short-lived positron-emitting radionuclides for medical research and clincial diagnostic applications. Application received by Commissioner of Customs: November 19, 1982.

Docket No. 83–83. Applicant: University of California, Lawrence Livermore National Laboratory, P.O. Box 5012, Livermore, CA 94550. Instrument: Camera, X-Ray, Ultra-Fast Streak, Model IMACON 500/X-Ray with Accessories. Manufacturer: John Hadland, Limited, United Kingdom. Intended use of instrument: The instrument is intended to be used for studies of such gases as neon, fluorine and kryptron to demonstrate lasing at higher energies then ever before achieved. Application received by Commissioner of Customs: November 19, 1982.

Docket No. 83–84. Applicant: University of Utah, Department of Materials Science & Engineering, Salt Lake City, UT 84112. Instrument: Electron Microscope, Model JEM–200CX with Accessories. Manufacturer: JEOL Limited, Japan. Intended use of instrument: The instrument is intended to be used by approximately 25 academic and research faculty (as well as their associated post-doctoral and graduate students) primary from the Materials Science and Engineering Department and faculty in the Departments of Mechanical and Industrial Engineering, Civil Engineering, Bioengineering, Electrical Engineering, Chemical Engineering, Metallurgical Engineering, Mining Engineering, and Chemistry while conducting various research projects. Application received by Commissioner of Customs: November 24, 1982.

Docket No. 83–86. Applicant: University of Florida, J. Hillis Miller Health Center, Division of Urology, Box J–247, Room No. N2–11, Gainesville, FL 32610. Instrument: Rotating Prism. Manufacturer: Rank Brothers, United Kingdom. Intended use of instrument: The instruments are components to electrophoresis apparatus which will be used to study the electrophoretic behavior of calcium oxalate (mono and di-hydrate) in the presence of chemical inhibitors to calcium oxalate nucleation and growth as a means of understanding urinary stone disease. Application received by Commissioner of Customs: November 9, 1982.

Docket No. 82–00147R. Applicant: Children's Hospital of Los Angeles, 4650 Sunset Boulevard, Los Angeles, CA 90007. Instrument: 6 MeV Linear Accelerator, G280F and Accessories. Application is a resubmission, notice of which was published in the **Federal Register** of May 14, 1982.

Docket No. 83–88. Applicant: University of California at Davis, School of Medicine, Department of Human Anatomy, Davis, CA 95616. Instrument: Electron Microscope, Model EM 410 and Accessories. Manufacturer: N.V. Philips, Gloeilampenfabrieken, The Netherlands. Intended use of instrument: The instrument is intended to be used for studies of cells, bacteria and viruses and the phenomena of cell/cell interactions in pregnancy, immunology, carcinogenesis, and infection. Investigations will be conducted to understand the mechanisms of both normal and abnormal cell growth and development; to interrelate cell structure with function in normal and dysfunctional situations and in cases of carcinogenesis and infection; to elucidate the cellular mechanisms of normal cell function. Application received by Commissioner of Customs: November 18, 1982.

Docket No. 83–76. Applicant: Veterans Administration Medical Center, University of Utah, Department of Pathology, 500 Foothill Road, Salt Lake City, UT 84148. Instrument: Electron Microscope JEM–100CX/SEG/SQH, 100KV with Accessories. Manufacturer: JEOL Limited, Japan. Intended use of instrument: The instrument is intended to be used for the examination of very thin sections of biological materials for high resolution TEM to demonstrate the ultrastructure features as well as changes under different experimental conditions. Experiments will be conducted in order to identify ultrastructural components of cells and/or morphological correlation to experimental treatments. The objectives of these investigations is to study the ultrastructural features for diagnostic purposes and investigation of the role(s) of the metallic elements in induction of the diseases and immunity (role of beryllium). Application received by Commissioner of Customs: November 19, 1982.

Docket No. 83–78. Applicant: University of California at Los Angeles, CBS 12; Room 200, UCLA, 405 Hilgard Avenue, Los Angeles, CA 90024. Instrument: Radiotherapy Simulator. Instrument: Oldelft Corporation, The Netherlands. Intended use of instrument: The instrument is intended to be used in support of research in the radiotherapy treatment of cancer. Its specific use is in the localization of the tumor within the body and the planning of the treatment. The instrument will also be used in the courses Radiation Science 202C and

Radiation Therapy Resident Training to train individuals in the optimum use of radiation in the treatment of cancer. Application received by Commissioner of Customs: November 23, 1982.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Caribbean Fishery Management Council and its Administrative Subcommittee; Public Meetings

AGENCY: National Oceanic and Atmosphere Administration, Commerce.

SUMMARY: The Caribbean Fishery Management Council, established by section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94-265), has established an Administrative Subcommittee. The Council and its Administrative Subcommittee will hold separate meetings. The Council will hold its 44th regular public meeting to consider status reports on fishery management plans (FMP's) under development, specifically the draft FMP for the Fishery Resources of the Puerto Rican and St. Croix Geological Platforms and also discuss other Council and administrative matters. The Administrative Subcommittee will meet to consider matters related to the Council's budget and to discuss regular administrative operations.

DATES: The Council's public meeting will convene on Wednesday, February 16, 1983, at approximately 1:30 p.m., adjourn at approximately 5 p.m.; reconvene on Thursday, February 17, 1983, at approximately 9 a.m.; adjourn at approximately noon. All meetings will take place at the Conference Room of the Hotel Pierre, 105 de Diego Avenue, Santurce, Puerto Rico.

FOR FURTHER INFORMATION CONTACT: Caribbean Fishery Management Council, Suite 1108, Banco de Ponce Building, Hato Rey, Puerto Rico 00198, Telephone: (809) 753-4926.

Dated: December 14, 1982.

Joe P. Clem,

Acting Chief, Operations Coordination Group, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcing Import Restraint Levels for Certain Cotton, Wool, and Man-Made Fiber Textile Products From Malaysia Effective on January 1, 1983

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton, wool, and man-made fiber textile products, produced or manufactured in Malaysia and exported during the twelve-month period beginning on January 1, 1983.

SUMMARY: The Governments of the United States and Malaysia exchanged notes dated December 5, 1980 and February 27, 1981 establishing a new Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement for the four-year period beginning on January 1, 1981 and extending through December 31, 1984. The agreement provides among other things, specific levels of restraint for Categories 331, 333/334/335, 338/339, 340, 347/348, 445/446, and 604 during the agreement year beginning on January 1, 1983. Accordingly, in the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to limit imports for consumption, or withdrawals from warehouse for consumption, of cotton, wool, and man-made fiber textile products in the foregoing categories to the designated amounts. The level for Category 445/446 has been reduced by 2,322 dozen as a result of a negotiated settlement regarding previous overshipments and by 1,489 dozen representing carryforward used during the 1982 agreement year.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

EFFECTIVE DATE: January 1, 1983.

FOR FURTHER INFORMATION CONTACT: Gordana Slijepcevic, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-4212).

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

December 14, 1982.

Commissioner of Customs,

Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of December 5, 1980 and February 27, 1981, between the Governments of the United States and Malaysia; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on January 1, 1983 and for the twelve-month period extending through December 31, 1983, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, and man-made fiber textile products in Categories 331, 333/334/335, 338/339, 340, 347/348, 445/446, and 604, produced or manufactured in Malaysia, in excess of the following levels of restraint:

Category	12-month level of restraint
331	576,413 dozen pairs.
333/334/335	75,333 dozen of which not more than 37,666 dozen shall be in Cat. 333; not more than 37,666 dozen shall be in Cat 334; and not more than 37,666 dozen shall be in Cat. 335.
338/339	440,398 dozen of which not more than 175,605 dozen shall be in Cat. 339.
340	306,961 dozen.
347/348	173,536 dozen of which not more than 90,738 dozen shall be in Cat. 348.
445/446	21,250 dozen.
604	1,244,881 pounds.

In carrying out this directive, entries of cotton, wool, and man-made fiber textile products in the foregoing categories, produced or manufactured in Malaysia, which have been exported to the United States on and after January 1, 1982 and extending through December 31, 1982, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during that twelve-month period. In the event the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement of December 5, 1980 and February 27, 1981 between the Governments of the United States and Malaysia which provide, in part, that: (1) Specific limits or sublimits may be exceeded by not more than 5 percent, if a corresponding reduction is made in one or more other specific limits in the same group during the same agreement year; (2) specific levels may be adjusted for carryover and carryforward up to 11 percent of the applicable category limits; and (3) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions

of the bilateral agreement, referred to above, will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Malaysia and with respect to imports of cotton, wool, and man-made fiber textile products from Malaysia have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register.**

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

Announcing Levels of Restraint for Certain Cotton Textile Products From Pakistan Effective on January 1, 1983

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton textile products produced or manufactured in Pakistan and exported during the twelve-month period which began on January 1, 1983.

SUMMARY: On March 9 and 11, 1982, the Governments of the United States and Pakistan signed a Bilateral Cotton Textile Agreement which establishes an aggregate limit for Categories 300–369 and within the aggregate limit, specific ceilings for Categories 313, 315, 331, 338, 339, 347/348, and 363, among others, during the agreement year which begins on January 1, 1983. It also provides consultation levels for categories, such as Categories 317, 320, and 369pt., which are not subject to specific ceilings and which may be adjusted during the agreement year. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, in accordance with the terms of the bilateral agreement, to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 300–369, as a group, and in individual Categories 313, 315, 317, 320, 331, 338, 339, 347/348, 363, and 369pt., produced or manufactured in Pakistan and exported during the twelve-month period which begins on January 1 1983 and extends through December 31, 1983, in excess of the designated levels of restraint. The level for Category 363 has been reduced by 1,130,412 dozen to account for carryforward used during the 1982 agreement year.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

EFFECTIVE DATE: January 1, 1983.

FOR FURTHER INFORMATION CONTACT: Gordana Slijepcevic, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212).

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

December 14, 1982.

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Comissioner: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton Textile Agreement of March 9 and March 11, 1982, between the Governments of the United States and Pakistan; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on January 1, 1983 and for the twelve-month period extending through December 31, 1983, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 300–369, as a group, and individual Categories 313, 315, 317, 320, 331, 338, 339, 347/348, 363, and 369pt. in excess of the following levels of restraint:

Category	12-month level of restraint [1]
300–369	215,285,136 square yards equivalent.
313	76,950,459 square yards.
315	44,934,904 square yards.
317	6,512,000 square yards.
320	6,000,000 square yards.
331	523,383 dozen pairs.
338	1,292,388 dozen.
339	456,345 dozen.
347/348	240,750 dozen.
363	19,028,593 numbers.
369pt. [2]	5,869,565 pounds.

[1] The level of restraint has not been adjusted to reflect any imports after December 31, 1982.
[2] In Category 369, all T.S.U.S.A. numbers except 366.1855.

In carrying out this directive, entries of textile products in the foregoing categories, produced or manufactured in Pakistan, which have been exported to the United States on and after January 1, 1982 shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the twelve-month period which began on January 1, 1982 and extends through December 31, 1982. In the event the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement of March 9 and 11, 1982 between the Governments of the United States and Pakistan which provide, in part, that: (1) Within the aggregate and group limits, specific levels of restraint may be exceeded by designated percentages; (2) specific levels may be increased for carryover and carryforward; and, (3) administrative arrangements or adjustment may be made to resolve problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions of the bilateral agreement, referred to above, will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Pakistan and with respect to imports of cotton textile products from Pakistan have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register.**

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Board of Trade Proposed Futures Contract for Silver in 5,000 Troy Ounce Units

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity futures contracts.

SUMMARY: The Chicago Board of Trade ("CBOT" or "Exchange") has applied for approval of a silver contract in 5,000

troy ounce units. The Commodity Futures Trading Commission (the "Commission") has determined that the terms and conditions of the proposed futures contract are of major economic significance and that, accordingly, making available the proposed contract for public inspection and comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before January 17, 1983.

ADDRESS: Interested persons should submit their views and comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Reference should be made to the CBOT 5,000-ounce silver futures contract.

FOR FURTHER INFORMATION CONTACT: Richard Shilts, Division of Economics and Education, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C., (202) 254–7303.

SUPPLEMENTARY INFORMATION: The CBOT currently is designated as a contract market in silver for trading in units of 1,000 troy ounces. Trading in 5,000-ounce units, as a result of the Exchange's March 1981 amendments to its silver contract, is permissible only as an interim measure while the new 1,000-ounce delivery unit contract is phased in.[1]

By letter dated October 14, 1982, the CBOT submitted for Commission approval, pursuant to Section 5a(12) of the Commodity Exchange Act (the "Act"), a proposed amendment to Regulation 1404.01 regarding the unit of trading for its silver contract. The proposal would allow the Exchange to trade two separate contracts in silver: a contract trading in units of 1,000 troy ounces, and a contract trading in units of 5,000 troy ounces.

The Exchange proposes to accomplish this by amending Regulation 1404.01 so that new trading months can be added to the 5,000-ounce contract beyond the period specified in the contract market rule while continuing to list trading months in the 1,000-ounce contract.

The Commission has determined to treat the current submission as an application for a new contract market designation, pursuant to Section 5 of the Act, 7 U.S.C. 7, and Guideline No. 1, 47 FR 49832 (November 3, 1982). The new designation would be for silver traded in units of 5,000 troy ounces and would be in addition to the currently designated 1,000 troy ounce silver contract.

A copy of the terms and conditions of the CBOT's proposed 5,000-ounce silver futures contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Copies can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

Other materials submitted by the CBOT in support of its application may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1981)). Requests for inspection of such materials should be made to the FOIA, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the terms and conditions of the proposed futures contract, or with respect to other materials submitted by the CBOT in support of its application, should send such comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, by January 17, 1983. Such comment letters will be publicly available except to the extent that they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9.

Issued in Washington, D.C., on December 13, 1982.

Jane K. Stuckey,

Secretary of the Commission.

[FR Doc. 82-34252 Filed 12-16-82; 8:45 am]

BILLING CODE 6351-01-M

[1] On March 5, 1981, the Commission approved an amendment to the CBOT's silver contract to reduce the size of the unit of trading from 5,000 to 1,000 troy ounces. This amendment allows trading in the 5,000-ounce unit to continue concurrently with trading in the new 1,000-ounce unit, but only for a limited period specified in the contract's rules.

New York Futures Exchange; Proposed Rules Relating to Exchange Speculative Position Limits

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Proposed Adoption of Contract Market Rules.

SUMMARY: The New York Futures Exchange ("NYFE") has submitted to the Commission proposed rules setting speculative position limits for currently designated contract markets pursuant to Commission Rules 1.61 and 1.41, 17 CFR 1.61 and 1.41 (1982), and Section 5a(12) of the Commodity Exchange Act, as amended, 7 U.S.C. 7a(12) (Supp. V 1981). The Commodity Futures Trading Commission ("Commission") has determined that for currently designated contracts, initial exchange proposals to set speculative limits are potentially of major economic significance. Accordingly, the Commission has determined that publication of this proposal is in the public interest, that receipt of public comment will assist the Commission in its consideration of the exchange submissions, and that publication is consistent with the purposes of the Commodity Exchange Act.

SUPPLEMENTARY INFORMATION: The NYFE has submitted to the Commission pursuant to Commission Rules 1.61 and 1.41, 17 CFR 1.61 and 1.41 (1982) and Section 5a(12) of the Commodity Exchange Act, as amended, 7 U.S.C. 7a(12) (Supp. V 1981) proposed exchange rules setting speculative position limits in nine designated contract markets. They are: British pound, Swiss franc, Deutsche mark, Canadian dollar, Japanese yen, 90-Day U.S. Treasury bills, U.S. Treasury bonds, Eurodollars and Domestic CDs.[1]

The Commission, in accordance with Section 5a(12) of the Act, has determined that the proposed rules setting exchange speculative position limits on currently designated contracts are potentially of major economic significance.[2] Accordingly, the Commission seeks to receive comments from interested persons with respect to these proposed exchange rules. The text of the proposed exchange rules submitted by NYFE appear below. In addition, NYFE Rule 307, which is referenced in, or is otherwise applicable to, the speculative position limit rules is also printed below:

[1] In addition, five other domestic boards of trade have submitted for Commission approval speculative position limits for currently designated contract markets. The proposed rules submitted by the Chicago Mercantile Exchange and by the Commodity Exchange, Inc., were published in the Federal Register on July 20, 1982 (47 FR 31417); correction, 47 FR 34615 (August 10, 1982). The staff of the Commission will be reviewing the remaining four proposals following its consideration of this proposal.

[2] This determination is based upon a finding that the initial imposition of speculative position limits for designated contract markets which currently do not have such limits may be of economic significance to those currently trading in a contract which has no existing speculative limits. However, the Commission believes that the subsequent adjustment of existing exchange speculative limits generally would not be of major economic significance.

Rules Submitted by the New York Futures Exchange

Rule 706

The position limit for any British Pound Futures Contract shall be a net long or net short position of 1,000 contracts for any person in all delivery months combined, computed in accordance with the following rules:

(i) All contracts carried in accounts in which trading is directly or indirectly controlled, by power of attorney or otherwise, by any person or by two or more persons acting pursuant to an expressed or implied agreement or understanding with respect to such trading shall be aggregated.

(ii) In computing the position limit for all delivery months combined, the net long or net short position shall be the difference, if any, between the number of open long contracts in all delivery months and the number of open short contracts in all delivery months.

(iii) All contracts which are part of hedge positions, intercommodity spread positions or arbitrage positions under Rule 307 shall be excluded in computing the net long or net short position of the person or persons with respect to which the Exchange made its hedge, intercommodity spread or arbitrage determination.

Rule 726

The position limit for any Swiss Franc Futures Contract shall be a net long or net short position of 1,000 contracts for any person in all delivery months combined, computed in accordance with the following rules:

(i) All contracts carried in accounts in which trading is directly or indirectly controlled, by power of attorney or otherwise, by any person or by two or more persons acting pursuant to an expressed or implied agreement or understanding with respect to such trading shall be aggregated.

(ii) In computing the position limit for all delivery months combined, the net long or net short position shall be the difference, if any, between the number of open long contracts in all delivery months and the number of open short contracts in all delivery months.

(iii) All contracts which are part of hedge positions, intercommodity spread positions or arbitrage positions under Rule 307 shall be excluded in computing the net long or net short position of the person or persons with respect to which the Exchange made its hedge, intercommodity spread or arbitrage determination.

Rule 746

The position limit for any Deutsche Mark Futures Contract shall be a net long or net short position of 1,000 contracts for any person in all delivery months combined, computed in accordance with the following rules:

(i) All contracts carried in accounts in which trading is directly or indirectly controlled, by power of attorney or otherwise, by any person or by two or more persons acting pursuant to an expressed or implied agreement or understanding with respect to such trading shall be aggregated.

(ii) In computing the position limit for all delivery months combined, the net long or net short position shall be the difference, if any, between the number of open long contracts in all delivery months and the number of open short contracts in all delivery months.

(iii) All contracts which are part of hedge positions, intercommodity spread positions or arbitrage positions under Rule 307 shall be excluded in computing the net long or net short position of the person or persons with respect to which the Exchange made its hedge, intercommodity spread or arbitrage determination.

Rule 766

The position limit for any Canadian Dollar Futures Contract shall be a net long or net short position of 1,000 contracts for any person in all delivery months combined, computed in accordance with the following rules:

(i) All contracts carried in accounts in which trading is directly or indirectly controlled, by power of attorney or otherwise, by any person or by two or more persons acting pursuant to an expressed or implied agreement or understanding with respect to such trading shall be aggregated.

(ii) In computing the position limit for all delivery months combined, the net long or net short position shall be the difference, if any, between the number of open long contracts in all delivery months and the number of open short contracts in all delivery months.

(iii) All contracts which are part of hedge positions, intercommodity spread positions or arbitrage positions under Rule 307 shall be excluded in computing the net long or net short position of the person or persons with respect to which the Exchange made its hedge, intercommodity spread or arbitrage determination.

Rule 786

The position limit for any Japanese Yen Futures Contract shall be a net long or net short position of 1,000 contracts for any person in all delivery months combined, computed in accordance with the following rules:

(i) All contracts carried in accounts in which trading is directly or indirectly controlled, by power of attorney or otherwise, by any person or by two or more persons acting pursuant to an expressed or implied agreement or understanding with respect to such trading shall be aggregated.

(ii) In computing the position limit for all delivery months combined, the net long or net short position shall be the difference, if any, between the number of open long contracts in all delivery months and the number of open short contracts in all delivery months.

(iii) All contracts which are part of hedge positions, intercommodity spread positions or arbitrage positions under Rule 307 shall be excluded in computing the net long or net short position of the person or persons with respect to which the Exchange made its hedge, intercommodity spread or arbitrage determination.

Rule 807

The position limit for 90-Day Treasury Bill Futures Contract shall be a net long or net short position of 5,000 contracts for any person in all delivery months combined, except that 21 days prior to the last trading day of any contract month the maximum long or short position which any person may hold or control in such contract month is 2,500 contracts and seven days prior to the last trading day of any contract month the maximum long or short position which any person may hold or control in such contract months is 500 contracts, computed in accordance with the following rules:

(i) All contracts carried in accounts in which trading is directly or indirectly controlled, by power of attorney or otherwise, by any person or by two or more persons acting pursuant to an expressed or implied agreement or understanding with respect to such trading shall be aggregated.

(ii) In computing the position limit for all delivery months combined, the net long or net short position shall be the difference, if any, between the number of open long contracts in all delivery months and the number of open short contracts in all delivery months.

(iii) All contracts which are part of hedge positions, intercommodity spread positions or arbitrage positions under Rule 307 shall be excluded in computing the net long or net short position of the person or persons with respect to which the Exchange made its hedge, intercommodity spread or arbitrage determination.

Rule 827

The position limit for any Treasury Bond Futures Contract shall be a net long or net short position of 5,000 contracts for any person in all delivery months combined, computed in accordance with the following rules:

(i) All contracts carried in accounts in which trading is directly or indirectly controlled, by power of attorney or otherwise, by any person or by two or more persons acting pursuant to an expressed or implied agreement or understanding with respect to such trading shall be aggregated.

(ii) In computing the position limit for all delivery months combined, the net long or net short position shall be the difference, if any, between the number of open long contracts in all delivery months and the number of open short contracts in all delivery months.

(iii) All contracts which are part of hedge positions, intercommodity spread positions or arbitrage positions under Rule 307 shall be excluded in computing the net long or net short position of the person or persons with respect to which the Exchange made its hedge, intercommodity spread or arbitrage determination.

Rule 887

The position limit for any Eurodollar Futures Contract shall be a net long or net short position of 5,000 contracts for any person in all delivery months combined, computed in accordance with the following rules:

(i) All contracts carried in accounts in which trading is directly or indirectly controlled, by power of attorney or otherwise, by any person or by two or more persons acting pursuant to an expressed or implied agreement or understanding with respect to such trading shall be aggregated.

(ii) In computing the position limit for all delivery months combined, the net long or net short position shall be the difference, if any, between the number of open long contracts in all delivery months and the number of open short contracts in all delivery months.

(iii) All contracts which are part of hedge positions, intercommodity spread positions or arbitrage positions under Rule 307 shall be excluded in computing the net long or net short position of the person or persons with respect to which the Exchange made its hedge, intercommodity spread or arbitrage determination.

Rule 1007

The position limit for any CD Futures Contract shall be a net long or net short position of 5,000 contracts for any person in all delivery half-months combined, except that 14 days prior to the first notice day of any delivery half-month the maximum long or short position which any person may hold or control in such delivery half-month is 4,000 contracts and on the first notice day of any delivery half-month the maximum long or short position which any person may hold or control in such delivery half-month is 500 contracts, computed in accordance with the following rules:

(i) All contracts carried in accounts in which trading is directly or indirectly controlled, by power of attorney or otherwise, by any person or by two or more persons acting pursuant to an expressed or implied agreement or understanding with respect to such trading shall be aggregated.

(ii) In computing the position limit for all delivery half-months combined, the net long or net short position shall be the difference, if any, between the number of open long contracts in all delivery half-months and the number of open short contracts in all delivery half-months.

(iii) All contracts which are part of hedge positions, intercommodity spread positions or arbitrage positions under Rule 307 shall be excluded in computing the net long or net short position of the person or persons with respect to which the Exchange made its hedge, intercommodity spread or arbitrage determination.

Position Limit Rule

Rule 307

(a) No member or member organization shall permit any customer or customers to hold or control any positions in excess of the position limit set forth under Rules of the Exchange relating to position limits in any account or accounts which such member or member organization carries for such customer or customers.

(b) Any person that desires to have certain futures contracts excluded in computing the net long or net short position such person may hold or control under Rules of the Exchange relating to position limits, may file with the Exchange an application, in such form and accompanied by such information as the Exchange may prescribe, requesting that the Exchange treat such futures contracts as hedge positions, intercommodity spread positions or arbitrage positions, as the case may be. Such application must include:

(i) Potential size of the futures transactions.

(ii) In the case of proposed hedge positions, a description of the intended futures transactions(s), a description of the offsetting cash position, and information demonstrating that such positions can be expected to meet the requirements of Commission Regulation 1.3(z)(1).

(iiii) In the case of proposed arbitrage and intercommodity spread positions, a description of the type of intended futures transactions for which the exclusion is requested, and a statement explaining the appropriateness of the proposed position.

(iv) A statement that the intended futures transactions(s) will be bona fide hedges, arbitrage positions or intercommodity spread positions.

(c) The Exchange will give the applicant, and any member or member organization carrying accounts for the applicant, written notice indicating to what extent, if any, the applicant's positions may be treated as hedge positions, intercommodity spread positions or arbitrage positions for purposes of the Rules governing position limits. In the case or arbitrage and intercommodity spread positions, the Exchange may impose such limitations as are commensurate with the liquidity of the markets involved, or with the applicant's financial ability or business circumstances, or with the appropriateness of the arbitrage or intercommodity spread positions. The Exchange may at any time and from time to time review determination made hereunder; require any applicant to submit such additional information as the Exchange may consider necessary or appropriate for purposes of this Rule; and revoke, modify, condition or otherwise limit any determination made hereunder with respect to the positions that may be treated as hedge positions, intercommodity spread positions or arbitrage positions for any person.

(d) Any member or member organization which carries any account or accounts for any person or persons that violate any Rules of the Exchange relating to position limits shall liquidate any futures contracts in excess of the limits promptly and in any event within such time as the Exchange may prescribe and shall report to the Exchange when such excess has been reduced. If a member or member organization fails to liquidate any excess futures contracts within the time prescribed by the Exchange, the Exchange may liquidate such excess. Any such liquidation of futures contracts may be effected in such manner as the Exchange, in its discretion, may determine. Without limiting the generality of the foregoing, any such liquidation may be effected by placing with one or more members or member organizations chosen at the discretion of the Exchange, orders for the purchase or sale of futures contracts on the Floor. The member or member organization for whose account such futures contracts are to be liquidated shall be liable to the Exchange for any commissions or other expenses incurred in liquidating such account. The Exchange shall not be liable in any way to a member or member organization, or to any other person, whose accounts have been liquidated pursuant to this Rule, including without limitation claims for losses arising out of the liquidation or the time and manner or the prices at which liquidation was effected.

(e) Any member or member organization which has, or carries an account for any customer which has hedge, intercommodity spread or arbitrage positions, must carry such positions in a special account.

Other materials submitted by the NYFE in support of these proposed rules may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1981)). Requests for copies of such materials should be made to the FOIA, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the

proposed exchange rules should send such comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, by (30 days). Such comment letters will be publicly available except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9.

Issued in Washington, D.C., on December 13, 1982.

Jane K. Stuckey,

Secretary to the Commission.

DEPARTMENT OF DEFENSE

Department of the Army

Discharge Review Boards; Army Discharge Review Board Standard Operating Procedures

Notice is hereby given that the Army Discharge Review Board Standard Operating Procedures published in the **Federal Register** (44 FR 25046) on April 27, 1979 are rescinded. At that time it was stated that while the SOP was designed for internal use by members and support personnel of the review board, it was published with the anticipation that applicants before the board may also find guidance contained in the document helpful in preparing for discharge review. Since then there has been an extensive modification to and expansion of the rules relating to discharge review in Department of Defense Directive 1332.28. This detailed guidance was published in the **Federal Register** (47 FR 37770) on August 26, 1982, and it provides the essential information concerning procedures, standards, forms and policies needed for the guidance of the public interested in functions of the Army Discharge Review Board. Further guidance will be provided in the Army's implementation (Army Regulation 15-180) of DOD Directive 1332.28, which will be published in the **Federal Register.**

(5 U.S.C. 552, 10 U.S.C. 133, 10 U.S.C. 136, 10 U.S.C. 1553, and delegations of authority from the Secretary of Defense and Assistant Secretary of Defense for Manpower, Reserve Affairs and Logistics)

Francis X. Plant,

Deputy Assistant Secretary (DA Review Boards and Personnel Security).

BILLING CODE 3710-08-M

Discharge Review Boards; Discharge Review Composite Index

The Armed Forces Discharge Review/Correction Board Reading Room will provide a composite index for April, July and October 1982, and January 1983 which will be distributed on or about February 1, 1983. Applicants to the Army, Navy, and Air Force Discharge Review Boards and Board for Correction of Military (or Naval) Records may request a postponement or continuation of a review in order to make use of the composite index, and a person who requests a postponement or continuance for the express purpose of using the composite index will be rescheduled for a new review at the earliest possible date, subject to traveling schedule for hearings outside the National Capital Region. This policy will remain in effect for continuances and postponements requested before March 15, 1983.

Additionally, applicants may request reconsideration of final decisions issued in their particular case by the Discharge Review Boards and Correction Boards. An applicant shall receive reconsideration of such a decision in the following circumstances: (1) The reconsideration must pertain to a case in which, between April 15, 1982 and January 31, 1983, the applicant (or his counsel) submitted an application, participated in a hearing, or otherwise presented an issue to the Board; (2) the applicant must certify that he attempted to use the index between April 15, 1982 and January 31, 1983 to prepare materials for submission to the Board prior to the Board's final decision; (3) the applicant must request reconsideration expressly on the grounds that a cited case listed in the composite index was not listed in the index which the applicant attempted to use; (4) the applicant must submit an issue that sets forth principles and facts from the cited case that are relevant to his case and the applicant must cite such principles and facts as basis for relief; (5) the cited case must have been decided at least 30 days prior to the date of decision in the applicant's case; and (6) the request for reconsideration must be received on or before January 31, 1984. (5 U.S.C. 552, 10 U.S.C. 133, 10 U.S.C. 136, 10 U.S.C. 1553, and delegations of authority from the Secretary of Defense and Assistant Secretary of Defense for Manpower, Reserve Affairs and Logistics.)

Dated: December 8, 1982.

National Advisory Council on Adult Education

AGENCY: National Advisory Council on Adult Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Governmental Relations and Legislation Committee of the National Advisory Council on Adult Education. This notice also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

DATES: January 10-11, 1983, 9:00 a.m. to 5:00 p.m.

ADDRESS: Sun City Center, Sun City, Florida.

FOR FURTHER INFORMATION CONTACT: Helen Banks, Administrative Assistant, National Advisory Council on Adult Education, 425 13th St., NW., Washington, D.C. 20004 (202/376-8892).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Adult Education is established under Section 313 of the Adult Education Act (20 U.S.C. 1201). The Council is established to:

Advise the Secretary in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Committee is open to the public. The proposed agenda includes:

Consolidation and Block Grants
Adult Education Reauthorization

Preparation of Report to Council on Legislative Recommendations

Records are kept of all Council proceedings, and are available for public inspection at the office of the National Advisory Council on Adult Education, 425 13th St., NW., Suite 323, Washington, D.C. 20004, from the hours of 8:00 a.m. to 4:30 p.m.

Signed at Washington, D.C. on December 13, 1982.

Rick Ventura,

Executive Director, National Advisory Council on Adult Education.

[FR Doc. 82-34249 Filed 12-16-82; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project Nos. 703-000 et al.]

Utah Power & Light Co.; Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1a. Type of Application: Exemption for Small Conduit Hydroelectric Facility.

b. Project No. P-703-000.

c. Date Filed: October 28, 1982.

d. Applicant: Utah Power & Light Company.

e. Name of Project: Paris Project.

f. Location: Paris Creek in Bear Lake County, Idaho.

g. Filed Pursuant to: Section 30 of the Federal Power Act [16 U.S.C. 823(a)].

h. Contact Person: Jody L. Williams, Attorney, 1407 West North Temple, P.O. Box 899, Salt Lake City, Utah 84110.

i. Comment Date: January 31, 1983.

j. Description of Project: The Paris Hydroelectric Project is currently operating under FERC License 703, issued November 11, 1975, and no new construction is planned. The project consists of: (1) A 0.61-acre forebay with a timber and concrete spillway; (2) a concrete intake structure; (3) a 1,366-foot-long, 22 to 30-inch-diameter steel penstock; (4) a powerhouse containing one turbine/generator unit with a capacity of 715 kW; (5) a 60-foot-long, 30-inch-diameter steel discharge pipe; and (6) a tailwater basin. The average annual generation is 2,450 MWh.

k. Purpose of Project: Project energy is utilized in Utah Power & Light Company's electric distribution system and is sold to the public utility customers in its service area.

l. This notice also consists of the following standard paragraphs: B, C and D3b.

2a. Type of Application: Amendment of License.

b. Project No: 803-006.

c. Date Filed: November 8, 1982.

d. Applicant: Pacific Gas and Electric Company.

e. Name of Project: DeSabla-Centerville.

f. Location: West Branch Feather River and Butte Creek, in Butte County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. § 791(a)-825(r).

h. Contact Person: Mr. W. M. Gallavan, Vice President, Rates and Valuation, Pacific Gas and Electric Company, 77 Beale Street, Room 1087A, San Francisco, California 94106.

i. Comment Date: January 26, 1983.

j. Description of Project: Licensee proposes to improve its existing DeSabla-Centerville Project by adding the Toadtown Development which would consist of: (1) A 7-foot-high intake structure; (2) the existing Rapid Pipe; (3) a 1,552-foot-long, 54-inch-diameter steel penstock; (4) a powerhouse containing oné generating unit rated at 1,660 kW; (5) a tailrace; and (6) a 1,500-foot-long transmission line. The average annual energy generation would be 8.43 million kWh.

Licensee has also requested that the term of license for Project No. 803 be extended.

k. Purpose of Project: The energy generated by the project would be utilized to meet demands in Licensee's service area.

l. This notice also consists of the following standard paragraphs: B, C. D1.

3a. Type of Application: Major License (more than 5 MW).

b. Project No: 3239-001.

c. Date Filed: June 1, 1982.

d. Applicant: Puget Sound Power & Light Company.

e. Name of Project: Sandy Creek Project.

f. Location: on Rocky, Sulphur and Sandy Creeks within Mt. Baker National Forest in Whatcom County, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. § 791(a)-825(r).

h. Contact Person: Mr. Robert V. Myers, Vice President, Generation Resources, Puget Sound Power & Light Company, Puget Power Building, Bellevue, Washington 98009.

i. Comment Date: January 7, 1983.

j. Competing Application: Projects No. 6373-000 and No. 6374-000 (Due Date: December 10, 1982).

k. Description of Project: The proposed project would consist of: (1) A 15-foot-high concrete gravity diversion structure with crest elevation of 3,205 feet (m.s.l.) on Upper Sulphur Creek; (2) a 42-inch-diameter, 11,500-foot-long concrete pipeline; (3) a 36-inch-diameter, 4,000-foot-long penstock; (4) a powerhouse of Sulphur Creek (Powerhouse No. 1) containing a single generating unit with a rated capacity of 5,600 kW; (5) a second 15-foot-high concrete gravity diversion structure with crest elevation of 2,025 feet on Rocky Creek; (6) a 42-inch-diameter 2,500-foot-long concrete pipeline diverting waters of Rocky Creek into Sulphur Creek; (7) a third 15-foot-high concrete gravity diversion structure on Sulphur Creek immediately downstream of discharge point from Powerhouse No. 1 and Rocky Creek diversion pipeline; (8) a 54-inch-diameter, 9,000-foot-long concrete pipeline; (9) a 48-inch-diameter, 6,000-foot-long penstock, leading to Powerhouse No. 2; (10) a fourth 15-foot-high concrete gravity diversion structure with crest elevation of 1,455 feet on Sandy Creek; (11) a 48-inch-diameter, 4,300-foot-long concrete pipeline; (12) a 40-inch-diameter, 4,000-foot-long penstock also leading to Powerhouse No. 2; (13) a powerhouse on Sandy Creek (Powerhouse No. 2) containing two generating units with rated capacities of 9,000 and 3,000 kW; and (14) a 34.5-kV, 5.7-mile-long transmission line connecting the two proposed powerhouses with the Applicant's existing substation adjacent to the Upper Baker River Development southeast of the project. Project energy would be utilized by the Applicant to serve its customers.

m. This notice also consists of the following standard paragraphs: A3, B, & C.

4a. Type of Application: Exemption from Licensing.

b. Project No.: P-3412-002.

c. Date Filed: October 25, 1982.

d. Applicant: The City of Oxford, Kansas.

e. Name of Project: Oxford Mill Project.

f. Location: Arkansas River in Sumner County, Kansas.

g. Filed Pursuant to: Section 408 of the Energy Security Act (1980) (16 U.S.C. 2705 and 2708 as amended).

h. Contact Person: Charles Webb, Mayor, City of Oxford, City Hall, Oxford, Kansas 67119.

i. Comment Date: January 31, 1983.

j. Description of Project: The project would consist of the reconstruction and restoration of existing facilities which include: (1) A main rockfill diversion dam about 750 feet long and 3 feet high; (2) a natural channel three-quarters of a mile long; (3) a secondary earth and

rockfill diversion dam 210 feet long and 6 feet high; (4) a 1-mile-long millrace; (5) a powerhouse with an installed capacity of 300 kW; and (6) other appurtenances. Applicant estimates average annual generation would vary from 1,300,000 kWh to 2,010,000 kWh.

k. Purpose of Project: Project energy would be sold to the Kansas Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A1, B, C and D3a.

m. Purpose of Exemption: An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

5a. Type of Application: Major License (over 5 MW).

b. Project No. 3571–001.

c. Date Filed: November 17, 1982.

d. Applicant: Central Oregon Irrigation District.

e. Name of Project: Central Oregon Siphon Power Project.

f. Location: On Deschutes River in Deschutes County, Oregon.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Ron Nelson, Central Oregon Irrigation District, 847 South Sixth Street, P.O. Box 548, Redmond, Oregon 97756.

i. Comment Date: February 16, 1983.

j. Description of Project: The proposed run-of-the-river project would consist of: (1) Two new 2.5-foot-high by 18-foot-long concrete weirs on the Deschuts River; (2) an existing 150-foot-long flume; (3) an existing siphon, approximately 6,000 feet long; (4) a 1,146-foot-long section of the existing Central Oregon Canal; (5) a new check structure to divert water from the canal to; (6) two 84-inch-diameter penstocks leading to; (7) a powerhouse to contain two turbine-generating units with a total rated capacity of 6.5 MW under a head of 130 feet; (8) a switchyard; and (9) appurtenant facilities. The project would generate 35.26 million kWhs. No transmission line is included in this project. The line would be constructed by others for which a separate license application will be filed. The license application for the Central Oregon Siphon Power Project was filed as the result of a preliminary permit issued for the project.

k. This notice also consists of the following standard paragraphs: A2, B and C.

6a. Type of Application: Application for License (5 MW or Less).

b. Project No: 3572–001.

c. Date Filed: September 30, 1982.

d. Applicant: North Stratford Equipment Corporation.

e. Name of Project: Livermore Falls Hydro Project.

f. Location: Grafton County, New Hampshire.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Contact Person: Mr. George K. Lagassa, Mill Pond Hydro Corporation, P.O. Box 4461, Portsmouth, New Hampshire 03801.

i. Comment Date: February 11, 1983.

j. Description of Project: The proposed project would be run-of-the-river and would consist of: (1) A breached dam, with the 83-foot long concrete spillway section remaining, to be repaired and reconstructed with a 258-foot long rock-filled timber crib section (or possibly a concrete gravity section if economically feasible) resulting in a dam, 341 feet long and 20 feet high, with spillway crest at 514 feet m.s.l.; (2) a reservoir having minimal pondage; (3) a gated intake structure with trashracks and two rectangular pressure flumes, each 10½ feet by 9 feet, integral with (4) a powerhouse to be rehabilitated and equipped with two rebuilt turbine-generator units having rated capacities of 750 kW each for a total rated capacity of 1,500 kW; (5) a tailrace returning flow to the Pemigewasset River approximately 100 feet downstream of the dam; (6) a new transmission line, approximately 500 feet long through an underground conduit, and a switchyard; and (7) appurtenant facilities. The Applicant estimates that the average annual energy output would be 9,500,000 kWh. Project energy will be sold to the utility serving the area. Applicant states that a possible 2,000 kW capacity may be added in a future project expansion if this becomes feasible. This application was filed during the term of the Applicant's preliminary permit for Project No. 3572–000.

k. This notice also consists of the following standard paragraphs: A2, B, C, and D1.

7a. Type of Application: Amendment of License.

b. Project No: P–3706–002.

c. Date Filed: November 12, 1982.

d. Applicant: American Hydro Power Company.

e. Name of Project: Mussers Dam.

f. Location: Middle Creek, Snyder County, Pennsylvania.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Contact Person: Peter A. McGrath, American Hydro Power Company, Two Aldwyn Center, Villanova, Pennsylvania 19085.

i. Comment Date: January 28, 1983.

j. Description of Project: Under the license, Licensee is authorized to rehabilitate an existing turbine and install a 350-kW generator. Licensee now proposes to install a 300-kW generator, in combination with the existing turbine, and in addition, install a new 40-kW turbine-generator unit.

k. This notice also consists of the following standard paragraphs: B, C.

8a. Type of Application: Exemption From Licensing.

b. Project No: 6616–000.

c. Date Filed: August 19, 1982.

d. Applicant: Olympus Energy Corporation.

e. Name of Project: Sky Creek.

f. Location: On Sky Creek, within the Ross Lake Recreation Area, near Marblemount, in Skagit County, Washington.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980 (Act), 16 U.S.C. 2705, and 2708 *as amended.*

h. Contact Person: Mr. Jerome E. Livingston, President, Olympus Energy Corporation, 201–215th Street, SE., Bothell, Washington 98011.

i. Comment Date: January 24, 1983.

j. Description of Project: The proposed project would consist of: (1) A 5-foot-high, 35-foot-long concrete diversion structure; (2) a 1,670-foot-long, 30-inch-diameter steel pipeline; (3) a 1,500-foot-long, 30-inch-diameter steel penstock; (4) a powerhouse containing two generating units with a total installed capacity of 1.9 MW; and (5) a 200-foot-long transmission line. The Applicant estimates that the average annual energy production would be 12.5 million kWh.

k. Purpose of Project: Project power would be sold to a local public utility.

l. This notice also consists of the following standard paragraphs: A1, B, C, D3a.

9a. Type of Application: Preliminary Permit.

b. Project No: 6666–000.

c. Date Filed: September 1, 1982.

d. Applicant: Lawrence J. McMurtrey.

e. Name of Project: Pressentin Creek Waterpower Project.

f. Location: Pressentin Creek, near Hamilton, within Snoqualmie—Mt. Baker National Forest, in Skagit County, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Lawrence J. McMurtrey, 12122—196th N.E. Redmond, Washington 98052.

i. Comment Date: February 22, 1983.

j. Description of Project: The proposed project would consist of: (1) Five 2-foot-high, 10-foot-long diversion structures on Pressentin Creek; (2) a 12,000-foot-long,

36-inch-diameter diversion pipeline; (3) a powerhouse with a total installed capacity of 3.19 MW; and (4) a 115-kV transmission line. The Applicant estimates that the average annual energy production would be 13.98 GWh.

k. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, & D2.

10a. Type of Application: Preliminary Permit.

b. Project No: 6727–000.

c. Date Filed: September 29, 1982.

d. Applicant: Northwest Power Company, Incorporated.

e. Name of Project: Miner's Tunnel Hydroelectric Project.

f. Location: On South Yuba River, near Nevada City, in Nevada County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. J. Ward MacDonald, President, Northwest Power Company, Incorporated, 1250 Pine Street, Suite 100, Walnut Creek, California 94596.

i. Comment Date: February 18, 1983.

j. Description of Project: The proposed project would consist of: (1) A 5-foot-High, 60-foot-long concrete diversion structure; (2) a 12-foot-high, 18-foot-wide, and 950-foot-long existing tunnel; (3) a 10-foot-diameter, 75-foot-long penstock; (4) a powerhouse containing one generating unit with a rated capacity of 2,000 kW; and (5) a 1.5-mile-long transmission line to connect to an existing Pacific Gas and Electric Company's transmission line. The Applicant estimates the average annual energy production at 8.7 million kWh.

k. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, & D2.

11a. Type of Application: Preliminary Permit.

b. Project No. 6732–000.

c. Date filed: October 1, 1982.

d. Applicant: Modesto Irrigation District.

e. Name of Project: Big Grizzly Canyon Creek.

f. Location: On Big Grizzly Canyon Creek, within the El Dorado National Forest, near Georgetown, Placer County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. A. Lee DeLano, Modesto Irrigation District, 1231–11th Street, Modesto, California 95352.

i. Comment Date: February 14, 1983.

j. Competing Application: Project No. 6487. Date Filed: July 6, 1982.

k. Description of Project: The proposed project would consist of: (1) A 5-foot-high, 30-foot-long concrete diversion structure; (2) a 6,100-foot-long, 20-inch-diameter conduit; (3) a 1,920-foot-long, 12-inch-diameter penstock; (4) a powerhouse containing a single generating unit with an installed capacity of 952 kW; and (5) a 14,460-foot-long, 12-kV transmission line interconnecting to an existing PG&E transmission line. The Applicant estimates that the average annual energy production would be 4.1 million kWh. A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24 months during which time it would conduct technical, environmental and economic studies; and prepare an FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $25,000.

l. Purpose of Project: Project power would be utilized by the Applicant for its customers.

m. This notice also consists of the following standard paragraphs: A3, B, C.

n. Agency Comments: D2.

12a. Type of Application: Preliminary Permit.

b. Project No. 6733–000.

c. Date filed: October 1, 1982.

d. Applicant: Modesto Irrigation District.

e. Name of Project: Long Canyon Creek.

f. Location: On Long Canyon Creek, within the Eldorado National Forest, near Georgetown, Placer County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. A. Lee DeLano, Modesto Irrigation District, 1231–11th Street, Modesto, California 95352.

i. Comment Date: January 6, 1983.

j. Competing Application: Project No. 6485. Date Filed: July 6, 1982.

k. Description of Project: The proposed project would consist of: (1) A 5-foot-high, 30-foot-long concrete diversion structure; (2) an 11,700-foot-long, 36-inch-diameter conduit; (3) a 1,500-foot-long, 30-inch-diameter penstock; (4) a powerhouse containing a single generating unit with an installed capacity of 1,360 kW; and (5) a 10,500-foot-long, 12-kV transmission line interconnecting to an existing PG&E transmission line. The Applicant estimates that the average annual energy production would be 5.8 million kWh.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24 months during which time it would conduct technical, environmental and economic studies; and prepare and FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $45,000.

l. Purpose of Project: Project power would be utilized by the Applicant for its customers.

m. This notice also consists of the following standard paragraphs: A3, B, C, D2.

13a. Type of Application: Preliminary Permit.

b. Project No. 6735–000.

c. Date Filed: October 1, 1982.

d. Applicant: Modesto Irrigation District.

e. Name of Project: Duncan Canyon Creek.

f. Location: On Duncan Canyon Creek, within the El Dorado National Forest, near Georgetown, Placer County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. A. Lee DeLano, Modesto Irrigation District, 1231–11th Street, Modesto, California 95352.

i. Comment Date: January 6, 1983.

j. Competing Application: Project No. 6486 Date Filed: July 6, 1982.

k. Description of Project: The proposed project would consist of: (1) A 5-foot-high, 30-foot-long concrete diversion structure; (2) a 25,800-foot-long, 48-inch-diameter conduit; (3) a 1,600-foot-long, 36-inch-diameter penstock; (4) a powerhouse containing a single generating unit with an installed capacity of 4,760 kW; and (5) a 2,100-foot-long, 12-kV transmission line interconnecting to an existing PG&E transmission line. The Applicant estimates that the average annual energy production would be 20.6 million kWh. A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24 months during which time it would conduct technical, environmental and economic studies; and prepare an FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $45,000.

l. Purpose of Project: Project power would be utilized by the Applicant for its customers.

m. This notice also consists of the following standard paragraphs: A3, B, C.

n. Agency Comments: D2.

14a. Type of Application: Exemption from Licensing.

b. Project No: 6775–000.

c. Date Filed: October 18, 1982.

d. Applicant: The Winchester Water Control District & Elektra Power Corporation.

e. Name of Project: Winchester Dam Hydroelectric Project.

f. Location: North Umpqua River, near Winchester, Douglas County, Orgeon.

g. Filed Pursuant to: Section 408 of the Energy Security Act, 16 U.S.C. 2705 and 2708 as amended.

h. Contact Person: Mr. D. Dixon Collins, 744 San Antonio Road, Palo Alto, California 94304.

i. Comment Date: January 21, 1983.

j. Description of Project: The proposed project would consist of: (1) The Applicant's existing 17-foot-high, 450-foot-long Winchester Dam; (2) an intake structure within the northwest abutment of the dam; (3) a 25-foot-wide, 59-foot-long concrete channel; (4) a powerhouse at the foot of the dam containing two generating units with a total installed capacity of 1,300 kW; (5) a 40-foot-wide, 300-foot-long tailrace channel; and (6) a 120-foot-long transmission line to connect to an existing Pacific Power and Light Company's (PP&LC) transmission line. The estimated average annual energy generation of 8,863,000 kWh would be sold to PP&LC.

k. This notice also consists of the following standard paragraphs: A1, B, C and D3a.

15a. Type of Application: Preliminary Permit.

b. Project No.: 6829–000.

c. Date Filed: November 4, 1982.

d. Applicant: Power Resources Development Corporation.

e. Name of Project: Sandy Creek Project.

f. Location: Sandy Creek, Jefferson County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Roger P. Swanson, 49 Onondaga Street, Skaneateles, New York 13152.

i. Comment Date: February 16, 1983.

j. Description of Project: The proposed project would consist of: (1) An existing masonry gravity dam, 12 feet high and 130 feet long; (2) a reservoir with a surface area of 2.6 acres, a storage capacity of 6 acre-feet, and a normal water surface elevation of 628 m.s.l.; (3) an existing 5-foot diameter steel penstock 40 feet long; (4) a new powerhouse containing one 420 kW generating unit; (5) a new tailrace; (6) a new switchyard; (7) a new transmission line; and (8) appurtenant facilities. The Applicant estimates the annual average energy production would be 2,200,000 kWh. The existing project facilities are owned by Lawrence R. Taft.

k. Purpose of Project: Project power would be sold to Niagara Mohawk Power Corporation.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B and C.

m. Agency Comments: D2.

n. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time the Applicant would perform studies to determine the feasibility of the project. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of the studies under the permit would be $27,500.

16a. Type of Application: Exemption from licensing (5MW or less).

b. Project No.: 6830–000.

c. Date Filed: November 4, 1982.

d. Applicant: Woods Creek, Inc. and Burlington Northern Railroad Company.

e. Name of Project: Proctor Creek Hydroelectric.

f. Location: On Proctor Creek in Snohomish County, Washington; partially within Snoqualmie National Forest.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980 (16 U.S.C. 2705 and 2708 as amended).

h. Contact Person: Mr. Neil H. Macdonald, Woods Creek, Inc., 14 South Idaho Street, Seattle, Washington 98134.

i. Comment Date: January 12, 1983.

j. Competing Application: Project No. 6176. Date Filed: April 7, 1982 and Project No. 6532, filed July 16, 1982.

k. Description of Project: The proposed project would consist of: (1) A 6-foot-high timber diversion weir with crest at elevation 1606 feet; (2) a 36-inch-diameter, 15,300-foot-long steel penstock; (3) a powerhouse at elevation 320 feet containing a turbine-generating unit rated at 2.4 MW and an average annual energy output of 10.2 GWh; (4) a 75-foot-long tailrace; (5) a 1,000-foot-long transmission line; and (6) a new 500-foot-long roadway.

l. This notice also consists of the following standard paragraphs: A1, B, C, and D3a.

17a. Type of Application: Preliminary Permit.

b. Project No. 6843–000.

c. Date Filed: November 15, 1982.

d. Applicant: City of Ithaca.

e. Name of Project: 30-Foot Dam Project.

f. Location: Six Mile Creek, Tompkins County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Jay Ryder, Halliwell Associates, Inc., 865 Waterman Avenue, East Providence, Rhode Island 02914.

i. Comment Date: January 11, 1983.

j. Competing Application: Project No. 6519–000 Date Filed: July 15, 1982.

k. Description of Project: The proposed project would consist of: (1) The existing concrete arch 30-Foot Dam, 30 feet high and 65 feet long; (2) a reservoir having a surface area of 20 acres, storage capacity of 287 acre-feet, and an normal water surface elevation of 583.5 feet m.s.l.; (3) an existing 2–foot diameter pipeline 4900 feet long extending to; (4) a new powerhouse containing one new generating unit with a capacity of 810 kW; and (5) appurtenant facilities. Applicant owns all of the existing facilities. Applicant estimates that the average annual energy production would be 2,838,240 kWh.

l. Purpose of Project: All project power would be sold to New York State Electric and Gas Company.

m. This notice also consists of the following standard paragraphs: A3, B, C, D2.

n. Proposed Scope of Studies Under Permit: A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 18 months, during which time the Applicant would perform studies to determine the feasibility of the project. Depending upon the outcome of the Studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of the studies under permit would be $25,400.

18a. Type of Application: Preliminary Permit.

b. Project No: 6848–000.

c. Date Filed: November 12, 1982.

d. Applicant: Dixfield Power Company.

e. Name of Project: Dixfield.

f. Location: Near the town of Dixfield, Oxford County, Maine.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Harry S. D. Adams, Manager, Hydroelectric Resources, P.O. Box 50, One Jefferson Square, Boise, Idaho 83728.

i. Comment Date: February 22, 1983.

j. Description of Project: The proposed project would consist of: (1) A new 25-foot high, 550-foot long earthen dam with a concrete spillway section; (2) an 183-acre reservoir with a total storage capacity of 1,830 acre-feet at elevation 410 feet M.S.L.; (3) a new powerhouse built integrally with the dam containing

turbine-generators with a total rated capacity of 5,325 kW; (4) a 200-foot long tailrace channel with a tailwater elevation of 390 feet M.S.L.; (5) a 300-foot long transmission line; and (6) appurtenant facilities. The project would generate up to 32,000,000 kWh annually.

k. Purpose of Project: Energy produced at the project would be sold to the local utility.

l. This notice also consists of the following standard paragraphs: A4b, A4c, A4d, B and C.

m. Agency Comments: D2.

n. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorized construction. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, geotechnical tests including test pits and borings in the vicinity of the proposed dam, and a study of environmental impacts. Disturbed areas would be restored upon completion of geotechnical tests. Based on results of these studies, Applicant would decide whether to proceed with more detailed studies and the preparation of a application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be up to $300.000.

19a. Type of Application: Preliminary Permit.

b. Project No: 6854–000.

c. Date Filed: November 15, 1982.

d. Applicant: Brown's Industries, Inc.

e. Name of Project: Brown's Pond Hydroelectric Project.

f. Location: On Lake Fork, Payette River, in Valley County, near McCall, Idaho.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a) — 825(r).

h. Contact Person: Mr. Judd W. DeBoer, President, Brown's Industries, Inc., P.O. Box 100, Eagle, Idaho 83616; with a copy to: Mr. Eric Schultz, CH2M Hill, 700 Clearwater Lane, P.O. Box 8748, Boise, Idaho 83707.

i. Comment Date: February 22, 1983.

j. Description of Project: The proposed project would consist of: (1) The existing 1,200-acre-foot Brown's Pond created by an existing earthfill embankment, 45 feet high and 400 feet long belonging to Edward A. Cruzen, Warren H. Brown, and Jayne J. Brown; (2) a new intake structure; (3) a new penstock 42 inches in diameter and 4,250 feet in length; (4) a powerhouse to contain a reaction-type, turbine-generating unit with a rated capacity of 750 kW operating under a head of 92 feet and producing 2.5 million kWhs of energy annually; (5) a 3.5-mile-long, 12.5-kV transmission line to connect to an existing Idaho Power Company line; and (6) appurtenant facilities.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks a 36-month permit to study the feasibility of constructing and operating the project. No new roads would be required to conduct the feasibility studies.

k. Purpose of Project: The project energy would be sold to Idaho Power Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

20a. Type of Application: Preliminary Permit.

b. Project No. 6855–000.

c. Date Filed: November 15, 1982.

d. Applicant: Mendocino County.

e. Name of Project: McKee Park Water Power Project.

f. Location: On East Fork Russian River, Mendocino County, near Potter Valley, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a) — 825(r).

h. Contact Person: Mr. Albert P. Beltrami, County Administrative Officer, County of Mendocino, Courthouse — Room 110, Ukiah, California 95482.

i. Comment Date: February 22, 1983.

j. Description of Project: The proposed project would consist of: (1) An approximately 10-foot-high by 120-foot-long diversion dam; (2) a 350-foot-long flume; (3) a powerhouse with an installed capacity of 450 kW operating under a head of 17 feet and producing 2.5 million kWhs of energy annually; and (4) a 660-foot-long, 12-kV transmission line to connect to an existing Pacific Gas and Electric Company line. A preliminary permit, if issued, does not authorize construction. The Applicant seeks a 36-month permit to study the feasibility of constructing and operating the project. No new road would be required to conduct the studies.

k. Purpose of Project: The project energy is proposed to be sold to Pacific Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A4b, A4c, A4d, B, C and D2.

21a. Type of Application: Preliminary Permit.

b. Project No. 6857–000.

c. Date Filed: November 17, 1982.

d. Applicant: City of Yakima.

e. Name of Project: Yakima Diversion Dam Hydroelectric Project.

f. Location: On Naches River, in Yakima County, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Contact Person: Mr. Richard A. Zais, Jr., City Manager, City of Yakima, 129 North Second Steet, Yakima, Washington 98902, with a copy to: Mr. John Mayo, CH2M Hill, P.O. Box 9249, Yakima, Washington 98909.

i. Comment Date: February 16, 1983.

j. Description of Project: The proposed project would consist of: (1) The existing City of Yakima's 8-foot-high by 190-foot-long diversion dam; (2) a new intake structure; (3) a new forebay canal; (4) a powerhouse with an installed capacity of 650 kW; (5) a tailrace channel; (6) a 4.1 kV, 0.4-mile-long transmission line to connect to an existing Pacific Power and Light Company and; (7) a new substation. The powerhouse would operate under a net head of 6 feet with a design flow of 1,500 cfs producing 3.5 million kWhs of energy annually. A permit, if issued, does not allow construction. The Applicant seeks a 24-month permit to study the feasibility of constructing and operating the proposed project. No new road would be required to conduct the studies.

k. Purpose of Project: The project energy would be sold to a private or a public utility.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

22a. Type of Application: Preliminary Permit.

b. Project No. P–6862–000.

c. Date Filed: November 18, 1982.

d. Applicant: City of Lewiston, Maine.

e. Name of Project: Lewiston Falls.

f. Location: City of Lewiston, Androscoggin County, Maine.

g. Filed Pursuant to: FPA, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Anthony W. Buxton, Preti, Flaherty and Beliveua, One Memorial Circle, Augusta, Maine 04330.

i. Comment Date: February 11, 1983.

j. Description of Project: The proposed project would utilize water from the existing canal system currently licensed as Project No. 2302 to Union Water Power Company. The Applicant proposes to study the feasibility of 7 alternative schemes of development basically comprised of: (1) Renovation of existing unlicensed turbine-generators along the canal system with a total rated capacity of up to 13.7 MW; or (2) construction of an entirely new powerhouse containing turbine-generators with a total rated capacity of up to 30.0 MW located in the vicinity of the Applicant's existing pumping station and the east abutment of dam #4; or (3) various combinations of refurbished existing facilities and construction of new facilities with a total rated capacity of up to 34.5 MW. Energy would be transmitted to the existing Central

Maine Power Company substation located in the immediate vicinity of the project on Mill Street. The project would generate up to 147,660,000 kWh annually. The existing facilities are owned by Union Water Power Company, Central Maine Power Company, W.S. Libbey Company and the Applicant.

k. Purpose of the Project: Energy produced at the project would be sold to the local utility.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

Competing Applications

A1. Exemptions for Small Hydroelectric Power Project under 5MW Capacity—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, either a competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1982). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d).

A2. Applications for License—Anyone desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, either the competing application itself (see 18 CFR 4.33 (a) and (d), and Part 16, where applicable) or a notice of intent (see 18 CFR 4.33 (b) and (c)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or §§ 4.101 to 4.104 (1982).

A3. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for license, exemption or preliminary permit, or notices of intent to file competing applications, will be accepted for filing in response to this notice (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate). Any application for license or exemption from licensing, or notice of intent to file a license or an exemption application, must be filed in accordance with the Commission's regulations (see 18 CFR 4.30 to 4.33 or §§4.104 (1982), as appropriate).

Preliminary Permits

A4a. Existing Dam or Natural Water Features Project—Anyone desiring to file a competing application for preliminary permit for a proposed project at an existing dam or natural water feature project, must submit the competing application to the Commission on or before 30-days after the specified comment date for the particular application (see 18 CFR 4.30 to 4.33 (1982)). A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

A4b. No Existing Dam—Anyone desiring to file a competing application for preliminary permit for a proposed project where no dam exists or there are proposed to be major modifications, must submit to the Commission on or before the specified comment date for the particular application, the competing application itself, or a notice of intent to file such an application (see 18 CFR 4.30 to 4.33 (1982)).

A4c. The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before the specified comment date for the particular application. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate).

A4d. submission of a timely notice of intent to file an application for preliminary permit allows an interest person to file an acceptable competing application for preliminary permit no later than 60 days after the specified comment date for the particular application.

B. *Comments, Protests, or Motions To Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, .211, .214 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room, 208RB at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

Agency Comments

D1. License applications (5 MW or less capacity)—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, The National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D2. Preliminary permit applications—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must

also be sent to the Applicant's representatives.

D3a. Exemption applications (5 MW or less capacity)—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 408 of the Act, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substative issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. Exemption applications (Conduit)—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 30 of the Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substative issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: December 13, 1982.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-34291 Filed 12-16-82; 8:45 am]

BILLING CODE 6717-01-M

Office of the Secretary

[Docket No. EP-40-82-1]

Energy Emergency Preparedness

AGENCY: Office of Environmental Protection, Safety, and Emergency Preparedness, DOE.

ACTION: Notice of Availability of Reports.

SUMMARY: On August 3, 1982, the President signed into law the Energy Emergency Preparedness Act of 1982 (EEPA, the Act) (Pub. L. 97-229) (42 U.S.C. 6202-6245). The Act, among other provisions, adopted a series of amendments to certain available legal authorities related to the International Energy Program, the Strategic Petroleum Reserve (SPR), and other emergency preparedness programs. It further prescribed a variety of actions to be pursued to include the preparation and submission to Congress of an SPR Drawdown Plan, an SPR Drawdown and Distribution Report, a Regional Petroleum Reserve Report, a Strategic Alcohol Fuel Reserve Report, and a report setting forth Comprehensive Energy Emergency Response Procedures. The latter three reports are due to the Congress on December 31, 1982, and are being prepared.

The SPR Drawdown Plan and the SPR Drawdown and Distribution Report were due to the Congress on December 1, 1982. The purpose of this Notice of Availability is to advise that the President has approved the documents, and forwarded them to the Congress on the prescribed date. Two other items were also made available on December 1. President Reagan transmitted to Congress the finding required by section 4(a) of EEPA concerning the fill rate for the SPR. In addition, the DOE released a report entitled "Issues and Analysis on the Use of the SPR: Staff Paper on Department of Energy Approaches and Current Status of Studies" (DOE/EP-0075).

This Notice also summarizes the principal comments offered by the public in response to a Notice of Inquiry published in the **Federal Register** on September 29, 1982 (47 FR 42801). That Notice solicited advice and comment from the public with regard to each of the requirements set forth in the Act.

FOR FURTHER INFORMATION CONTACT: Ronald L. Winkler, U.S. Department of Energy, Deputy Assistant Secretary for Energy Emergencies, Forrestal Building, Room 3G-072 (Mail Stop EP-40), 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252-2443.

SUPPLEMENTARY INFORMATION: I. *Summary of the SPR Drawdown Plan.* Section 4(c) of the EEPA required that a new SPR Drawdown Plan be supplied to the Congress as a substitute for a Plan which has been in effect since November 15, 1979. Under a provision of the Act, the new Plan (Amendment No. 4) took immediate effect on the date it was transmitted to Congress.

The revised SPR Drawdown Plan (Amendment No. 4 to the SPR Plan) establishes new procedures for the drawdown, sale, and distribution of SPR oil in the event of a severe energy supply disruption, or to fullfill the obligations of the United States under the International Energy Program. The Plan is premised on the Administration's commitment to unencumbered free market adjustments to an energy shortage as the most reliable means of rapidly and efficiently distributing SPR oil in the event of an energy emergency. Accordingly, SPR oil will be sold wherever practicable to the widest range of buyers through price competitive sales.

Key features of SPR Plan Amendment No. 4 include the following departures from the Plan it supplants:

(1) References to potential Federal allocation of petroleum resources have been excised to reflect the President's rescission of petroleum allocation and price controls in January 1981, and the expiration of the Emergency Petroleum Allocation Act of 1974. This serves to buttress and underscore the Administration's belief in the reliability and efficacy of free market adjustments to energy disruptions.

(2) The sale for those quantities of SPR oil which the President releases will be made at market prices. At least 90 percent of the quantity sold in a given month will be sold on a price competitive basis, with awards going to the highest bidders.

(3) To further enhance the competitive character of SPR sales, the universe of buyers eligible to bid for SPR oil has been expanded to include all responsible buyers. The previous Plan had restricted the universe of eligible buyers to include only domestic refiners. The expansion of the buyer universe will be as large as possible to ensure the

maximum efficient distribution of SPR oil. Nonetheless, an important consideration in the process of selling SPR oil will be an assurance that sale and delivery schedules can be met, and a standard sales agreement which must be signed by all bidders will include measures which will guarantee the financial and performance responsibility of successful bidders to pay for and take timely delivery of SPR oil.

(4) As a measure of last resort, the new Plan permits the distribution of up to 10 percent of the volume of SPR oil released in any calendar month to specified buyers. Such directed distributions will be made in a manner determined by the Secretary of Energy. The price for such SPR oil will be the average price of SPR oil sold at the contemporaneous competitive sale, or at the most recent competitive sale, if no contemporaneous competitive sale is held. The Plan also provides for the temporary storage of SPR oil at SPR sites, where the Secretary of Energy deems this to be in the national interest.

II. *Summary of the SPR Drawdown and Distribution Report.* Section 6(b) of the EEPA required that an SPR Drawdown and Distribution Report which addresses the basic procedures and policies governing the use of the SPR be supplied to the Congress. The Report serves as a companion document and supplement to the SPR Drawdown Plan.

The Report underscores the Administration's policy of reliance on market mechanisms to distribute and price available petroleum supplies, including the SPR, during periods of disruption. It includes a summary of the legal authorities governing a SPR drawdown, a discussion of the objectives of SPR oil deployment, and a review of those factors which must be considered in making a SPR drawdown decision. Several illustrative scenarios are presented to indicate how various market factors may combine to influence a decision to deploy the SPR.

The Report also stresses the impracticability of establishing in advance any specific "trigger" or formula for a decision to use the SPR because of the wide and unpredictable range of conditions which may occur, and can only be known with clarity at the time of a supply disruption. The effects of such uncertainties on the decisionmaking process are addressed, as is an overview of contracting procedures for the sale of SPR oil.

Because of substantial changes in policies established by SPR Plan Amendment No. 4, current sales procedures are now being revised.

III. *Summary of Public Comments.* As a consequence of the Notice of Inquiry published in the **Federal Register** on September 29, 1982, 62 responses were received by the Department of Energy as of November 15, 1982. The majority of comments were provided by the petroleum industry and State governments, with the balance of comments having been provided by various associations and private sector groups. Most of the comments related to the Strategic Petroleum Reserve and the conditions of its use, and these are summarized below. Although a summary of comments related to the Regional Petroleum Reserve, the Strategic Alcohol Fuel Reserve, and the Comprehensive Energy Emergency Response Procedures will be provided after these reports have been transmitted to the Congress, they are occasionally referenced below to afford an improved perspective on commentor views. The principal comments provided were as follows:

(1) Among the larger companies of the oil industry, only Ashland, Arco, and Sun cited the desirability for allocation and price controls for SPR sales during severe energy emergencies. The remainder, including the American Petroleum Institute (API), which represented an industry viewpoint, were in favor of maximum competitive free market operations. All would limit buyers to bona fide refiners except Getty, which called for inclusion of "all domestic enterprises." All cited the need for flexibility in the timing and rate of a SPR drawdown except Getty, which recommended a 1 million barrel per day (MMBD) import shortfall trigger. The API also provided recommendations for greater Government and industry cooperation through the establishment of advisory groups, which may require additional antitrust and/or conflict-of-interest protection, and for the Federal preemption of State emergency plans which may conflict with those of the Federal Government.

(2) Independent refiners called for some form of special treatment in the distribution of SPR oil, including SPR oil allocations or preferred access provisions for their use. They believe that the Federal Government should preempt conflicting State emergency plans, and that the SPR buyer universe of eligible bidders should be limited to refiners alone.

(3) Distributors, marketers, and importers called for the expansion of the buyer universe to include importers, special access to SPR oil for independents and importers, the preemption of conflicting State plans, the early use of SPR oil in an energy emergency, and Government intervention to assure the equitable distribution of SPR oil to those in need.

(4) Most Government-related entities, including the States, the National Governors' Association, and the Commonwealth of Puerto Rico, supported the establishment of Regional Petroleum Reserves. Most questioned the efficacy and equity of the free market in providing energy supplies to regions and certain individuals in the event of a severe energy supply shortage. Many recommended Federal intervention of some type in the marketplace in an emergency, and called for the establishment of such procedures as the standby allocation of SPR oil and, in some cases, even rationing. Puerto Rico was especially concerned about its unique and extreme dependency on foreign imports, and asserted that reliance on a free market approach to dealing with energy emergencies would result in shortages and shutdowns in the oil and petrochemical industries of the Commonwealth.

(5) Unrestrained free-market response in the event of an energy disruption was supported by petrochemical companies, the American Iron and Steel Institute (AISI), the U.S. Chamber of Commerce, and the Industrial Oil Consumers Group (IOCG), which includes, among others, ALCOA, General Motors, Bethlehem Steel, ARMCO, and U.S. Steel. Some emphasized the advantages of maintaining Presidential flexibility in selecting the rate and timing of a SPR drawdown during a shortage. The petrochemical respondents recommended expanding the SPR buyer universe to include all domestic buyers who are willing and able to process the oil received.

(6) To help assure that SPR oil reaches the marketplace rapidly in an emergency, the IOCG, supported by AISI, recommended monthly precrisis sales of rights to SPR oil. Actual distribution would occur only after a Presidential finding of a severe supply shortage, and would include up to 10 percent of the SPR oil in storage. Only domestic refiners with operating capacity would be eligible, competitive bidding with no set-asides would prevail, and a defense override would be provided. The AISI would also set a price floor at the spot price plus a premium. In this way, the IOCG believes use of the SPR oil would result in rapid national supply enhancement, price containment, and increased public confidence in actions being undertaken by the Government to deal with a shortage.

(7) The need for allocation priorities was strongly supported by the agriculture and food industry, the Vehicular Highway Transportation Industry, and Southern California Edison (SCE). Transportation companies were concerned with the confusion that might arise from differing State energy emergency plans, while the SCE supported the need for Regional Petroleum Reserves. The food industry respondents strongly pressed the argument that the food chain's vulnerability and criticality made some sort of allocation for their purposes essential. They noted that they may be forced to seek Congressional legislation to ensure SPR supplies for the food industry if this guarantee were not forthcoming in the SPR Drawdown Plan.

(8) In general, the expansion of the buyer universe was supported by those advocating free market approaches to the sale of SPR oil, while most of those who advocated the allocation of SPR oil for specific buyers or purposes called for the restriction of buyer eligibility. Concerning the timing and drawdown rate of the SPR oil during an emergency, there appeared to be general agreement that a SPR oil drawdown should occur in the early stages of a disruption to have the maximum beneficial effect on supply enhancement, prices, and public confidence in the remedial measures being pursued by the Government and the private sector.

IV. All comments received with regard to the Notice of Inquiry from the public are available for public inspection in the DOE Reading Room, room IE–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, between 8:00 a.m and 4:00 p.m., Monday through Friday. The docket number designation is "Energy Emergency Preparedness, Docket No. EP–40–82–1"

Copies of the SPR Drawdown Plan (DOE/EP–0073) and the SPR Drawdown and Distribution Report (DOE/EP–0074), as well as the Staff Paper (DOE/EP–0075) and the Presidential Finding, may be obtained by writing or contacting the DOE office of Public Affairs, Room 1E–218 Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585; (202) 252–5568.

Dated: December 10, 1982.

William A. Vaughan,

Assistant Secretary, Environmental Protection, Safety and Emergency Preparedness.

BILLING CODE 6450–01–M

European Atomic Energy Community; Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended, and the Agreement for Cooperation Between the Government of the United States of America and the Government of Austria Concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreements involves approval of the following retransfer:

RTD/AT(EU)–59, from the Federal Republic of Germany to Austria, coated particles containing 2.80 grams of uranium, enriched to 90% in U–235, for post-irradiation examination. It is planned to return this material to the Federal Republic of Germany for disposal following conclusion of these tests.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: December 14, 1982.

George Bradley,

Principal Deputy Assistant Secretary for International Affairs.

European Atomic Energy Community; Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of proposed "subsequent arrangements" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended.

The subsequent arrangements to be carried out under the above mentioned agreement involve approval of the following sales:

Contract Number S–EU–756, to Kernforschungsanlage Julich, the Federal Republic of Germany, 25 grams of natural uranium, for use as standard reference material.

Contract Number S–EU–757, to the Central Bureau for Nuclear Measurements, Belgium, 0.002 grams of plutonium-244, 9.997 grams of plutonium-239, and 0.005 grams of uranium-233, for use as standard reference materials.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of these nuclear materials will not be inimical to the common defense and security.

These subsequent arrangements will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: December 14, 1982.

George Bradley,

Principal Deputy Assistant Secretary for International Affairs.

BILLING CODE 6450–01–M

Norway and Sweden; Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Agreements for Cooperation Between the Government of the United States of America and the Governments of Norway and Sweden Concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreements involves approval of the following retransfer:

RTD/NO (SW)–13, from Sweden to Norway, uranium samples containing 8,000 grams of uranium, enriched to an average of 3.5% in U-235, for analysis of uranium content, enrichment, and rare earth metals. After completion of analyses, the material will be disposed of as waste.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: December 14, 1982.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS–59111; TSH–FRL–2271–4]

Certain Chemicals; Premanufacture Exemption Applications

AGENCY: Environmental protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5(a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's revised statement of interim policy published in the **Federal Register** of November 7, 1980 (45 FR 74378). This notice, issued under section 5(h)(6) of TSCA, announces receipt of two applications for exemptions, provides a summary, and requests comments on the appropriateness of granting each of the exemptions.

DATE: Written comments by: December 30, 1982.

ADDRESS: Written comments, identified by the document control number "[OPTS–59111]" and the specific TME number should be sent to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Management Support Division, Environmental Protection Agency, Rm. E–401, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Margaret Stasikowski, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–216, 401 M Street SW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TME received by EPA. The complete non-confidential document is available in the Public Reading Room E–107.

TME 83–14

Close of Review Period. January 19, 1983.

Manufacturer. Confidential.

Chemical. (G) Chlorinated, oleated, hydrocarbon polymer.

Use. Confidential. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Clean out and disposal: dermal.

Environmental Release/Disposal. Release only by accidental spill. Disposal by RCRA (Resource Conservation and Recovery Act) approved methods.

TME 83–15

Close of Review Period. January 22, 1983.

Importer. Confidential.

Chemical. (G) (Substituted) anthracenylimino-(substituted) carbomonocyclic acid alkyl amine salt.

Use/Import. Confidential. The test marketing substance will be used in an open use that will release < 2 kg of the substance to the environment. Import range: Confidential.

Toxicity Data. Acute oral: > 8,000 mg/kg; Irritation: Skin—Non-irritating, Eye—Non-irritating.

Exposure. Use: dermal, a maximum of 5 workers, up to 2 hrs/da, up to 2 da/yr.

Environmental Release/Disposal. Less than 2 kg/yr released to air.

Dated: December 10, 1982.

Woodson W. Bercaw,

Acting Director, Management Support Division.

[FR Doc. 82–34287 Filed 12–16–82; 8:45 am]

BILLING CODE 6560–50–M

[A–9–FRL 2269–4]

Extension of Prevention of Significant Deterioration Permit for Arizona Public Services Company, Cholla Generating Station Unit No. 5.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Final Action on PSD Permit Extension.

SUMMARY: On April 23, 1981, the Arizona Public Services Company (APS) requested an extension until December 31, 1984 for the date by which construction must recommence for Cholla Unit No. 5 at the Cholla Generating Station, Navajo County, Arizona. In the August 11, 1982 **Federal Register** (47 FR 34854) EPA proposed to approve this extension request for Unit No. 5.

FOR FURTHER INFORMATION CONTACT: David Solomon, New Source Section (A–3–1), Air Operations Branch, Environmental Protection Agency, Region 9, 215 Fremont Street, San Francisco, CA 94105, telephone (415) 974–8240.

DATE: This action is effective February 15, 1983.

SUPPLEMENTARY INFORMATION: On February 15, 1978, the EPA granted APS a Prevention of Significant Deterioration (PSD) Approval to Construct (NSR 4–1–2, AZP 78–01) for Cholla Unit No. 5, a 350 MW coal-fired steam-electric generating unit, at the Cholla Generating Station near Joseph City, Navajo County, Arizona. The Cholla Generating Station currently consists of one (1) 115 MW unit, two (2) 250 MW units and one (1) 350 MW unit. All four units are coal fired and in operation. APS commenced construction pursuant to 40 CFR 52.21(b)(8) on Cholla No. 5 on July 31, 1978. The information provided to EPA by APS indicated that APS had entered into site-specific contracts, which could not be cancelled or modified without substantial loss, to undertake a program of construction of Cholla No. 5 to be completed within a reasonable time. APS temporarily suspended construction of Cholla No. 5 on August 2, 1978, and on December 12, 1980 a termination notice was sent to the construction contractor. On April 23, 1981 APS requested from EPA an

extension of the period of time for which construction may be discontinued. The PSD regulations provide for a period of discontinued construction not to exceed eighteen months. A longer period of time would invalidate the PSD permit. The company requested that the permit remain valid until December 31, 1984, by which time construction is scheduled to continue.

In its request to EPA the company stated that since the issuance of the PSD permit, due to unforeseen circumstances, peak load forecasts underwent some major revisions. The letter cites customer initiated reduction in electric consumption, economic uncertainties, reduced growth predictions for the state, a company initiated load management and energy conservation program and other factors relating to reduce demand. In support of it request the company noted adverse financial, environmental, scheduling and other impacts that would result from APS having to submit a new permit application for Cholla Unit No. 5.

EPA reviewed APS's request and in the August 11, 1982 **Federal Register** proposed to approve the extension provided prior to commencing construction APS (1) submits to EPA for approval a new Best Available Control Technology (BACT) analysis for Cholla No. 5 at least as stringent as the existing permit and NSPS Subpart Da, and (2) reaffirm its commitment to begin construction by December 31, 1984 should any other major source express an interest in constructing in the impact area, but would be limited by the available increment. In that **Federal Register** Notice EPA states that the unforseen reduction in consumer demand is sufficient justification for an extension of the construction discontinuance period. EPA believed it would be unwise to require the company to proceed with construction absent the need for additional electrical capacity. At the same time, EPA believes that as long as APS remains committed to proceeding with the construction, it would be wasteful of both the company's and the Agency's resources to invalidate the company's present PSD permit and require another PSD review of the project prior to December 31, 1984. This is especially true since APS must update Cholla No. 5 BACT to conform with the most current standards and will be held accountable should increment consumption in the area become a problem.

A thirty day public comment period was provided for interested parties to comment on EPA's proposed approval. Comments were specifically solicited from the State of Arizona as to the appropriateness of the proposed extension since it affects the use of the PSD increment. EPA received one comment on its proposed approval submitted by the Arizona Department of Health Services (ADHS). ADHS agreed with the extension until December 31, 1984 provided they are furnished a copy of the new BACT analysis for comment and approval, and are also furnished a copy of APS's reaffirmed commitment to begin construction by December 31, 1984.

EPA has reviewed the comments received and has determined that the extension requested by APS for construction of Unit No. 5 is acceptable. Therefore, EPA approves the extension request. Construction of APS's Cholla Unit No. 5 must commence by December 31, 1984. Furthermore, prior to commencement of construction, APS must (1) submit to EPA and ADHS for approval a new BACT analysis for Cholla No. 5 at least as stringent as the existing permit and NSPS subpart Da, and (2) reaffirm its commitment to begin construction by December 31, 1984 should any other major source express an interest in constructing in the impact area, but would be limited by the available increment.

Today's action may be considered final agency action on the extension request submitted by APS. Under Section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit on or before February 15, 1983. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Dated: December 7, 1982.

Sonia F. Crow,

Regional Administrator.

Air Quality Criteria Document for Lead; Public Meeting

AGENCY: Environmental Protection Agency.

ACTION: Notice of public meeting.

SUMMARY: A series of preliminary peer-review workshops will be held in Research Triangle Park, North Carolina on January 18–19–20, 1983 to facilitate scientific and technical evaluation of some of the working draft chapters of the Air Quality Criteria Document for Lead. These workshops, which will be held in the main auditorium of the National Institute of Environmental Health Sciences (South Campus) in Research Triangle Park, N.C., will begin at 8:30 a.m. on Tuesday, January 18, with discussions of the effects of lead on the nervous, hematopoetic, renal, and other organ systems. This workshop is expected to end at 5:30 p.m., as are all the others. The workshop convening at 8:30 a.m. on Wednesday, January 19, will cover environmental concentrations and potential exposures and the epidemiological assessment of such exposures. The workshop beginning at 8:30 a.m. on Thursday, January 20, will complete discussions of the epidemiological assessment of the effects of lead exposure and take up the subject of risk evaluation based on these assessments. The public is invited to attend as observers.

FOR FURTHER INFORMATION CONTACT: Dr. David Weil, Project Manager, Environmental Criteria and Assessment Office, MD–52, U.S. Environmental Protection Agency, Research Triangle Park, N.C. 27711, telephone: 919/541–4163.

SUPPLEMENTARY INFORMATION: The existing Air Quality Criteria Document for Lead (EPA–600/8–77–017) is being updated and revised pursuant to Sections 108 and 109 of the Clean Air Act, as amended, 42 U.S.C. §§ 7408 and 7409, and will be used as a basis for the review and, as appropriate, revision of the National Ambient Air Quality Standard (NAAQS) for lead. As part of this process, EPA is assembling a panel consisting of its consulting authors and contributors, EPA personnel and other scientific and technically qualified persons selected by EPA to discuss the proposed revisions and suggest ways of resolving outstanding issues.

Subsequent to these workshops, revisions of the draft Air Quality Criteria Document for Lead will be made and the document released as an External Review Draft sometime in March or April, 1983. This External Review draft will be available for public comment during a 90-day period immediately following that release. In order to obtain a single copy of the External Review Draft as soon as it is available, interested parties should write to ORD Publications (Lead Doc), P.O. Box 14189, Cincinnati, Ohio 45214 at this time and provide their mailing addresses. Further instructions regarding the External Review Draft and its subsequent public comment period will be forthcoming in a **Federal Register** announcement of its release.

Persons wishing to attend the upcoming January 18–20, 1983, workshops as observers should contact David Weil (see "Further Information" above). Copies of the draft chapters to be discussed will be provided at the meeting to such observers, who will have an opportunity to make brief oral statements should they so desire. Ample opportunity for public review of the revised chapters and submission of written comments will be provided when the first external review draft of the entire document is submitted for EPA Science Advisory Board review.

Detailed notes of the meeting will be kept by EPA, containing an accurate summary of key matters discussed and conclusions reached. These notes, preliminary chapter drafts discussed at the meeting, and other materials provided for or produced collectively at the meeting will be included in the docket established for the review of the lead document (Docket No. ECAO–CD–81–2). The docket is available for inspection and copying between the hours of 8:00 a.m. and 4:00 p.m. at EPA headquarters in the Central Docket Section (A–130), Gallery 1, West Tower, Waterside Mall, 401 "M" Street, SW., Washington, D.C. 20460.

Dated: December 3, 1982.

Courtney Riordan,

Acting Assistant Administrator for Research and Development (RD–672).

Science Advisory Board Executive Committee, Open Meeting

Under Pub. L. 92–463, notice if hereby given of a meeting of the Executive Committee of the Science Advisory Board. The meeting will be held January 5–6, 1983 starting at 9:15 a.m. in Room 1101 West Tower, EPA Headquarters, 401 M Street, SW, Washington, D.C.

The major purpose of the meeting is to enable the Committee to provide its advice and comment to EPA on Research Outlook 1983, the annual update of the Agency's five-year research and development plan. The Committee will also discuss plans for the review of the Agency's Program Integration Project, hear reports of standing committees of the Board, as well as other issues of member interest.

The meeting is open to the public. Any member of the public wishing to obtain information or participate should contract Terry F. Yosie (202) 382–4126 by close of business December 29, 1982.

Terry F. Yosie,

Acting Staff Director, Science Advisory Board.

Clark International Marketing S.A., a Division of Clark Equipment Co. v. Venezuelan Line; Filing of Complaint and Assignment

Notice is given that a complaint filed by Clark International Marketing S.A., a division of Clark Equipment Company against Venezuelan Line was served December 7, 1982. Complainant alleges that respondent has subjected it to an overcharge of rates for ocean transportation in violation of section 18(b)(3) of the Shipping Act, 1916.

This proceeding has been assigned to Administrative Law Judge Charles E. Morgan. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

GENERAL SERVICES ADMINISTRATION

Change in Office Names and Addresses

In furtherance of GSA's continuing program to reduce office space and to consolidate related functions, on September 28, 1982, the Transportation and Public Utilities Service (TPUS) and the Office of Personal Property (DP), Federal Property Resources Service (FPRS), were abolished. The TPUS functions of freight transportation, traffic management, travel services, fleet management, interagency motor pools and automotive contracting and the FPRS functions of personal property utilization and disposal, together with their respective staffs, were transferred to the new Office of Personal Property (OPP), General Services Administration.

These offices were moved to Crystal Mall Building 4, 1941 Jefferson Davis Highway, Arlington, Va.

The old office names and the corresponding new OPP office names and room and telephone numbers are as follows:

Old office names	New OPP office names, room and telephone numbers
Office of Transportation and Travel Management and Office of Motor Equipment.	Office of Transportation (YT), Room 412, Telephone: (703) 557-1273.
Office of Automotive Management.	Automotive Commodity Center (YA), Room 420, Telephone: (703) 557-0473.
Office of Personal Property.....	Office of Property Management (YM), Room 1019, Telephone: (703) 557-1240.

Dated: December 3, 1982.

L. L. Mitchell,

Assistant Administrator for Personal Property.

BILLING CODE 6820-AM-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Advisory Committee; Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meeting is announced:

Vaccines and Related Biological Products Advisory Committee

Date, time, and place. January 20 and 21, 9 a.m., Rm. 121, Bldg. 29, 8800 Rockville Pike, Bethesda, MD.

Type of meeting and contact person. Open public hearing, January 20, 9:05 a.m. to 10:05 a.m., unless public participation does not occur or last that long; open committee discussion, 10:05 a.m. to 11:30 a.m.; closed committee deliberations, 11:30 a.m. to 4:30 p.m.; open committee discussion, January 21, 9 a.m. to 4 p.m.; closed committee deliberations, 4 p.m. to 4:45 p.m.; Jack Gertzog, Office of Biologics, National Center for Drugs and Biologics (HFN-6), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5455.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of vaccines and related biological products intended for use in the diagnosis, prevention, or treatment of human diseases.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing on issues pending before the committee.

Open committee discussion. The committee will discuss procedures for review of the Office of Biologics research program and will review a number of Category IIIA products which are to be reclassified in accordance with the final rule published in the **Federal Register** of October 5, 1982 (47 FR 44062).

Closed committee deliberations. The committee will discuss trade secret or confidential commercial information relevant to pending license applications. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Ophthalmic Device Section of the Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel

Date, time, and place. January 27 and 28, 9 a.m., Auditorium, 200 Independence Ave. SW., Washington, DC.

Type of meeting and contact person. Open public hearing, January 27, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 1 p.m.; closed committee deliberations, 2 p.m. to 5 p.m.; open public hearing, January 28, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 1 p.m.; closed committee deliberations, 2 p.m. to 3 p.m.; open committee discussion, 3 p.m. to 5 p.m.; Dr. George C. Murray, National Center for Devices and Radiological Health (HFK–460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7940.

General function of committee. The Committee reviews and evaluates available data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation. The Committee also reviews data on new devices and makes recommendations regarding their safety and effectiveness and their suitability for marketing.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the Committee. Those desiring to make formal presentations should notify the executive secretary before January 12, 1983, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On January 27, the Committee will discuss general issues relating to approvals of premarket approval applications (PMA's) for intraocular lenses (IOL's) and specific PMA's for IOL's. If discussion of all pertinent IOL issues is not completed, discussion will be continued the following day. On January 28, the Committee may discuss PMA's or general issues relating to contact lenses or other ophthalmic products.

Closed committee deliberations. On January 27 and 28, the Committee will conduct reviews of PMA's for IOL applications. On January 28, the Committee may also discuss trade secret or confidential commercial information relevant to PMA's for contact lens products. These portions of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA), as amended by the Government in the Sunshine Act (Pub. L. 94–409), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative sessions to formulate advice and recommendations to the agency on matters that do not independently justify closing.

Dated: December 9, 1982.

Arthur Hull Hayes, Jr.,

Commissioner of Food and Drugs.

[FR Doc. 82-34093 Filed 12-16-82; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 82M-0366]

Bausch & Lomb Optics Center; Premarket Approval of SOFLENS® (Polymacon) Bifocal Contact Lens P.A.1™ Lens Series

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing approval of the supplemental application for premarket approval under the Medical Device Amendments of 1976 of the SOFLENS® (polymacon) Bifocal Contact Lens P.A.1™ Lens Series, sponsored by Bausch & Lomb Optics Center, Rochester, NY. After reviewing the recommendation of the Ophthalmic Device Section of the Ophthalmic; Ear, Nose, and Throat; and Dental Devices Panel, FDA notified the sponsor that the application was approved because the device had been shown to be safe and effective for use as recommended in the submitted labeling.

DATE: Petitions for administrative review by January 17, 1983.

ADDRESS: Requests for copies of the summary of safety and effectiveness data and petitions for administrative review may be sent to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Charles Kyper, National Center for Devices and Radiological Health (HFK-402), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910; 301-427-7445.

SUPPLEMENTARY INFORMATION: On January 26, 1982, Bausch & Lomb Optics Center, Rochester, NY, submitted to FDA a supplemental application for premarket approval of the SOFLENS® (polymacon) Bifocal Contact Lens P.A.1™ Lens Series for daily wear by not-aphakic hyperopic and myopic presbyopic persons with nondiseased eyes who require up to 2.00 diopters (D) of refractive add. The lens is available in the power range of −4.00 D to +2.00 D and provides a nominal 1.50 D of refractive add. The application was reviewed by the Ophthalmic Device Section of the Ophthalmic; Ear, Nose, and Throat; and Dental Devices Panel, an FDA advisory committee, which recommended approval of the application. On November 16, 1982, FDA approved the application by a letter to the sponsor from the Associate Director for Device Evaluation of the Office of Medical Devices.

Before enactment of the medical Device Amendments of 1976 (the amendments) (Pub. L. 94-295, 90 Stat. 539-583), soft contact lenses and solutions were regulated as new drugs. Because the amendments broadened the definition of the term "device" in section 201(h) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 321(h)), soft contact lenses and solutions are now regulated as class III devices (premarket approval). As FDA explained in a notice published in the **Federal Register** of December 16, 1977 (42 FR 63472), the amendments provide transitional provisions to ensure continuation of premarket approval requirements for class III devices formerly regulated as new drugs. Furthermore, FDA requires, as a condition to approval, that sponsors of applications and supplemental applications for premarket approval of soft contact lenses or solutions comply with the records and reports provisions of Part 310 (21 CFR Part 310), Subpart D, until these provisions are replaced by similar requirements under the amendments.

A summary of the safety and effectiveness data on which FDA's approval is based is on file with the Dockets Management Branch (address above), and is available upon request from that office. A copy of all approved final labeling is available for public inspection at the Office of Medical Devices—contact Charles Kyper (HFK-402), address above. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

The labeling of approved soft contact lenses states that the lenses are to be used only with certain solutions for disinfection and other purposes. The restrictive labeling informs new users that they must avoid using certain products, such as solutions intended for use with hard contact lenses. However, the restrictive labeling needs to be updated periodically to refer to new lens solutions that FDA approves for use with approved contact lenses. A sponsor who fails to update the restrictive labeling may violate the misbranding provisions of section 502 of the act (21 U.S.C. 352) as well as the Federal Trade Commission Act (15 U.S.C. 41-58), as amended by the Magnuson-Moss Warranty-Federal Trade Commission Improvement Act (Pub. L. 93-637). Furthermore, failure to update restrictive labeling to refer to new solutions that may be used with an approved lens may be grounds for withdrawing approval of the application for the lens under section 515(e)(1)(F) of the act (21 U.S.C. 360e(e)(1)(F)). Accordingly, whenever FDA publishes a notice in the **Federal Register** of the agency's approval of a new solution for use with an approved lens, the sponsor of the lens shall correct its labeling to refer to the new solution at the next printing or at any other time FDA prescribes by letter to the sponsor.

Opportunity for Administrative Review

Section 515(d)(3) of the act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of FDA's decision to approve this supplemental application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and FDA's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration of FDA action under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issues to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before January 17, 1983, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: December 9, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

[Docket No. 82F-0349

Calgon Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Calgon Corp. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of copolymers of diallyldimethylammonium chloride and acrylamide as a retention and/or drainage aid employed in the manufacture of paper and paperboard intended to contact food.

FOR FURTHER INFORMATION CONTACT: Vir Anand, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 3B3677) has been filed by Calgon Corp., Calgon Center, Box 1346, Pittsburgh, PA 15230, proposing that § 176.170(a)(5) (21 CFR 176.170(a)(5)) be amended by broadening the weight ratio specification of the monomers in the substance "Diallyldimethylammonium chloride with acrylamide," listed therein, from a fixed 50-50 ratio to a range of ratios where the maximum weight percent of either diallyldimethylammonium chloride or acrylamide does not exceed 85 percent.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c) (proposed December 11, 1979; 44 FR 71742).

Dated: December 12, 1982.

Sanford A. Miller,

Director, Bureau of Foods.

BILLING CODE 4160-01-M

Consumer Participation; Open Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the following consumer exchange meeting: Dallas District Office, chaired by James E. Anderson, District Director.

DATE: Tuesday, January 11, 1983, 5:30 p.m. to 7:30 p.m.

ADDRESS: Downstairs Meeting Room, Ramada Inn, Texarkana, TX.

FOR FURTHER INFORMATION CONTACT: Hazel L. Wallace, Consumer Affairs Officer, Food and Drug Administration, Dallas District, 1200 Main Tower, Rm. 1545, Dallas, TX 75202; 214-767-5433.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to encourage dialogue between consumers and FDA officials, to identify and set priorities for current and future health concerns, to enhance understanding and exchange information between local consumers and FDA's District Offices, and to contribute to the agency's policymaking decisions on vital issues.

Dated: December 10, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

[Docket No. 82F-0347]

Ciba-Geigy Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that the Ciba-Geigy Corp. has filed a petition proposing that the food additive regulations be amended to provide for the expanded use of calcium bis[monoethyl(3,5-di-*tert*-butyl-4-hydroxybenzyl)phosphonate] as an antioxidant and stabilizer for polypropylene, high-density polyethylene and other olefin polymers intended for food-contact applications without use temperature limitations.

FOR FURTHER INFORMATION CONTACT: Julia L. Ho, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St., SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 2B3668) has been filed by Ciba-Geigy Corp., Three Skyline Dr., Hawthorne, NY 10532, proposing that Part 178 (21 CFR Part 178) of the food additive regulations be amended to provide for the expanded use of calcium bis[monoethyl(3,5-di-*tert*-butyl-4-hydroxybenzyl)phosphonate] as an antioxidant and stabilizer for polypropylene, high-density polyethylene complying with § 177.1520(c) items 2.1, 2.2 and 2.3 and olefin copolymers complying with § 177.1520(c) items 3.1 and 3.2, intended for food-contact applications without use temperature limitations.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

Dated: December 6, 1982.

Sanford A. Miller,

Director, Bureau of Foods.

[FDA-225-82-8400]

Memorandum of Understanding With the Veterans Administration

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has executed a memorandum of understanding with the Veterans Administration. The purpose of the understanding is to facilitate communication and encourage effective cooperation in the area of clinical research with investigational new drugs and medical devices, including biologicals.

EFFECTIVE DATE: August 20, 1982.

FOR FURTHER INFORMATION CONTACT: Walter J. Kustka, Intergovernmental and Industry Affairs Staff (HFC-50), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1580.

SUPPLEMENTARY INFORMATION: In accordance with § 20.108(c) (21 CFR 20.108(c)) stating that all agreements and memoranda of understanding between FDA and others shall be published in the **Federal Register**, the agency is publishing the following memorandum of understanding:

Memorandum of Understanding Between Veterans Administration and the U.S. Department of Health and Human Services, Food and Drug Administration

I. Purpose

The purpose of this Memorandum of Understanding is to identify specific responsibilities of the Veterans

Administration (VA) and the Food and Drug Administration (FDA) to facilitate communication and encourage effective cooperation between the agencies in the area of clinical research with investigational new drugs and medical devices, including biologicals.

II. Background

In 1977, in response to a congressional directive, FDA developed a program to assure the quality of bioresearch data intended to support the approval of new drugs, biologicals, and medical devices. Regulations were subsequently proposed, clarifying existing regulations and elucidating the responsibilities of investigators in conducting clinical trials.

The main objectives of the clinical investigator program are to assure protection of investigational subjects; to assess through audit procedures, whether data submitted to FDA in specific studies are valid; and to determine the state of compliance of clinical investigators with the regulations. The FDA has applied the same standards of performance to Federal institutions and Government employees as has been applied to private industry.

III. FDA's Responsibilities

A. FDA will provide the VA project officer with a list of VA clinical investigators FDA intends to inspect during a given fiscal quarter.

B. FDA will notify the Medical Center Director at the VA Medical Center employing the investigator to be inspected to make suitable arrangements for the inspection.

C. Following the inspection, FDA will make available to the VA project officer and the VA Medical Center Director a copy of any correspondence to the clinical investigator and, upon request, will make available to the VA project officer specific inspection reports and bureau reviews pertaining to VA clinical investigators.

D. FDA will advise the VA, through the project officer, of any violative findings resulting from investigations into the performance of clinical investigtors employed by the VA, and will provide copies of any correspondence associated with a regulatory action.

IV. VA's Responsibilities

A. VA Central Office Research and Development will notify VA medical center directors of scheduled visits by FDA investigators in order to facilitate audits of studies of investigational new drugs and medical devices being conducted at VA facilities by VA investigators.

B. The VA will facilitate access to administrative records and patient medical records associated with any investigational new drug and device research subject to FDA regulations and will also provide copies of those records upon the official request of an FDA investigator. Access to these records is authorized under the Privacy Act of 1974 (5 U.S.C. 552a(b) (3) and (7)) and the VA confidentiality statutes (38 U.S.C. 3301(b)(3)), 38 U.S.C. 3305(b)(1)(C) and 38 U.S.C. 4132(b)(2)(B)). FDA personnel accessing drug, alcohol and sickle cell anemia treatment records subject to the confidentiality provisions of 38 U.S.C. 4132 are not permitted to redisclose patient identities, directly or indirectly, in any manner in any report or audit documents which are created in accordance with this MOU. Violations of 38 U.S.C. 4132 may result in the imposition of fines and other adverse consequences.

C. VA will review internal guidelines for clinical research with investigational new drugs and medical devices to assure that VA guidelines are consistent with FDA regulations for the conduct and reporting of investigational studies.

V. Duration of Agreement

This agreement shall become effective on the date of the last signature and shall continue in effect unless modified by mutual written consent or terminated by either party upon a ninety (90) day advance written notice to the other.

VI. Project Officers

Veterans Administration, Earl X. Freed, PH.D., Deputy Assistant Chief Medical Director for Research and Development (15A), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420, 389–2616

Food and Drug Administration, Ernest L. Brisson, Director, Bioresearch Monitoring Staff, HFC–30, Food and Drug Administration, 5600 Fishers Lane, Rockville, Maryland 20857, 443–2390

VII. Authority

The authority for this agreement is contained in 21 U.S.C. 355 (i), (j); 357 (d), (e); 360j(g); 372; 374; 379; 823(f); and 42 U.S.C. 241, 242a, 262–264; and 38 U.S.C. 4101(c)(1) implemented by 38 CFR 2.6(a)(1).

Approved and Accepted for the Veterans Administration.

By: s/ Donald L. Custis, M.D.,

Title: Chief Medical Director.

Dated: August 20, 1982.

Approved and Accepted for the Food and Drug Administration.—

By: s/ Joseph P. Hile,

Title: *Associate Commissioner for Regulatory Affairs.*

Dated: July 28, 1982.

Effective date. This Memorandum of Understanding became effective August 20, 1982.

Dated: November 23, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 82–34254 Filed 12–16–82; 8:45 am]

BILLING CODE 4160–01–M

Health Resources and Services Administration

Consultation With State and Local Officials Prior to Awarding Community Health Center Grants

AGENCY: PHS, Health Resources and Services Administration.

ACTION: Notice.

SUMMARY: Section 1923 of the Public Health Service (PHS) Act (42 U.S.C. 300y–2) requires that if a State does not apply for a Primary Care Block Grant under section 1924 of the PHS Act (42 U.S.C. 300y–3), or does not qualify for such a grant, the Secretary of Health and Human Services will use those funds not allotted to States participating in the block grant to make grants under section 330 of the PHS Act (42 U.S.C. 254c) to individual community health centers (CHCs). Section 1923 also requires that the Secretary consult with the chief executive officer of the State and with appropriate local officials before making such grants for community health centers in a State. This notice describes the manner in which the Health Resources and Services Administration (HRSA) will fulfill the requirement for consultation. In addition, it solicits comments from local officials regarding CHCs in their areas.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Bohrer, Acting Director, Division of Primary Care, Bureau of Health Care Delivery and Assistance, HRSA, Room 7A–55, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone number 301–443–2260.

DATE: To be considered as part of the review process, comments must be received 45 days prior to the month of the CHC's anniversary date (the expiration date of the CHC's previous award). However, in the case of CHCs whose grants expire within 60 days of the date of the publication of this notice, the 45 day limit will not apply. Comments regarding such CHCs should be submitted as soon as possible in order to be considered in the grant review process.

ADDRESS: Comments should be mailed to the appropriate Department of Health and Human Services Regional Office (see Appendix A).

SUPPLEMENTARY INFORMATION: In order to fulfill the statutory requirement discussed in the "Summary" section above, the Secretary, before making a grant to a CHC in a State, will consult by letter with the governor. In addition, through the publication of this notice, the Secretary invites written comments from local officials such as, but not limited to, mayors, county commissioners, State legislators, local health department officials, and health systems agencies regarding CHCs in their local areas. Comments, whether supportive or critical, should focus on the operation of and the need for the

particular CHC within the local area. Local officials who wish to discuss their written comments with HRSA staff should address such requests for consultation to the appropriate Department of Health and Human Services Regional Office (see Appendix A).

A list of all currently funded CHCs which will be considered for funding in fiscal year 1983 is attached as Appendix B to this notice. Under the CHC program, grants are generally made for a one-year period. The names, anniversary dates, and locations of the centers are listed in Appendix B. It should be noted that the name of a CHC grantee in the Department's records is not always the name by which its health delivery component is known in the community. Inclusion of CHCs' names on the attached list does not imply availability of funds for grants to such centers or imply that any of the centers will actually be funded after a review of their application and performance.

Before applying for fiscal year 1983 CHC funding, individual CHCs should solicit letters concerning comments on the center's operation from State and local officials. Any such letters should be included in their applications for continued funding.

Dated: December 10, 1982.

Robert Graham,

Administrator, Assistant Surgeon General.

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the list was last published on December 10.

Public Health Service

Food and Drug Administration
- Subject: License Applications for the Manufacture of Allergenics and Plasma Derivative Products and General Establishment Application (0910-0124)—Extension
- Respondents: Drug manufacturers of biological products
- OMB Desk Officer: Fay S. Iudicello

Health Resources and Services Administration
- Subject: Primary Care Block Grant Reporting Requirements (0915-0023)—Reinstatement
- Respondents: State governments
- OMB Desk Officer: Richard Eisinger

Alcohol, Drug Abuse, and Mental Health Administration
- Subject: Final Report Guidelines (0930-0005)—Reinstatement
- Respondents: Researchers
- OMB Desk Officer: Richard Eisinger

National Institutes of Health
- Subject: Small Business Innovative Research: Announcement and Application Instructions—NEW
- Respondents: Small business with expertise to contribute to agency research and development mission
- OMB Desk Officer: Richard Eisinger

Social Security Administration
- Subject: Letter to Employer Requesting Earnings Information for Supplemental Security Income (SSA-*LA*201 (1-83))—Revision
- Respondents: Businesses or other institutions
- OMB Desk Officer: Milo Sunderhauf

Health Care Financing Administration
- Subject: Independent Rural Health Clinic and Urban Clinic (Demonstration) Cost Report (HCFA-222)—Revision
- Respondents: Rural health clinics participating in Medicare and urban clinics participating in the Urban Clinics Demonstration
- Subject: Paperwork Associated with the Certification of Outpatient Physical Therapy and Speech Pathology Providers for Medicare and Medicaid (HCFA-1596 and R-10)—Extension/No Changes
- Respondents: Outpatient physical therapy and speech pathology providers participating in Medicare and Medicaid
- Subject: Identification of Extension Units of Outpatient Physical Therapy and Speech Pathology Providers (HCFA-381)—New
- Respondents: Outpatient physical therapy and speech pathology providers participating in Medicare and Medicaid
- OMB Desk Officer: Fay S. Iudicello

Copies of the above information collection clearance packages can be obtained by calling the HHS Reports Clearance Officer on 202-245-6511.

Written comments and recommendations for the proposed information collections should be sent directly to both the HHS Reports Clearance Officer and the appropriate OMB Desk Officer designated above at the following addresses:

J. J. Strnad, HHS Reports Clearance Officer, Hubert H. Humphrey Building, Room 524-F, Washington, D.C. 20201;

OT

OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503, Attn: (name of OMB Desk Officer).

Dated: December 10, 1982.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

BILLING CODE 4150-04-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[N-2711]

Nevada; Classification Vacated

1. Pursuant to the authority delegated by Bureau Order 701 and amendment thereto, the Bureau of Land Management multiple use classification N-2711 was published in the **Federal Register** on December 11, 1969 (FR Doc 69-14690). Pursuant to the Classification and Multiple Use Act of September 19, 1964 (43 U.S.C. 1411-18) and the 43 CFR Part 2460 regulations, this action classified approximately 1,340 acres of public land in Esmeralda County, Nevada, for multiple use management. The land was segregated from appropriation under all the public land laws except recreation and public purposes. The area was further segregated from the mining laws, but not the mineral leasing and material sale laws.

2. Pursuant to 43 CFR 2461.5(c)(2), the classification is hereby vacated.

Mount Diablo Meridian, Nevada

T. 35 N., R. 37 E.,
Sec. 16, E½, S½NW¼, SW¼.
T. 36 N., R. 38 E.,
Sec. 15, all except S½SE¼SE¼;
Sec. 16, N½NE¼NE¼;
Sec. 32, NE¼SW¼, E½NW¼SW¼, S½SW¼.

The area described above comprises approximately 1,340 acres.

3. At 9:00 a.m. on January 17, 1983, all the land except 217.5 acres (within the E½ of sec. 16, T. 35N., R. 37 E.,) patented to the City of Winnemucca under an airport conveyance is hereby open to the operation of all the public land laws, subject to valid existing rights.

4. At 9:00 a.m. on January 17, 1983, the land will also be open to the operation of the mining laws. The land remains open to the mineral leasing and material sale laws.

5. All valid applications received prior to or at 9:00 a.m. on jaunary 17, 1983, will be considered as simultaneously filed. All other applications received will be considered in the order of filing.

Inquiries concerning this land should be addressed to the Chief, Division of Operations, Bureau of Land Mangement, P.O. Box 12000, Reno, Nevada 89520.

Dated: December 8, 1982.

Edward F. Spang,

State Director, Nevada.

[FR Doc. 82-34239 Filed 12-16-82; 8:45 am]

BILLING CODE 4310-84-M

[N-1559]

Nevada; Classification Vacated

1. Pursuant to the authority delegated by Bureau Order 701 and amendments thereto, the Bureau of Land Management multiple use classification N-1559 was published in the **Federal Register** on November 13, 1968 (FR Doc 68-13599.) Pursuant to the Classification and Multiple Use Act of September 19, 1964 (43 U.S.C. 1411-18) and the 43 CFR Part 2460 regulations, this action classified approximately 3,112,986 acres of public land in Pershing and Humboldt Counties, Nevada, for multiple use management. The land was segregated from appropriation under the agricultural land laws and from sales under Section 2455 of the Revised Statutes. One area (Thomas Canyon) was further segregated from all forms of appropriation including the mining laws, but not the Recreation and Public Purposes Act (44 Stat. 741) as amended, nor the mineral leasing and material sale laws.

2. Pursuant to 43 CFR 2461.5(c)(2), the classification is hereby vacated in its entirety and described as follows:

Mount Diablo Meridian, Nevada

Commencing at northeastern corner of Pershing County common to Pershing County, Humboldt County and Lander County;
Thence northerly along the county boundary between Humboldt County and Lander County to the Humboldt River;
Thence generally along the Humboldt River westerly to about Mill City;
Thence northwesterly to a point on the Western Pacific Railroad about 4 miles west of Jungo;
Thence westerly along the railroad to a point on the Western Pacific Railroad about 10 miles west of Sulphur;
Thence northerly within R. 28 and 27 E. to a point on Pershing County line between T. 35 and 36 N.;
Thence westerly along the township line between T. 35 and 36 N. to a point on the township line between R. 23 and 24 E.;
Thence southerly along the township line between R. 23 and 24 E. to a point of intersection with the south boundary of Pershing County within T. 24 N.;
Thence easterly along the south boundary of Pershing County within T. 24 N. to its intersection with the west boundary of Lander County in T. 24 N., R. 39 E.;
Thence northeasterly along the County line between Pershing and Lander County to a point of beginning.

The area described above aggregates approximately 3,112,986 acres of of public land.

3. At 9:00 a.m. on January 17, 1983, the land is hereby open to the operation of the agricultural land laws, subject to valid existing rights.

4. At 9:00 a.m. on January 17, 1983, the following described land known as Thomas Canyon will also be open to the operation of the mining laws:

Mount Diablo Meridian, Nevada

T. 35 N., R. 38 E.,
Sec. 16, NE¼, NE¼SE¼, SW¼SW¼, S½NW¼, NW¼NW¼.

This area comprises approximately 360 acres.

5. All the land described in the classification remains open to the mineral leasing and material sale laws.

6. All valid applications received prior to or at 9:00 a.m. on January 17, 1983, will be considered as simultaneously filed. All other applications received will be considered in the order of filing.

Inquiries concerning this land should be addressed to the Chief, Division of Operations, Bureau of Land Management, P.O. Box 12000, Reno, Nevada 89520.

Edward F. Spang,

State Director, Nevada.

[FR Doc. 82-34280 Filed 12-16-82; 8:45 am]

BILLING CODE 4310-84-M

[N-1279]

Nevada; Classification Vacated

1. Pursuant to the authority delegated by Bureau Order 701 and amendments thereto, the Bureau of Land Management multiple use classification N-1279 was published in the **Federal Register** on May 25, 1968 (FR Doc 68-6235) and amended by a correction published June 28, 1968 (FR Doc 68-7620). Pursuant to the Classification and Multiple Use Act of September 19, 1964 (43 U.S.C. 1411-18) and the 43 CFR Part 2460 regulations, this action classified approximately 409,351 acres of public land in Esmeralda County, Nevada, for multiple use management. The land was segregated from appropriation under the agricultural land laws and from sale under Section 2455 of the Revised Statutes. The Lahontan Cutthroat Natural Area was further segregated from all forms of appropriation including the mining laws, but not the Recreation and Public Purposes Act (44 Stat. 741) as amended, nor the mineral leasing and material sale laws.

2. Pursuant to 43 CFR 2461.5(c)(2), the classification is hereby vacated with the exception of the following described area known as the Lahontan Cutthroat Area:

Mount Diablo Meridian, Nevada

T. 41 N., R. 26 E.,
Sec. 1, Lots 1, 2, 3, 6, SE¼NW¼, SW¼SW¼, NE¼SW¼, SW¼SE¼;

Sec. 2, Lots 1, 4, S½NE¼, SW¼NW¼, W½SW¼, SE¼;
Sec. 3, All;
Sec. 4, Lots 1, 7, 16, SE¼NE¼;
Sec. 11, All;
Sec. 12, Lots 1–4, inclusive, N½NE¼, SE¼NE¼, SE¼NW¼, W½NW¼, SW¼, SW¼SE¼.
T. 42 N., R. 26 E.,
Sec. 14, Lots 5 thru 8, inclusive, SW¼;
Sec. 15, Lots 7 thru 12, inclusive;
Sec. 22, N½, NE¼SW¼, NW¼SE¼;
Sec. 23, All;
Sec. 24, All;
Sec. 25, All;
Sec. 26, All;
Sec. 27, W½NE¼; SE¼NW¼, W½NW¼, S½;
Sec. 28, E½;
Sec. 33, E½E½;
Sec. 34, All;
Sec. 35, Lots 5 thru 20, inclusive;
Sec. 36, All.
T. 41 N., R. 27 E., unsurveyed,
Sec. 6, N½, SW¼.
T. 42 N., R. 27 E., unsurveyed,
Sec. 19, W½;
Sec. 29, W½SW¼;
Sec. 30, W½, SE¼;
Sec. 31, All;
Sec. 32, W½W½.

The area described above comprises approximately 12,316 acres. This area has high fisheries habitat value and will remain classified for a period of 5 years from the date of this publication at which time the classification will again be reviewed.

3. At 9:00 a.m. on January 17, 1983, all the land except that described in paragraph 2 above is hereby open to the operation of the agricultural land laws, subject to valid existing rights.

4. All the land described in the classification remains open to the mineral leasing and material sale laws.

5. All valid applications received prior to or at 9:00 a.m. on January 17, 1983, will be considered as simultaneously filed. All other applications received will be considered in the order of filing.

Inquiries concerning this land should be addressed to the Chief, Division of Operations, Bureau of Land Management, P.O. Box 12000, Reno, Nevada 89520.

Edward F. Spang,

State Director, Nevada.

National Park Service

Santa Monica Mountains National Recreation Area Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Santa Monica Mountains National Recreation Area Advisory Commission will be held on Tuesday, January 11, 1982 at 7:30 p.m. in the Nygreen 1 Hall at California Lutheran College, 60 West Olsen Road, Thousand Oaks, California.

The Advisory Commission was established by Pub. L. 95-625 to provide for free exchange of ideas between the National Park Service and the public to facilitate the solicitation of advice or other counsel from members of the public on problems pertinent to the National Park Service in Los Angeles and Ventura Counties.

Members of the Commission are as follows:

Dr. Norman P. Miller, Chairperson
Hon. Marvin Braude
Ms. Sarah Dixon
Ms. Margot Feuer
Dr. Henry David Gray
Mr. Edward Heidig
Mr. Frank Hendler
Ms. Mary C. Hernandez
Mr. Peter Ireland
Mr. Bob Lovellette
Ms. Susan Barr Nelson
Mr. Carey Peck
Mr. Donald Wallace

The major agenda items include the following:

Superintendent's Status Report of the SMMNRA
Election of the Vice Chairperson
Advisory Commission Recommendation on the Development Concept Plan for Cross Mountain Parks
Resource Management Committee Report and Public Hearing on Draft Natural Resource Management Plan
Other Committee Reports.

The meeting is open to the public. Any member of the public may file with the Commission a written statement concerning issues to be discussed.

Persons wishing to receive further information on this meeting or who wish to submit written statements may contact the Superintendent, Santa Monica Mountains National Recreation Area, 22900 Ventura Boulevard, Suite 140, Woodland Hills, California 91364.

Minutes of the meeting will be available for public inspection by February 28, 1983 at the above address.

Dated: December 10, 1982.

John J. Reynolds,

Acting Superintendent, Santa Monica Mountains National Recreation Area.

BILLING CODE 4310-70-M

[M-56230, M-56231 and M-56230-A]

Montana; Classification of Public Lands for State Indemnity Selection

December 7, 1982.

1. The Montana Commissioner, Department of State Lands, has filed a petition for classification and application to acquire the public lands described in paragraph 5 below, under the provisions of Sections 2275 and 2276 of the Revised Statutes, as amended (43 U.S.C. 851, 852 (1976)), in lieu of certain school lands granted to the State under the Act of February 22, 1889, 25 Stat. 676, that were encumbered by other rights or reservations before the State's title could attach. The application has been assigned serial numbers M-56230, M-56231, and M-56230-A.

2. The Bureau of Land Management will examine these lands for evidence of prior valid rights or other statutory constraints that would bar transfer. Those lands found suitable for transfer will be held to be classified on February 11, 1983. Classification is pursuant to Title 43, Code of Federal Regulations, Subpart 2400 and Section 7 of the Act of June 28, 1934.

3. Information concerning these lands and the proposed transfer to the State of Montana may be obtained from the District Manager, Miles City District Office, Bureau of Land Management P.O. Box 940, Miles City, Montana 59301, (406) 232-4331, or the District Manager, Butte District Office, Bureau of Land Management, P.O. Box 3388, Butte, Montana 59701, (406) 494-5059.

4. For a period of 60 days from the date of publication of this notice in the **Federal Register**, all persons who wish to submit comments or objections on the above classification may present their views in writing to the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107. Any adverse comments will be evaluated by the State Director who will issue a notice of determination to proceed with, modify, or cancel the action. In the absence of any action by the State Director, this classification action will become the final determination of the Department of the Interior. As provided by Title 43, Code of Federal Regulations, Subpart 2462.1, a public hearing will be scheduled by the State Director if he determines that sufficient public interest exists to warrant the time and expense of a hearing.

5. The lands included in this classification are located in Broadwater, Cascade, Meagher, Powell, Missoula, Granite, Dawson, and Big Horn counties, Montana, and are described as follows: (footnotes correspond to numbered

authorized users or applicants listed in Paragraph 6).

Application M–56230, Principal Meridian

T. 4 N., R. 2 E.,
Sec. 2, Lot 5; and [1, 2, 67]
Sec. 12, Lots 2, 3, and 6, and SW¼NW¼.[2, 66]
T. 15 N., R. 3 E.,
Sec. 24, Lot 1, E½NE¼ and NW¼SE¼.[3, 69]
T. 16 N., R. 3 E.,
Sec. 12, Lots 1 thru 16, and NE¼SW¼.[4, 70]
T. 12 N., R. 4 E.,
Sec. 24, E½NE¼.[5, 71]
T. 13 N., R. 4 E.,
Sec. 28, NW¼SW¼; and [6, 72]
Sec. 34, Lots 2, 3, and 4, and SW¼NW¼.[6, 72]
T. 15 N., R. 4 E.,
Sec. 6, Lot 5;[7, 75]
Sec. 7, Lots 5 and 11;[8, 75]
Sec. 18, Lots 5 and 17; and [73, 75]
Sec. 19, Lots, 1, 5, 6, 7, and 8.[3, 73, 74]
T. 16 N., R. 4 E.,
Sec. 30, Lots 9 thru 12; and [9, 76]
Sec. 31, Lots 12 and 13.[9, 75]
T. 10 N., R. 9 W.,
Sec. 4, Lots 3 and 4, SW¼NW¼, NE¼SE¼ and S½S½;[10, 11, 13, 76]
Sec. 9, Lot 2;[12, 13, 76]
Sec. 14, Lots 3 and 4, S½NW¼ and SW¼; and [10, 13, 14, 77]
Sec. 20, Lot 1 and NE¼NW¼.[15, 78]
T. 11 N., R. 11 W.,
Sec. 14, Lots 1 thru 4, N½ and N½S½.[16, 17, 18, 79]
T. 13 N., R. 14 W.,
Sec. 24, Lots 5, 6, and 12, and NE¼; and [19, 80]
Sec. 27, SE¼NE¼ and E½SE¼.[20, 21, 80]
T. 11 N., R. 15 W.,
Sec. 2, Lots 1 thru 4, S½N½, SW¼, and NE¼SE¼;[22, 81]
Sec. 4, Lots 1 thru 4, S½N½, N½SW¼, SW¼SW¼, and SE¼SE¼; and [22, 23, 81]
Sec. 8, E½NE¼.[22, 23, 81]
T. 11 N., R. 16 W.,
Sec. 2, S½NE¼, E½SW¼, and SE¼; and [24, 25, 26, 27, 81]
Sec. 4, SW¼.[26, 27, 28, 81]
T. 12 N., R. 16 W.,
Sec. 6, Lots 3 thru 6, 11 thru 14, E½SW¼ and S½SE¼;[29, 81]
Sec. 26, N½ and E½SE¼;[30, 31, 32, 33, 81]
Sec. 27, SW¼ and SW¼SE¼;[34]
Sec. 28, NE¼, E½NW¼, SW¼NW¼, SW¼, and S½SE¼; and [30, 35, 81]
Sec. 34, S½NW¼, SW¼, and W½SE¼.[35, 36, 37, 81]
T. 12 N., R. 17 W.,
Sec. 2, S½NW¼, NE¼SW¼, and SE¼SE¼;[38]
Sec. 4, SE¼SE¼;[38]
Sec. 8, Lot 9 and N½SE¼;[38]
Sec. 10, N½; and [39, 40]
Sec. 12, Lots 1 thru 4, W½E½ and W½.[38, 81]

Total acreage for M–56230 is approximately 7,407.92 acres.

Application M–56231, Principal Meridian

T. 15 N., R. 55 E.,
Sec. 12, W½; and [41, 42, 84]
Sec. 24, All. [41, 42, 83, 83]
T. 15 N., R. 56 E.,
Sec. 8, All; [41, 84]
Sec. 20, N½ and SE¼; [41, 42]
Sec. 28, All; and [41, 42]
Sec. 30, Lots 1 and 2, E½ and E½NW¼.[44, 88, 88]
T. 8 S., R. 40 E.,
Sec. 24, NW¼SW¼; [45, 86]
Sec. 26, N½SW¼; [46]
Sec. 27, N½SE¼; and [45, 47, 48, 86]
Sec. 34, SE¼SW¼. [45, 48, 48, 50, 85]
T. 9 S., R. 40 E.,
Sec. 3, N½SW¼ and NW¼SE¼; and [48, 49, 49, 50, 51, 86]
Sec. 4, NE¼SE¼. [51, 86]

Total acreage for M–56231 is approximately 3,583.35 acres.

Application M56230–A, Principal Meridian, Montana

T. 12 N., R. 6 W.,
Sec. 18, Lots 1, 2, and 3, N½NE¼, and E½NW¼. [52, 87, 88]
T. 16 N., R. 6 W.,
Sec. 34, N½NE¼, SW¼NE¼ and W½. [53, 54, 55, 89]
T. 12 N., R. 7 W.,
Sec. 1, Lots 1, 2, 7, 8, 9, 10, 13, and 14, W½SE¼; [56, 58, 87, 88]
Sec. 12, Lots 1, 3, and 4, W½E½. [56, 87]
Sec. 13, All. [56, 57, 87, 88]
T. 12 N., R. 11 W.,
Sec. 12, NE¼SW¼, W½SE¼ and SE¼SE¼; [59, 90]
Sec. 14, W½SW¼, SE¼SW¼, and E½SE¼; [58, 60, 64, 90]
Sec. 22, Lot 1; [62, 63, 91]
Sec. 26, N½, SW¼, and W½SE¼. [61, 66, 90]
T. 13 N., R. 14 W.,
Sec. 2, S½SE¼. [65]

Total acreage for M–56230–A is approximately 3,090.23 acres.

The total acres for all the above-described lands is approximately 14,091.50 acres.

6. The following listed corporations and individuals are holders of or applicants for leases, permits, withdrawals, and/or rights-of-way on the public lands described in paragraph 5 above:

Oil and Gas Leases

[2] Home Petroleum Corp., 2600 N. Loop W., Houston, TX 77092, M–35981.
[3] Texas Oil & Gas Corp., 2700 Fidelity Union Tower, Dallas, TX 75201, M–40110.
[4] Petrolic Corporation, P.O. Box 2248, Roswell, NM 88201, M–52535.
[5] Skyline Oil Company, 2000 University Club Bldg., Salt Lake City, UT 84111, M–37580.
[6] Cherry Creek Oil Co., P.O. Box 20522, Billings, MT 59104, M–37591.
[7] James M. Chudnow, 1516 W. Bryn Mawr, Chicago, IL 60660, M–51320.
[8] James M. Chudnow, M–51899.
[9] Tom Wheatley, Jr., 444–17th St. No. 618, Denver, CO 80202, M–51263.
[10] Sanchez-O'Brien Oil & Gas Corp., P.O. Box 2986, Laredo, TX 78041, M–45448.
[11] Thomas H. Connelly, 810 Midland Savings Bldg., Denver, CO 80202, M–45387.
[12] James M. Chudnow, 1516 W. Bryn Mawr, Chicago, IL 60660, and Laurent A. Giesbert, Cidex 47–12, 27670, Bosc-Rober-En-Roumois, France, M–54301.
[13] TXO Production Corp., Fidelity Union Tower, Dallas, TX 75201, M–39809.
[14] TXO Production Corp., M–39812.
[17] Thomas H. Connelly, M–45394.
[18] Virginia S. Rutter, P.O. Box 3186, Midland, TX 79702, M–45574.
[19] J. L. Davis, et al, 300 Blanks Bldg., Midland, TX 79701, M–46653.
[20] Virginia S. Rutter, M–46986.
[21] Credo Petroleum Corp., 1905 Sherman Street, Suite 700, Denver, CO 80203, M–55918.
[22] Leon Jeffcoat, et al, 301 S. Main, Suite C, Midland, TX 79701, M–47191.
[27] William E. Jeffers, Box 65, Artesia, NM 88210, M–55670.
[29] Pioneer Production Corp., P.O. Box 2542, Amarillo, TX 78189, M–46501.
[30] William E. Jeffers, M–47958.
[34] Thomas H. Connelly, M–48496.
[35] Credo Petroleum Corp., M–55813.

Range Improvemens and Cooperative Agreements

[69] Fence 7740 Carol Anderson & Sons.
[73] Fence 7748 Everett Carlson.
[74] Fence 7749 Elizebeth Carlson.
[76] Fence 7205 Benson Brothers.
[87] Fence Herbert E. Eskildsen.
[88] Fence Edward S. Grady.
[90] Fence C. N. Mannix Ranch.
[91] Fence Adele C. Coughlin.

7. Rights-of-way granted by the Bureau of Land Management on the above lands will transfer with the land or may be reserved to the United States. Where mineral rights will transfer to the State, existing oil and gas leases will remain in effect under the terms and conditions of the leases. This classification constitutes official notice to grazing lessees that their Bureau of Land Management leases will be terminated in whole or in part upon transfer of the land to the State of Montana. The State Commissioner has agreed to give BLM's grazing permittees a preference right for grazing privileges on lands transferred to the State. The State leases will contain the same terms and conditions included in the present leases to the fullest extent allowed by State laws. However, the State and the lessees may agree to enter into other tenure arrangements.

For a period of 45 days from the date of fist publication indicated below, persons asserting a claim to or interest in the described lands, other than holders of leases, permits or rights-of-way listed above, may file such claim with the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107, together with evidence that a copy thereof has been served on the Board of Land Commissioners, State of Montana, Capitol Building, Helena, Montana 59601.

Bill D. Noble,

Acting State Director.

BILLING CODE 4310-84-M

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development and Production Plan.

SUMMARY: Notice is hereby given that ODECO Oil and Gas Company has submitted a Development and Production Plan describing the activities it proposes to conduct on Lease OCS–G 3164, Block 135, Ship Shoal Area, offshore Louisiana.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Regional Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837–4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: December 9, 1982.

John L. Rankin,

Acting Regional Manager, Gulf of Mexico OCS Region.

INTERSTATE COMMERCE COMMISSION

Agricultural Cooperative; Notice to the Commission of Intent To Perform Interstate Transportation for Certain Nonmembers

December 14, 1982.

The following Notices were filed in accordance with section 10526 (a)(5) of the Interstate Commerce Act. These rules provide that agricultural cooperatives intending to perform nonmember, nonexempt, interstate transportation must file the Notice, Form BOP 102, with the Commission within 30 days of its annual meetings each year. Any subsequent change concerning officers, directors, and location of transportation records shall require the filing of a supplemental Notice within 30 days of such change.

The name and address of the agricultural cooperative (1) and (2), the location of the records (3), and the name and address of the person to whom inquiries and correspondence should be addressed (4), are published here for interested persons. Submission of

information which could have bearing upon the propriety of a filing should be directed to the Commission's Office of Compliance and Consumer Assistance, Washington, D.C. 20423. The Notices are in a central file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C.

Motor Carriers; Finance Applications; Decision-Notice

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1 of the Commission's Rules of Practice. See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1182.2(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 3 (202) 275-5223.

Volume OP3-MC-F-45

Decided: December 10, 1982.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

MC-F 15020, filed December 2, 1982. RICHARD L. LOFTUS, (LOFTUS) (7925 Nevada Avenue, Hammond, IN)—continuance in control—RAINBOW TRANSPORT, INC. (RAINBOW) (7925 Nevada Avenue, Hammond, IN). Representative: Carl L. Steiner, 135 South LaSalle Street, Chicago, IL. Loftus seeks authority to continue in control of Rainbow upon the institution by RAINBOW of operations in interstate or foreign commerce, as a motor common carrier. Rainbow has filed an application in No. MC-164965 seeking authority to transport, over irregular routes, general commodities (with exceptions), between points in the U.S. (except AK and HI). Loftus presently holds no permanent authority from the Commission, however, Loftus also controls through stock ownership, Sawyer Eastern Inc., a motor common carrier pursuant to Certificate issued in MC-149582 and subs thereunder.

Note.—Rainbow has filed a directly related application in its initial common carrier permanent application. This application, docketed No. MC-164965 is published in this same **Federal Register** issue.

For the following, please direct status inquiries to Team 2 at 202-275-7030.

Volume No. OP2-316

Decided: December 9, 1982.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC-F-15015, filed November 26, 1982. U.S. TRUCK LINES, INC., OF DELAWARE, (applicant), 785 Union Commerce Bldg., Cleveland, OH, 44115—continuance in control—MOTOR EXPRESS RENTALS CORPORATION, 6501 West 65th St., Chicago, IL 60638. Representative: Joel H. Steiner, 135 South LaSalle St., Chicago, IL 60603. Applicant seeks authority to continue in control of Motor Express Rentals Corporation, upon the institution by Motor Express Rentals Corporation of operations, in interstate or foreign commerce, as a motor common carrier. Applicant seeks to acquire control of said rights and property through the transaction. Applicant, a non carrier controls through stock ownership (1) Be Mac Transport Company, Inc., MC-

10872 and subs thereto, (2) Brown Express, Inc., MC–46054 and subs thereto, (3) Central Truck Lines, Inc., MC–38473 and subs thereto, (4) The Cleveland, Columbus & Cincinnati Highway, Inc., MC–3419 and MC–3420 and subs thereto, (5) Kanawha Cartage Company, MC–150148 and subs thereto, (6) Mercury Freight Lines, Inc., MC–113528 and subs thereto, (7) Motor Express Inc. of Indiana, MC–28813 and subs thereto, (8) Motor Express, Inc. (NJ), MC–1778 and subs thereto, (9) National Tank Truck Delivery, Inc., MC–116132 and subs thereto, and (10) Ohio Delivery, Inc., MC–142758 and subs thereto.

Note.—Motor Express Rentals Corporation has filed as a directly related application its initial common carrier application, docketed MC–164862, published in the same **Federal Register** issue.

BILLING CODE 7035–01–M

Motor Carriers; Finance Applications; Decision-Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 C.F.R. 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is order:

The following application are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board Number 3, Members Krock, Joyce, and Dowell.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 3, (202) 275–5223.

Volume No. OP3–MC–FC–55

MC-FC-81031. By decision of December 9, 1982, issued under 49 U.S.C. 10926 and the transfer rules at 49 C.F.R. 1181, Review Board Number 3 approved the transfer to ALASKA FREIGHT LINES, INC., Valdez. AK, of Certificate No. MC-118444 Sub 2, issued February 4, 1963, to BILL UNFER AND VIC UNFER, d.b.a. UNFER BROS., Valdez, AK, authorizing the transportation of *general commodities* (except classes A and B explosives, commodities in bulk in tank-type equipment, and household goods as defined by the Commission), between Haines and Valdez, AK, on the one hand, and, on the other, Fairbanks, AK, and points in AK on AK Hwy 2 between Fairbanks and the United States-Canada Boundary line: points on AK Hwy 4 between Valdez, AK, and the junction of AK Hwys 4 and 2 at or near Delta Junction, AK; and points within 50 miles of the described portions of said highways (including points on AK Hwy 1 between Tok Junction and Gulkana, AK). Representative: George Hillar, P.O. Box 1769, Valdez, AK 99686.

For the following, please direct status inquires to Team 5 (202) 275–7289.

Volume No. OP5–FC–282

MC-FC-81019. By decision of December 6, 1982 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1181, Review Board Number 3 approved the transfer to THE MIAMI MARGARINE COMPANY, d.b.a. DELMAR TRANSPORTATION COMPANY, of Cincinnati, OH, of Certificate No. MC 162668, issued November 2, 1982, to OLD DUTCH DISTRIBUTORS. INC., of Blasdell, NY, authorizing the transportation of *food and related products*, between Cleveland and Cincinnati, OH, Philadelphia, PA, Buffalo, NY, Detroit, MI, and points in Chautauqua County, NY, Kent County, MI, Middlesex County, NJ, Greenville County, SC, and Summit County, OH, on the one hand, and, on the other, those points in the U.S. in and east of MN, IA, KS, MO, AR, and LA. Representative: William J. Hirsch, 64 Niagara St., Buffalo, NY 14202.

[Decision Volume No. 065]

Republication of Grants of Operating Rights Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the **Federal Register**.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this **Federal Register** notice. Such pleading shall address specifically the issue(s) indicated as the purpose for republication. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

Agatha L. Mergenovich,

Secretary.

MC 144757 (Sub-19) (republication) filed March 16, 1982; published in the **Federal Register** issue of May 10, 1982; and republished this issue. Applicant: DAKOTA PACIFIC TRANSPORT, INC., 3104 East St. Patrick, Rapid City, SD 57701. Representative: J. Maurice Andren, 1734 Sheridan Lake Road, Rapid City, SD 57701, Phone: (605) 343–4036. In a decision by the Entire Commission, decided October 20, 1982, and finds that performance by applicant: To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities*, between Readers, AL, Bell and McNary, AZ, Villa Park, CA, Alfords and Gorday, GA, Bloomfield, Carbon, Evanston, Orange City, South Ottumwa, and West Grove, IA, Allendale, Beecher City, Berry, Breckenridge, Broughton, Converse Branch, Dales, Edinburg, Equality, Flanagan, Graymont, Havoline, Iola, Lakewood, Louis, Millersville, Oweneco, Rochester, Rook's Creek, Sharpsburg, and Tower Hill, IL, Ashley, Benton, Clarksville, Eddy, Foraker, Hamilton, Helmer, Hudson, Paoli, South Milford, Stoney Creek, Topeka, and Wolcottville, IN, Maxine, KS, Benton, Blackford, Camp Breckenridge, Clay, Corydon, Crayne, Crider, Deanfield, DeKoven, Dexter, Edgoten, Fluornoy, Fordsville, Fredonia, Grove Center, Hardin, Henshaw, Marion, Masonville, Mexico, Morganfield, Narrows, Oakridge, Philpot, PI Junction, Repton,

St. Vincent, Sturgis, Sullivan, Thompsonville, Uniontown, Waverly, Wheatcroft, and Whitesville, KY, Jacobs, Pauls, and Rands, ME, Alden, Arnheim, Barker Creek, Bellaire, Bendon, Central Lake, Chassel, Chief Lake, Douglas, Ellsworth, Hancock, Harpers, Interlochen, Keweenaw, Norwalk, Pilgrim, State Hospital, Rapid City, and Wealthy, MI, Empire, Mo, Abbeville, College Hill, Cumberland, Dancy, Gibbons, Hudsonville, Lamar, Lexington, Mantee, McClary, Michigan City, Owens Wells, Oxford, Reform, Sherwood, Spraggins, Taylor, Waterford, Water Valley, and Woodland, MS, Boyd, Fox, Joliet, Red Lodge, Roberts, and Sherryl Spur, MT, Caroleen and Henrietta, NC, Dunseith and Thorne, ND, Irvington, NE, Chatsworth, Winslow Junction, and Woodmansie, NJ, Mottville, Rosendale, and Skaneateles Falls, NY, Edon and Westminister, OH, Carlon, Cromby, Forest, Garrett Road, Grassland, Honey Brook, Light Street, Llanerch, Napier, Newton Square Branch, Parker Ford, Pennhurst, Spring City, Starrucca, Thompson, Transfer, and Uniondale, PA, Barton, Furman, Kline, Lena, Seigling, and Valentine, SC, Ashland City, Beech Bluff, Big Sandy, Bolivar, Chapmansboro, Congor, Deanburg, Doddsville, Fox Bluff, Hickory Point, Hickory Valley, Hornsby, Jordonia, Kenwood, Lacy, Lexington, Luray, Malesus, Medon, Middleburg, Parksburg, Ralston, Riverside, Scottsboro, Serles, Silerton, Steel City, Terrell, and Toone, TN., DeWalt, Herbert, and Smada, TX, on the one hand, and, on the other, points in the United States.

Conditions: This certificate, to the extent it authorizes the transportation of classes A and B explosives, will expire 5 years from its date of issuance. Applicant must certify to the Commission, prior to initiating operations, that all rail service has actually terminated at the involved points. Applicant must send an affidavit marked "Certification of Rail Service Termination" to the Deputy Director, Motor Section, Office of Proceedings, Interstate Commerce Commission, Washington, DC 20423.

Note.—The purpose of this republication is to delete all commodity and territorial exclusions.

MC 144757 (Sub-21) (republication), filed May 21, 1982; published in the **Federal Register** issue of September 30, 1982; and republished this issue. Applicant: DAKOTA PACIFIC TRANSPORT, INC., 3104 East St. Patrick, Rapid City, SD 57701. Representative: J. Maurice Andren, 1734 Sheridan Lake Road, Rapid City, SD 57701, Phone: (605) 343–4036. In a decision, by the Commission, Division 1, decided November 10, 1982, and finds that performance by applicant: To operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities,* between Arnaudville, Bryant, Bushville, Cecelia, Coteau Holmes, Gondron, Grand Point, Isle Labbe, Jefferson Island, Loreauville, New Iberia Conection, Oubre, Parks, Patin, Pecaniere, Summerall, Ulysse, Vida, and Walet, LA; Fairfax and Tarkio, MO; Burckley and Enumclaw, WA; Huntley and Ragan, NE; Bender, Breckenridge, Eddy, Erie, Grainville, Hunter, Lamont, Middleton, Peckham, Salt Fork Steen, and Simpson, OK; Weir City, KS; Bartlett, Cartago, Coso, Inyokern, Linnie, Little Lake, Olancha, and Sykes, CA; Corral and Hill City, ID; Cipsco Park, Carbon Lake, Leo Rock and Sand Ridge, IL; Viola, KS; Edgar, Johnson, Keuka, Newby and Oak Crest, FL; Pactolus, Stokes and Whitchard, NC; Ehrhardt, SC; Dundee, Lake Hamilton and Waverly, FL; Greenwood, Loyal and Spokeville, WI; Oakdale, MN; Pencilwood, CA; Berwick, OH; Mt. Hope, NJ; Buchanan, Carlton, Cochranton and Utica, PA; Dimeling, Madera, and Lilly, PA; Lansdown, NJ; Aqueduct, NY; Alexandria, Atlasburg, and St. Clair, PA; Kentmere, DE; La Otto and Huntertown, IN; Picatinny Arsenal, and Hudson, NJ; Whitehall, OH; Levans Mill, and Hepburnville, PA; Randolph, MA; Hughesville and Warren Glen, NJ; Gadsden, IN; Newton Highlands, MA; Toms River, NJ; East View, Elmsford, and Woodbine, NY; Cadiz, Grants, McVittys and Patterson, OH; Bowersville, Little Virginia, and New Providence, PA; Milton, DE; Olivers, San Pierre, Rupel, Tefft, Toto and Wheatfield, IN; Colon, Concord, Haires, Homer, Spring Arbor, Union City and Tekonsha, MI; Merchantville, Pavonia, Branchport, East Longbranch and Ft. Monmouth, NJ; Frankfort, Harbor, Ilion, McConnellsville, Pittsford, Cheming Junction, Elmira Heights and Horseheads, NY; Coleman, Columbiana Mine, Lisbon, De Cliff, Hepburn, Swan Creek, W. Marion, and N. Cherokee, OH; Ironsides, Glasgow and Irvona, PA; Ludlow, MA; Heilwood, PA; Honeoye Falls and Lima, NY; Ft. George G. Meade, MD; Charlettesville, Cumberland, Gem and Greenfield, IN; Garrettsville, Hiram, Leavittsburg, Phalanx, Amsterdam, Ann Mine, Bergholz, Hopedale, Industrial Mine, K & R 1 Mine, Mechanicstown, Piney Fork and Route 43 Washer, OH; Durbin, Aylesworth, Hebron, Kouts, Le Roy, North Judson and Winamac, IN; Bayard and Fairhope, OH; Betzwood, Port Indian, and Spring Mill, PA; Harding, Ontario, and Harrods, OH; Malden, NJ; Greason, Lees Cross Roads, Longsdorf, Newville, and Eclipse, PA; Arlington Siding, Fishkill Plains and Manchester Bridge, NY; Centerville and Germantown, IN; Eldorado, New Paris and Stillwater, OH; Clintondale, East Walden and Modena, NY; Amo, Clayton, Coatesville and Plainfield, IN; Cornwall, PA; Highstown, NJ; Covington, Hillsboro, Range Road and Waynetown, IN; Mt. Carmel, PA; Birmingham, Ft. Dix and Pemberton, NJ; Cunningham, Milton, and Semora, NC; Baskerville, Boydton, Buffalo Jct., Finchley, Mayo, Nelson, Union Level and Virgilina, VA; Carthage and Key West, MN; and Lake Kapowsin, WA, on the one hand, and, on the other, points in the United States.

Note.—To the extent that the certificate granted here authorizes the transportation of classes A and B explosives, it will expire 5 years from the date it is issued.

Note.—The purpose of this republication is to include "Alaska and Hawaii" in the territorial description.

MC 148036 (Sub-4) (republication) filed July 19, 1982; published in the **Federal Register** issue of August 9, 1982; and epublished this issue. Applicant: RED WING TRANSPORTATION CORPORATION, Box 87, Highway 63, Hager City, WI 54104. Representative: Harry P. Strong, Jr., 201 Security Bldg., 2395 University Avenue., St. Paul, MN 55115 (612–645–0511). In a decision, by the Commission, Review Board #3, decided October 14, 1982; and finds that performance by applicant: To operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *food and related products,* between points in the United States (except Alaska and Hawaii), and (2) *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in Minnesota and Pepin County, WI, on the one hand, and, on the other, points in the United States (except Alaska and Hawaii), will serve a useful public purpose responsive to a public demand or need. Applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements.

Note.—The purpose of this republication is to include "food and elated products in bulk" in the commodity description.

MC 161637 (republication) filed May 6, 1982; published in the **Federal Register** issue of May 26, 1982; and republished

this issue. Applicant: ROGERT SAMAC, d.b.a. S.S.T., 905 S. 209th, Seattle, WA 98148. Representative: Boyd Hartman, P.O. Box 3641, Bellevue, WA 98009, Phone: (206) 453–0312. In a decision, by the Commission, Division 1, decided October 27, 1982, and finds that performance by applicant: To operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *salt,* between points in Washington, on the one hand, and, on the other, points in Utah; (2) *building materials,* between points in Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming; and (3) *iron and steel articles,* between points in California, Idaho, Nevada Oregon, Utah, Washington, and Wyoming, will serve a useful public purpose responsive to a public demand or need. Applicant is fit, willing and able properly to perform the granted service and to conform to statutory and administrative requirements.

Note.—The purpose of this republication is to include "California, Idaho, and Montana" in Part 2 of the grant of authority.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

In the matter of Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operation (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

Agatha L. Mergenovich,

Secretary.

Note.–All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

In the matter of Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers.

The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a pubic demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements, which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

[Volume No. OP–2–316]

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following operating rights applications, filed on or after July 3, 1980, are filed in connection with pending finance applications under 49 U.S.C. 10926, 11343 or 11344. The

applications are governed by Special Rule 252 of the Commission's General Rules of Practice (49 CFR 1100.252).

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Persons submitting protests to applications filed in connection with pending finance applications are requested to indicate across the front page of all documents and letters submitted that the involved proceeding is directly related to a finance application and the finance docket number should be provided. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. However, the Commission may have modified the application to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements as to the finance application *or* to the following operating rights applications directly related thereto filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except where the application involves duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice by effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Decided: December 9, 1982.

By the Commission, Review Board Number 1, Members Parker, Chandler, and Fortier.

Agatha L. Mergenovich,

Secretary.

MC 164862, filed November 26, 1982. Applicant: MOTOR EXPRESS RENTALS CORP., 6501 West 65th St., Chicago, IL 60638. Representative: Joel H. Steiner, 135 S. LaSalle St., Suite 2106, Chicago, IL 60603, 312–236–9375. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in AZ, CO, NE, NM, OK, UT and WY.

Note.— This application is directly related to MC–F–15015, published in the same **Federal Register** issue.

[Docket No. AB–43 (Sub–95)]

Illinois Central Gulf Railroad Co.; Abandonment in Sharkey and Washington Counties, MS; Findings

The Commission has issued a certificate authorizing Illinois Central Gulf Railroad Company to abandon its 17.49 mile rail line from milepost 158.44 south of Hollandale, Washington County, MS, to mile post 175.93 north of Rolling Fork, Sharkey County, MS. The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, D.C. 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10 day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1121.38.

BILLING CODE 7035–01–M

[Ex Parte No. 387]

Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATE: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278, or Tom Smerdon, (202) 275–7277.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instance to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuses of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) nor that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfullness.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Summary of Decisions Granting in Whole or in Part Petitions for Modification

AGENCY: Mine Safety and Health Administration (MSHA), Labor.

ACTION: Notice of affirmative decisions issued by the administrators for coal mine safety and health and metal and nonmetal mine safety and health on petitions for modification of the application of mandatory safety standards.

SUMMARY: Under Section 101(c) ofthe Federal Mine Safety and Health Act of 1977, the Secretary of Labor may modify the application of a mandatory safety standard to a mine if the Secretary determines either or both of the following: That an alternative method exists at the petitioner's mine that will guarantee no less protection for the miners affected than that provided by the standard, or that the application of the standard to the petitioner's mine will result in a diminution of safety to the affected miners.

Summaries of petitions received by the Secretary appear periodically in the **Federal Register.** Final decisions on these petitions are based upon the petitioner's statement, comments and information submitted by interested persons and a field investigation of the conditions at the petitioner's mine. The Secretary has granted or partially granted the requests for modification submitted by the petitioners listed below. In some instances the decisions are conditioned upon the petitioner's compliance with stipulations stated in the decision.

FOR FURTHER INFORMATION: The petitions and copies of the final decisions are available for examination by the public in the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203.

Dated: December 1, 1982.

Patricia W. Silvey,

Acting Director, Office of Standards, Regulations and Variances.

AFFIRMATIVE DECISIONS ON PETITIONS FOR MODIFICATION

Docket No.	FR Notice	Petitioner	Regulations affected	Summary of findings
M-81-117-C	46 FR 39243	Consolidation Coal Co	30 CFR 75.1303	Underground storage of explosives in excess of forty-eight hours with specified safeguards and precautions considered acceptable alternative method. Granted with conditions.
M-81-163-C	47 FR 11344	T.A.G. Coal Co	30 CFR 75.301	Proposed airflow reduction in petitioner's mine which would maintain a safe and healthful atmosphere considered acceptable alternative method of compliance. Granted with conditions.
M-81-173-C	47 FR 7897	K. and D. Coal Co	30 CFR 75.301	Proposed airflow reduction in petitioner's mine which would maintain a safe and healthful atmosphere considered acceptable alternative method of compliance. Granted with conditions.
M-81-201-C	46 FR 58385	Peabody Coal Co	30 CFR 75.503	Metal, spring-loaded, self-locking harness snaps considered acceptable alternative to padlocks for securing battery plugs to battery-tray receptacles on permissible mobile battery-powered machines. Granted with conditions.
M-81-207-C	46 FR 52446	Peabody Coal Co	30 CFR 75.503	Bolt- and nut-locking devices considered acceptable alternative to padlocks for securing battery plugs to battery-tray receptacles on permissible mobile battery-powered machines. Granted with conditions.
M-81-211-C	46 FR 62201	Zeiger Coal Co	30 CFR 75.503	Metal, spring-loaded, self-locking harness snaps considered acceptable alternative to padlocks for securing battery plugs to battery-tray receptacles on permissible mobile battery-powered machines. Granted with conditions.
M-81-230-C	47 FR 1354	Carbon Fuel Co	30 CFR 75.305	Due to deteriorating roof conditions, petitioner's proposal to danger off specified entries in Section 7 and the return airways in their entirety and to establish specified checkpoints considered acceptable alternative method. Granted with conditions.

BILLING CODE 4510-43-M

Office of Pension and Welfare Benefit Programs

[Application Nos. D-3437, D-3438]

Proposed Exemption for Certain Transactions Involving Ely, Guess & Rudd, A Professional Corp.; Pension Plan and Ely, Guess & Rudd, A Professional Corporation Profit Sharing Plan Located in Anchorage, Alaska

AGENCY: Department of Labor.

ACTION: Notice of Proposed Exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the loan of $86,250 by the Ely, Guess & Rudd, A Professional Corporation Pension Plan (the Pension Plan) and a loan of $63,750 (collectively, the Loans) by Ely, Guess & Rudd, A Professional Corporation Profit Sharing Plan (the Profit Sharing Plan collectively, the Plans) to Ely, Guess & Rudd, A Professional Corporation (the Employer), a party in interest with respect to the Plans. The proposed exemption, if granted, would affect the participants and beneficiaries of the Plans and the Employer.

DATE: Written comments and requests for a public hearing must be received by the Department on or before January 31, 1983.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216. Attention: Application Nos. D-3437, D-3438. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Horace C. Green of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was requested in an application filed by the Employer, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Employer, a law firm in Anchorage, Alaska, established the Pension Plan as a non-contributory money purchase pension plan and the Profit Sharing Plan as a non-contributory profit sharing plan on November 24, 1970. As of January 31, 1982, the Pension Plan had total assets of $1,470,620 and approximately 53 participants and the Profit Sharing Plan had total assets of $1,086,402 and approximately 53 participants. The assets of both Plans have been commingled into one common fund. The Ely, Guess & Rudd Trust Committee (the Committee) directs all investments for

the Plans. The individuals who comprise the Committee and make the investment decisions for the Plans are all officers and/or shareholders of the Employer.

2. The applicant is requesting an exemption which would permit the Plans to make the Loans to the Employer. The proceeds from the Loans would be used to assist the Employer in financing the purchase of computer equipment and software (the Computer System) which will cost approximately $152,755. The Loans will have a floating interest rate of 1 percent over the prime rate of the Seattle First National Bank (the Bank) of Seattle, Washington, adjusted quarterly with a floor of 12½ percent and a term of 5 years. Repayment will be made in equal monthly installments of principal and interest. The Loans will be secured by certain assets (the Collateral) of the Employer. The Collateral will include the Computer System, certain office equipment and fixtures (the Office Equipment) and an unencumbered NEAX–12 EPABX telephone system (the Telephone System) of the Employer. In addition, the Employer will pledge approximately $300,000 of unencumbered accounts receivables (the Accounts Receivable) of less than 30 days as security for the Loans. an appraisal performed on May 4, 1982 by Bill Borchardt, manager of Arctic Office Machine and Furniture Company of Anchorage, Alaska, valued the Office Equipment between $35,000 and $40,000. An appraisal performed on June 24, 1982 by Richard B. Wells, a communications consultant of Executone of Alaska, Inc., Anchorage, Alaska, valued the Telephone System at between $35,000 and $40,000. The Plans will maintain perfected first security interests in the collateral through the execution and filing by the Employer of security agreements on behalf of the Plans. The Employer will incur all costs necessary to obtain and preserve the Collateral, including, but not limited to, paying all taxes, assessments, insurance premiums, etc. The Employer will warrant to own, throughout the term of the Loans, all Collateral free from any adverse claims, security interests or encumbrances. The Collateral will be fully insured and the Plans will be the named insured.

3. Peoples Bank and Trust (Peoples) of Anchorage, Alaska, an unrelated party, has agreed to serve as an independent fiduciary with respect to the transactions. It is represented that Peoples, after reviewing the proposed transactions and the accompanying security arrangement, believes that the Loans are in the best interest of the Plans, their participants and beneficiaries and protective of their rights. Peoples will monitor all terms and conditions of the Loans, enforce collection of the Loans in the event of default and will require annual appraisals of the Collateral. Peoples will require the Employer to provide additional collateral within 30 days when, in its opinion, the market value of the Collateral is less than 200 percent of the remaining unpaid balance of the Loans. In such instance, Peoples will be provided with additional collateral so that the outstanding balance of the Loans will always be 200 percent secured.

4. In summary, the applicant represents that the Loans satisfy the statutory criteria of section 408(a) of the Act because: (a) the Committee represents that the Loans would provide an investment opportunity more attractive than others currently available to the Plans; (b) Peoples, an independent fiduciary, has determined that the Loans are in the best interests of the Plans' participants and beneficiaries and protective of their rights; (c) the Loans will at all times be secured by the Accounts Receivable and the Collateral which would represent at least 200 percent of the outstanding balance of the Loans; and (d) Peoples will monitor all terms and conditions of the Loans.

Notice to Interested Persons

Notice of the proposed exemption will be provided to all of the Plans' participants and beneficiaries. Within 14 days of the publication of the notice of pendency in the **Federal Register**, notice to active employees will be given by posting the notice on the employee bulletin boards located in each of the three offices of the Employer. In addition, notice will be given to each former employee or beneficiary by mailing such notice to his last known personal residence by first class mail. Such notice will contain a copy of the notice of pendency of such exemption published in the **Federal Register** and will inform such interested persons of their right to comment or request a hearing within the period set forth in the notice of pendency of exemption.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the

exemption is granted, the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the Loans by the Plans to the Employer provided the terms and conditions of the Loans will be and remain at least as favorable to the Plans as those which the Plans could receive in an arm's-length transaction with an unrelated party. The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 9th day of December, 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

[Application No. D-300]

Proposed Exemption for Certain Transactions Involving the Vern Sims Ford Profit Sharing Plan Located in Sedro Wooley, Washington

AGENCY: Department of Labor.

ACTION: Notice of Proposed Exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt: (1) The past sales of leases (the Lease(s)) of automobiles to the Vern Sims Ford Profit Sharing Plan (the Plan) by Vern Sims Ford, Inc. (the Employer), the sponsor of the Plan; and (2) the guarantee by the Employer in the event of default of the obligations of the lessees under the Leases. The proposed exemption, if granted, would affect the Employer, the participants and beneficiaries of the Plan and other persons participating in the transactions.

EFFECTIVE DATE: This exemption is effective January 1, 1975.

DATE: Written comments and requests for a public hearing must be received by the Department on or before January 27, 1983.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application No. D-300. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Louis Campagna of the Department, telephone (202) 523-8883. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was requested in an application filed by the Employer, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Preamble

On March 23, 1979, the Department published a class exemption (Prohibited Transaction Exemption 79-9 (PTE 79-9), 44 FR 17819), which permits employee benefit plans to purchase certain notes from employers any of whose employees are covered by the plan where the employers receive such notes from their customers in the ordinary course of their business and the notes are collateralized by security agreements on the property purchased by the customers.

In PTE 79-9 the Department defined a customer note for purposes of the exemption as "* * * a two party instrument executed along with a security agreement for tangible personal property, which is accepted in connection with, and in the normal course of the employer's primary business activity as a seller of such property * * *"

The transactions which are the subject of this exemption involve automobile Leases originated by the Employer and sold to the Plan and therefore do not fall within the definition of customer notes. However, because the Leases and attendant arrangements appear to parallel those transactions contemplated by PTE 79-9 in that the Leases were accepted by the Employer in connection with, and in the normal course of, the Employer's primary business activity as a seller and lessor of automobiles and are executed along with a security agreement for the automobile, the Department has determined that relief comparable to that afforded by PTE 79-9 would be appropriate.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Plan is a profit sharing plan with approximately six participants. The trustees (the Trustees) of the Plan are employees and officers of the Employer. While the Trustees are responsible for the investments of the Plan, all investments of the Plan are subject to a majority vote of all participants and any participant may direct that his particular account may be withheld from a particular investment.

2. The Employer is an automobile dealership engaged in the leasing and retail sale of automobiles. Since November of 1973, the Employer has been selling a number of the Leases it has originated to the Plan and to other local investors including the Rainier National Bank of Sedro Wooley, Washington (the Bank). The Bank is independent of the Employer. Approximately 25% of all Leases originated by the Employer have been sold to the Plan. The terms and conditions of the Leases offered by the Employer to the Bank and other investors have been identical to those offered the Plan. The Bank represents that it has actively solicited the purchase of the Leases from the Employer as such Leases have provided the Bank with an average rate of return of 2.25% above its prime interest rate. The lessees under the Leases sold to the Plan have all been unrelated to the Employer.

3. The applicant represents that the sale of a Lease is essentially the sale of

an automobile subject to a Lease whereby in exchange for the purchase price of the Lease, the purchaser, in this case the Plan, receives from the Employer title and ownership of the automobile, a promissory note (the Note) based on the price of the Lease and an assignment of rentals under the Lease. The price of the Lease is based upon the wholesale cost (the Principal Amount) of the automobile to the Employer plus the residual value (the Residual Value) of the automobile at the end of the Lease. The Residual Value is calculated at the inception of the Lease based upon the "blue book" value of the automobile at the expiration of the Lease. The duration of the Leases sold to the Plan by the Employer ranged from twelve to forty-eight months, with the average being thirty-six months. The lessee under the Lease typically made monthly rental payments which varied between 1.67% and 2% of the Principal Amount of the Lease. In the case of a Lease sold by the Employer to the Plan, the Employer collected the rentals from the lessee each month and remitted the rentals immediately to the Plan. The Employer retained none of the rentals as fees for this service. The monthly rentals thus received by the Plan were applied to the monthy payment due by the Employer and the Note. If no rental payment was received by the lessee under the Lease, the Employer would still remit its monthly payment on the Note. The applicant represents that the Note served to obtain the Employer as guarantor of the rentals to be received under the Lease. Further, the Employer guaranteed the immediate repayment of the balance due on the Lease in the event of a default. The rental payments essentially repaid the Plan the Principal Amount of the Lease plus a specified rate of return. At the termination of the Lease, possession of the automobile reverted to the Plan at which time the Plan had the option of selling the automobile to the lessee at its Residual Value or to the Employer at the Residual Value.

4. The Plan, through the Employer's credit department, investigated the credit rating of all lessees under Leases which have been sold to the plan. The applicant represents that customers with good credit standing, records of repayment and long satisfactory association with the Employer were preferred and chosen as lessees under Leases which were sold to the Plan. In the event of a default under a Lease the Plan at its option could: (1) Terminate the Lease; (2) collect on the Employer's guarantee of the immediate repayment of the balance owing the Plan by the lessee under the Lease; and (3) instruct the Employer, at the Employer's expense, to repossess the automobile subject to the Lease and return it to the Plan. The Employer represents that the Plan has experienced no defaults on any Lease sold to the Plan by the Employer. Full insurance coverage was required to be maintained by the lessee on an automobile under a Lease. If the lessee did not maintain such insurance, the Plan could declare a default, so notify the Employer and the Employer would repossess the automobile.

5. The applicant represents that no more than ½ of 1% of the total assets of the Plan, at any one time, have been invested in a Lease to any one lessee. The applicant also represents that, at times, the total percentage of Plan assets invested in the Leases exceeded 50%. The Department proposes that this exemption extend only to those past sales of Leases to the Plan by the Employer whereby as a result of such sales the Plan had 50% or less of its assets invested in such Leases.[1] Whereby as the result of the past sales of the Leases the Plan had in excess of 50% of its assets invested in the Leases, the Employer represents that it will pay all applicable excise taxes on the excess within 90 days of the grant of this exemption.

6. The applicant represents that the past sales of Leases by the Employer to the Plan satisfied the statutory criteria of section 408(a) of the Act because: (1) The Leases were originated by the Employer in the ordinary course of its business; (2) the terms and conditions of the Leases sold to the Plan were identical to those of Leases sold to the Bank, an unrelated party; (3) the employer guaranteed the repayment of the balance remaining on the Leases in the event of default by a lessee; (4) the terms of the Leases were for relatively short periods of time; (5) insurance against any loss or damage had been procured and maintained by the lessee as a condition of the Lease; (6) the Plan has experienced no defaults with respect to the Leases sold the Plan by the Employer; (7) a relatively small percentage of the Leases originated by the Employer were sold to the Plan and no more than ½ of 1% of the assets of the Plan were, at any one time, invested in a Lease with any one lessee; and (8) the sale of the Leases to the Plan parallel those transactions contemplated by PTE 79–9.

[1] This restriction parallels Section II, D of PTE 79–9 which states that the acquisition of a customer note from the employer shall not cause a plan to hold more than 50% of the current value of plan assets in customer notes of the employer.

Notice to Interested Persons

Notice will be provided to all participants and beneficiaries of the Plan within 10 days after the publication of the notice of pendency in the **Federal Register**. Notice will be by mailing or posting at locations within the premises of the Employer which are customarily used for employee notices. Notice will consist of a copy of the notice of pendency as published in the **Federal Register** and a statement informing interested persons of their right to comment or request a hearing on the proposed exemption within the period set forth in the notice of pendency.

General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of

whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writers's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to: (1) The past sales of the Leases by the Employer to the Plan whereby as a result of such sales the Plan had 50% or less of its assets invested in such Leases, provided that the sales of the Leases and the terms and conditions of the Leases were at least as favorable to the Plan as arms-length transactions with unrelated parties; and (2) the guarantee of the Employer of the obligations of the lessees under the Leases in the event of a default by the lessees under the Leases.

The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions that are the subject of this exemption.

Signed at Washington, D.C., this 9th day of December 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in. Each entry will contain the following information:

The Agency of the Department issuing this form.
The title of the form.
The Agency form number, if applicable.
How often the form must be filled out.
Who will be required to or asked to report.
Whether small business or organizations are affected.
The standard industrial classification (SIC) codes, referring to specific respondent groups that are affected.
An estimate of the number of responses.
An estimate of the total number of hours needed to fill out the form.
The number of forms in the request for approval.
An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202–523–6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW, Room S–5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Norman Frumkin, Telephone 202–395–6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

New

Employment Standards Administration
Overpayment Recovery Questionnaire
ESA/BL CM–1167
On occasion
Federal Black Lung recipients
2200 responses; 733 hours; one form.

The information is needed to determine whether or not an overpaid individual is able to pay a claim for recovery of an overpayment, consideration must be given to the individual's present and potential income, possible concealment or improper transfer of assets, and assets of the individual which may be available in enforced collection proceedings.

Extension (Burden Change)

Bureau of Labor Statistics
Hours at Work Survey
BLS 2000N, 2000P
Annual
Businesses or other institutions
Small businesses
SIC: All except 001 and 002
2925 responses; 731 hours; two forms.

Hours at work information is needed to more correctly measure labor input for productivity measures. Presently, labor input is measured using hours paid. The collection of information on-hours at work began in March 1982 and must be collected annually. Ratios of hours at work to hours paid will be calculated to adjust present measures.

Signed in Washington, D.C., this 14th day of December, 1982.

Paul E. Larson,

Departmental Clearance Officer.

BILLING CODE 4510-27; 4510-24-M

NUCLEAR REGULATORY COMMISSION

Applications for Licenses To Export Nuclear Facilities or Materials

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application," please take notice that the Nuclear Regulatory Commission has received the following applications for export licenses. A copy of each application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, NW., Washington, D.C.

A request for a hearing or a petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register.** Any

request for hearing or petition for leave to intervene shall be served by the requester or petitioner upon the applicant, the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, the Secretary, U.S. Nuclear Regulatory Commission and the Executive Secretary, Department of State, Washington, D.C. 20520.

In its review of applications for licenses to export production or utilization facilities, special nuclear material or source material, noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility or material to be exported. The table below lists all new major applications.

Dated this 13th day of November, at Bethesda, Md.

For the Nuclear Regulatory Commission.

James V. Zimmerman,

Assistant Director, Export/Import and International Safeguards, Office of International Programs.

FEDERAL REGISTER (EXPORT)

Name of applicant, date of application, date received, and application number	Material type	Material in kilograms		End-use	Country of destination
		Total element	Total isotope

BILLING CODE 7590-01

Applications for Licenses To Import Nuclear Materials

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application," notice is made that the Nuclear Regulatory Commission has received an application from Battelle Columbus Laboratories, Columbus, Ohio, for a license authorizing the import of 3.298 kilograms of uranium and .7 gram of plutonium, contained in irradiated fuel elements, from McMaster University, Hamilton, Ontario, for reprocessing at Department of Energy facilities at Scoville, Idaho. A copy of the application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, NW., Washington, D.C.

Battelle Columbus Laboratories requested that the normal 30-day period between the notification of the receipt of an application in the **Federal Register** and the issuance of the license be waived in this instance in order that the shipment might be completed in December, 1982. The firm's request was based on (1) the contract between McMaster University and the Department of Energy for the return and reprocessing of these fuel elements expires December 31, 1982; (2) the shipping casks to be used for this shipment are available for only a limited time period; (3) the uranium which would be recovered is required to meet a contractual timetable for feed material for use in procurement of new fuel to which the Canadians are committed and (4) the shipper desires to minimize anticipated travel problems and delays due to severe weather conditions during the winter months.

This request is essentially the same as many previous requests to import irradiated fuel from Canada, as well as from a number of other foreign countries, which have taken place over a considerable period of time without incident. This import, in the judgment of the NRC staff, poses no unreasonable risk to the public health and safety and will not be inimical to the common defense and security. In light of the urgency expressed by the applicant and for the reasons given above, under the provisions of 10 CFR 110.10(a), this license application was exempted from the normal 30-day waiting period between the date of notice of receipt in the **Federal Register** and issuance of the license and the license has been granted to Battelle Columbus Laboratories.

Dated this 13th day of December, at Bethesda, Md.

For the Nuclear Regulatory Commission.

James V. Zimmerman,

Assistant Director, Export/Import and International Safeguards Office of International Programs.

[FR Doc. 82-34311 Filed 12-16-82; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-282 and 50-306]

Northern States Power Co. (Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2); Exemption

I

The Northern States Power Company (the licensee) is the holder of Facility Operating License Nos. DPR-42 and DPR-60 which authorize operation of the Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2. These licenses provide, among other things, that they are subject to all rules, regulations and Orders of the Commission now or hereafter in effect.

The facility comprises two pressurized water reactors at the licensee's site located in Goodhue, Minnesota.

II

On Novembr 19, 1980, the Commission published a revised Section 10 CFR 50.48 and a new Appendix R to 10 CFR 50 regarding fire protection features of nuclear power plants (45 FR 76602). The revised § 50.48 and Appendix R became effective on February 17, 1981. Section 50.48(c) established the schedules for satisfying the provisions of Appendix R. Section III of Appendix R contains fifteen subsections, lettered A through O, each of which specifies requirements for a particular aspect of the fire protection features at a nuclear power plant. One of these fifteen subsections, III.J, is the subject of this exemption request.

Subsection III.J specifies that emergency lighting units with at least an 8-hour battery power supply shall be provided in all areas needed for operation of safe shutdown equipment and in access and egress routes thereto.

Section 50.48(c) requires completion of all modifications to meet the provisions of Appendix R within a specified time from the effective date of this fire protection rule, February 17, 1981, except for modifications to provide alternative safe shutdown capability.

By letters dated November 16 and December 1, 1981, Northern States Power Company requested exemptions

from 10 CFR 50.48(c) with respect to the requirements of Subsection III.J of Appendix R as follows:

Extend the implementation date in paragraph (c)(3) for modifications required by Appendix R Subsection III.J that do not require prior NRC approval but require plant shutdown, from the first refueling shutdown or extended outage commencing after 180 days from the effective date of Appendix R for each unit to the refueling outage scheduled for autumn of 1982 for Unit 1 and scheduled for spring of 1982 for Unit 2.

Section 50.48(c)(3) specifies the installation schedule of those fire protection features such as emergency lighting (III.J) that require a plant shutdown to complete the installation. The installation schedule in § 50.48(c)(3) requires the completion of the installation of such fire protection features during the first refueling outage commencing after 180 days from the effective date of Appendix R (February 17, 1981). Hence, § 350.48(c)(3) requires the licensee to complete the installation of the emergency lighting (III.J) during the first refueling outage commencing after August 17, 1981 for each unit.

On May 4, 1982, the Commission granted Northern States Power Company an extension from the schedular requirements of 10 CFR 50.48(c)(3) for Unit 1 until the end of autum 1982 outage based on facts that had been presented by that date. An exemption was not granted for Unit 2 since the licensee's commitment date by which installation would be completed complied with the schedule specified in § 50.48(c)(3).

By letter dated May 20, 1982, the licensee requested further schedular relief from 10 CFR 50.48(c) in regard to the installation of emergency lighting. Specifically, the request would extend the deadline for completing the installation for both units to the end of December 1982.

The licensee by the same letter also stated that a plant shutdown is no longer considered necessary at either unit in order to implement the Subsection III.J requirements. Because of these changed circumstances, the exemption from the schedular requirements of 10 CFR 50.48(c)(3) granted on May 4, 1982 for Unit 1 is no longer valid. Under conditions described by the licensee's letter dated May 20, 1982 the schedular requirement for Subsection III.J is established in 10 CFR 50.48(c)(2). This subsection requires that the installation of emergency lighting be completed by November 17, 1981, nine months from the effective date of the rule.

The staff informed the licensee by letter dated July 29, 1982 that in order to consider the exemption request, the licensee would be required to submit a complete and detailed chronology of the efforts to implement Subsection III.J commencing with the publication of the fire protection rule on November 19, 1980 to the present and justify in detail the proposed schedule to complete the installation for both units by January 1, 1983. The licensee by letter dated August 23, 1982 provided additional information supporting the exemption request including a detailed chronology of the efforts to implement Subsection III.J.

III

The licensee stated that for several months following the publication of Appendix R the licensee believed that the existing emergency lighting system, with minor modifications, would satisfy the requirements of Subsection III.J The existing power source for emergency lighting is automatically transferred to the DC power system which provides power well in excess of the required eight-hour capability. In addition the existing emergency lighting system had been reviewed and found acceptable by the NRC staff based on established positions prior to the issuance of Appendix R. It was not until July 13, 1981 that additional information related to the staff's interpretation of the requirements of Subsection III.J was made known to the licensee. Specifically, using a central power source was found unacceptable unless it could be shown that a postulated fire in one area of the plant could not cause the loss of lighting in another area.[1] This interpretation of Subsection III.J requirements makes it impractical for any permanently wired emergency lighting system, such as that which now exists at the Prairie Island Nuclear Generating Plant, to meet the requirements of the regulation. Efforts to comply with Subsection III.J were redirected on July 13, 1981 to procure and install satisfactory local battery powered lighting units.

When the licensee prepared the exemption requested by letter dated November 16, 1981, the safe shutdown analysis had not progressed sufficiently to identify the exact locations for operation of safe shutdown equipment under Subsection III.G of Appendix R. It appeared at this point in the design that several areas requiring emergency lighting would be in parts of the plant where radiation levels made it imprudent to perform the modifications during plant operations. One this basis the licensee requested an exemption from the schedular requirements of 10 CFR 50.48(c)(3). It was not until May 1982 that the safe shutdown analysis of Subsection III.G was completed to a point where all areas of the plant needing emergency lighting could be identified. The plant staff determined that emergency lighting could be installed in all of these identified areas during plant operation without disrupting the operation of critical plant equipment or exposing plant personnel to excessive radiation levels. Once these circumstances were known, the licensee, by letter dated May 20, 1982, submitted a second request for a schedule exemption, asking for an extension in the time allowed for completing Subsection III.J modification to January 1, 1983 for both units. As noted above, the appropriate section for the exemption was now stated to be C–2 rather than C–3.

Delays developed when the licensee sought to purchase seismically qualified equipment—a design feature that exceeds the requirements of Subsection III.J. This delay occurred when the foreign battery supplier was no longer a reliable source which lead to further delays in the licensee's efforts to purchase suitable lighting units. The purchasing of the lighting units also thwarted by a contract dispute between the lighting unit vendor and the manufacturer of the batteries. In addition, the engineering analysis for emergency lighting resulted in unforeseen delays associated with properly identifying all of the areas where lighting units would be needed until the safe shutdown analysis under Subsection III was nearly completed, which affected the total number of lighting units needed to be purchased.

Based on our consideration of these circumstances, we conclude that the licensee made proper application of available resources in a best effort to provide seismically qualified lighting. However, the time allowed proved to be insufficient to permit full implementation. In addition, we have determined that as an interim compensatory measure the existing emergency lighting, although not fully in compliance with III. J, and in conjunction with the portable lighting units that are available for use by the Operators and members of the fire brigade can provide emergency lighting as needed until the installation of the III. J. units is achieved. On this basis the staff has judged that the request for exemption to allow additional time to complete the installation of the

[1] This finding was contained in our letter to the licensee in regard to an exemption request for the Monticello Plant dated July 13, 1982.

emergency lighting for both units until January 1, 1983 should be granted.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will endanger life or property or the common defense and security and is otherwise in the public interest and hereby grants the following exemptions with respect to the requirements of Subsection III.J of Appendix R. to 10 CFR Part 50:

Extend the implementation date in paragraph (c)(2) for installation of modifications required by Appendix R, Subsection III.J for both units, that do not require prior NRC approval or plant shutdown, from nine months after February 17, 1981 to January 1, 1983.

The NRC staff had determined that the granting of this Exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action

Dated at Bethesda, Md., this 8th day of December 1982.

BILLING CODE 7590-01-M

[Docket No. 50-346]

The Toledo Edison Co. and the Cleveland Electric Illuminating Co.; Issuance of Amendment to Facility Operating License

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 51 to Facility Operating License No. NPF-3, issued to The Toledo Edison Company and The Cleveland Electric Illuminating Company (the licensees), which revised Technical Specifications (TSs) for operation of the Davis-Besse Nuclear Power Station, Unit No. 1 (the facility) located in Ottawa County, Ohio. The amendment is effective as of its date of issuance.

This amendment adds TSs for a Systems Integrity Measurements Program and an Improved Iodine Monitoring Program.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated November 25, 1981, (2) Amendment No. 51 to License No. NPF-3, and (3) the Commission's letter to The Toledo Edison Company dated December 10, 1982. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the William Carlson Library, University of Toledo, 2801 Bancroft Avenue, Toledo, Ohio 43606. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 10th day of December 1982.

[Docket No. 50-281]

Virginia Electric and Power Co.; Granting of Relief From ASME Code Requirements, Inservice Inspection Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components," to Virginia Electric and Power Company (the licensee) for the Surry Power Station, Unit No. 2 located in Surry County, Virginia. The ASME Code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50.

This relief allows the licensee to replace 1½ inch drain valves upstream of the main steam trip valve without performing hydrostatic test for the entire steam generators and a considerable portion of the main steam piping. A leakage test will bbe performed instead. This relief is the same as that provided in NRC letter dated October 1, 1982, for Unit 1 and the Evaluation of Relief Request with that letter applies to this relief request. In this instance, two steam generators are affected instead of one previously.

The request for this granting of relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the Evaluation of Relief Request dated October 1, 1982.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the request for relief dated December 9, 1982; (2) the letter to the licensee dated December 9, 1982; and (3) the letter to the licensee dated October 1, 1982 transmitting the Commission's related Evaluation of Relief Request. These items are

available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Swem Library, Collee of William and Mary, Williamsburg, Virginia 23185. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 10th day of December, 1982.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[File No. 81-676]

Drexel Burnham Lambert Group, Inc.; Application and Opportunity for Hearing

December 7, 1982.

Notice is hereby given that The Drexel Burnham Lambert Group, Inc. ("Applicant") has filed an application pursuant to Section 12(h) of the Securities Exchange Act of 1934, as amended, (the "1934 Act"), for an order exempting Applicant from the registration provisions of Section 12(g) of the 1934 Act.

The Applicant states, in part:

1. In the absence of an exemption, Applicant would be required to register its securities under Section 12(g) of the 1934 Act, and would be required to comply with all reporting requirements thereunder.

2. Applicant believes that the exemptive order it requests is appropriate in view of the fact that there are no public stockholders of the Applicant and that there is no trading interest in its stock.

For a more detailed statement of the information presented all persons are referred to said application which is on file in the Office of the Commission at the Public Reference Room, 450 Fifth Street, N.W., Washington, DC 20549.

Notice is further given that any interested person not later than January 3, 1983 may submit to the Commission in writing his views on any substantial facts bearing on the application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, DC 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert.

Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 12882; 812-5305]

Paine Webber RMA Money Fund, Inc.; Application

December 8, 1982.

In the matter of Paine Webber RMA Money Fund, Inc.; 140 Broadway, New York, N.Y. 10005, (812-5305), filing of application.

Notice is hereby given that Paine Webber RMA Money Fund, Inc. ("Applicant"), registered under the Investment Company Act of 1940 (the "Act") as an open-end, diversified management investment company, filed an application on September 3, 1982, and amendments thereto on November 19 and December 2, 1982, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting the Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder, to the extent necessary to permit the Applicant to compute its net asset value per share using the amortized cost method of valuation. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below. Such persons are also referred to the Act for the complete text of those provisions thereof for which an exemption is being sought.

The application states that Applicant's shares will be offered only to customers of the Paine Webber Resource Management Account Program ("RMA"), an integrated financial services programs. Applicant's investment objective is to provide investors with the maximum current income consistent with liquidity and preservation of capital. Applicant states in the application that it provides the opportunity for RMA customers to invest in one of two series, each of which is a professionally managed, diversified portfolio of short-term, high qualify obligations, and further that it has authority to create and offer shares in additional portfolios from time to time in the future. The Money Market Portfolio will invest in U.S. Government securities; obligations of U.S. banks, including certificates of deposit and bankers' acceptances; commercial paper, including variable rate master notes; and repurchase agreements on such instruments with financial institutions believed by Applicant's board of directors to present minimal credit risks. The U.S. Government Portfolio will invest in government securities which are issued or guaranteed by the U.S. Government, various agencies and instrumentalities of the U.S. Government, certain interests in the foregoing, and repurchase agreements onsuch U.S. Government securities with financial institutions believed by Applicant's board of directors to present minimal credit risks.

Applicant further states that both portfolios may purchase variable rate securities with maturities in excess of one year, which are guaranteed by the full faith and credit of the U.S. Government. Applicant states that the yields on such securities are adjusted at least semi-annually, in relation to specific money market rates, which is expected to substantially reduce the wide fluctuation possible in the market value of long-tern securities. Applicant also states that both portfolios may enter into reverse repurchase agreements with banks.

The application states that investments by the Applicant will be limited to obligations with remaining maturities of one year or less. It is further stated that Applicant will maintain a dollar-weighted average portfolio maturity of 120 days or less. For these purposes, the maturities of variable rate obligations will be determined in accordance with the procedures set forth in proposed Rule 2a-7, or if the rule should ultimately be adopted, in accordance with the procedures set forth in the rule as adopted.

Applicant states that each of its portfolios intends to declare as dividends payable on each business day all of its net investment income to shareholders of record as of 12:00 noon New York time of the preceding business day. Net investment income

will consist of the interest income earned on the Applicants investment's (adjusted for amortization of original issue or market discounts or premiums), less estimated expenses, plus or minus any gains or losses realized upon the sale of any portfolio securities. Dividends are automatically reinvested at net asset value in additional shares. Applicant states that its net asset value per share, the price at which shares are issued and redeemed, will be computed by dividing the value of the Applicant's total assets, less its liabilities, by the total number of shares outstanding. Net asset value of the Applicant will be determined every business day at 12:00 noon, New York City time.

The application states that the Commission expressed the view that, among other things, it would be inconsistent with the provisions of Rule 2a–4 for a "money market" fund to value its portfolio instruments with over 60-day maturities on an amortized cost basis and that the valuation of such securities by such a fund should be made with reference to market factors (Investment Company Act Release No. 9786, May 31, 1977).

Section 6(c) of the Act provides, in part, that upon application the Commission may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of the relief requested, Applicant states that it understands that to attract investors to a short term money market investment vehicle, it must have a stable capital value and a constant and steady flow of investment income. Applicant states that it believes, in order to attract such investors and retain them as shareholders, the Applicant must have a stable net asset value per share and must be able to pay dividends that do not fluctuate as a consequence of changes in the values of its portfolio securities. Applicant asserts that by investing in high quality, short-term money market obligations and valuing such securities on the basis of their amortized cost, the Applicant will benefit such investors by providing an investment vehicle less subject to fluctuation than under alternative procedures whereby its daily dividend would be adjusted by all realized and unrealized gains and losses on its portfolio securities. Management of the Applicant believes that, with respect to a portfolio of money market obligations with a dollar-weighted average maturity of 120 days or less, the discrepancy between market value and amortized cost is negligible. Applicant also states that a number of money market funds with which applicant will be in direct competition now effect sales, redemptions and repurchases of their shares at prices calculated using the amortized cost method of valuation. Applicant states that its board of directors has determined in good faith that in light of the characteristics of the Applicant, absent unusual or extraordinary circumstances, the amortized cost method of calculating the net asset value per share of the Applicant is appropriate and in the best interests of shareholders of the Applicant and reflects fair value of such securities.

Accordingly, Applicant submits that the standards of fairness expressed in of Section 6(c) of the Act are consistent with granting the requested exemption. Applicant agrees, as a condition to the granting of the exemption for each portfolio of Applicant, that the following may be made conditions of the order applicable to each of its present portfolios as well as any portfolios created in the future.

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, the board of directors of Applicant undertakes—as a particular responsibility within the overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objectives, to stabilize Applicant's net asset value per share, as computed for the purpose of distribution, redemption and repurchase, at $1.00 per share.

2. Included within the procedures to be adopted by the board of directors of Applicant shall be the following:

(a) Review by the board of directors, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from the Applicant's $1.00 amortized cost price per share, and the maintenance of records of such review.[1]

(b) In the event such deviation from the $1.00 amortized cost price per share exceeds ½ of 1 percent, the board of directors will promptly consider what action, if any, should be initiated.

(c) Where the board of directors believes the extent of any deviation from the Applicant's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses, or to shorten the average maturity of portfolio instruments; reducing or withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that applicant will not (a) purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days.[2]

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above, and will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of its board of directors' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the board of directors' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, if any, to those United States dollar-denominated instruments which its board of directors determines

---

[1] To fulfill this condition, Applicant intends to use actual quotations or estimates of market value reflecting current market conditions chosen by its board of directors in the exercise of its discretion to be appropriate indicators of value which may include, *inter alia*, (1) quotations or estimates of market value for individual portfolio instruments, or (2) values obtained from yield data relating to classes of money market instruments published by reputable sources.

[2] In fulfilling this condition, if the disposition of a portfolio security results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce its dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

present minimal credit risks, and which are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by its board of directors.

6. If any action pursuant to condition 2(c) was taken during the preceding calendar quarter, the Applicant will file, as an attachment to Form N–1Q, a statement which describes the nature and circumstances of such action.

Notice is further given that any interested person may, not later than January 3, 1983, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 12864; 812-5065]

T. Rowe Price New Horizons Fund, Inc., et al.; Application

In the matter of; T. Rowe Price New Horizons Fund, Inc., 100 East Pratt Street, Baltimore, MD 21202; Hambrecht & Quist, 235 Montgomery Street, San Francisco, California 94104; (812–5065); filing of application.

December 1, 1982.

T. Rowe Price New Horizons Fund, Inc. (the "Fund"), registered under the Investment Company Act of 1940 ("Act"), and Hambrecht & Quist, a California limited partnership organized as a broker-dealer under the Securities Exchange Act of 1934, (together, "Applicants") have filed an application and amendments thereto for an order of the Commission pursuant to Section 17(b) of the Act exempting the Fund from the provisions of Section 17(a) of the Act to the extent necessary to enable the Fund to effect principal transactions with Hambrecht & Quist, and pursuant to Section 10(f) of the Act exempting the Fund from that section to the extent necessary to enable it to purchase securities from Hambrecht & Quist in underwritings to the extent set forth in the application. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that the Fund is a Maryland corporation. The investment objective of the Fund is long-term growth of capital through investment primarily in the securities of small growth companies which management believes have the potential to become major companies in the future. Hambrecht & Quist is particularly noted for its interest in and its relationship to such companies, and it is both a market maker and underwriter for their securities. In the years 1979, 1980 and 1981, Hambrecht & Quist participated as manager in initial public offerings of an aggregate of 73 companies, including 38 that were at one time or from time to time held by the Fund, and in those years it participated as syndicate member in initial public offerings of 38 companies, including 10 that were at one time or from time to time held by the Fund. In the opinion of T. Rowe Price Associates, Inc. ("Price Associates"), the investment adviser to the Fund, Hambrecht & Quist is one of the most knowledgeable firms in the United States in terms of its ability to find and evaluate small, high technology companies of the type that might be suitable for investment by the Fund, and it is an important source of information with respect to the securities of such companies.

Applicants state that Paul M. Wythes, a director of the Fund, is a limited partner of Hambrecht & Quist. Mr. Wythes' interest in the profits and losses of Hambrecht & Quist is less than 1%, and his income from other sources constitutes the major portion of his total income. Applicants state that for the year 1980, Mr. Wythes' share of the profits of Hambrecht & Quist was less than 15 percent of his total income. The Commission has issued an order declaring that Mr. Wythes shall not be considered an "interested person" of the Fund or of Price Associates by reason of his status as a limited partner of Hambrecht & Quist (Investment Company Act Release No. 11487 (December 11, 1980)).

Applicants state that because Mr. Wythes is a director of the Fund, as well as a limited partner of Hambrecht & Quist, Hambrecht & Quist is an affiliate of an affiliate of the Fund for purposes of the Act and, accordingly, the Fund is precluded from effecting principal transactions with Hambrecht & Quist by virtue of Section 17(a) of the Act and from purchasing securities from Hambrecht & Quist in an underwriting by virtue of Section 10(f) of the Act.

The Fund states that decisions with respect to the purchase and sale of portfolio securities on behalf of the Fund are made by officers of the fund pursuant to recommendations of Price Associates. All of such officers are also officers of Price Associates. The board of directors of the Fund does not participate in the allocation of the Fund's brokerage, but reviews such allocations on the basis of quarterly and other periodic reports furnished to it by Price Associates. In the years 1981, 1980 and 1979, the Fund paid brokerage commissions (including discounts received by securities dealers in connection with underwritings) amounting to $1,511,701, $1,418,803 and $703,601, respectively, of which Hambrecht & Quist received from the Fund brokerage commissions, including underwriting discounts, of $28,430, $33,027 and $17,296, respectively. All transactions with Hambrecht & Quist after April 23, 1981 (the date Mr. Wythes was first elected to the board of directors of the Fund) have been on an agency basis.

Applicants state that Price Associates has advised the Fund that in many instances Hambrecht & Quist provides the best market in which the Fund can accumulate or dispose of positions in the size appropriate to the Fund. Applicants further state that Price Associates has also advised the Fund that it recognizes that there may be situtations in which another dealer may offer a better price in any particular case (*e.g.*, where it has a buyer or seller for a block), but in the opinion of Price Associates Hambrecht & Quist has been, and is expected to continue to be, able to effect many security transactions at prices and in quantities more favorable than those available through other brokers. Therefore, Applicants assert, to preclude trading with Hambrecht & Quist is to deprive the Fund of the opportunity to get the best prices in

many cases. Applicants state that they recognize these difficulties would not exist if the Fund dealt with Hambrecht & Quist on an agency basis, as it may lawfully do. They further state, however, that this is not a realistic option because the market for the types of stock in which the Fund trades is typically over-the-counter, where principal transactions dominate the market; of 136 stocks held in the Fund's portfolio on June 7, 1982, 70 were only traded over the counter. As a result, in the opinion of Price Associates, agency transactions are not a meaningful or realistic alternative in a majority of the Fund's portfolio transactions.

Section 17(b) of the Act provides that the Commission, upon application, may exempt transactions from the provisions of Section 17(a) if evidence establishes that the terms of the proposed transactions, including the consideration to be paid, are reasonable and fair and do not involve overreaching on the part of any person concerned, and that the proposed transactions are consistent with the policy of the registered investment company concerned and with the general purposes of the Act. Applicants represent that, in order to comply with Section 17(b) of the Act, the board of directors of the Fund proposes to adopt written procedures designed to insure that principal transactions with Hambrecht & Quist are consistent with the investment objectives and policies of the Fund, are effected on a basis which is fair and reasonable to the Fund and do not involve overreaching by Hambrecht & Quist which would disadvantage the Fund in relation to other potential buyers and sellers from Hambrecht & Quist. Applicants further represent that these procedures would include the review by the Fund's board of directors of such transactions with Hambrecht & Quist no less frequently than quarterly, and that records of such transactions would be maintained in the files of the Fund for not less than six years. Applicants represent that in order to facilitate such reviews, Price Associates would furnish the Fund's board of directors with information relating to such transactions, including, but not limited to, the reasons for the selection of Hambrecht & Quist, the purchase or sale price involved, the market price on the day before and the day after such transaction as reported on the National Association of Securities Dealers Automated Quotations System, and other information deemed necessary by the board of directors for the purpose of its evaluation. Applicants state that the Fund believes that these safeguards will provide the necessary mechanism to ensure that such transactions are fair and reasonable to the Fund and do not involve overreaching, and that such transactions comply with Section 17(b) of the Act.

The Applicants state that the application of Section 10(f) works to the disadvantage of the Fund in a number of ways. First, insofar as Hambrecht & Quist typically takes down the largest share of most underwritings which it manages, in many cases the Fund is prevented from dealing with the largest source of the particular securities it desires to purchase. Moreover, Applicants state that because of Hambrecht & Quist's standing and reputation, the securities in an offering managed by Hambrecht & Quist are usually enthusiastically received by the public (so that the offering qualifies as a "hot issue" within the Rules of the National Association of Securities Dealers, Inc.), with the result that not only is the Fund prevented from dealing with the primary source (*i.e.*, Hambrecht & Quist), but is competing with public customers for the residual supply in the hands of smaller firms. Thus, Applicants state, in many cases the Fund may find itself in the position of being able to acquire a smaller position than it would otherwise prefer, unless it is willing to go into the potentially higher-priced aftermarket.

Applicants state that the final sentence of Section 10(f) provides, in effect, that the Commission may by order upon application conditionally or unconditionally exempt any transaction or class of transactions from any of the provisions of Section 10(f), if and to the extent such exemption is consistent with the protection of investors. The Fund is seeking an order exempting it from the provisions of Section 10(f) which would otherwise prohibit it from purchasing securities from Hambrecht & Quist in underwritings. Applicants represent that the Fund will comply with all provisions of Rule 10f-3 except, to the extent necessary to effectuate the transactions described above, paragraph (f) thereof.

The Fund states that its board of directors, having considered all of the facts cited in the application, has concluded that it is not in the interest of the shareholders of the Fund that it be precluded from dealing with Hambrecht & Quist in principal and underwriting transactions. The Fund states that its board of directors has also concluded that, if and to the extent there is any potential for abuse in such transactions, that potential is minimized or eliminated by the role of the non-interested directors of the Fund in the periodic review of portfolio transactions of the Fund. The Fund states that its board of directors also notes that, as provided in the Fund's representations in connection with the prior order of the Commission with respect to Mr. Wythes, Mr. Wythes does not vote on any matters relating to the allocation of portfolio brokerage by the Fund to Hambrecht & Quist, or the selection of brokers or dealers with which the Fund effects portfolio transactions as agent or principal (including but not limited to transactions as to which Sections 17(a) or 10(f) of the Act on Rules 17e–1 or 10f–3 thereunder apply). Moreover, Applicants represent that if the relief requested herein is granted, Mr. Wythes will not participate in any reviews by the board of directors of any principal transactions with Hambrecht & Quist or of any purchase from Hambrecht & Quist in underwritings.

According to the application, in considering these matters the board of directors of the Fund has noted that if Hambrecht & Quist were a corporation, the interest of Mr. Wythes in its profits and losses would be less than the minimum amount necessary to constitute him an affiliated person of that firm under the definition of affiliate in Section 2(a)(3) of the Act, and in that event, *a fortiori*, Hambrecht & Quist would not be an affiliate of an affiliate of the Fund and the problems giving rise to the filing of this application would not exist. Moreover, in the opinion of the Applicants, because a limited partnership interest is a non-voting one, a person whose sole relationship to the broker-dealer is a limited partnership interest of less than 1%, is necessarily further removed from management than he would be if he held voting stock of a corporation and was in a position to participate in the selection of management. Applicants state that, as a limited partner, Mr. Wythes does not participate in the management or operation of Hambrecht & Quist and, indeed, is precluded from such involvement. Since Mr. Wythes would not be deemed to be an interested person of Hambrecht & Quist if he held voting stock with commensurate participation in profits and losses, the board of directors of the Fund states that it has concluded that Mr. Wythes' relationship to Hambrecht & Quist is not the type of relationship intended to bring into play the restrictions of Sections 17(a) or 10(f). Moreover, Applicants state, if the relief sought by the application is granted, Mr. Wythes' benefit in the resulting business relationship between the Fund and Hambrecht & Quist by virtue of his

limited partnership interest in Hambrecht & Quist will be minimal; the Fund does not believe that Mr. Wythes' ability to serve the Fund independently and in the interests of the Fund's shareholders will be impaired.

Applicants also request that the relief sought be extended to other investment companies for which Price Associates acts as investment adviser ("Price Funds") for which Mr. Wythes may, from time to time, serve as director. Applicants state that Mr. Wythes does not currently serve as director of any other Price Funds, but it is conceivable that he may be asked to serve on the board of one or more of the Price Funds in the future. Applicants represent that they understand that the relief requested with respect to possible future transactions between the Price Funds and Hambrecht & Quist will apply to the other Price Funds for which Mr. Wythes may serve as director only if (a) the de minimis nature and extent of the relationship between Mr. Wythes and Hambrecht & Quist remains in effect as described in the application (e.g. a less than one percent limited partnership interest), and (b) any of the Price Funds for which Mr. Wythes may serve as a director complies with all the conditions and representations set forth in the instant application and the order issued by the Commission thereon.

Notice is hereby given that any interested person may, not later than December 27, 1982, at 5:30 p.m., submit to the Commission, in writing, a request for a hearing on the application accompanied by a statement as to the nature of his/her interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or such person may request to be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application herein will be issued as a matter of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 12881; 812-5339]

Territorial Government Fund; Application

December 8, 1982.

In the matter of: The Territorial Government Fund; 421 Seventh Avenue; Pittsburgh, PA 15219; (812-5339); Filing of Application.

Notice is hereby given that The Territorial Government Fund ("Applicant") registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on October 14, 1982, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder, to the extent necessary to permit Applicant to value its assets using the amortized cost method of valuation. All interested persons are referred to the Application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is a "money market" fund organized as a Massachusetts Business Trust and that Cash Management Services, Inc., a wholly-owned subsidiary of Federated Investors, Inc., serves as its investment adviser. Applicant further states that its investment objective is to seek current income consistent with stability of principal and that it may invest in the United States Government obligations (whether or not subject ot repurchase agreements); further, Applicant states that it may invest up to 20% of its assets in short term instruments of banks and savings and loan associations insured, to the extent of the principal amount, by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation, all maturing in one year or less.

Section 6(c) of the Act provides, in part, that upon application the Commission may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes or persons, securities, or transactions, from any provision or provisions of the Act or of the rules thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant states that experience indicates that in order to attract investors two features are necessary in a "money market" fund: (1) Stability of principal, and (2) steady flow of investment income. Applicant asserts that by maintaining a portfolio of high quality, short-term "money market" instruments valued at amortized cost it can provide these features to investors. Applicant represents that its board of trustees has properly determined in good faith that, in light of the characteristics of Applicant, the amortized cost method of valuation of portfolio instruments is appropriate and preferable for the Applicant, reflects fair value of such instruments, and is in the best interest of Applicant's shareholders.

Applicant consents to the imposition of the following conditions in an order granting the relief it requests:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to its investment adviser, the board of trustees undertakes—as a particular responsibility within the overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objective, to stabilize Applicant's net asset value per share, as computed for the purpose of distribution, redemption and repurchase, at $1.00 per share.

2. Included within the procedures to be adopted by the board of trustees shall be the following:

(a) Review by the board of trustees, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from Applicant's $1.00 amortized cost price per share, and the maintenance of records of such review.[1]

(b) In the event such deviation from Applicant's $1.00 amortized cost price per share exceeds ½ of 1 percent, a requirement that the board of trustees

[1] To fulfill this condition, Applicant intends to use actual quotations or estimates of market value reflecting current market conditions chosen by its board of trustees in the exercise of its discretion to by appropriate indicators of value which may include, *inter alia*, (1) quotations or estimates of market value for individual portfolio instruments, or (2) values obtained from yield data relating to classes of money market instruments published by reputable sources.

will promptly consider what action, if any, should be initiated.

(c) Where the board of trustees believes the extent of any deviation from Applicant's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which may include: redemption of shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses, or to shorten Applicant's average portfolio maturity; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that Applicant will not (a) purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days. In fulfilling this condition, if the disposition of a portfolio security results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon a reasonably practicable.

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in paragraph 1 above, and Applicant will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the board of trustees' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of its meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar denominated instruments which the board of trustees determines present minimal credit risks, and which are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by the board of trustees.

6. Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement as to whether any action pursuant to paragraph 2(c) above was taken during the preceding fiscal quarter and, if any such action was taken, will describe the nature and circumstances of such action.

Applicant submits that the granting of the requested exemptions is appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than January 3, 1983, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advise as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[File No. 1-7837]

Verex Corp.; Application To Withdraw From Listing and Registration

December 10, 1982.

In the matter of; Verex Corp.; 4¾% Convertible Subordinated Debentures (due 9–1–92); File No. 1–7837; Securities Exchange Act of 1934, Section 12(d).

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the New York Stock Exchange, Inc. ("NYSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

Verex Corporation ("Company") has determined to remove its debentures from listing and registration on the NYSE because as of January 1, 1981, the average monthly trading volume has been low and trading has been sporadic. In addition, as of October 1, 1982, there was $5,998,000 of the debentures outstanding and held by approximately 265 holders of record. In this regard, the Company believes that the cost and expenses of continued listing on the NYSE is not justified. The NYSE has no objection to the delisting.

Any interested person may, on or before January 4, 1983, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 19312; File No. ODD–82–3]

Philadelphia Stock Exchange, Inc.; Listed Options on Foreign Currencies

December 8, 1982.

In the matter of; Philadelphia Stock Exchange, Inc.; 1900 Market Street, Philadelphia, PA 19103, File No. ODD–82–3, Listed Options on Foreign Currencies.

On October 4, 1982, the Philadelphia Stock Exchange, Inc. ("Phlx"), pursuant to Rule 9b–1 under the Securities Exchange Act of 1934 (the "Act"), supplied to the Commission preliminary copies of an options disclosure document with respect to standardized

options on foreign currencies ("Foreign Currency Options Disclosure Document"). On November 5, 1982, Phlx filed a revised Foreign Currency Options Disclosure Document with the Commission. The Foreign Currency Options Disclosure Document is a supplement to the basic options disclosure document, which was prepared by the American Stock Exchange, Inc. ("Amex"), Chicago Board Options Exchange, Incorporated ("CBOE"), the Pacific Stock Exchange, Incorporated ("PSE") and the Phlx. On October 18, 1982, the Commission issued an order allowing distribution of the basic options disclosure document to investors.[1]

Rule 9b–1 provides that an options market must file five preliminary copies of an options disclosure document with the Commission at least 60 days prior to the date definitive copies are furnished to customers unless the Commission determines otherwise having due regard to the adequacy of the information disclosed and the protection of investors. This provision is intended to permit the Commission either to accelerate or extend the time period before definitive copies of a disclosure document may be distributed to the public.

The Commission staff has reviewed the Foreign Currency Options Disclosure Document and finds that it is consistent with the protection of investors and in the public interest to allow the distribution of the disclosure document as of the date of this order.[2]

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19317; File No. SR-Amex-82-11]

American Stock Exchange, Inc.; Self-Regulatory Organization

Proposed Rule Change by; American Stock Exchange, Inc.; relating to membership rule amendments;

[1] *See* Securities Exchange Act Release No. 19153.

[2] Rule 9b–1 provides that the use of an options disclosure document shall not be permitted unless the options class to which the document relates is the subject of an effective registration statement on Form S–20 under the Securities Act of 1933. In this regard, on December 8, 1982, the Commission, pursuant to delegated authority, declared effective Options Clearing Corporation's Form S–20 registration statement with respect to the options described in the Foreign Currency Options Disclosure Document. *See* File No. 2–79558.

comments requested within 21 days after the date of this publication.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on August 3, 1982, the American Stock Exchange filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange is proposing certain Constitutional and rule amendments relating to minimum compensation for ABC seatholders (Rule 319), outside business activities (Rule 342(b)), salaried market employees (Article IV, Section 3(a)), and the Gratuity Fund (Article IX, Section 6).

II. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for the Proposed Rule Change

(a) *Purpose.* The Exchange is proposing a number of Constitutional and rule amendments relating to membership matters as part of its program to ensure that the Exchange's rules remain up to date, and that where appropriate, they conform to similar rules in effect at the New York Stock Exchange. Each of the proposed changes is reviewed separately below.

Minimum Compensation for ABC Seatholders. Amex Rule 319 requires that a member organization guarantee a regular member ABC seatholder associated with the firm at least $16,000 a year in salary and/or participation in profits and provides that the member may be charged with his share of losses or be guaranteed against loss. When the rule was originally adopted in 1967, it was intended to maintain the status of regular memberships by providing a minimum salary. Rule amendments have gradually removed similar outdated requirements as the Exchange has sought to leave such business determinations to the discretion of individual member organizations.

It is proposed that Rule 319 now be rescinded. The New York Stock Exchange has recently deleted its comparable rule (Rule 314).

Outside Business Activities. Amex Rule 342(b) requires that persons associated with member organizations obtain the member organization's prior written consent with respect to all outside business activities and interests in which they are involved. The provision is intended to insure that such activities and interests do not create conflicts of interest and/or potential organizational liabilities or affect the supervisory capabilities of member firms.

Currently, oral requests for member firm approval are permitted under the rule. However, requiring that the request be made in writing would enhance a firm's ability to study the specifics of a particular request and facilitate recordkeeping of such requests. It is therefore proposed that Paragraph (b) of the rule be amended to require written requests for member firm approval. An additional non-substantive amendment is proposed to Paragraph (e) of the rule regarding association with persons subject to statutory disqualifications to clarify the intent of the provision.

The amendments conform the rule to recent amendments to the comparable New York Stock Exchange rule (Rule 346).

Salaried Market Employees. Article IV, Section 3(a) of the Constitution provides that the Exchange may permit a regular member elected to membership prior to June 1, 1923 to designate in his absence a representative, known as a salaried market employee, to execute orders on the Floor for the account of the regular member or his member organization. This privilege has not been exercised since the 1940s, and with the death last year of the last regular member eligible to exercise the privilege, it is proposed that the provision be rescinded. Conforming amendments are proposed to Rule 14 and Rule 181.

Gratuity Fund Beneficiaries. Article IX, Section 6 of the Constitution sets forth the beneficiaries of the Gratuity Fund benefit, which includes the "widow" of a deceased member. Since there are now many women members of

the Exchange, it is proposed that Section 6 be amended to substitute the phrase "surviving spouse" wherever reference is made to the term "widow". This amendment is purely technical in nature and in no way alters any rights with respect to the Gratuity Fund.

(b) *Basis.* The proposed amendments are consistent with Section 6(b) of the Exchange Act in general, being designed to ensure that the Exchange's rules remain up to date, and that where appropriate, they conform to similar rules in effect at the New York Stock Exchange.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will have no impact on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section 450 5th Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 9, 1982.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 19316; SR-Amex-82-16]

American Stock Exchange, Inc; Proposed Rule Change

December 9, 1982.

In the matter of; American Stock Exchange, Inc.; 86 Trinity Place, New York, N.Y. 10006; (SR-Amex-82-16); order approving proposed rule change.

On October 18, 1982, the American Stock Exchange, Inc. ("Amex") filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and rule 19b-4 thereunder to amend Amex Rule 300 to provide the capital contribution of any partner of an Amex member firm cannot be withdrawn sooner than twelve months after it is made. Under present Rule 300(b), only a member firm subject to Amex Rule 470 (relating to capital requirements for members and member organizations) is prohibited from withdrawing its capital contribution prior to twelve months from the date the contribution is contributed. Under the proposed rule change, Rule 300 would encompass all Amex partnerships, not only those subject to Rule 470.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 34-19189, October 28, 1982) and by publication in the **Federal Register** (47 FR 50151, November 4, 1982). No comments were received with respect to the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and in particular, the requirements of Section 6, and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82-34283 filed 12-16-82; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19313; File No. SR-Phlx-81-4]

Philadelphia Stock Exchange, Inc.; Proposed Rule Change

December 8, 1982.

In the matter of; Philadelphia Stock Exchange, Inc.; 1900 Market Street, Philadelphia, PA 19103; File No. SR-Phl-81-4; amendment and order approving proposed rule change.

I. *Introduction.* Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) (the "Act"), and Rule 19b-4 thereunder, the Philadelphia Stock Exchange, Inc. ("Phlx") filed with the Commission proposed rule changes to authorize the listing and trading of standardized put and call options contracts on foreign currencies ("Foreign Currency Options").[1] Included as part of those rules were provisions governing customer margin requirements applicable to Foreign Currency Options. The proposed rule changes, with the exception of those portions concerning margin, have been approved by the Commission.[2] The margin rules proposed by the Phlx were not approved at that time because of the absence of necessary volatility information for foreign currencies underlying the proposed options contracts and the absence of a provision specifying the time period within which margin would have to be posted. Phlx subsequently provided the staff with the needed volatility information and filed an

---

[1] Phlx's proposal was originally filed on February 28, 1981 and amendments were filed on March 2, 1982 and May 28, 1982. Notices of the proposed rule change and amendments were given by the Commission in Securities Exchange Act Release Nos. 17666 (March 27, 1981) and 18825 (June 21, 1982) and by publication in the **Federal Register** (46 FR 20348 (April 3, 1981) and 47 FR 27652 (June 25, 1981), respectively). *See* File No. SR-Phlx-8-4. Phlx subsequently filed two additional amendments regarding its margin formula: a proposal to establish a seven-day posting rule (Amendment No. 4) (*see* note 3, *infra*) and a proposal to delete all provisions that would authorize use of letters of credit as "cover" in lieu of margin (Amendment No. 5). Interested persons are invited to submit written data, views and arguments concerning Amendment No. 5 within 21 days from the date of publication of this notice in the **Federal Register.**

[2] *See* Securities Exchange Release No. 19133 (October 14, 1982) 47 FR 46946 (October 21, 1982).

amendment setting forth a seven day posting requirement.[3]

II. *Terms of the Proposed Rule Changes.* The amended proposed rule change as it relates to margin for Foreign Currency Options is similar to other margin provisions for new options products. With respect to long positions in Foreign Currency Options, current exchange rules applicable to options on equity securities are unaltered. Specifically, no put or call option carried in a customer account is permitted to have loan value for the purpose of calculating margin; therefore, the options premium or purchase price must be paid in full.[4]

The proposed rules provide that, with respect to exchange-traded options on foreign currency issued, guaranteed or carried short in a customer's account, the minimum margin would be 130 percent of the current market value of the option, plus $750, minus the amount, if any, that the options contract is "out-of-the-money".[5] The proposed formula is subject to a minimum margin of 130 percent of the premium plus $250; maximum margin would be set at 130 percent of the option premium plus $2,500.[6]

An exemption from the foregoing margin requirements would be provided for short positions that are fully covered and reduced margins would apply to paritally covered and reduced margins would apply to partially covered positions. Phlx has proposed that options writing be premitted on an unmargined basis when certain forms of "cover" exist (*e.g.*, transferring the requisite units of foreign currency to a bank account designated by the broker, so that a type of "depository receipt" could be given to the Options Clearing Corporation ("OCC"); furnishing of an "escrow receipt" to the broker certifying that a custodian is holding the underlying foreign currency and will deliver it to OCC against payment of the aggregate exercise price; or furnishing an "option guarantee letter" guaranteeing delivery of the foreign currency to the broker).[7]

Phlx also is proposing to extend its current margin requirements for spread and straddle stock option positions to spreads and straddles on Foreign Currency Options. In the case of Foreign Currency Option spreads, Phlx is proposing that customers be required to post margin equal to the lesser of: (a) the margin required for the short position, or (b) the amount by which the exercise price of the long call (or short put) exceeds the exercise price of the short call (or long put).[8] In the case of Foreign Currency Options straddles, Phlx is proposing that customers be required to post margin equal to: (at) the margin required for the put or the call, whichever is greater, plus (b) any unrealized loss on the other options position.[9]

Finally, Phlx proposal sets forth the period of time within which margin payments must be made by Foreign Currency Options customers.[10] In this regard, Phlx has determined to incorporate the seven business day posting rule utilized in Regulation T and in effect for other securities options (as well as all other marginable securities) and has submitted an amendment to the proposed rule change to establish a seven business day posting requirement.[11]

III. *Discussion.* Section 7 of the Act authorizes the Federal Reserve Board ("FRB") to prescribe rules and regulations with respect to the amount of credit that may initially be extended and subsequently maintained on any security (other than an exempted security). Pursuant to that grant of authority, the FRB has adopted Regulation T, which includes provisions establishing margin requirements for options on securities. While foreign currency in not a "security," options on foreign currencies traded on a national securities exchange are securities under the Act. At this time, however, the FRB has not promulgated rules under Regulation T expressly applicable to options on foreign currency.[12] Therefore, margin regulation on Foreign Currency Options currently is vested with the self-regulatory organizations subject to Commission oversight.[13]

The Commission has carefully examined the margin rules submitted by the Phlx. The extension to options on foreign currency of the prohibition against long options positions having loan value in a margin account is fully consistent with the original application of the prohibition to options on equity securities. In particular, because an options represents a contractual right of limited duration, an options contract constitutes a wasting asset whose value diminishes as the expiration date approaches. In addition, because of the leverage involved, the prices of options, and therefore their intrinsic values, are subject to significant volatility. These features, which dictated a proscription against the purchase of equity options on margin as well as rendered such

---

[3] The amendment was filed on November 10, 1982, and notice was given by Securities Exchange Act Release No. 19248 (November 17, 1982) and by publication in the **Federal Register** 47 FR 53554 (November 26, 1982)). *See* File No. SR–Phlx–81–4 (Amendment No. 4).

[4] Phlx Rule 722(d) 2.

[5] *See* Phlx Rule 772(d)2(B)(iii). A call options contract is "out-of-the-money" to the extent that the exercise price of the option exceeds the current spot market price of the underlying foreign currency. A put option is "out-of-the-money" to the extent that current spot market price of the underlying foreign currency exceeds the exercise price of the option.

[6] *Id.* Phlx members could, of course, require larger margin deposits than required by Phlx's proposed rule. In addition, Phlx itself could increase its Foreign Currency Options margin requirements from time to time. *See* Proposed Rule 722(d)2(K).

The New York Stock Exchange, Inc. ("NYSE") has stated that, until April 1, 1983, it will not institute enforcement proceedings with regard to its Rule 431(d)(2), which imposes a margin maintenance requirement for uncovered short positions in exchange-traded puts and calls of at least 30 percent, provided NYSE members and member organizations adhere to the margin requirements established by Phlx Rule 722 for Foreign Currency Options. *See* NYSE Information Memo No. 82–62 (December 8, 1982).

[7] *See* proposed Rule 722(d)2(H). These three methods of "cover" are predicated on the deposit of the underlying foreign currency and accordingly are analogous to the methods of cover available to writers of call options on stock. A fourth method of cover, furnishing an irrevocable letter of credit to pay to the member broker the requisite units of foreign currency, also was previously proposed by the Exchange. Phlx subsequently filed an amendment, however, deleting from its proposed rules for the time being any references to this possible form of cover. *See* File No. SR–Phlx–81–4 (Amendment No. 5).

[8] *See* proposed Rule 722(d)2(F). Phlx had originally proposed that the short side of spread positions be fully margined during the last two business days prior to expiration to guard against the possibility that a substantial adverse price movement might occur subsequent to expiration of the spreader's long position but prior to assignment of an exercise notice for the short position. Phlx's amended proposal deleted this margin requirement on the basis that it was "unnecessary" to "codify" this "precautionary measure."

[9] *See* proposed Rule 722(d)2(E).

[10] The rules of the exchanges setting forth margin requirements on other kinds of options do not contain provisions establishing margin posting periods. Rather, the posting of margin for other options is governed by the provisions of Regulation T. Because of questions regarding the applicability of Regulation T, as currently formulated, to Foreign Currency Options, it was determined that for clarity a posting period should be included in Phlx's rules.

[11] *See* note 3, *supra*. Phlx also has provided empirical information concerning the historical level of protection its margin formula would provide over that period of time. *See* note 15, *infra*.

[12] *See* Regulation T, 12 CFR 220.6. To the extent that the FRB might determine to regulate foreign currency options margin, the Phlx has requested the FRB to accord the same treatment to options on foreign currency that the FRB has accorded options on exempt securities [*i.e.*, initial margin requirements and the specification of appropriate cover for options would be determined by the rules of the exchange, provided those rules were approved by the Commission). *See* letter from Nicholas A. Giordano, President, Phlx, to Robert S. Plotkin, Assistant Director, FRB, dated August 18, 1982. The staff of the FRB has indicated that Foreign Currency Options can be written utilizing the Phlx's proposed margin provisions, provided they have been approved by the Commission. *See* letter from Laura Homer, Securities Credit Officer, FRB, to Richard Ketchum, Associate Director SEC, dated December 7, 1982.

[13] *Id. See also* 12 CFR 220.8(j)(2).

options unsuitable as collateral for the purchase of other securities, are equally applicable to options on foreign currency.

For margin on uncovered short positions, the Phlx has developed a formula which it believes will yield margin deposits providing adequate credit protection for member firms. The exchange has reached this conclusion by comparing the margin levels calculated pursuant to the proposed formula with the historic volatility of the various underlying foreign currencies over seven day periods.[14] While, in some cases, the proposed margin formula yields an amount that covers less than 100 percent of the historic seven day price movements examined by the exchange,[15] the exchange has contended that the formula nevertheless is appropriate. In particular, the exchange believes that a formula designed to produce margin levels sufficient to cover 100 percent of historic price movements is both excessive and unnecessary. In support of this contention, the exchange indicates that in periods of significant price volatility, member firms can, and in fact would, require that margin deficiencies be eliminated in periods of less than seven days,[16] and in response to a customer's failure to do so, can liquidate the customer's options position. Moreover, the exchange points to existing margin rules or currently proposed modifications to its margin rules that would enable the exchange at any time to impose higher margin requirements than are prescribed by its rules when it deems that higher margin requirements would be appropriate.[17]

In light of these considerations, the Commission believes that the proposed margin formula for uncovered short positions is appropriate. Given the degree of financial leverage made possible by the proposed margin formula, however, the Commission remains concerned that unsophisticated and under-capitalized investors should not be subjected to unreasonable risks of loss through transactions in Foreign Currency Options. In this regard, the Commission wishes to emphasize to both the exchange and its member firms the need for rigorous application of exchange rules governing opening of accounts [18] and suitability [19] to ensure that market participants understand and are financially able to bear the risks of Foreign Currency Options trading.[20]

IV. *Findings and Conclusion.* Under Section 19(b)(2) of the Act, the Commission must approve a proposed rule change if it determines that it is consistent with the requirements of the Act and the rules thereunder applicable to national securities exchanges. Among other things, the Commission must find that a proposed rule is designed to protect investors and the public interest and does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

On the basis of the foregoing discussion, the Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder and, in particular, with the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change as amended be, and it hereby is, approved.[21]

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary

BILLING CODE 8010-01-M

Pacific Stock Exchange, Inc.; Application for Unlisted Trading Privileges and of Opportunity for Hearing

December 10, 1982.

In the matter of application of the Pacific Stock Exchange, Inc.; for unlisted trading privileges in certain securities.

The above named national securities exchange has filed an application with the Securities and Exchange Commission pursuant to Section 12(f)(1)(C) of the Securities and Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following stock:

Xonics, Incorporated
Common Stock, $.10 Par Value

This security has been removed from listing and registration on the Pacific Stock Exchange, Incorporated ("PSE") pursuant to the issuer's delisting application which became effective November 30, 1982. The security is currently traded over-the-counter. While this security is not included in the consolidated transaction and quotation reporting system, the PSE has indicated in its application that last sale and quotation information for the security would be provided by the exchange to vendors of securities information and would be available on the PSE floor. In addition, the PSE has stated in its application that it would exempt such security from any applicable off-board trading restrictions.

Interested persons are invited to submit on or before January 4, 1983, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. In order to approve the application, the Commission must find, after notice and opportunity for hearing, that the extension of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors. In considering an application for the extension of unlisted

---

[14] Seven days is the maximum period of time permitted a customer under Phlx's proposed rules to satisfy a deficiency in a margin account. Member firms, of course, are free to prescribe a shorter period of time.

[15] Statistics provided by the exchange indicate that, during the twelve month period from October 1981 through September 1982, the volatility rate of daily spot prices for the Swiss franc, the most volatile currency on which Phlx proposes to trade options, was 0.86 percent (*i.e.*, a change of less than one percent per day relative to the U.S. dollar). Using that volatility rate, the minimum margin requirement for out-of-the-money Swiss franc options would be insufficient one out of every eight or nine days (or stated conversely, margin protection for about 90 percent of all seven day spot market price movements would be provided by the formula). The volatility rate for the other currencies were: Japanese yen—.78; deutsche mark—67; British pound—.65; and Canadian dollar—.34. Because volatilities may change over time, the Phlx intends to monitor closely the volatility of each currency upon which options are traded; if necessary, Phlx. can increase the margin requirement. Phlx has established a Foreign Currency Options Margin Subcommitte for this purpose. *See* Phlx Rule 722, commentary .02 (Amendment No. 4).

[16] *See* note 14, *supra*.

[17] *See* note 6, *supra*.

[18] Phlx Rule 1024(b).

[19] Phlx Rule 1026.

[20] The proposed modifications to exchange rules with respect to the margining of spreads and straddle positions in Foreign Currency Options generally consist of changes necessary to extend existing equity options rules to Foreign Currency Options.

[21] Since Amendment No. 4 (concerning the seven day margin posting period) is for clarification and would merely extend to Foreign Currency Options the same posting requirements applicable to all other securities, the Commission finds that additional notice is unnecessary. Accordingly, the Commission finds good cause for approving that proposal prior to the thirtieth day after notice of publication thereof.

trading privileges to the security not listed and registered on a national securities exchange, the Commission shall, among other matters, take account of the public trading activity in such security, the character of such trading, the impact of such extension on the existing markets for such securities, and the desirability of removing impediments to and the progress that has been made toward the development of a national market system.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirement Under OMB Review

ACTION: Notice of Reporting Requirement Submitted for OMB Review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATE: Comments must be received on or before January 17, 1983. If you anticipate commenting on a submission but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB reviewer and the agency clearance officer of your intent as early as possible.

COPIES: Copies of the proposed form, the request for clearance (S.F. 83), supporting statement, instructions, transmittal letters, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Comments on the item listed should be submitted to the Agency Clearance Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

Agency clearance officer: Elizabeth M. Zaic, Small Business Administration, 1441 L St., NW., Room 200, Washington, D.C. 20416, Telephone: (202) 653-8538.

OMB reviewer: J. Timothy Sprehe, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3235, New Executive Office Building, Washington, D.C. 20503, Telephone: (202) 395-4814.

Title: Small Business Institute Evaluation Questionnaire

Form No.: SBA 24

Frequency: Nonrecurring

Description of Respondents: Clients receiving management assistance from SBA's Small Business Institutes

Annual Responses: 1,000

Annual Burden Hours: 500.

Type of Request: Extension (Burden Adjustment)

Dated: December 14, 1982.

Elizabeth M. Zaic,

Chief, Paperwork Management Branch, Small Business Administration.

2

FEDERAL RESERVE SYSTEM
(Board of Governors)

TIME AND DATE: 9:30 a.m., Wednesday, December 22, 1982.

PLACE: Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED: *Summary Agenda:* Because of their routine nature, no substantive discussion of the following items is anticipated. These matters will be voted on without discussion unless a member of the Board requests that an item be moved to the discussion agenda.

1. Proposed amendment to Regulation L (Management Official Interlocks). (Proposed earlier for public comment; Docket No. R–0430).
2. Proposed technical amendments to Regulation Q (Interest on Deposits) to conform with actions of the Depository Institutions Deregulation Committee.

Discussion Agenda:

3. Reserve requirement and time deposit definition issues under Regulations D (Reserve Requirements of Depository Institutions) and Q (Interest on Deposits). (Includes issues proposed earlier for public comment; Docket Nos. R–0417 and R–0424).
4. Publication for comment of a proposed book-entry securities fee structure.
5. Proposed amendments to Regulation K (International Banking Operations) regarding bank holding company investment in export trading companies.
6. Any items carried forward from a previously announced meeting.

Note.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452–3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board (202) 452–3204.

Dated: December 15, 1982.

James McAfee,
Associate Secretary of the Board.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of December 21, 1982, at 450 5th Street, NW, Washington, D.C.

An open meeting will be held on Tuesday, December 21, 1982, at 10:00 a.m. followed by a closed meeting.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10).

Chairman Shad and Commissioners Evans, Thomas, Longstreth and Treadway voted to consider the items listed for the closed meeting in closed session.

The subject matter of the open meeting scheduled for Tuesday, December 21, 1982, at 10:00 a.m., will be:

1. Consideration of whether to propose for public comment new Form N–1A and certain related guidelines and rule amendments. The new form, which would be used by open-end management investment companies for registration under the Investment Company Act of 1940 and the Securities Act of 1933, would use a simplified prospectus. For further information, please contact Larry L. Greene at (202) 272–7320.

2. Consideration of whether to amend 17 CFR 201.22(e), 230.403(a), 240.12b–12 (a) and (b) , 250.22(d), 260.7a–17, 260.7a–18, 270.0–2(b), 270.8b–12 (a) and (b), and 275.0–4(b), which would require the use of paper measuring no larger than 8½ x 11 inches in size for documents filed with the Commission. For further information, please contact Douglas J. Scheidt at (202) 272–2454.

3. Consideration of whether to propose for comment two alternative sets of amendments to its rules for application of the full cost method of accounting by oil and gas producers. The proposed amendments are intended to clarify the criteria for determining which capitalized costs may be excluded from immediate amortization. They would thereby narrow the diversity of practice resulting from varying interpretations of the Commission's existing rules which permit the exclusion from amortization of "unusually significant" costs of unproved properties and major development projects. The Commission will also consider proposing amendments to clarify its rules on the recognition of gain or loss on sales of oil and gas producing properties. For further information, please contact M. Elizabeth Rader or John W. Albert at (202) 272–2130.

4. Consideration of whether to repropose a revised order exposure rule, Rule 11A–1 under the Securities Exchange Act of 1934, reflecting proposals and comments concerning previously proposed order exposure rules. For further information, please contact Robert Colby at (202) 272–2413.

The subject matter of the closed meeting scheduled for Tuesday, December 21, 1982, following the 10 a.m. open meeting:

Freedom of Information Act appeal.
Settlement of administrative proceeding of an enforcement nature.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Bob Zutz at (202) 272–2091.

December 14, 1982.

Part II

Department of Labor

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the **Federal Register** are listed with each State.

Iowa:	
IA82–4030	June 18, 1982.
IA82–4048	Oct. 1, 1982.
IA82–4049	Oct. 8, 1982.
Illinois: IL82–2003	March 5, 1982.
Louisiana: LA82–4053	Nov. 5, 1982.
Massachusetts:	
MA81–3054	Sept. 4, 1981.
MA82–3005	April 30, 1982.
MA81–3050	Aug. 28, 1981.
Idaho: ID82–5128	Nov. 26, 1982.
Washington: WA82–5117	Aug. 13, 1982.
New York: NY81–3018	March 27, 1981.
Texas:	
TX82–4042	Aug. 20, 1982.
TX82–4046	Oct. 1, 1982.
TX82–4054	Nov. 5, 1982.
Connecticut: CT81–3032	May 15, 1981.

Supersedeas Decisions To General Wage Determination Decisions

The numbers of the decisions being superseded and their dates of publication in the **Federal Register** are listed with each State. Supersedeas decision numbers are in parentheses following the numbers of the decisions being superseded.

Illinois: IL82–2031 (IL82–2068)	May 7, 1982.
Missouri: MO81–4056 (MO82–4069)	July 24, 1981.
Texas: TX82–4029 (TX82–4065)	June 18, 1982.
Wisconsin: WI82–2043 (WI82–2062)	Aug. 27, 1982.

Special Notice

Inasmuch as Friday December 24 and 31, 1982 falls on Federal holidays, the Davis-Bacon wage determinations will be published the next work days, i.e., Monday, December 27, 1982, and Monday, January 3, 1983, respectively.

Signed at Washington, D.C. this 10th Day of December 1982.

Dorothy P. Come

Assistant Administrator, Wage and Hour Division.

POWER EQUIPMENT OPERATORS CLASSIFICATIONS:

GROUP I Cranes, Draglines, Shovels, Skimmer Scoops, Clamshells or Derrick Boats, Pile Drivers, Crane-Type Backhoes, Asphalt Plant Opers. Plant Opers., Ditching Machines or Backfillers, Dredges, Asphalt Spreading Machines, Heavy Duty Mechanic, Ass't. Master Mechanic, All Locomotives, Cableways or Tower Machines, Hoists 2 drum or more , Hoists-2 Drum or more, Hydraulic Backhoes, Ditching Machines or Backfiller Cherry Pickers, Overhead Cranes, Roller (Steam or Gas) Concrete Pavers, Excavators, Concrete Breakers, Concrete Pumps, Bulk Cement Plants, Cement Pumps, Derrick-Type Drills, Mixers (over 3 bags) and Boat Oprs., (25' & over), Motor Graders or Pushcats, Scoops or Tournapulls, Bulldozers, Endloaders or Fork-Lifts, Power Blade or Elevating Graders, Winch Cats, Boom Tractors, and Pipe Wrapping or Painting Machines, Drills (other than derrick type) 1-drum-hoists, Mud Jacks, Mixers (2 or 3 bags), Conveyors (2), Air Compressors (2), Water Pumps regardless of size (2), Welding Machines (2) Siphons or Jets (2), Winch Heads or Apparatus (2) and Light Plants (2), Mixers (under 2 bags), all Tractors regardless of size (Straight Tractor Only), Firemen on Stationary Boilers, Automatic Elevators, Form Grading Machines, Finishing Machines, Power-Sub-Grader or Ribbon Machine, Longitudinal Floats, Boat Oprs., (under 25 ft., conveyors (1), Distribution Oprs., On Trucks, Siphons or Jets (1) Winch Heads or Apperatuses (1), Light Plant (1) Mixers (under 2 bags)

GROUP II Air Compressor (1), Water Pumps regardless of size (1) Welding Machines (1)

GROUP III Firemen and Asphalt Spreader Oilers

GROUP IV Heavy Equipment Oilers (truck cranes, dredges, monigans, large Cranes, etc.)

GROUP V Oilers

GROUP VI

a. Engineers Operating under air pressure
b. Engineers Operating in air over 10 lbs. pressure
c. Oilers operating under air pressure
d. Oilers operating in air over 10 lbs. pressure

TRUCK DRIVERS CLASSIFICATIONS:

GROUP I: Drivers on 2 Axles hauling less than 9 tons; Air Compressor & Welding Machine incl. those pulled by separate units; Fork Lifts up to 6,000 lbs. cap.; Mechanic Tenders; Pick-ups when hauling materials, tools, or men to and from and on the job site; & Truck Driver Tenders

GROUP II: 2 or 3 Axles hauling more than 9 tons, but hauling less than 16 tons; A-Frame Winches; Fork Lifts over 6,000 lbs. cap.; 4-Axle Combination units; Hydrolifts or similar equipment when used for transportation purposes; & Winches

GROUP III: 2, 3 or 4 Axles hauling 16 tons or more; Dispatcher; 5-Axles or more combination units; Mechanics & Working Foreman; & Water Pulls

GROUP IV: Drivers on Oil Distributors; & Drivers on Semi-Lowboys when moving equipment

FOOTNOTES:

a. Employer contributes 6% of regular hourly rate to vacation pay credit for employee who has worked in business more than 5 years and 6% of regular hourly rate for employee who has worked in business less than 5 years; 7 paid holidays: New Year's Day; Memorial Day; Independence Day; Labor Day; Thanksgiving Day; Day After Thanksgiving; & Christmas Day
b. Paid Holiday: 4 Hours for Christmas Eve if holiday falls on Monday through Friday.
c. $51.00 per week per employee

WELDERS: Receive rate prescribed for craft performing operation to which welding is incidental.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a) (1) (ii)).

DECISION NO. MO82-4069

LABORERS CLASSIFICATION DEFINITIONS PETTIS COUNTY

GROUP 1 - Carpenter tenders; track men; wreckers (alterations or entire project); reinforcing rod carriers; all other general laborers
GROUP 2 - Plumber laborers; stonemasons tenders; air tool operators; sewer work; water lines; conduit pipe; drain tile & duct lines; batter board man or pipe & ditch work; pier hole men working below ground; vibrator man; scaleman; jackhammer; chipping hammer operators; material batch hopper man; spreader or screed man on asphalt machine; brush feeders on pulverizers; swinging scaffold; cement handlers (bulk or sack); laser beam man; chain or concrete saw
GROUP 3 - Plaster tenders; hod carriers; brick tenders; cutting torch & burner men; asphalt rakers; barco tamper; jackson or any similar tamps; power buggy operator; powderman; mastic kettlemen; sandblasting & gunnite nozzleman; head pipe layer on sewer work; men working in tunnels; head formsetters & stringline men; hot tar applicator

LABORES CLASSIFICATION DFFINTIONS SALINE COUNTY

GROUP 1 - Common labor; wire mesh handlers or setters, carpenter tender; trackmen; signalmen; salamander tenders; floor cleaners; landscape men; sod layers; wreckers (for alteration or entire projects)
GROUP 2 - Plumber laborers (conduit pipe, sewer work, drain tile & duct lines, digging & back filling); power tool operators; pier hole diggers (over 10 ft.); vibrator, jackhammer & chipping hammer operators; chain saw operators, concrete saw operators; brush feeders on pulverizers; reinforcing steel handlers; air tamp operators; ditch witch operators; swinging scaffolds; cutting torch or burner men; georgia buggies (self-propelled); fork lift, hoseman; insulation men
Group 3 - Fork lift (masonry); brick tenders; plasterer tenders; stone mason tenders; barco, Jackson or similar tamp operators; asphalt raker; powdermen; mastic hot kettlemen; sandblasting & gunite nozzle men; wagon & churn drill operators

CLASSIFICATION DEFINITIONS

POWER EQUIPMENT OPERATORS

GROUP I - Asphalt paver and spreader; asphalt plant mixer operator; asphalt plant operator; back fillers; backhoe; barber-greene loader; blade-power; boats-power; boilers (2); boring machines; cableways; cherry pickers; chip spreader; concrete ready-mixed plant, portable (job site); concrete mixer paver; crane-overhead; crusher, rock; derricks and derricks cars (power operated); ditching machines; dozers; dredges - any type power; grade-all - similar type; hoist, endless chain-power operated with power travel; loaders; mechanic and welder; mucking machine; orange peels; pumps - material; push cats; scoops; self-propelled rotary drill; shovel, power; side boom; skimmer scoop; testhole machine; throttle man

GROUP II - Boilers (1); Brooms - power operated; chip spreader (front man); clef plane operator; compressors (1) 125' or over; concrete saws, self-propelled); crab - power operated; curb finishing machine; firemen on rigs; flex plane; floating machine; form grader; greaser; hoist, endless chain - power operated; hopper - power operated; hydra hammer; lad-a-vator - similar type; rollers; siphons, jets, and jennies; sub-grader; tractors over 50 h.p.; compressors (2) 125' ft. or over not more than 20' apart; compressors-tandem; compressors single, truck mounted; elevator; finishing machine

GROUP III:
(a) Oilers
(b) Fork lift-masonry
(c) Oiler driver
(d) A-frame trucks; fork lift-all types (except masonry); mixers (w/side loaders); pumps (w/well points) dewatering systems, test or pressure pumps; tractors (except when hauling material) less than 50 h. p.

GROUP IV
Clamshells, 80 ft. of boom or over (inc. jib); crane or rigs, 80 ft. of boom or over (inc. jib); draglines, 80 ft. of boom or over (inc. jib); pile drivers, 80 ft. of boom or over (incl. jib)

GROUP V
Hoists-each additional drum over 1 drum

GROUP VI
Crane or rigs, over 200 ft. of boom

GROUP VII
Ready Mixed Concrete Plants:
(a) Crane operator
(b) Loader operator & plant man
(c) Conveyor operator

GROUP VIII
Master Mechanic

GROUP IX
Crane-tower or climbing

"Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a) (1) (ii))"

SUPERSEDEAS DECISION

STATE: Texas

COUNTIES: Bell, Bosque, Coryell, Falls, Hill & McLennan

DECISION NO.: TX82-4065

DATE: Date of Publication

Supersedes Decision No. TX82-4029 dated 6/18/82, in 47 FR 26552.

DESCRIPTION OF WORK: Building Projects (does not include single family homes & apartments up to & including 4 stories).

BUILDING CONSTRUCTION	Basic Hourly Rates	Fringe Benefits
ASBESTOS WORKERS:		
ZONE 1-Bell,Coryell,Falls	$15.20	2.94
ZONE 2-Bosque,Hill, McLennan	16.29	2.885

Tandem Axle or Semi-trailer	5.00	

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS (BUILDING CONSTRUCTION)
GROUP 1 - Heavy duty mechanic; Blade grader, self-propelled; Crawler dozers or loaders; Derricks, power operated (all types); Dragline, Cableway; Backhoe; Cranes, power operated (all types); Elevating grader, self-propelled; Hoist, motor driven two drums or more; Mixmobile; High-lifts and loaders, over 1/3 cu. yd. capacity; Winch truck; Locomotive; Mixer, 14 cu. ft. or over; Paving mixer (all sizes); Scraper; Trenching machine (all sizes); Gradall; Foundation boring machine; Scoopmobile; Shovel, power operated; Pump crete machine; Rock crusher operated on job; Well points including installations; Riding compactor; Forklift over 1500 lbs. capacity; Flat wheel rollers (60" & over); Pneumatic rollers (10 tons & above)
GROUP 2 - Blade grador, towed; Flex plane; Form grader; Mixer, less than 14 cu ft ; Pulsometer; Conventional truck crane driver and oiler; Combination man; Hoist, single drum; Pneumatic roller; High-lift and loaders, 1/3 cu. yd. or less; Forklift, 1500 lbs. capacity or less
GROUP 3 - Fireman
GROUP 4 - Oiler

SUPERSEDEAS DECISION

STATE: Wisconsin
DECISION NUMBER: WI82-2062
COUNTIES: Statewide
DATE: Date of Publication
Supersedes Decision Number WI82-2043 dated August 27, 1982, in 47 FR 38035
DESCRIPTION OF WORK: Highway and Airport Runway and Taxiway Construction (does not include bridges over navigable waters; tunnels; buildings in highway rest areas; and railroad construction)

LABORERS CLASSIFICATIONS
ZONES 1, 2, and 3

Group 1: Bituminous Workers (Shoveler, Loader, Utility Man); Demolition and Wrecking Laborer; Guard Rail Builder; Reinforcing Steel Setter (pavement); Stone Handler; Tree Trimmer; Landscaper; Multiplate Culvert Assembler; Conduit Layer; Unskilled Laborer

Group 2: Bituminous Workers (Dumper, Ironer, Smoother, Tamper); Batch Truck Dumper; Cement Handler; Concrete Handler

Group 3: Chain Saw Operator; Demolition Burning Torch Laborer; Joint Sawyer and Filler (pavement); Vibrator or Tamper Operator (mechanical, hand operated)

LABORERS CLASSIFICATIONS - ZONES 1, 2, and 3 (Cont'd)

Group 4: Air Tool Operator (hand operated)

Group 5: Strike Off Man

Group 6: Form Setter (curb, walk and pavement)

Group 7: Bituminous Worker (Raker and Luteman)

Group 8: Powderman, Blaster

ZONES 4 and 6

Group 1: Bituminous Workers (Dumper, Ironer, Smoother, Tamper, Shoveler, Loader, Utility Man); Strike Off Man; Joint Sawer or Filler (pavement); Concrete Handler; Demolition and Wrecking Laborer; Guard Rail Builder; Reinforcing Steel Setter (pavement); Stone Handler; Landscaper; Multiplate Culvert Assembler; Conduit Layer; Unskilled Laborer

Group 2: Tree Trimmer

Group 3: Air Tool Operator; Vibrator or Tamper Operator; Batch Truck Dump; Cement Handler; Form Setter (curb, walk and pavement)

Group 4: Bituminous Worker (Raker, Luteman); Chain Saw Operator; Demolition Burning Torch Laborer

Group 5: Powderman, Blaster

Group 6: Bituminous Worker (Raker, Luteman)

ZONE 5

Group 1: Bituminous Workers (Dumper, Ironer, Smoother, Tamper, Shoveler, Loader, Utility Man); Concrete Handler; Conduit Layer; Demolition and Wrecking Laborer; Guard Rail Builder; Joint Saw and Filler (pavement); Landscaper; Multiplate Culvert Assembler; Reinforcing Steel Setter (pavement); Stone Handler; Strike Off Man; Unskilled Laborer

Group 2: Tree Trimmer

Group 3: Air Tool Operator (hand operated); Batch Truck Dumper or Cement Handler; Vibrator or Tamper Operator, mechanical (hand operated)

Group 4: Chain Saw Operator; Demolition Burning Torch Laborer; Formsetter (curb, walk and pavement)

Group 5: Blaster, Powderman

Group 6: Bituminous Workers (Raker, Luteman)

[FR Doc. 82-34006 Filed 12-16-82; 8:45 am]
BILLING CODE 4510-27-C

POWER EQUIPMENT OPERATORS

Group 1: Automatic Subgrader; Bituminous Paver or Plant; Central Concrete Plant; Concrete Breaker (heavy); Concrete Mixer-Paver; Crane; Derrick; Dragline; Dredge; Excavator (Side Boom); Grader; Loading Machine (Conveyor); Mechanic or Welder (heavy duty equipment); Milling Machine; Percussion or Rotary Drilling Machine; Pile Driver; Placer-Spreader; Power Shovel; Screed (Bituminous Paver); Slipform Paver; Stabilizing Mixer (self-propelled); Steel Roller (over 5 tons); Tractor (Scraper, Dozer, Pusher, Loader, Endloader, Backhoe); Trench Machine Tube Finisher

Group 2: Concrete Mixer (less than 21 C.F.); Concrete Pump; Steel Roller (5 tons or less)

Group 3: Shouldering Machine

Group 4: Concrete Breaker (light); Concrete Spreader; Curing Machine; Finishing Machine; Launch; Mechanical Float; Roller (Pneumatic tired self-propelled); Subgrader (Form Paving); Tractor (light equipment); Tractor (towing Compactors and light equipment)

Group 5: Fireman; Environmental Burner

Group 6: Air Compressor; Curb Machine; Drilling or Boring Machine (heavy); Generator; Greaser (heavy equipment); Stump Chipper; Tank Car Heater

Group 7: Crusher or Screening Plant; Screed (Milling Machine)

Group 8: Oiler; Percussion or Rotary Drilling Machine Helper; Pump (over 3 inches)

TRUCK DRIVERS

Group 1: Truck Drivers, 2 axle - Mechanic Helper, Truck

Group 2: 3 or more axles, Euclids or Dumpster units

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii))

Part III

Office of Management and Budget

Cumulative Report on Rescissions and Deferrals

OFFICE OF MANAGEMENT AND BUDGET

Cumulative Report on Rescissions and Deferrals

December 1, 1982.

This report is submitted in fulfillment of the requirements of Section 1014(e) of the Impoundment Control Act of 1974 (Public Law 93–344). Section 1014(e) provides for a monthly report listing all budget authority for this fiscal year with respect to which, as of the first day of the month, a special message has been transmitted to the Congress.

This report gives the status as of December 1, 1982 of 20 deferrals contained in the first special message of FY 1983 transmitted to the Congress on October 1, 1982.

Deferrals (Attachment)

As of December 1, 1982, $584.3 million in 1983 budget authority was being deferred from obligation and another $7.9 million in 1983 obligations was being deferred from expenditure. The Attachment shows the history and status of each deferral reported during FY 1983.

Information From Special Message

The special message containing information on the deferrals covered by the cumulative report is printed in the **Federal Register** of:

Thursday, October 7, 1982 (Part V, Vol. 47, No. 195)

David A. Stockman,

Director.

BILLING CODE 3110-01-M

STATUS OF 1983 DEFERRALS

	Amount (In millions of dollars) *	
Deferrals proposed by the President	$ 598.8	
Routine Executive releases through December 1, 1982	-6.5	
Overturned by the Congress	0	
Currently before the Congress	$ 592.2	a

* Totals do not add due to rounding.

a This amount includes $7.9 million in outlays for a Department of the Treasury deferral (D83-16).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Presidential Documents

Title 3—

The President

Proclamation 5006 of December 16, 1982

World Communications Year 1983: Development of Communications Infrastructures

By the President of the United States of America

A Proclamation

The United Nations' General Assembly has proclaimed 1983 World Communications Year: Development of Communications Infrastructures. Its purpose is to stimulate accelerated worldwide development of communications infrastructures and to provide an opportunity for all countries to undertake an in-depth review and analysis of their policies on communications development.

Communications systems have taken on an increasingly vital role in every facet of economic, political, and social progress. While there have been remarkable advances in both this technology and its applications—ranging from health care, education, and banking transactions to weather observations and earth resource location—many nations have not been able to benefit appreciably from these capabilities.

Through partnership of United States private businesses, in cooperation with the International Telecommunication Union, we have an opportunity to promote the well-being of people around the globe. I encourage the United States communications industry—with its position of world leadership in this technology—to actively and voluntarily support this effort to stimulate the development of communications infrastructures in all nations.

NOW, THEREFORE, in keeping with the goals of the World Communications Year, I, RONALD REAGAN, President of the United States of America, do hereby proclaim 1983 as World Communications Year: Development of Communications Infrastructures, in the United States.

IN WITNESS WHEREOF, I have hereunto set my hand this 16th day of Dec., in the year of our Lord nineteen hundred and eighty-two, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Editorial Note: The President's remarks of December 16 on signing Proclamation 5006 are printed in the *Weekly Compilation of Presidential Documents* (vol. 18, no. 50).

Rules and Regulations

Federal Register
Vol. 47, No. 244
Monday, December 20, 1982

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 2

Revision of Delegations of Authority

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This document revises the delegations of authority from the Secretary of Agriculture and General Officers to correct citations of authority.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Robert L. Siegler, Deputy Assistant General Counsel, Office of the General Counsel, USDA, Washington, D.C., 20250, (202) 447-6035.

SUPPLEMENTARY INFORMATION: Section 1444(b) of the Agriculture and Food Act of 1981, Pub. L. 97–98 redesignated section 509 of the Rural Development Act of 1972, as amended, as section 508. The redesignated section, administered by the Commodity Credit Corporation, with the assistance of the Farmers Home Administration, provides for pilot projects for the production and marketing of industrial hydrocarbons and alcohols from agricultural commodities and forest projects. Accordingly, the delegations of authority to the Under Secretary for Small Community and Rural Development and the Administrator, Farmers Home Administration are revised to reflect the new citation.

In addition, Pub. L. 97–258 enacted into positive law title 31, United States Code. The Military Personnel and Civilian Employees Claims Act of 1964, as amended, formerly cited as 31 U.S.C. 240–243 is now cited as 31 U.S.C. 3721. Accordingly, the delegations of authority to the General Counsel, who is authorized to settle claims on behalf of the Department under the Act are revised to reflect the new citation.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect thereto are impractical and contrary to the public interest, and good cause is found for making this rule effective less than 30 days after publication in the **Federal Register**. Further, since this rule relates to internal agency management it is exempt from the provisions of Executive Order 12291. Finally, this action is not a rule as defined by Pub. L. 96–354, the Regulatory Flexibility Act, and thus is exempt from the provisions of the Act.

List of Subjects in 7 CFR Part 2

Authority delegations (Government agencies).

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Accordingly, Part 2, Subtitle A, Title 7, Code of Federal Regulations is amended as follows:

1. The authority citation for Part 2 reads as follows:

Authority: 5 U.S.C. 301 and Reorganization Plan No. 2 of 1953, unless otherwise noted.

Subpart C—Delegations of Authority to the Deputy Secretary, the Under Secretary for International Affairs and Commodity Programs, the Under Secretary for Small Community and Rural Development, and Assistant Secretaries

2. Section 2.23 is amended by revising paragraph (a)(15) to read as follows:

§ 2.23 Delegations of authority to the Under Secretary for Small Community and Rural Development.

(a) * * *

(15) Assist the Commodity Credit Corporation in administering section 508 of the Rural Development Act of 1972, as amended (7 U.S.C. 2668).

* * * * *

Subpart D—Delegations of Authority to Other General Officers and Agency Heads

3. Section 2.31 is amended by revising paragraph (b) to read as follows:

§ 2.31 Delegations of authority to the General Counsel.

* * * * *

(b) Determine, settle, and pay claims submitted by employees of the Department under the Military Personnel and Civilian Employees Claims Act of 1964, as amended (31 U.S.C. 3721).

* * * * *

Subpart I—Delegations of Authority by the Under Secretary for Small Community and Rural Development

4. Section 2.70 is amended by revising paragraph (a)(30) to read as follows:

§ 2.70 Administrator, Farmers Home Administration.

(a) * * *

(30) Assist the Commodity Credit Corporation in administering section 508 of the Rural Development Act of 1972, as amended (7 U.S.C. 2668).

* * * * *

Dated: December 13, 1982.

John R. Block,
Secretary of Agriculture.

Dated: December 15, 1982.

Frank W. Naylor, Jr.,
Under Secretary for Small Community and Rural Development.

[FR Doc. 82-34446 Filed 12-17-82; 8:45 am]
BILLING CODE 3410-01-M

Agricultural Marketing Service

7 CFR Part 905

[Orange, Grapefruit, Tangerine and Tangelo Reg. 6, Amdt. 18]

Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Limitation of Shipments

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This amendment establishes a total limitation of shipment regulation for fresh Florida oranges, grapefruit, tangerines, and tangelos during the period beginning at 6:00 p.m., e.s.t., December 22, 1982, and ending 12:01 a.m., e.s.t., December 28, 1982. The regulation is needed to assist in preventing the accumulation of excessive market supplies of the specified fruits during the Christmas

Holiday period specified, in which it is anticipated there will be a greatly reduced market demand.

EFFECTIVE DATE: 6:00 p.m., e.s.t., December 22, 1982.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities because it would not measurably affect costs for the directly regulated handlers.

This rule is issued under the marketing agreement, as amended, and marketing Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines and tangelos grown in Florida, hereinafter referred to collectively as the order. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based upon the recommendations and information submitted by the Citrus Administrative Committee established under the order and other available information. It is found that this action will tend to effectuate the declared policy of the act.

This amendment reflects the Department's appraisal of the marketing situation during the period immediately prior to the week in which Chrismas Day occurs and for the period immediately following. It is anticipated that shipments of fresh oranges, grapefruit, tangerines, and tangelos prior to Christmas Day will result in market supplies in excess of market needs. An accumulation of excessive quantities of any variety of citrus fruit in the markets during the period immediately prior to and following Christmas contributes to unstable marketing conditions. It is reported that, absent the shipping holiday, excessive shipments of the specified fruits would occur, causing an accumulation of these varieties of fruit in the market prior to and during the post-holiday period, a period in which there is a drop in consumer demand. Hence the curtailment of orange, grapefruit, tangerine and tangelo shipments, as hereinafter specified, would contribute to a better-managed supply situation and in turn to the establishment of orderly marketing.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this amendment is based and the effective date necessary to effectuate the declared purposes of the act. A reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this amendment effective at the time specified. Determination as to the need for, and extent of, regulation under § 905.52(a)(3) must await the development of the crop and the availability of information about market supplies and the demand for such fruits. The recommendation and supporting information for such regulation were promptly submitted to the Department after an open meeting of the committee, after notice to growers, shippers, and interested persons had been given, and all present were afforded an opportunity to submit information and views. Information regarding specifications of the regulation has been provided to shippers, and the regulation is identical with the recommendations of the committee. Compliance with the regulation will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective time.

List of Subjects in 7 CFR Part 905

Marketing agreements and orders, Florida, Grapefruit, Oranges, Tangelos, Tangerines.

PART 905—[AMENDED]

Accordingly, § 905.306 is amended by redesignating paragraph (d) as paragraph (e) and a new paragraph (d) is added to read as follows:

§ 905.306 Orange, grapefruit, tangerine and tangelo regulation 6.

* * * * *

(d) Notwithstanding the provisions of Table 1 in paragraph (a) of this section during the period beginning at 6:00 p.m., e.s.t., December 22, 1982, and ending at 12:01 a.m., e.s.t., December 28, 1982, no handler shall ship between the production area and any point outside thereof in the continental U.S., Canada, or Mexico, any oranges, grapefruit, tangerines, or tangelos, of the varieties or types, specified in paragraph (a) Table I of this section, grown in the production area.

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 14, 1982.

D. S. Kuryloski,

Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82-CEF-9-AD; Amdt. 39-4547]

Airworthiness Directives; DeHavilland Model DHC-6 Airplane

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which requires inspection and repair, as necessary, of the windscreen washer/deicer system and installation of a heated windscreen in DeHavilland Model DHC-6 airplanes certificated for flight into icing conditions. There have been a number of reported incidents of alcohol leakage in the crew compartment due to defective components of the windscreen washer/deicing system. In one such incident, an inflight fire occurred in the crew compartment. Installation of the heated windscreen eliminates the need for alcohol deicing of the windscreen. The required inspections of the windscreen washer/deicing system minimize the probability of alcohol leakage and resulting crew compartment fire until airplanes are modified.

EFFECTIVE DATE: December 27, 1982. Compliance: As prescribed in the body of the AD.

ADDRESSES: DeHavilland Service Bulletin No. 6/422, Revision A dated June 18, 1982, and DeHavilland Modification No. S.O.O. 6007, Issue 7, dated May 17, 1982, applicable to this AD may be obtained from DeHavilland Aircraft of Canada Limited, Garratt Blvd., Downsview, Ontario, Canada M3K 185. A copy of both the Service Bulletin and the Modification is contained in Rules Docket, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Peter Cuneo, Federal Aviation

Administration, Systems and Equipment Section, ANE–173, New York Aircraft Certification Office, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581. Telephone (516) 791–6427; or Paul Cormaci, Federal Aviation Administration, ACE–109, 601 E. 12th Street, Kansas City, Missouri 64106; Telephone (816) 374–6932.

SUPPLEMENTARY INFORMATION: There has been an incident of an inflight fire in the crew compartment and forward passenger area of a DeHavilland DHC–6 airplane. The fire occurred after the copilot had activated the windscreen washer/deicing switch and apparently resulted from ignition of isopropyl alcohol which leaked from windscreen washer/deicing system components located in the crew compartment. There have been a number of incidents of such leakage in U.S. registered DHC–6 airplanes.

To preclude recurrence the Canadian Minister of Transport issued an Airworthiness Directive, AD No. CF–82–20 dated July 7, 1982, which prohibits use of isopropyl alcohol in the windscreen/deicing system and requires installation of an electrically heated windscreen in accordance with DeHavilland Modification S.O.O. 6007. The Canadian AD allows until April 1, 1983, for accomplishment of the installation, during which time the airplanes may be operated with isopropyl alcohol as a deicing fluid with periodic washer/deicing system inspection, and if necessary repair in accordance with DeHavilland Service Bulletin No. 6/422, Revison A dated June 18, 1982.

Since the condition described herein is likely to exist or develop on other airplanes of the same type design, the FAA is issuing an AD applicable to DeHavilland Model DHC–6 airplanes. This AD will prohibit use of isopropyl alcohol in the windscreen washer/deicing system after November 30, 1983. It requires installation of an electrically heated windscreen in DHC–6 airplanes certificated for flight into icing conditions by this date and periodic inspection of the windscreen washer/deicing system in these airplanes until this installation is accomplished.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aircraft, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD.

DeHavilland: Applies to Model DHC–6 (serial numbers 1 through 709, 711 through 735, 737 through 753, 755 through 761, 763 through 779, and 791) airplanes which incorporate a windscreen washer/deicing system certificated in any category.

Compliance: Required as indicated unless already accomplished. To prevent leakage of isopropyl alcohol in the crew compartment and a possible crew compartment fire, accomplish the following:

(a) Within the next 25 hours time-in-service after the effective date of this AD, and each 200 hours time-in-service thereafter inspect the windscreen washer/deicing system for evidence of leaks in accordance with the Accomplishment Instructions of DeHavilland Service Bulletin S/B No. 6/422, Revision A dated June 18, 1982.

(1) Replace any defective components which could cause leaks and ensure that all tubing is secured in accordance with Accomplishment Instructions Step 3 and Step 6.

(b) On or before November 30, 1983

(1) Install a permanent placard having letters of ⅛-inch minimum height on or near the washer/deicing fluid tank filler which states "DO NOT USE ISOPROPYL ALCOHOL OR ISOPROPYL ALCOHOL MIXTURES."

(2) Install a placard having letters of ⅛-inch minimum height adjacent to the windscreen washer/deicing system switch which states "WASHER ONLY."

and operate the airplane in accordance with these placard limitations.

(3) On airplanes certificated for flight into icing conditions, install an electrically heated windscreen in accordance with DeHavilland Modification S.O.O. 6007, Issue 7 dated May 17, 1982.

(c) The inspections per paragraph (a) of this AD need not be accomplished when the placards required by paragraph (b) are installed.

(d) The airplane may be flown in accordance with Federal Aviation Regulation 21.197 to a location where this AD can be accomplished.

(e) An equivalent method of compliance with this AD may be used if approved by the Manager, New York Aircraft Certification Office, ANE–170, Federal Aviation Administration, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581, Telephone: (516) 791–6680.

This amendment becomes effective on December 27, 1982.

(Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Section 11.89 of the Federal Aviation Regulations (14 CFR 11.89))

Note: The FAA has determined that this regulation involves an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impractical for the Agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket identified under the caption "**ADDRESSES.**"

Issued in Kansas City, Missouri on December 9, 1982.

Murray E. Smith,

Director, Central Region.

14 CFR Part 39

[Docket No. 82–CEF–11–AD; Amdt. 39–4518]

Airworthiness Directives; Dornier Model DO28D–1 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), which requires repetitive inspections and modification of the ARC PA–500A autopilot actuator assembly installed in certain Dornier Model DO28D–1 airplanes. The PA–500A autopilot has demonstrated a gear box jamming problem which can result in restriction of control movement. The inspections or modification required by this AD will prevent limitation of control movement due to this condition.

DATES: December 27, 1982.

Compliance: As indicated in the body of the AD.

ADDRESSES: Dornier Service Bulletin 1069–2820, dated May 27, 1980, applicable to this AD may be obtained from Dornier GMBH, Sales and Service Department, D–8000 Munchen 66, POB 2160, Federal Republic of Germany. A copy of this information is also contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: C. Christie, Manager, Aircraft Certification Staff, AEU–100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, Brussels, Belgium or P. Cormaci, Manager, Foreign FAR 23

Section, ACE-109, Central Region, FAA, 601 East 12th Street, Kansas City, Missouri 64106; Telephone (816) 374-6932.

SUPPLEMENTARY INFORMATION: The FAA issued AD 76-04-03 applicable to certain Cessna model airplanes which incorporated the ARC PA-500A autopilot actuator because gear box jamming had been encountered on actuators installed in those airplanes. At that time the FAA was unaware that the ARC PA-500A actuators were also installed on Dornier Model DO228D-1 airplanes. The FAA has now found that the cited jamming problem may also occur on these components when installed on the Dornier DO28D-1 airplanes.

Since the FAA has determined that the unsafe condition described herein is likely to exist or develop in other airplanes of the same type design, an AD is being issued requiring modification of the ARC PA-500A autopilot actuators and an initial and repetitive inspection of the actuators until this modification is accomplished on Dornier DO28D-1 airplanes. Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD.

Dornier: Applies to Model DO28D-1 (Serial Nos. 4036, 4037, 4050, 4055 through 4058, 4303, 4306 through 4318, 4321 through 4325, 4331 and 4332) airplanes, certificated in any category, when equipped with ARC PA-500A autopilot actuators.

Compliance: Required as indicated, unless already accomplished.

To prevent restriction of control movement due to jamming of the ARC PA-500A actuator gear train, accomplish the following:

(a) Within the next 100 hours time-in-service after the effective date of this AD and thereafter at intervals not to exceed 100 hours time-in-service, inspect the ARC PA-500A actuator in accordance with Dornier Service Bulletin No. 1069-2820, dated May 27, 1980, which incorporates ARC Field Engineering Service Bulletin No. 181. Prior to further flight correct any unsafe condition noted by adjustment or replacement of parts as necessary.

(b) Within 12 months after the effective date of this AD, modify the ARC Model PA-500A actuator(s) in accordance with Dornier Service Bulletin No. 1069-2820, dated May 27, 1980, which incorporates ARC Field Engineering Service Bulletin No. 181.

(c) The inspections required by paragraph (a) of this AD may be discontinued when the modifications required in paragraph (b) of this AD have been accomplished.

(d) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(e) The intervals between repetitive inspections required by this AD may be adjusted up to 10 hours time-in-service to allow them to be accomplished concurrent with other scheduled maintenance on the airplane.

(f) An equivalent method of compliance with this AD may be used if approved by the Manager, Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Office, FAA, c/o American Embassy, Brussels, Belgium.

This amendment becomes effective on December 27, 1982.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR 11.89).

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "**ADDRESSES**" at the location identified.

Issued in Kansas City, Missouri, on December 9, 1982.

Murray E. Smith,

Director, Central Region.

14 CFR Part 39

[Docket No. 82-CE-35-AD; Amdt. 39-4519]

Airworthiness Directives; Cessna Models 335, 340 and 340A Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to certain Cessna Models 335, 340 and 340A airplanes which requires initial and repetitive inspections of the rudder balance weight rib for cracks and replacement if cracks are found. Reports of cracked rudder balance weight attachment ribs have been received. Should these cracks progress to failure of the rib and loss of the rudder balance weight during flight, flutter of this control surface may occur. This action will assure detection of these cracks prior to failure of the rudder balance weight rib and loss of the rudder balance weight.

DATE: Effective date: December 27, 1982.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Cessna Multi-engine Customer Care Service Information Letter ME 82-8, dated April 2, 1982, applicable to this AD, may be obtained from Cessna Aircraft Company, Marketing Division, Attention: Customer Service Department, Wichita, Kansas 67201; telephone (316) 685-9111. A copy of this Service Information Letter is also contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Lawrence S. Abbott, Aerospace Engineer, Aircraft Certification Office, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209; telephone (316) 269-7005.

SUPPLEMENTARY INFORMATION: Rudder balance weights on Cessna Models 335, 340 and 340A airplanes are secured to the rudder by a rib that is cantilevered forward from the rudder tip. There have been reports that cracks have developed in the weight attach rib which could, if allowed to propagate, result in separation of the balance weight from the airplane during flight and rudder flutter may result. Cessna issued Service Information Letter ME 82-8 dated April 2, 1982, which specifies initial and repetitive inspections of the rudder balance weight rib for cracks. If rib cracking is found, this Service Information Letter recommends installation of a new rib, Cessna P/N 5331004-2 before further flight. This modification improves the overall strength of the rudder balance weight attachment and will eliminate the cracking problem described above. Accordingly, since the unsafe condition described above is likely to exist or develop in rudder balance weight ribs

installed on other airplanes of the same type design, an AD is being issued applicable to certain Cessna Models 335, 340 and 340A airplanes making compliance mandatory with those provisions of Cessna Service Information Letter ME 82–8, which specify initial and repetitive inspections and modification if cracks are found.

The FAA has determined that there is an immediate need for a regulation to assure safe operation of the affected airplanes. Therefore, notice and public procedure thereon is impracticable and contrary to the public interest and good cause exists for making the amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD.

Cessna: Applies to Models 335 (S/N 335–0001 through 335–0065), 340 (S/N 340–0001 through 340–0555), and 340A (S/N 340A0001 through 340A1521) airplanes certificated in any category.

Compliance: Required as indicated, unless already accomplished.

To ensure structural integrity of the rudder balance weight rib, accomplish the following:

(a) Within the next 100 hours time-in-service after the effective date of this AD and each 100 hours time-in-service thereafter, remove the fiberglass rudder tip cap and visually inspect the original rudder balance weight rib, Cessna P/N 0831311–1, for cracks. If cracks are found, before further flight, install a new rudder balance weight rib Cessna P/N 5331004–2.

(b) After Cessna P/N 5331004–2 rudder balance weight rib has been installed, the inspections required by paragraph (a) of this AD may be discontinued.

(c) Aircraft may be flown, in accordance with Federal Aviation Regulation 21.197, to a location where the provisions of this AD can be accomplished.

(d) Any equivalent method of compliance with this AD must be approved by the Manager, Aircraft Certification Office, Federal Aviation Administration, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 269–7000.

Cessna Service Information Letter, ME 82–8 dated April 2, 1982, pertains to this subject.

This amendment becomes effective December 27, 1982.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR 11.89).)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption, "**ADDRESSES**" at the location identified therein.

Issued in Kansas City, Missouri, on December 10, 1982.

Murray E. Smith,

Director, Central Region.

14 CFR Part 71

[Airspace Docket No. 82–ANM–10]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the description of the Astoria, OR, transition area. A Standard Instrument Approach Procedure (SIAP) with Distance Measuring Equipment (DME) has been designated for Runway 13 at Astoria Airport. In order to provide controlled airspace for the approach, the current 700-foot transition area has been extended to provide adequate controlled airspace. Also, this alteration permits considerable reduction to the northwest extension of the control zone.

EFFECTIVE DATE: February 17, 1983.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

History

On October 4, 1982, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the description of the Astoria control zone (47 FR 43714). A new DME has been commissioned at Astoria. A VOR/DME instrument approach procedure is being designated for Runway 13. The new procedure requires extension of the present 700-foot Astoria transition area. This action permits more efficient use of that airspace, lowers the minimum altitudes, and aids flight planning. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were republished in Advisory Circular AC 70–3 dated January 29, 1982.

Rule

This amendment to Part 71 of the Federal Aviation Regulations amends the current 700-foot transition at Astoria Airport, OR, in order to provide controlled airspace for the approach to Runway 13. This alteration permits considerable reduiction to the northwest extension of the control zone.

List of Subjects in 14 CFR Part 71

Transition areas, Control zones, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, §§ 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) are amended, effective 0901 G.m.t., February 17, 1983, as follows:

§ 71.171 [Amended]

Astoria, OR [Revised]

Within a 5-mile radius of the Clatsop County Airport, Astoria, OR, (lat. 46°09'31" N., long. 123°52'42" W.); and within 2 miles each side of the Astoria VOR 268° radial, extending from the 5-mile radius zone to 8 miles west of the VOR.

§ 71.181 [Amended]

Astoria, OR [Revised]

That airspace extending from 700 feet above the surface within a 5-mile radius of the Clatsop County Airport, Astoria, OR, (lat. 46°09'31" N., long. 123°52'42" W.); within 4.5 miles north and 9.5 miles south of the Astoria VOR 268° radial, extending from the 5-mile radius area to 18.5 miles west of the VOR, excluding the portion within a 2-mile radius of the Seaside State Airport (lat. 46°01'00" N., long. 123°54'15" W.); within 4.5 miles northeast and 9.5 miles southwest of the Astoria VOR 326° radial, extending from the 5-mile radius area to 24.5 miles northwest of the VOR; and within an 18.5-mile radius arc of the Astoria VOR/DME extending clockwise from the 326° radial to the 039° radial.

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), and 1510); Executive Order 10854 (24 FR 9565); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on December 10, 1982.

B. Keith Potts,

Manager, Airspace and Air Traffic Rules Division.

14 CFR Part 71

[Airspace Docket No. 82-ASW-66]

Designation of Transition Area; Covington, LA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will designate a transition area at Covington, LA. The intended effect of the amendment is to provide controlled airspace for aircraft executing a new instrument approach procedure to the Richard Privette Airport. This amendment is necessary since there is a proposed standard instrument approach procedure (SIAP) to the Richard Privette Airport using the Picayune VORTAC. Coincident with this action, the airport is changed from visual flight rules (VFR) to instrument flight rules (IFR).

EFFECTIVE DATE: February 17, 1983.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stephenson, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, telephone (817) 624-4911, extension 302.

SUPPLEMENTARY INFORMATION:

History

On October 18, 1982, a notice of proposed rulemaking was published in the **Federal Register** (47 FR 46296) stating that the Federal Aviation Administration proposed to designate the Covington, LA, transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. Comments were received without objections. Except for editorial changes, this amendment is that proposed in the notice.

List of Subjects in 14 CFR Part 71

Control zones, Transition areas, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71, § 71.181, of the Federal Aviation Regulations (14 CFR Part 71) as republished in Advisory Circular AC 70-3 dated January 29, 1982, is amended, effective 0901 G.m.t., February 17, 1983, as follows:

Covington, LA New

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Richard Privette Airport (latitude 30°26'40" N., longitude 89°59'20" W.) and within 2 miles each side of the 243° radial of the Picayune VORTAC extending from the 5-mile radius area to 7 miles northeast of the airport.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c).)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Excutive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procadures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Fort Worth, TX, on December 8, 1982.

F. E. Whitfield,

Acting Director, Southwest Region.

[FR Doc. 82-34236 Filed 12-17-82; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 10

[Docket No. R-82-1064]

Rulemaking: Policy and Procedures

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: This final rule removes from the Code of Federal Regulations references to the Final Report on Improving Government Regulations. This report was instituted pursuant to Executive Order 12044, which has been revoked.

EFFECTIVE DATE: Upon expiration of the first period of 30 calendar days of continuous session of Congress after publication, but not before further notice of the effective date is published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Grady J. Norris, Assistant General Counsel for Regulations, Room 10278, Department of Housing and Urban Development, 451 7th Street, SW, Washington, D.C. 20410, telephone (202) 755-7055. [This is not a toll-free number.]

SUPPLEMENTARY INFORMATION: Pursuant to Executive Order 12044, March 24, 1978, each Executive Agency was required to publish in the **Federal Register** a Report on Improving Government Regulations. Executive Order 12044 was revoked on February 19, 1981, by Executive Order 12291 "Federal Regulation". The Report sets forth the former procedures for processing regulations which are outdated under the present system. Because the Report on Improving Government Regulations is no longer required, reference to it should be removed from the Code of Federal Regulations.

The subject matter of this rulemaking action relates to departmental procedure and is therefore exempt from the notice and public comment requirements of Section 553 of the Administrative Procedure Act.

This rule does not constitute a "major rule" as that term is defined in Section 1(b) of the Executive Order on Federal Regulation issued by the President on February 17, 1981. The rule does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3)

have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

An environmental assessment, which is made routinely in accordance with HUD regulations in 24 CFR Part 50, pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, is unnecessary because this rule is clearly unrelated to environmental concerns and is considered to have no potential for significantly affecting the quality of the human environment.

Pursuant to the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities because it pertains only to administrative Departmental procedure.

This rule is listed at 47 FR 48431 as item S–6–82 in the Department's Semiannual Agenda of Regulations published on October 28, 1982, pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

List of Subjects in 24 CFR Part 10

Policy and procedures.

PART 10—[AMENDED]

§ 10.1 [Amended]

Accordingly, 24 CFR Part 10 is amended by removing from § 10.1 the last two sentences which refer to the Final Report on Improving Government Regulations.

(Sec. 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d))

Dated: December 14, 1982.

Samuel R. Pierce, Jr.,

Secretary, Housing and Urban Development.

[FR Doc. 82–34428 Filed 12–17–82; 8:45 am]

BILLING CODE 4210–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 52 and 81

[EPA Action 941; A–7–FRL 2216–4]

Approval and Promulgation of Implementation Plans and Designation of Areas for Air Quality Planning Purposes: State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: Section 107(d) of the Clean Air Act, as amended, provides for the designation of areas as either attainment, nonattainment, or unclassified with respect to the national ambient air quality standards. In today's action, EPA is redesignating Columbia, Missouri, from nonattainment to attainment with regard to the secondary standard for total suspended particulates (TSP).

DATE: This action will be effective February 18, 1983, unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of EPA's technical evaluation are available for inspection during normal business hours at the following locations: Air Branch, Environmental Protection Agency, 324 East 11th Street, Kansas City, Missouri 64106; Public Information Reference Unit, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460; Missouri Department of Natural Resources, 1101 Rear Southwest Boulevard, Jefferson City, Missouri 65102.

FOR FURTHER INFORMATION CONTACT: Wayne G. Leidwanger at (816) 374–3791 (FTS 758–3791).

SUPPLEMENTARY INFORMATION: In response to Section 107(d) of the Clean Air Act, as amended, EPA and the State of Missouri have designated all areas of the state as attaining the national ambient air quality standards, not attaining the standards, or having insufficent data to make a determination. An attainment area is one in which the air quality does not exceed the standards. A nonattainment area is one in which the air quality is worse than the standards. An unclassified area is one for which there are insufficient data to determine whether the area is attainment or nonattainment. At 40 CFR Part 81, Subpart C, the areas of the state which are nonattainment for one or more pollutants are identified.

On March 3, 1978, at 43 FR 8962, Columbia, Missouri, was designated nonattainment with respect to the secondary TSP standard. In order for EPA to redesignate an area from nonattainment to attainment for TSP, there must be at least eight consecutive quarters of valid air quality data showing that the air quality does not exceed the standard. (If there is an emission control strategy which demonstrates that legally enforceable emission reductions have contributed to improved air quality, less than eight consecutive quarters of air quality data may be used for redesignating an area from nonattainment to attainment. However, the state did not agree with the original designation of Columbia and did not develop a plan to attain the standard. Therefore, this provision does not apply.)

EPA now has ambient air quality data which show that Columbia is in attainment of the secondary TSP standard. There have been no violations of the standard within the past eight consecutive quarters. Therefore, EPA is redesignating Columbia as attainment with respect to total suspended particulates.

In today's action, EPA is also clarifying the applicability of the state's permitting rules to Columbia. On June 22, 1982, at 47 FR 26833, EPA generally approved Missouri's rules involving the prevention of significant deterioration (PSD) and new source review in nonattainment areas. Because the state had not designated Columbia nonattainment, EPA took no action on the state's permitting rules insofar as they pertained to Columbia. With this redesignation, the attainment area (PSD) new source review regulations of the state will be applicable in Columbia.

The public is advised that this action will be effective 60 days from the date of the Federal Register notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by sixty days from today. This action may not be challenged later in proceedings to enforce its requirements [See sec. 307(b)(2)].

Under 5 U.S.C. 605(b), the Administrator has certified that redesignations do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

List of Subjects in 40 CFR Parts 52 and 81

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, National parks, Wilderness areas.

(Sec. 107 of the Clean Air Act, as amended)

Dated: December 1, 1982.

Anne M. Gorsuch,

Administrator.

PART 81—DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

1. Title 40, Part 81, Subpart C, of the Code of Federal Regulations is amended as follows:

§ 81.326 [Amended]

In § 81.326 in the table Missouri—TSP under Northern AQCR (137), remove the entire entry for Columbia:

* * * * *

Columbia city limits . . . 'X . . .

* * * * *

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

2. In § 52.1320, paragraph (c)(37) is revised to read as follows:

§ 52.1320 Identification of plan.

* * * * *

(c) * * *

(37) On April 15, 1982, the State of Missouri submitted a new Rule 10 CSR 10–6.060, Permits Required, and amendments to Rule 10 CSR 10–6.020, Definitions, involving the review and permitting of new sources of air pollution. Included in the plan are provisions relating to the attainment area (PSD) new source review. No action is taken on the rules insofar as they pertain to the New Madrid TSP nonattainment area. Also included in the plan are provisions relating to new source review in the other nonattainment areas in the state.

[FR Doc. 82-34420 Filed 12-17-82; 8:45 a.m.]

BILLING CODE 6560-50-M

---

40 CFR Part 61

[A-3-FRL 2267-3]

National Emission Standards for Hazardous Air Pollutants; Delegation of Authority to Allegheny County, Pennsylvania

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Allegheny County Health Department has requested the delegation of authority to implement and enforce the National Emission Standards for Hazardous Air Pollutants (NESHAP) program for asbestos and mercury only. Section 112(d)(1) of the Clean Air Act requires the Administrator to delegate this authority to any agency which submits an adequate procedure. Therefore, on September 27, 1982, authority for the NESHAP program for asbestos and mercury in Allegheny County was delegated. This rulemaking provides notice of this action and amends 40 CFR 61.04, Address, to reflect this delegation. This Section is also being amended to reflect a new address for Philadelphia's Air Management Services, which has already been delegated NESHAP authority.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Gregory Ham, (215) 597–2745, EPA Region III, Curtis Building, 6th and Walnut Streets, Philadelphia, PA 19106.

SUPPLEMENTARY INFORMATION: National Emission Standards for Hazardous Air Pollutants (NESHAP) have been promulgated by the Administrator under 40 CFR Part 61 for four pollutants: Beryllium, Asbestos, Mercury, and Vinyl Chloride. Section 112(d)(1) directs the Administrator to delegate authority to implement and enforce the standards to any agency which submits an adequate procedure. Nevertheless, the Administrator retains concurrent authority to implement and enforce the standards following delegation of authority to a State or local agency.

On September 24, 1982, the Director of the Allegheny County Health Department (ACHD), and the Allegheny County Commissions jointly requested the delegation of authority for the NESHAP program for asbestos and mercury only. ACHD has determined that standards for Beryllium and Vinyl Chloride would not currently apply to any sources in the County, and therefore did not request delegation at this time.

The Director of the Air and Waste Management Division has determined that the ACHD procedure for implementing and enforcing the standards is adequate. Pursuant to authority delegated to him by the Administrator, the Air and Waste Management Division Director notified the Director of the Health Department on September 27, 1982 that authority to implement and enforce the standards for asbestos and mercury was delegated to the Allegheny County Health Department. The letter approved the delegation and outlined the conditions of it. A ten day response period was provided during which the Director of the Health Department or any other representative could present objections to the conditions of the delegation. No responses were received during this period. Therefore, this delegation is final.

Copies of the request for delegation of authority are available for public inspection at the Environmental Protection Agency, Region III, Curtis Building, 6th & Walnut Streets, Philadelphia, Pennsylvania, 19106.

Effective immediately, all reports required pursuant to the emission standards for hazardous air pollutants (asbestos and mercury only) should be submitted to the Allegheny County Health Department, Bureau of Air Pollution Control, 301 Thirty-ninth Street, Pittsburgh, Pa., 15201, with copies to the Director, Air and Waste Management Division, at the EPA address above. The amended *§ 61.04, Address,* which adds the address of the Bureau (to which all reports, requests, applications, submittals, and communications to the Administrator pursuant to this part must be addressed), is set forth below.

In addition, § 61.04 is being amended to reflect a new address for Philadelphia's Air Management Services (AMS). AMS has moved to a new address since delegation of authority for NESHAP occurred.

The Administrator finds good cause for foregoing prior public notice and for making this rulemaking effective immediately because it is an administrative change and not one of substantive content. No additional burdens are imposed on the parties affected. The delegation which is reflected by the Administrative amendment was effective on September 27, 1982, and it serves no purpose to delay this change of address in the Code of Federal Regulations.

(Sec. 112 of the Clean Air Act, as amended, 42 U.S.C. 7412.)

The Office of Management and Budget has exempted this rulemaking from requirements of Executive Order 12291.

List of Subjects in 40 CFR Part 61

Air pollution control, Asbestos, Beryllium, Hazardous materials, Mercury, Vinyl chloride.

Dated: November 23, 1982.

Stanley L. Laskowski,

Acting Regional Administrator.

PART 61—[AMENDED]

Part 61 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

1. In § 61.04 paragraph (b) (NN) is revised to read as follows:

§ 61.04 Address

* * * * *

(b) * * *

(NN) (i) City of Philadelphia: Philadelphia Department of Public Health, Air Management Services, 500 S. Broad Street, Philadelphia, Pennsylvania 19146.

(ii) Commonwealth of Pennsylvania: Department of Environmental Resources, Post Office Box 2063, Harrisburg, Pennsylvania, 17120

(iii) Allegheny County: Allegheny County Health Department, Bureau of Air Pollution Control, 301 Thirty-ninth Street, Pittsburgh, Pennsylvania, 15201.

* * * * *

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. 6461]

National Flood Insurance Program; Change in Format of Newspaper Notices and Final Rules

AGENCY: Federal Emergency Management Agency.

ACTION: Rule related notice.

SUMMARY: The Federal Emergency Management Agency (FEMA) gives notice that the format and content of information in newspaper notices and final rules of base flood elevation determinations is changed.

This action is precipitated by the basic informational context, the duplicative nature, and the ever-increasing cost of these publications for the National Flood Insurance Program (NFIP). Proposed rules for base flood elevation determinations remain unchanged. These publications are made under 44 CFR Part 67.

EFFECTIVE DATE: On December 20, 1982, and there after, all part 67 newspaper notices and final rules sent for publication will be in the changed format.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0270.

SUPPLEMENTARY INFORMATION: On August 4, 1982, at 47 FR 33721-33722, FEMA gave notice of its intent to reduce the size of or eliminate identified notices and regulations of the National Flood Insurance Program under 44 CFR Parts 64, 65, 67 and 70. A proposed rule for the elimination of **Federal Register** publications under 44 CFR Parts 64, 65 and 70 will be published separately with a discussion of comments received during the comment period. No comments were received on the format and content changes intended for Part 67 newspaper notices and final rules. The format and content of Part 67 publications in local newspaper and the **Federal Register** do not require a proposed rule to effect changes. After allowing a suitable period for comments and having received none, FEMA is providing this notice that the change in format and contents of Part 67 newspaper notices and final rules is in effect.

Under Part 67 a notice of proposed flood elevation determination for a community is published in the community's local newspaper. In the past, this notice has contained a "table of elevations" which lists the proposed base flood elevation at selected locations along flood sources. However, this table of elevations can only give a very restricted view of the flood hazard determination. The clearest view is given by the preliminary Flood Insurance Study and Flood Insurance Rate Map which are provided to the community for citizen review and inspection prior to the newspaper publications. In order to encourage more meaningful review of these materials, the table of elevations will be deleted and in its place FEMA will list the community's flood sources studied in detail, the range of the base flood elevations within the community for each flood source and will provide the address in the community where the study and maps can be reviewed. The table of elevations will continue to be published for each community in the **Federal Register** publication of the proposed flood elevation determinations and copies of it will be provided to the community and State.

The table of elevations will also be deleted from the format of the final flood elevation determination rules published in the **Federal Register** under Part 67 when no appeal of the proposed base flood elevations has been made. The final rule will list those communities whose proposed determinations are being finalized and will list the address in each community where proof copies of the Flood Insurance Study and Flood Insurance Rate Map are available for review. Final rules under Part 67 will be published in the **Federal Register** at least monthly showing all communities whose elevations have been finalized since the previous publication. Communities' final rules will contain the table of elevations when an appeal under Part 67 of the proposed determinations has been filed.

The formats which will be used for the newspaper notice and final rules under Part 67 are as follows:

Newspaper Notice

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations shown in your community's preliminary Flood Insurance Study and Flood Insurance Rate Map. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the community.

ADDRESSES: Study and maps showing the proposed base flood elevations and their delineation are available for review at

Send comments to

FOR FURTHER INFORMATION CONTACT: Dr. Brian Mrazik, Federal Emergency Management Agency, National Flood Insurance Program, (202) 287-027, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood

elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

Lessees and owners of real property in (community name) are encouraged to review the preliminary Flood Insurance Study and Flood Insurance Rate Map available at the address cited above. Proposed base flood elevations along flood sources studied in detail are shown on the flood profiles in the Study. The flood sources studied in detail are:

Source of flooding	Range of base flood elevations, # depth in feet above ground. * Elevation in feet (NGVD)

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Base (100-year) flood elevations are finalized for the communities listed below.

The base 100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik; Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the Federal Register for each community listed.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal the proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12291, so no regulatory analyses have been prepared. It does not involve any collection of information for purposes of The Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The base (100-year) flood elevations are finalized in the communities listed below. Appeals of the proposed base flood elevations were received and have been resolved by the agency.

State	City town/county	Map repository address	Date of publication of proposed rule

The base (100-year) flood elevations are finalized in the communities listed below. Appeals of the proposed base flood elevations were received and have been resolved by the Agency.

State	City/town/county	Source of Flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director)

Issued: November 30, 1982.

Acting Associate Director, State and Local Programs and Support.

[FR Doc. 82-34378 Filed 12-17-82; 8:45 am]

BILLING CODE 6718-03-M

44 CFR Part 70

[Docket No. FEMA-5909]

Letter of Map Amendment for Dade County, Fla.; Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included Dade County, Florida. It has been determined by the Associate Director, State and Local Programs and Support after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for Dade County, Florida, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(b):

Map Number H & I 125098, Panel 0375 D published on October 6, 1980 in 45 FR 66058 indicates that the property at 24040 S.W. 142 Avenue in Section 22, Township 56 South, Range 39 East, in Dade County, Florida, recorded in Deed Book 259 at Page 239 of the Public Records of Dade County, is located within the Special Flood Hazard Area.

Map Number H & I 125098, Panel 0375 D is hereby corrected to reflect that the above-mentioned property is not within the Special Flood Hazard Area identified on November 14, 1980. The existing structure is located in Zone C.

The map amendments listed below are in accordance with § 70.7(b):

Map Number H & I 125098, Panel 0275 D published on October 6, 1980 in 45 FR 66058 indicates that 10221 S.W. 88th Avenue in Dade County, Florida, also known as Lot 16 of Block 1 in Galloway Glen, recorded in Plat Book 108, Page 54 of the Public Records of Dade County, is located within the Special Flood Hazard Area.

Map Number H & I 125098, Panel 0275 D is hereby corrected to reflect that the structure on the above-mentioned property is not within the Special Flood inundated by a flood having a one-percent chance of occurrence in any given year.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

44 CFR Part 70

[Docket No. FEMA-6116]

Letter of Map Amendment for Martin County, Fla.; Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included Martin County, Florida. It has been determined by the Associate Director, State and Local Programs and Support after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for Martin County, Florida, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethedsda, Maryland 20034, Phone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(b):

Map Number H & I 120161, Panel 0170 B published on July 22, 1981 in 46 FR 37654 indicates that portions of the Plat Numbers 1, and 4 of Sailfish Point Subdivision, as recorded in Plat Book 8,

Pages 10, and 88, respectively, Public Records of Martin County, Florida, are located within the Special Flood Hazard Area.

Map Number H & I 120161, Panel 0170 B is hereby corrected to reflect that Lots 1, 2, 4, 6, 10 through 13, 17, 19, 20, 22 through 35 of Plat No. 1, and Lots 1 through 38 of Plat No. 4, are not within the Special Flood Hazard Area identified on June 15, 1981. The lots are located in Zone B.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

[Docket No. FEMA-6237]

Letter of Map Amendment for Pasco County, Fla.; Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included Pasco County, Florida. It has been determined by the Associate Director, State and Local Programs and Support after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for Pasco County, Florida, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, National Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638-6620.

Map amendments listed below are in accordance with § 70.7(b):

Map Number H & I 120230, Panel 0195 B published on January 25, 1982 in 47 FR 3355 indicates that Lot Number 10, Crane's Roost Unit One, in Pasco County, Florida, as recorded in Plat Book 20, Pages 86 and 87 of the Public Records of Pasco County, Florida, is located within the Special Flood Hazard Area.

Map Number H & I 120230, Panel 0195 B is hereby corrected to reflect that those portions at or above 20 feet National Geodetic Vertical Datum (NGVD) are not within the Special Flood Hazard Area identified on November 18, 1981. Those portions of the property are located in Zone C. However, portions of the lot would still be partially inundated by the base flood.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

Letter of Map Amendment for Pinellas County, Fla.; Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included Pinellas County, Florida. It has been determined by the Associate Director, State and Local Programs and Support after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for Pinellas County, Florida, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to

purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(b):

Map Number H & I 125139 B, Panel 09 published on October 6, 1980 in 45 FR 66060 indicates that Cypress Trace-Phase 1, a subdivision of a part of the Southeast ¼ of the Southwest ¼ of Section 33, Township 28 South, Range 16 East, Safety Harbor, Florida, recorded in Plat Book 73, Pages 95 through 97 in the Pinellas County Circuit Court Clerk's Office, is located within the Special Flood Hazard Area.

Map Number H & I 125139 B, Panel 09 is hereby corrected to reflect that the above-mentioned property is not within the Special Flood Hazard Area identified on July 8, 1977. The property is located in Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

Letter of Map Amendment for the Unincorporated Area of Prince Georges County, Md.; Under National Flood Insurance Program; Map Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule, map correction.

SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps were published identifying Special Flood Hazard Areas. This list included the Unincorporated Area of Prince Georges County, Maryland. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the Unincorporated Area of Prince Georges County, Maryland, that a certain structure is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject structure is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that structure as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638–6620 toll free.

The Map amendments listed below are in accordance with § 70.7(b):

Map No. 245208, Panel No. 0205B, published on October 6, 1980, in 45 FR 66039, indicates that the existing structure located on Lot No. 21, Block N, Section Six, Rosecroft Park, Unincorporated Area of Prince Georges County, Maryland, as recorded in Plat Book 50, Page 43, in the Office of the Clerk of the Circuit Court of Prince Georges County, Maryland, is located within the Special Flood Hazard Area.

Map No. 245208, Panel No. 0205B, is hereby corrected to reflect that the existing structure located on the above-mentioned property is not within the Special Flood Hazard Area identified on July 19, 1982. The structure is in Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated Special Flood Hazard Areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

Letter of Map Amendment for the Township of Woodbridge, New Jersey; Under National Flood Insurance Program; Map Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule, map correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the Township of Woodbridge, New Jersey. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the Township of Woodbridge, New Jersey that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Frank Petrone, Federal Emergency Management Agency, 26 Federal Plaza, New York, New York 10278, 212-264-8980.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone; (800) 638-6620.

The map amendments listed below are in accordance with § 70.7(b):

Map No. H&I 345331 Panel 01B, published on October 6, 1980 in 45 FR 66031, indicates, that the existing structure located on the property commonly known as Lot 2, Block 498-A, recorded in Book 2021 of Deeds at page 569, located in the Surrogate's office of Middlesex County, New Jersey, is located within the Special Flood Hazard Area.

Map No. H&I 345331 Panel 01B, is hereby corrected to reflect that the above mentioned structure is not within the Special Flood Hazard Area identified on April 30, 1976. This structure is in Zone B.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the

Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

[Docket No. FEMA-5909]

Letter of Map Amendment for Beaufort County, South Carolina; Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included Beaufort County, South Carolina. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for Beaufort County, South Carolina, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP). P.O. Box 34294, Bethesda, Maryland 20034, phone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(b):

Map Number H & I 450025, Panel 05 published on October 6, 1980 in 45 FR 66070 indicates that Lots 46, 47 and a portion of Lot 48, W.D. Walsh Subdivision, in Beaufort County, South Carolina, as shown on a plat by R.D. Trogdon, Sr., dated February 27, 1956 and recorded in the Office of the Clerk of Court for Beaufort County in Plat Book 10 at Page 37, are located within the Special Flood Hazard Area.

Map Number H & I 450025, Panel 05 is hereby corrected to reflect that the existing structure on Lot 46 of the above-mentioned property is not within the Special Flood Hazard Area identified on September 30, 1977. The structure is located in Zone B. However, portions of the subdivision would still be inundated by a flood having a one-percent chance of occurrence in any given year.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

[Docket No. FEMA-6116]

Letter of Map Amendment for the City of Converse, Texas; Under National Flood Insurance Program; Map Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule, map correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Converse, Texas. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Converse, Texas, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be

obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(b):

Map No. H & I 480038 Panel 0001B, published on July 22, 1981, in 46 FR 37655, indicates that Lots 14, 15, and 29 through 33, Block 2, Cimarron Valley, Unit 6, Converse, Texas, as recorded in Book 9100, Page 215 of Deeds and Plats, in the Office of the Clerk, Bexar County, Texas, are located within the Special Flood Hazard Area.

Map No. H & I 480038 Panel 0001B is hereby corrected to reflect that the existing structures located on the above-mentioned property are not within the Special Flood Hazard Area identified on June 15, 1981. These structures are in Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

44 CFR Part 70

[Docket No. FEMA-6452]

Letter of Map Amendment for the City of El Paso, Texas, Under National Flood Insurance Program; Map Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule, map correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of El Paso, Texas. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of El Paso, Texas, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(b):

Map No. 480214 Panel 0021B, published on November 9, 1982, in 47 FR 52160, indicates that the North 33 feet of Lot 31, Block 4, Willowlane and the North 33 feet of the West 10 feet of Lot 32, Block 4, Willowlane, Unit Two, El Paso, Texas, as recorded in Volume 51, Page 22 and Volume 55, Page 40, of Plat Records, in the Office of the Clerk, El Paso County, Texas are located within the Special Flood Hazard Area.

Map No. 480214 Panel 0021B is hereby corrected to reflect that the existing structure located on the above-mentioned property is not within the Special Flood Hazard Area identified on October 15, 1982. This structure is in Zone B.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 1 and 87

[FCC 82-525]

Amendment To Provide a Temporary Operating Authorization Procedure for Aircraft Stations in the Aviation Services

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document provides a new procedure for the temporary licensing of aircraft radio stations. This action was initiated by the FCC in order to allow new aircraft operators to utilize their radios sooner than now possible and to reduce the number of Special Temporary Authority requests required to be processed by the agency's staff.

EFFECTIVE DATE: June 1, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Robert H. McNamara, Private Radio Bureau, (202) 632–7175.

SUPPLEMENTARY INFORMATION:

List of Subjects

47 CFR Part 1

Administrative practice and procedure, Radio.

47 CFR Part 87

General aviation, Radio.

Order

Adopted: December 2, 1982.

Released: December 9, 1982.

In the matter of amendment of Parts 1 and 87 of the rules to provide a temporary operating authorization procedure for aircraft stations in the Aviation Services, FCC 82–525.

1. This Order amends the Commission's rules to provide an improved procedure for the temporary licensing of aircraft stations in the Aviation Services.

Background

2. The Commission has adopted temporary licensing procedures in a number of radio services.[1] Such temporary licensing procedures have benefited the public by allowing applicants to begin radio operations sooner, without lessening the Commission's ability to determine if the applicant is qualified to be a permanent licensee. In some instances the Commission has also benefited from the implementation of temporary licensing procedures due to a marked reduction in the number of special temporary authority (STA) requests which are handled on a case-by-case basis.

3. Under existing licensing procedures in the Aviation Service, there is a limited device available for the temporary licensing of certain aircraft stations. Radio stations on new aircraft or aircraft with new radio installations may operate for 60 days when an FCC Form 453–B is executed by the manufacturer or dealer and mailed to

[1] See: Personal Radio Service—Order, FCC 76–320, released April 13, 1976, 41 FR 15849. Maritime Radio Service—Order, 70 FCC 2d 863, released January 11, 1979, 44 FR 5288, Errata, 44 FR 8878. Restricted Radiotelephone Operator Permit—Order, 71 FCC 2d 1214, Released May 10, 1979, 44 FR 29067. Business Radio Service—Report and Order, PR Docket No. 79–338, 81 FCC 2d 373 released September 4, 1980, 45 FR 59881, aff'd *Sub nom. Telocator Network of America* v. *FCC*, No. 80–2182 (D.C. Cir., August 19, 1981). Specialized Mobile Radio Systems—Report and Order, PR Docket No. 79–335, released April 6, 1982, 47 FR 17830.

the Commission with the application for a new aircraft station license (FCC Form 404). However, many applicants for a new aircraft radio station license are not eligible to utilize the Form 453–B. Therefore, the advantages of temporary licensing are not available to many aircraft operators.

New Procedure

4. We believe that a temporary licensing procedure similar to such procedures available in other radio services would benefit the aviation public by allowing all aircraft operators an opportunity to begin radio operations sooner than now possible. Additionally, the Commission will benefit from a reduction of staff hours necessary to process STA requests (which should be nearly eliminated for aircraft stations). These benefits can be achieved without lessening the Commission's ability to determine whether an applicant is qualified to be a permanent licensee. Therefore, we are amending the rules to adopt the temporary licensing procedure for aircraft stations, described below. We are also eliminating FCC Form 453–B and adding new Form 404–A[2] (Temporary Aircraft Radio Station Operating Authority) which will be attached to Form 404 (Application for Aircraft Radio Station License) for the convenience of the public.

5. The procedure to be used in obtaining a temporary aircraft station authorization will be as follows:

(a) The applicant completes and mails to the Commission an application for an aircraft radio station license (FCC Form 404).

(b) At the same time, the applicant may complete an FCC Form 404–A (attached to the Form 404) certifying that the applicant:

—Is not the representative of a foreign government;

—Has not been denied a license or hass not had the license revoked by the Commission;

—Is not the subject of any legal action concerning the operation of a radio station; and

—Will insure that the aircraft radio station will be operated by an individual holding the proper class of license or permit issued by the Commission.

(c) The applicant posts the executed FCC Form 404–A on board the aircraft and may use this document as a temporary aircraft station license for a period of 90 days from the date the Form 404 was mailed to the Commission.

(d) The applicant utilizes the FAA aircraft registration number as the temporary call sign.

[2] See Appendix B.

6. Accordingly, the new FCC Form 404–A and posting requirement is adopted subject to clearance by the Office of Management and Budget. Additionally, sufficient supplies of the new forms must be obtained to provide for the initial public demand. Therefore, unless the public is advised to the contrary by a Public Notice, the rules adopted herein to implement the new procedure will be effective June 1, 1983.

7. Regarding questions or matter covered in this document contact Robert McNamara, (202) 632–7175.

8. Authority for the amendments adopted herein is contained in Sections 4(i), 303, 307, 308 and 309 of the Communications Act of 1934, as amended.[3] The prior notice and public procedure provisions of the Administrative Procedure Act, 5 U.S.C. 553, are unnecessary in this proceeding; since, in view of similar actions in other radio services as referenced above, significant public participation would be highly unlikely if the subject prior notice and public provisions were utilized in this proceeding.

9. Accordingly, it is ordered, That Parts 1 and 87 of the Commission's rules are amended as set forth in the attached Appendix A, effective June 1, 1983.

10. It is further ordered, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A

Parts 1 and 87 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 1—PRACTICE AND PROCEDURE

1. Section 1.922 is amended by removing FCC Form 453–B and its title, and adding FCC Form 404–A after Form 404 to read as follows:

§ 1.922 Forms to be used.

* * * * *

404–A Temporary Aircraft Radio Station Operating Authority.

* * * * *

2. In § 1.925, paragraph (c) is revised to read as follows:

§ 1.925 Application for special temporary authorization, temporary permit, temporary operating authority, or interim amateur permit.

* * * * *

(c) An applicant for an Aircraft Radio Station License may operate the radio station pending issuance of an Aircraft Radio Station License by the Commission for a period of 90 days under a temporary operating authority, evidenced by a properly executed certification made on FCC Form 404–A.

* * * * *

[3] 47 U.S.C. 154(i), 303, 307, 308 and 309.

PART 87—AVIATION SERVICES

1. In § 87.29, paragraph "(a)(1)" is renumbered "(a)" a new introductory paragraph (a) and (a)(1) are added, and paragraph (c) is removed as follows:

§ 87.29 Application for aircraft radio station license.

(a) An application for new or modified aircraft radio station licenses shall be made on FCC Form 404. The purchaser or assignee of a radio-equipped aircraft shall apply for a new aircraft radio station license on FCC Form 404.

(1) An applicant for a new aircraft radio station license may operate the aircraft radio station pending issuance of a station license for a period of 90 days under a temporary operating authority evidenced by a properly executed certification made on FCC Form 404–A. Such temporary authority is not available to applicants for a fleet license. The applicant shall use the aircraft FAA registration number as a temporary call sign.

* * * * *

§ 87.35 [Amended]

2. In § 87.35, paragraph (c) is removed.

APPENDIX B

United States of America

Federal Communications Commission

TEMPORARY AIRCRAFT RADIO STATION OPERATING AUTHORITY

1 Instructions

Use this form if you want a temporary operating authority while your regular application FCC Form 404 is being processed by the FCC. This authority authorizes the use of transmitters operating on the frequencies listed in section 87.183 of the Commission's Rules.

Do not use this Form if you already have a valid aircraft station license.

Do not use this Form when renewing your aircraft license.

Do not use this Form if you are applying for a fleet license.

Do not use this Form if you do not have an FAA Registration Number.

ALL APPLICANTS MUST CERTIFY:

1) I am not a representative of a foreign government.

2) I have applied for an Aircraft Station License by mailing a completed FCC Form 404 to the Federal

Communications Commission, P.O. 1030, Gettysburg, PA 17325.

3) I have not been denied a license or had my license revoked by the FCC.

4) I am not the subject of any adverse legal action concerning the operation of a radio station.

5) I will ensure that the Aircraft Radio Station will be operated by an individual holding the proper class of license or permit required by the Commission's Rules.

2 Certification, Read and Sign

WILLFUL FALSE STATEMENTS VOID THIS PERMIT AND ARE PUNISHABLE BY FINE AND/OR IMPRISONMENT

Name of Applicant

Signature of Applicant

FAA Registration Number

(Use as Temporary Call Sign)

Date Form 404 Mailed to FCC

3 Limitations

Your authority to operate your Aircraft Radio Station is subject to all applicable laws, treaties and regulations and is subject to the right of control of the Government of the United States.

This authority is valid for 90 days from the date the Form 404 is mailed to the FCC.

You must post this temporary authority on board your aircraft.

(Do Not Mail this Page)

BILLING CODE 6712-01-M

47 CFR Part 73

[BC Docket No. 81-505; RM-3800]

Radio Broadcast Services, TV Broadcast Station in Barstow, Calif.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action assigns UHF television Channel 64 to Barstow, California, in response to a petition filed by Victorville TV, Inc. The assignment will provide Barstow with a first local commercial television allocation.

DATE: Effective February 14, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 632–7792.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Television.

Report and Order; Proceeding Terminated

Adopted: December 6, 1982.

Released: December 14, 1982.

In the matter of amendment of § 73.606(b), table of assignments, Television Broadcast Stations (Barstow, California), MM Docket No. 81–505, RM–3800.

1. Before the Commission for consideration is a Notice of Proposed Rule Making, 46 FR 41534, published August 17, 1981, proposing the assignment of UHF television Channel 64 to Barstow, California, as that community's first commercial assignment, in response to a petition filed by Victorville TV, Inc. ("Petitioner"). Petitioner filed supporting comments reaffirming its intention to apply for authority to construct and operate a station on Channel 64 at Barstow, if assigned.

2. Barstow (population 17,690),[1] located in San Bernardino County (population 893,157), is currently served by one daytime-only AM Station (KIOT), one full-time AM Station (KWTC), and co-owned Station KWTC–FM (Channel 232A). Additionally, it has one unoccupied and unapplied for noncommercial educational television channel (Channel *35) assigned to it.

3. Petitioner initially proposed the assignment of Channel 64 on a hyphenated basis to the communities of Barstow and Victorville, California. However, the *Notice* stated that sufficient information had not been submitted to support a hyphenated assignment. Barstow was preferred since an assignment there is consistent with the minimum distance separation requirements, whereas an assignment to Victorville would require a site restriction 10.2 kilometers (6.4 miles) northeast of the community to avoid short-spacing to Station KOCE–TV (Channel 50), licensed to Huntington Beach, California. The assignment to Barstow bars the use of the channel at Victorville under the 15-mile rule § 73.607(b), since the two communities are separated by a distance of approximately 46.9 kilometers (29.3 miles). However, service to Victorville, as well as an auxiliary studio there, as suggested by petitioner, is possible.

4. In view of the fact that the assignment could provide Barstow with a first commercial television station, the Commission believes that the public interest would be served by assigning UHF television Channel 64 to Barstow.

5. Mexican concurrence in the proposal has been obtained.

6. Accordingly, pursuant to authority contained in Sections 4(i), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.204(b) and 0.281 of the Commission's Rules, it is ordered, that effective February 14, 1983 the Television Table of Assignments, § 73.606(b) of the Commission's Rules, is amended as follows for the community listed:

City	Channel No.
Barstow, Calif	*35+, 64

7. It is further ordered, That this proceeding is terminated.

8. For further information concerning the above, contact Nancy V. Joyner, Mass Media Bureau, (202) 632–7792.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

47 CFR Part 73

[BC Docket No. 80–123; RM–3460]

Radio Broadcast Services, TV Broadcast Station in Hagerstown, Md.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action assigns television Channel 68 to Hagerstown, Maryland, as its second commercial television channel in response to a request from James Resh.

DATE: Effective February 11, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Broadcast Bureau, (202) 632–7792.

[1] Population figures are extracted from the 1980 U.S. Census, Advance Reports.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Television.

In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations (Hagerstown, Maryland), BC Docket No. 80–123, RM–3460.

Report and Order; Proceeding Terminated

Adopted: November 30, 1982.

Released: December 13, 1982.

1. The Commission has before it for consideration the Notice of Proposed Rule Making, 45 FR 23480, published April 7, 1980, which proposed the assignment of UHF television Channel 68 to Hagerstown, Maryland, as that community's second commercial television assignment, in response to a petition filed by James Resh ("petitioner"). Supporting comments were filed by petitioner reiterating its intention to apply for authority to construct and operate a station on Channel 68 at Hagerstown, Maryland, if assigned. Comments were also filed by the Maryland Center for Public Broadcasting ("MCPB"), licensee of television Station WMPB (Channel *67), Baltimore.[1] Opposition comments were filed by Henson Aviation ("Henson"), then licensee of Station WHAG–TV (Channel 25), Hagerstown. Responsive comments were filed by the petitioner.

2. The Notice set forth the background of this proceeding and therefore it will not be repeated in detail here. Briefly, the Notice proposed the assignment of UHF televisions Channel 68 to Hagerstown, Maryland, based upon the petitioner's assertion that there is a need for additional local commercial television service to the community which could provide viewers with a choice of programs from a new, independent and community-oriented facility. Therein, we stated that the proposal required a site restriction 3.2 miles northwest of Hagerstown to avoid short-spacing to Station WMPB (Channel 67), in Baltimore. Additionally, a further site restriction was noted to comply with the mileage separation to a proposed assignment on the co-channel at Seaford, Delaware, in the New Jersey UHF-TV rule making proceeding (BC Docket No 79–269). Petitioner asserted that adequate site flexibility in the Hagerstown area would enable it to comply with the minimum distance separation requirements while simultaneously providing the requisite city grade coverage as required by § 73.685(a) of the Commission's Rules.

3. In its comments MCPB states that it has no objection to the proposed assignment of Channel 68 to Hagerstown provided it is conditioned upon compliance with the minimum spacing requirements to its Station WMBP-TV (Channel *67) in Baltimore.

4. Henson's opposition comments reiterate its earlier argument, which we rejected, regarding the viability of an additional commercial assignment at Hagerstown. It claims that postponing the question of viability to the application stage is counterproductive since market size, other television services and economic conditions of the area are all an integral part of the overall factors to be considered at the rule making level. Otherwise, it claims, it would be wasteful to proceed to the application stage only to discover upon review of an application, that financial qualifications could not be met, or that the community could not support a second commercial television station. Moreover, it adds that petitioner failed to provide data regarding the preclusive effect of its proposal, and the availability of other channels to communities so affected thereby.

5. In response to the opposition comments, petitioner remarks that Henson presents no valid argument, but merely rehashes its earlier position. In any event, it claims, Henson's arguments appear to be directed not to the petition, *per se*, but rather to the Commission's policies, and consequently they are not relevant here.

6. As for Henson's allegation that market size and economic conditions of the area should be addressed at the rule making level, we have traditionally treated this issue as one more appropriate for the application stage. *Grand Junction, Colorado*, 28 RR 2d 513 (1973).

7. Secondly, in response to Henson's assertion that Hagerstown is well served by numerous cable systems as well as area television stations, we stress that such availability of reception services has been cited by the Commission as justification for denying a channel assignment in comparative cases. However, we are not aware of any situation in which a channel assignment was denied to a community solely on the basis of the availability of other services received in that community from other area stations. A channel is assigned to a specific community to broadcast programs designed to meet that community's special needs and interests. No station having a primary obligation to another locality is expected to provide the equivalent of such service. See *Clinton, Louisiana*, 45 RR 2d 1587–88 (1979). Consequently, the signals received in Hagerstown from stations licensed to other communities cannot be deemed as substitutes for local service, and the reception of such signals does not provide a basis for denying the assignment herein.

8. Moreover, Henson's allegation that petitioner failed to provide information with regard to preclusion is also without merit since a preclusion study is not generally required in proceedings to amend the Television Table of Assignments.

9. We previously indicated that the proposed assignment of UHF television Channel 68 to Hagerstown conflicted with a proposal in BC Docket No. 79–269 to assign the same frequency allocation to Seaford, Delaware, thereby necessitating a site restriction beyond that specified in the Notice. However, the Seaford, Delaware and related channel substitutions at Dover, Delaware were dismissed by a *First Report and Order*, 47 FR 47893, published October 28, 1982. Therefore, the only site restriction applicable to this proposal requires that the transmitter be located 3.2 miles northwest of Hagerstown to avoid short spacing to Station WMPB (Channel *67) in Baltimore, Maryland. According to petitioner, such site restriction will not hinder its ability to implement its proposal since adequate site flexibility exists in the area.

10. In light of the above, and having found no policy objections to the proposal, we believe that the assignment of UHF television Channel 68 to Hagerstown, Maryland, would serve the public interest.

11. Canadian concurrence has been obtained.

12. Accordingly, pursuant to the authority contained in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.204(b) and 0.281 of the Commission's Rules, it is ordered, That effective February 11, 1983, the Television Table of Assignments, § 73.606(b) of the Rules, IS AMENDED with regard to Hagerstown, Maryland, as follows:

City	Channel No.
Hagerstown, Md.	25–, *31, and 68+.

13. It is further ordered, That this proceeding is terminated.

[1] MCPB is also the licensee of educational television stations located in Annapolis (Channel *22), Salisbury (Channel *28), and Hagerstown, Maryland (Channel *31).

14. For further information concerning the above, contact Nancy V. Joyner, Broadcast Bureau, (202) 632-7792.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Martin Blumenthal,

Assistant Chief, Policy and Rules Division, Broadcast Bureau.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 581

[Docket No. 73-19; Notice 31]

Bumper Standard; Denial of Petitions for Reconsideration

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Denial of petitions for reconsideration.

SUMMARY: This notice responds to petitions for reconsideration of a final rule amending the Bumper Standard. The final rule amended the Bumper Standard to reduce the test impact speeds specified in that standard to 2.5 mph for longitudinal front and rear barrier impacts and for longitudinal pendulum impacts and 1.5 mph for corner pendulum impacts. The notice also amended the damage resistance criteria of the standard to eliminate limitations on the damage which may be incurred by the bumper face bar and associated components and fasteners in bumper impact testing. No change was made in the requirements prohibiting damage in such testing to specified safety-related components and all exterior vehicle surfaces other than the bumper face bar and related components and fasteners.

The petitioners requested that the agency reverse its action and reinstate the previous impact speeds and damage resistance criteria. This notice denies the petitions.

FOR FURTHER INFORMATION CONTACT:

William Boehly, Office of Market Incentives, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590, 202-426-1740.

SUPPLEMENTARY INFORMATION: On October 1, 1981, NHTSA published in the **Federal Register** (46 FR 48262) a notice of proposed rulemaking (NPRM) seeking comments on nine different alternatives for amending the Bumper Standard. The purpose of the action was to increase and seek to maximize the net consumer and public benefits of the standard, in accordance with the Motor Vehicle Information and Cost Savings Act (Cost Savings Act). At that time, the Bumper Standard required that Phase II damage resistance criteria be met in a series of 5 mph longitudinal front and rear barrier impacts and of longitudinal pendulum impacts and of 3.0 mph corner pendulum impacts. The Phase II criteria prohibited damage to safety components and to all exterior vehicle surfaces, e.g., sheet metal, other than the bumper face bar and related components and fasteners. While damage to the bumper and related components and fasteners was permitted, it was strictly limited. The proposals ranged from one reducing the longitudinal barrier and pendulum test impact speed for rear bumpers only to 2.5 mph to one eliminating all test impact requirements for front and rear bumpers except as necessary to maintain a height requirement.

The basis for initiating the rulemaking action was the agency's April 1981 Evaluation of the Bumper Standard. That report addressed in detail the costs and benefits of the agency's bumper requirements. The report found that the standard might not be providing net benefits for consumers.

After considering the best available data, public comments submitted in response to the NPRM, and comments presented at two public meetings, NHTSA published (May 20, 1982; 47 FR 21820) a final rule amending the Bumper Standard (49 CFR Part 581). The notice reduced the test impact speeds required by that standard to 2.5 mph for longitudinal front and rear barrier and pendulum impacts and 1.5 mph for corner pendulum impacts. The notice also amended the damage resistance criteria by reducing them to the level that had been effective in model year 1979. Those criteria, known as Phase I criteria, are identical to Phase II criteria except that the Phase I criteria do not contain the stringent limitations set by Phase II on the permissible test damage which may be sustained by the bumper face bar and associated components and fasteners in bumper testing. The effective date of these changes was July 6, 1982.

The agency stated that the changes in damage resistance criteria and the compliance test speed were dictated by the requirements of the Cost Savings Act. The statute requires the issuance of a bumper standard and provides that any such standard "seek to obtain the maximum reduction in costs to the public and to the consumer," taking into account the costs and benefits of implementation, effects on insurance and legal costs, savings in consumer time and inconvenience and considerations of health and safety (15 U.S.C. 1912(b)(1)). Stated simply, the previous standard failed to provide the maximum feasible reductions in cost. Therefore, the agency determined that the previous standard could no longer be retained in accordance with the Cost Savings Act.

The agency concluded that the statutory criterion regarding maximum feasible reduction in cost was best attainable through the changes made. The agency also concluded that reducing the impact speed to 2.5 mph and eliminating the Phase II damage criteria would not have an adverse effect on safety. The agency found that such amendments would not have any discernible effect on the number of accidents, deaths or injuries that occur annually.

The agency received several timely petitions for reconsideration of its decision, one from the Insurance Institute for Highway Safety (IIHS) and the others from private individuals. The agency later received additional submissions from IIHS concerning its petition, as well as several comments relevant to the IIHS petition from other parties. All materials received have been reviewed and taken into account.

The petitioners and some commenters raised a wide range of issues about the final rule and urged that it be rescinded. These issues include virtually all of the questions previously addressed by the agency in this proceeding, and some new or expanded arguments as well. The questions involve the agency's authority under the Cost Savings Act to issue a standard specifying a test impact speed of less than 5 mph, the degree of certainty concerning agency assumptions that must be attained to justify a change in the standard, the relevance of the results of a new public opinion poll which was conducted for proponents of the prior bumper standard and which purports to show a willingness on the public's part to pay increased costs (i.e., not bounded by the limitation of the "maximum feasible reduction" language) for bumpers, the sufficiency of the agency's consideration of alternatives, the effect of the rule on safety, the accuracy of the agency's assumptions about how insurance companies and auto companies are likely to adjust their rates or prices, the basis for the agency's decision to drop the standard's Phase II damage criteria in favor of Phase I, and the appropriateness of the numerical assumptions made by the agency in its

Final Regulatory Impact Analysis (FRIA).

After careful consideration of the petitions for reconsideration and other documents, the agency denies the petitions for the reasons set forth below. Therefore, no changes will be made at this time to the amended standard.

As will be apparent throughout this notice, many of the issues raised in the petitions for reconsideration were previously raised in the comments on the NPRM. These issues were fully considered by the agency and discussed in the preamble to the May 1982 final rule and in the FRIA. In a number of instances, the petitioners for reconsideration did not acknowledge the agency's discussions in reraising old issues. To avoid repetition, the agency has not repeated here all of its discussion in its May 1982 documents.

Agency Mandate

In adopting the final rule, the agency explained in detail the origin and nature of its mandate under the Cost Savings Act, and addressed as well the issue of whether a bumper standard specifying a test impact speed of at least 5 mph could be construed as required under that statute in view of the varying statements of expectation voiced in the succession of Congresses which have addressed the question. Stated another way, the issue as so discussed was whether those statements could be construed to add up to an expressed intent on the part of Congress, recognizable by the agency, which would deprive the agency of the discretion otherwise given it in the plain words of the statute to make its own determination of that standard which best satisfies the statutory criteria. The agency noted the relevant congressional discussions in the final rule preamble, and then concluded that:

> (W)hile these expectations are relevant, the determinative fact in all instances must be what the Congress in fact did through legislative action. In the Act, the Congress did not set a particular standard, but instead adopted the maximum feasible cost reduction criterion, and required that bumper standards be set in accordance with it. The criterion is a deliberately flexible one which permits and even requires that bumper standards be adjusted based on available information. 47 FR at 21830.

Both IIHS in its petition and some of the commenters on that petition questioned the degree of certainty concerning agency assumptions that would be necessary to justify a change in the standard by the agency. IIHS alleged, for example, that under certain assumptions NHTSA's analysis could be used to show that net benefits of the present 5 mph standard are $40 greater than those of the 2.5 mph alternative. One commenter questioned whether, based on an allegedly weak record, the agency should "reduce consumer protection" to save only $28 over the life of a car. That commenter also alleged that NHTSA's analysis shows that a 5 mph standard cannot be ruled out as being more cost effective than the 2.5 mph standard.

The agency believes that the record supporting the rulemaking is a strong one. In reaching its decision, the agency was required to resolve two key issues. The first was whether, in light of congressional directives to act in accordance with the results of its multi-year analysis and relevant Executive Orders of the President, the agency could justify retention of the then existing standard, which specified 5 mph front and rear test impact speeds and Phase II damage criteria (more simply, the 5/5, Phase II standard.) If not, the agency then had to address the second issue of that level of standard which could best satisfy the applicable requirements of law.

As the agency indicated in the final rule, the record is most clear on the issue of the former standard's insufficiency to satisfy the criteria in the Act. That standard provided significantly less net reductions in costs to the public and consumers than would several of the alternatives that were considered during the rulemaking.

In addressing the second issue, the agency dealt with each of the principal uncertainties and resolved them to the degree possible. As the agency noted, in some cases the requisite decisions were necessarily based on imperfect data, and were thus inherently judgmental or predictive in part. The obligation to make such decisions, and resolve such uncertainties by the exercise of such judgment, is clearly an integral part of the agency's mandate under the Act to set a bumper standard at a level which "seeks to provide the maximum feasible reduction of costs to the public and to the consumer," taking into account the statutorily specified elements of cost and benefit. It goes without saying, of course, that even greater uncertainty, and an even greater element of judgment and predictive discretion, was involved in the original setting of the 5/5, Phase II standard itself.

The agency dealt with the issue of uncertainty in the preamble to the final rule, stating:

> The agency believes that sufficient information exists to make all determinations required by applicable statutory criteria. The uncertainties confronting the agency now are significantly less than those which existed when the current standard [the 5 mph standard] was promulgated. The agency knows far more now about the benefits and costs of bumper standards with various levels of performance requirements than it did then. In the agency's judgment, there is no reasonable prospect of obtaining more definitive data under the continued application of the existing Part 581 standard.
>
> The record is most clear on the issue of the present standard's noncompliance with the criteria in the Act. If the agency were now setting a bumper standard for the first time, it could not justify establishing a 5.0-mph/5.0-mph standard. The existing 5.0-mph standard provides significantly less net benefit to the public and consumers than would several of the proposed alternatives with less stringent performance requirements. 47 FR at 21825.

The agency cannot agree with the inference by petitioners herein that a saving $28 per car is not sufficient to justify a change in the standard. First, the statute clearly would not permit the agency to retain a standard which it has found would result in any fewer net benefits than an alternative standard. That is the case here. Second, due to the large volume of automobiles sold in the United States, even what might appear to be the relatively small saving of $28 per car will in fact result in hundreds of millions of dollars of savings, to consumers and the public, annually.[1] Third, $28 is the average savings, and millions of consumers would in fact experience savings several times higher than that amount.

The agency also believes that IIHS has misread the FRIA in alleging that the agency's analysis itself could be used to conclude that a 5/5 standard cannot be ruled out as being more cost effective than the 2.5/2.5 standard, or to show that the net benefits of such a standard would be $40 greater than those of a 2.5/2.5 standard. The FRIA merely indicated, as part of the agency's consideration of the degree to which extreme assumptions could affect its conclusions, that one combination of such extreme assumptions could show a 5/5 standard to yield more benefits than a 2.5/2.5 standard. However, the agency in the same discussion pointed out that it was virtually impossible that the factual elements of that combination of assumptions could in fact occur at the same time, under real world conditions.

Public Opinion

Similarly, the agency fully discussed in the preamble to the final rule the

[1] It might be noted that in its ongoing efforts to identify the costs of the various safety regulations to consumers, the agency has concluded that only four of its standards (FMVSS 105, Hydraulic brakes, FMVSS 202, Head restraints, FMVSS 208, Occupant crash protection—manual safety belts, and FMVSS 214, Side impact protection) involve imposition of costs equal to or greater than $28.

limited role which public opinion, in and of itself, can be accorded in agency deliberations, even under the consumer directed mandate of the Act. As part of its comments on the NPRM, IIHS had submitted the results of a public opinion poll alleging that the public favored a 5/5 bumper standard. In discussing that poll in the final rule preamble, the agency stated:

> * * * The level of bumper standards established by the agency under the Act cannot be determined merely on the basis of what members of the public understand to be the relevant facts and issues, or what they themselves would prefer. The Congress has determined the public policy which must be applied by the agency, and the agency's decision must be reached in accordance with the statutory criteria. Those criteria do not include public preferences as such, although as noted in the FRIA, adequately demonstrated public preference may be relevant to assessments of future market demand and the response options available to the auto manufacturing and insurance industries. 47 FR at 21829.

The agency noted further that many of the specific questions asked in the cited poll may have inadvertently induced responses based on inflated estimates of the value of the 5/5 bumper standard. For that and other reasons, the agency stated that it regarded the survey as an inconclusive indicator of informed public opinion.

While IIHS stated in its petition that it did not accept the agency's characterizations of the original survey, it submitted as part of that petition the results of a new poll that was apparently undertaken to address some of the observations advanced by the agency in its final rule. Specifically, the new poll informed respondents of reductions in new car prices that would be associated with 2.5/2.5 bumpers, and of stated effects on fuel economy. Based on the results of the new poll, IIHS has reraised the issue that public opinion favors a 5/5 standard.

The agency has carefully examined the new poll. As before, however, the data presented are not considered to be directly relevant to the agency's decision. The statutory criteria simply do not include public preferences. Further, even if they did, the agency knows of no way to quantify the results of the poll in such a way as to make them part of the net benefit calculations made by the agency to determine which standard would provide maximum feasible cost reduction. At most, if valid, the data would represent only an individually relevant factor in agency judgment as to the relative effectiveness of programs to encourage the offering of optional levels of protection greater than would otherwise be justified as mandatory under the terms of the Act.

Moreover, quite apart from the limitations of its statutory mandate, the agency does not concur with IIHS that issues as complex as those associated with the bumper rulemaking are appropriately amenable to resolution by major recourse to public opinion as discerned by polls. For example, while the current IIHS effort did attempt to make respondents aware of some limited cost issues, the survey instrument is still highly conclusionary, and greatly oversimplifies the important issues involved. It did not attempt to introduce as relevant considerations even the existence of the wide range of other complex issues required to be considered by the agency in its decision-making. These include such things as the estimated number of low speed accidents a vehicle is likely to be involved in, how much damage such accidents will cause, the value that should be placed on delay and inconvenience, and the value of unrepaired damage.

With respect to these and a number of other complex issues, the agency was required to sift through and make informed judgments about enormous amounts of competing data, utilizing the services of engineers, economists and other professionals. This very complexity explains why Congress chose to delegate the setting of bumper standards to the agency instead of either legislating specific standards, or suggesting that public opinion be considered a determinative or significant factor.

Alternatives

The IIHS petition alleged that the only alternatives considered by the agency were weaker versions of the former standard. The petitioner argued that the agency should have considered, in addition to different compliance test impact speeds, regulatory options designed to lead to lighter weight bumpers, capable of meeting the then current 5/5 standard. The petitioner stated that NHTSA's analysis showed that such requirements would move bumper systems toward even greater reductions in costs to the public. The only example given by the petitioner of such a requirement, however, was maximum weight requirements for bumper systems. The petitioner also argued that NHTSA's failure to consider such requirements occurred despite the agency's explicit acknowledgment that the standard's compliance tests were chosen with the knowledge that they were imperfect surrogates from which to predict on-road experience.

In the first place, the agency did in fact consider more than just the nine proposed alternative versions of the former standard. As the preamble to the final rule noted, in preparing the Preliminary Regulatory Impact Analysis (PRIA), the agency considered the possibility of raising as well as lowering the required test impact speeds. The data on possible net benefits for higher speed standards was very limited and conjectural, however, and the agency was forced to consider them to be not even marginally reliable for decision-making. The agency did determine that any standard with a higher impact speed would under present or foreseeable technology result in greater costs, i.e., more complex bumper designs, greater primary and secondary weight and impacts on fuel economy. Further, the agency also was able to conclude that such a standard would have little or no effect on the majority of low speed accidents, since such a large number of low speed accidents occur at speeds of 3 mph or less.

In an attempt to seek additional information on this subject, the agency asked in the Preliminary Regulatory Impact Analysis (PRIA) whether speeds other than 5 mph, 2.5 mph and unregulated speed should be considered. None of the comments provided the type or amount of information that would have enabled the agency responsibly to consider other impact speeds.

The agency does not agree with IIHS's contention that maximum weight requirements would necessarily lead to the maximum feasible reduction in costs to the public, and thus did not propose such an alternative standard. As a general rule, lighter bumpers are more expensive than heavier bumpers, since they utilize more costly materials. Such bumpers may also require more complex designs. Thus, any cost saving resulting from the increased fuel economy of vehicles with lighter bumpers would be offset in whole or in large part by the bumpers' higher initial and replacement cost. Moreover, any type of requirement for lightweight bumpers would significantly restrict the design flexibility of the manufacturers.

For these reasons, the agency does not believe that it is appropriate to consider establishing requirements along these lines. Moreover, even if the agency were to consider such action, there would in the agency's judgment be serious question as to whether the agency has the authority to do so. The agency has considerable doubt whether such a requirement would constitute a "bumper standard" within the meaning of the Act. See 15 U.S.C. 1901(6).

It is not certain what point the petitioner seeks to make by pointing out that the agency declined to adopt or consider adopting requirements that would encourage the use of lightweight bumper designs "despite" the agency's explicit acknowledgement that present compliance test have been set with the knowledge that they are imperfect surrogates from which to predict on-road experience. To the extent that the agency acknowledges that point, it simply recognizes that no compliance test procedure could ever represent the complexities of the full range of real world accidents. That is, no known format of compliance test could be expected to reflect all such variables as the impact speeds, angles of crash, extent and frequency of bumper mismatch, and the rigidity, density and shapes of objects impacted which occur in actual driving situations. If the petitioner suggests that the agency should adopt additional tests such as barrier offset tests, angle tests, pole tests, and car-to-car tests, in the belief that those tests would lead to lighter bumpers, the agency simply disagrees. In fact, the agency believes that such different or expanded test protocols would merely force the installation of heavier bumpers, and further increase the costs to consumers and the public of the standard.

Safety Issues

Several issues were raised by petitioners concerning safety. IIHS alleged that the agency did not offer "convincing evidence" for its conclusion that there was not any safety based justification for the 5/5 bumper standard. IIHS also alleged that the agency did not properly address the contribution of 5/5 bumpers to crash energy management, particularly at speeds less than 30 mph. The individual petitioners also raised safety as an issue, expressing concern that the change would result in a loss of lives in accidents.

The agency thoroughly addressed the issue of safety in the FRIA and the preamble to the final rule. (See especially chapter IV of the FRIA.) The petitioners have raised no new arguments or submitted any new data concerning the contribution made by 5/5 bumpers to safety by virtue of enhanced protection of safety-related items such as lights and turn signals, a subject which was specifically addressed in the FRIA. Further, IIHS did not provide any rationale as to why it thinks that the FRIA's handling of that particular issue may have been deficient.

Based on the analysis provided in the FRIA, outside studies, and comments on the NPRM, the agency concluded that reduction of the 5/5 bumper standard would not have any significant effect on safety. The agency specifically noted in the FRIA the comment by one major domestic manufacturer, which cited studies conducted by Westat and Indiana University's Institute for Research in Public Safety in support of its assertion that only one percent of accidents are caused by safety component malfunctions which could have resulted from low speed collision damage. That commenter also contended, moreover, that the nature of these malfunctions, (e.g., lamps not working) would not permit the inference that even this low incidence of contribution to accident causation can be attributable to prior collisions, but must be considered instead to be more commonly experienced as a result of maintenance neglect, e.g., failure to replace burned out lamps. As a result, the commenter argued, low speed collision damage would necessarily have to be considered a miniscule factor in motor vehicle safety. Other commenters argued that the bumper standard's connection to safety is tenuous, that there is no evidence that safety would be compromised by amendment of the bumper standard, and that a 2.5/2.5 bumper standard would be adequate in any event to protect vehicle safety components.

On the specific question of the contribution of 5 mph bumpers to crash energy management, the agency fully considered that issue as it related to all speeds, notwithstanding the fact that certain of the illustrations cited by the agency involved 30 mph crashes. As IIHS pointed out, it is true that severe injuries can and do occur in crashes at speeds as low as 10–15 mph. However, at those speeds as well as at higher speeds, 5 mph bumpers contribute insignificantly to changes in the management of the crash energies to which vehicle occupants are subjected.

In a crash, an unrestrained occupant will impact the vehicle interior either after it has fully stopped or while it is still moving forward, i.e., while the vehicle itself is still in the process of absorbing energy. In order for a 5 mph bumper to have a superior beneficial effect on safety through contribution to crash energy management, it would have to cause the velocity of the vehicle to decrease at a significantly slower rate than would a 2.5 mph bumper. In such a case, the occupant would impact the vehicle interior at a point in time at which the vehicle itself still had a higher forward velocity than it would have had if equipped with the alternative bumper. The difference between the forward velocity of the vehicle interior and that of the occupant would in such a case be less, and as a result the occupant would absorb less energy or force in the impact. (This same analysis is of course applicable to restrained occupants as well, though they are much less likely to impact any point within the interior of the vehicle.)

The agency has determined, however, that 5 mph bumpers do not in fact cause the velocity of a vehicle to decrease at a significantly slower rate than would 2.5 mph bumpers in collisions at speeds of 10 to 15 mph or higher. There are several reasons for this. First, that difference between the two bumper systems which is relevant to safety in this context is the difference between the total energy absorption capability of the two systems, not the difference between energy absorption capability without damage. The energy that can be absorbed without damage to the vehicle is a small part of the total energy absorbed in collisions at 10–15 mph and above. Regardless of the type of bumper, the vehicle will already be stopped or almost stopped, in collisions at 10 mph or less, when the occupant impacts the vehicle interior. Thus, neither bumper system would have any significant opportunity to alter the speed at which the vehicle interior is traveling when the interior is struck by the occupant.

At speeds of 10–15 mph and higher, the small difference between 2.5 and 5 mph bumpers in energy absorption capability, primarily related to system weight, would have a negligible effect on the rate a vehicle slows in a crash. Other parts of the vehicle, e.g., the sheet metal and framing, are primarily responsible for the absorption of energy at such higher speeds. Further, as was noted in one of the comments on the notice of proposed rulemaking, the extra weight and rigidity of more damage resistant bumpers could in fact be expected to adversely affect crash deformation characteristics and rates of crush and energy absorption. Thus, more damage resistant bumpers may reduce, rather than increase, the potential levels of occupant protection in higher speed collisions.

Changes in Insurance Rates and Auto Prices

One commenter on the IIHS petition, the National Association of Independent Insurers (NAII), has alleged that the agency underestimated the impact the change in the Bumper Standard will have on automobile insurance rates. NAII argued that although the insurers had stated that the level of collision insurance premium increases would be

10 to 20 percent, the preamble to the final rule said that insurers had agreed that the appropriate figure would be 10 percent.

The agency fully considered the effect that the reduction in the bumper standard would have on insurance rates. As in any rulemaking proceeding, the agency based its cost estimates on the reasonably foreseeable consequences of its action. As was fully discussed in the FRIA, the agency carefully considered increases in collision and liability claims, as well as such factors as taxes and sales commissions. The increases in collision and liability claims were based on the agency's estimates of increased vehicle damage that may occur as a result of auto manufacturers meeting a 2.5 mph bumper standard instead of a 5 mph standard. The values used for taxes, sales commissions, profits, etc. were based on insurance industry data.

In cases of variance among asserted values for such cost components, the agency must necessarily adopt those figures whose derivation is known and which appear to be the most accurate. As indicated above, the agency fully supported its cost estimates in the FRIA. Therefore, it was appropriate to assign diminished probative value to estimates submitted by insurance industry commenters to the extent that those estimates were unsupported and in conflict with agency estimates based on known and documentable values.

In reaching its decisions on this factual point, the agency considered the estimates higher than 10 percent. The 10 to 20 percent range referred to by NAII was presented in one of the hearings conducted by the agency on the rulemaking. That range was stated to have been based on the discounts provided by insurance companies during the early 1970's, after state and Federal bumper standards took effect. It apparently represented those discounting companies' judgment as to the economic value of the difference in damage susceptibility between vehicles produced before any bumper standard, and vehicles produced under the 5 mph standard.

The relevance of that range, particularly at its upper end, seems questionable. Bumpers produced under the 2.5/2.5 standard are expected to provide significantly greater damage protection than those produced in the unregulated environment which preceded the bumper standard and which were the basis for the cited discounts. The unregulated bumper produced just prior to the early 1970's when bumpers standards came into existence have been estimated to have been the equivalent of 1.5 mph bumpers, rather than 2.5 mph bumpers. Further, those unregulated bumpers were not subject to height requirements and thus resulted much more often in underride or override.

Therefore, there does not appear to be any basis for anticipating that costs will increase under the action taken to the same extent they decreased when the standard first came into effect. Finally, the agency pointed out in the FRIA that one major company's estimate of a 15 percent increase in collision rates was, when appropriately adjusted, not incompatible with the agency's own range of estimates.

NAII also objected to one of the specific reasons stated by the agency for not agreeing with the predictions of the rate increases by the insurance industry. That reason was the agency's assumption that only actual cost increases would be approved by State regulatory bodies for pass through and recovery in the form of rate increases. The commenter argued that this assumption demonstrates a total misunderstanding of the insurance industry's regulatory ratemaking procedure.

According to the commenter, many states do not require any approval before raising rates. The commenter stated that when new, improved bumpers were first produced under the government's bumper program, many insurers offered "judgmental discounts" on rates, assuming the lower rates would be justified by later experience in the form of fewer claims and lower payouts. The commenter stated that it had every reason to believe those judgmental discounts and lowered collision costs will be rescinded and rates raised as a result of the change in the Bumper Standard. The apparent implication of NAII's comment is that if insurance companies think rate increases of 10 to 20 percent are needed, those are the increases they will adopt even if states requiring pre-approval of rate increases based on estimates of increased costs would in fact only be able to find, and approve, a lesser amount.

The agency does not agree that it mischaracterized the insurance industry's regulatory ratemaking procedure. While some states may not require approval before raising rates, many states do. Moreover, approval for rate increases is ordinarily more difficult to obtain than approval for rate decreases.

The agency believes that even in those states not requiring prior approval, rates will ultimately reflect actual cost increases as a result of competition in the market place. This will certainly be true in the long run, if not fully realizable in the short run. In any event, the principle that insurance companies will, and should, be able to recover from their insured customers only actual increased costs (including normal profit) is the only assumption which in the agency's view is consistent with the intent of the Act that this element of cost be taken into account in setting the standard. To conclude otherwise would require the agency to infer that the Congress intended the Act to create a windfall and objectively unsupportable level of increased profit for insurance companies, at the expense of consumers and the public. This the agency declines to do.

On a somewhat related point, NAII argued that there is no reason to believe that car manufacturers will pass on cost savings to consumers The answer to this point is similar to the answer to the arguments concerning insurance rate increases. The agency believes that cost savings will be passed through to consumers as a result of competition. Moreover, as the agency noted in the FRIA, several car manufacturers specifically indicated that they would pass cost reductions on to consumers. The agency believes that its reliance on the manufacturers' statements is reasonable since neither petitioners here nor commenters on the NPRM have put forth any basis for assuming otherwise.

Phase I vs. Phase II

IIHS noted the agency had concluded that "any attribution of benefits to the Phase II requirements would be too speculative as a basis for agency decision." IIHS therefore alleged that the agency dropped the Phase II requirements simply because it could not find any data on the Phase I vs. Phase II issue.

It is true, as the agency pointed out, that empirical performance data on Phase I bumpers are not available owing to the uncertainty about which model year 1979 cars may be considered to have had only Phase I bumpers. The requirements for Phase I bumpers were in effect for that model year only. Commenters indicated that some car manufacturers immediately began compliance with the Phase II requirements, which became effective in model year 1980, without ever producing Phase I (only) bumpers. Evidence of the lack of any significant difference, however, among bumper systems for these two years is found in the teardown studies on 1979 and 1980 bumpers. Those studies showed no differences in the weights of those bumpers and only insignificant changes ($2) in costs.

The agency's decision to reduce the damage criteria was not based on the fact that data were unavailable for Phase I vs. Phase II. Instead, it was based on data showing no difference in lifetime net benefits between the original FMVSS 215 bumpers and Phase II bumpers. Therefore, in accordance with the Act, the agency determined that the Phase II requirements should be eliminated. As pointed out, the agency did not consider it consistent with the statute's direction to seek the maximum feasible "reduction in costs" to maintain requirements which result in higher known costs to achieve only essentially the same expected net benefit.

The preamble to the final rule and FRIA explain more fully the decision on Phase I vs. Phase II, including additional considerations bearing on the decision. Among other things, the agency noted that the Phase I requirements will permit use of new technology, prevented by the Phase II criteria, that may result in even greater consumer benefits.

Assumptions in the FRIA

IIHS raised a number of issues concerning numerical assumptions made in the FRIA. Most of the issues related to assumptions about primary and secondary weight savings and estimates concerning the relative effectiveness of 5 and 2.5 mph bumpers. It was alleged that a significant portion of the FRIA's projected cost decreases for 2.5 mph bumpers is derived from projected primary and secondary weight savings which are largely illusory. It was also argued that the agency's estimate of fuel savings attributable to weight reduction is incorrect.

Primary Weight Savings

IIHS argued that both the lower and upper ends of the FRIA's range of estimated primary weight savings—15 to 33 pounds—are too high. This range affected the arithmetic average of weight savings used in some of the comparisons of alternative bumper standards but not the weighted average used in one of the comparisons.

The petitioner stated that the agency had ignored some manufacturer comments which state that their primary weight savings will be less than 15 pounds. The petitioner argued that the upper end of the range was too high because it appears to be based on differences between U.S. versions of cars complying with the former U.S. 5 mph standard and European versions of the same cars complying with the European 2.5 mph standard. The petitioner stated that these design differences are irrelevant because the provisions of the European standard are less stringent than those of the recently adopted U.S. 2.5 mph standard.

NHTSA does not believe that any significant change to the bounds of its range is necessary or would be appropriate. The effects of any even arguably relevant changes on the overall results of the agency's analysis would be minimal, and in no event outcome determinative.

In response to the NPRM, three manufacturers (Chrysler, Volkswagen and Mitsubishi) did give estimates lower than 15 pounds. However, Chrysler and Volkswagen, whose U.S. sales substantially exceed those of Mitsubishi, have indicated that those figures represented only initial savings and that additional savings could be expected. The figure initially given by Chrysler was 10 pounds. However, it should be noted that Chrysler emphasized that this was a minimum figure. Further, Chrysler's estimate of 10 pounds was for Phase II bumpers. Weight savings somewhat above 10 pounds are likely for that company as a result of the agency's decision to adopt the Phase I requirements. Based on projections from detailed weight data submitted by GM and Volvo, additional weight savings of from one to two pounds would be expected in altering plans for complying with a 2.5/2.5 Phase II standard to plans for compliance with a 2.5/2.5 Phase I standard. In addition, Chrysler was cited in a September 23, 1982, *Christian Science Monitor* article as having stated that it would eliminate about 10 pounds for the 1983 model year and still more weight for the next model year.

Similarly, Volkswagen has indicated that the 8 pound figure attributed to it represents the initial weight savings only. In a July 29, 1982, letter to IIHS, Volkswagen stated that the weight of its Rabbits and Jettas would be reduced by 8 pounds by substituting the energy absorbing components with rigid brackets. Volkswagen emphasized that it never suggested that there would not be additional weight savings for the Rabbit, such as those that might result from redesigning the face bar. It noted further that it had specifically stated at the October 22, 1982, public hearing that the weight savings for the Jetta would significantly exceed 8 pounds.

As to the upper end of the range, Volvo supplied a higher number, 39 pounds. It was not dependent on estimates involving the European bumper but was excluded because of the particular nature of the Volvo cars and their low U.S. sales volume. The 33 pound figure that was used was based on estimates provided by Renault and BMW. The petitioner argues that since the Renault and BMW weight estimates appear to be based on differences between a European version of a car built to a 2.5 mph European standard and an American version of the same car built to the former Part 581 standard, they may be too high since the European 2.5 mph standard is less stringent than the amended Part 581 standard. This point appears to be confirmed by a later submission of one of those manufacturers, which reports lower weight savings than it originally projected.

The outcome of the agency's comparison of alternative bumper standards is not significantly affected by the choice between using a range of reasonable values which excludes high and low outlying values and one which uses the most extreme values submitted by the manufacturers. The results of the analysis in the FRIA are insensitive to the choice between a 15–30 pound range (30 pounds being the Ford average figure) or 15–33 pound range. Use of the former instead of the latter range reduces the net benefits of the 2.5 mph/2.5 mph standard by only $3–4. If a range of extreme values, 8–39 pounds, had been used, there would have been no change in the net benefits calculated in the FRIA. Finally, even if NHTSA had adopted IIHS's apparent suggestion of an 8–30 pound range primary weight savings, the agency's decision would not have changed. The lifetime net benefits of 2.5 mph bumpers would still have yielded more than $20 per car as compared to 5.0 mph bumpers.

Similarly, the sales weighted average computed in the FRIA would not be affected if the agency used lower estimates of weight savings for Renault and BMW. This results from the relatively low United States sales of those two companies.

IIHS also argued that NHTSA's teardown studies, used as an independent check on manufacturer weight reduction estimates, included an unrepresentative sample of vehicles. According to the petitioner, the agency's review did not include a large number of newer front-wheel drive vehicles and thereby biased the results in a way that would be expected to produce higher bumper weights. The petitioner alleged that the studies could therefore not be expected to produce an independent check on manufacturer estimates of weight savings for mid-1980's model cars. Further, the petitioner alleged that NHTSA's analysis ignores the fact that 5 mph bumpers have been getting lighter with each successive design cycle. The apparent implication of this argument is that the weight savings estimated by the

agency may not be the same as would be realized in the mid-1980's.

The agency does not agree that the sample of vehicles used for teardown studies was unrepresentative for the purpose of determining the validity of the manufacturers' submissions. Due to cost constraints, the agency was not able to study every model type. The agency believes the sample of vehicles studied was sufficiently large and representative to serve its limited purpose, a check on manufacturer estimates.

The agency did not ignore the fact that 5 mph bumpers have been getting lighter when compared to the initial FMVSS 215 bumpers. The agency believes, however, that the few examples cited by IIHS do not establish that there would have been significant additional reductions in average bumper weight had the standard remained at 5 mph. Manufacturers have been producing 5 mph bumpers since 1973. Thus, there has been sufficient time for manufacturers to have optimized weight savings from successive design cycles. By way of contrast, the agency's weight estimates for 2.5 mph bumpers represented initial designs. Thus, additional weight savings will be possible for 2.5 mph bumpers as manufacturers learn from successive design cycles.

On a related point, this petitioner took exception to the agency's statement that even if it based its analysis on bumpers utilizing the latest technology, the effect of this change on the analysis would largely be negated by the necessary parallel assumption that bumper systems offering lower levels of protection would also be designed at the most efficient levels possible. Petitioner argued that this statement obscured the fact that efficient bumper designs such as those already on some cars cannot possibly yield the weight savings projected by the agency even if the most efficient 2.5 mph designs were used. The petitioner cited three specific vehicles, the Plymouth Horizon, Volkswagen Rabbit, and Ford Escort.

The agency does not agree with the possible implication that manufacturers cannot achieve significant weight savings by replacing efficient 5 mph bumper designs with efficient 2.5 mph designs. The three vehicles cited by IIHS are all considerably smaller than the fleet average. While the weight savings of a particular vehicle depends on many factors, it may be stated as a general rule that larger cars are likely to experience higher weight savings than smaller cars. This is true because larger cars have larger and heavier bumpers and therefore more potential for weight savings. NHTSA projects that weight reduction will be proportionate to total bumper weight. Thus, the three vehicles cited by IIHS would be expected to have weight reductions less than the averages projected by the agency.

Nevertheless, for current new small cars with light weight 5.0 mph bumpers, significant weight reduction appears possible. Although the ECE 2.5 and U.S. 2.5 mph bumper standards are different, those differences do not explain a substantial portion of the 41 pound difference between the 13 pound bumper system on the European Ford Escort and the 54 pound system on the US counterpart. Thus, a primary weight savings well within the 15 to 33 pound range is not unreasonable, even for a very small car.

Also on the subject of primary weight savings, IIHS argued that unless a vehicle could be moved into a lighter EPA weight class, manufacturers do not appear to be interested in seeking to reduce bumper weights to achieve small improvements in fuel efficiency for consumers. As an example, the petitioner noted that two of GM's X-cars have virtually interchangeable bumpers with weights differing by 33 pounds. According to the petitioner, this makes it clear that possible small consumer savings in fuel are not an overriding consideration when bumper design decisions are made and that there is no evidence that any theoretically possible weight savings will ever be realized in practice. It was also argued that there is no evidence to suggest that manufacturers will seek to produce 2.5 mph bumpers that are significantly lighter than lightweight 5 mph bumpers.

The agency's estimates of weight savings are those expected to be achieved in the real world, instead of those which are theoretically possible. Those expectations were based on the changes that the auto manufacturers indicated they actually intended to make in their bumper systems in response to a 2.5 mph standard. The petitioner has not offered any evidence calling those intentions about future weight reductions into question. Similarly, the agency's evaluation of the teardown studies was based upon the agency's own assessment of the changes that a manufacturer would actually make. Those studies, which were discussed in the 1981 Evaluation and in the FRIA, were used by the agency as a check on manufacturer comments in reaching its final decision.

While the agency is not privy to all of the reasons that the manufacturers have in mind for achieving their projected weight savings, the agency can identify several incentives which the manufacturers have. For whatever material is used in a given bumper, a lighter version of that bumper will cost less since less material will be used. In switching from a 5 mph bumper to a 2.5 mph bumper and removing the relatively expensive energy absorbers, manufacturers will save money while obtaining a weight savings. Further, each pound of primary weight saved will enable the manufacturers to achieve secondary weight savings elsewhere, thereby saving the money associated with secondary weight. Since the manufacturers have an overall incentive to meet consumer demand for fuel economy, the agency believes that they will take advantage of the opportunities to reduce weight.

As to the particular example cited by IIHS, the agency does not believe any firm conclusions can be drawn regarding the reasons for the weight differences in the bumper systems of two models of General Motors X body cars. The single example certainly does not prove that General Motors or any other manufacturer considers vehicle weight to be an unimportant factor except for the purposes of EPA weight classes. While a number of explanations are possible for the differences in the bumper systems, the agency does not believe it appropriate or useful to speculate on why a company made particular design decisions.

Secondary Weight Savings

IIHS argued that because secondary weight reductions cannot occur until a vehicle is completely redesigned, any vehicle whose bumper system performance is reduced to 2.5 mph in the next few model years, i.e., without accompanying overall vehicle redesign and secondary weight reductions, will generate net consumer losses over its lifetime. This petitioner also argued that there is considerable uncertainty as to whether any secondary weight savings will actually occur when vehicle redesign is ultimately undertaken. On the subject of secondary weight, the petitioner noted and submitted certain statements made in a recent paper published by C. L. Magee, a Ford employee, under the auspices of the Society of Automotive Engineers (SAE). In that paper, the author ("Magee") indicated that secondary weight benefits are probably only practically realizable over a period of 10 or more years. Also, Magee noted that a complicating factor limiting the achievement of secondary weight reduction is the practice of deriving a variety of vehicles from a common base.

The issue of short run, transitional effects of the reduction in the bumper standard was discussed in the final rule. The agency noted therein that it expects manufacturers to continue to produce bumper systems exhibiting at least some characteristics of 5 mph, Phase I bumpers. Production requirements and market pressures will constrain any move immediately to 2.5 mph bumpers only. The agency noted that, as indicated by several manufacturers, bumper face bars and reinforcements designed for 5.0 mph impacts will undoubtedly continue to be used on at least some new cars, in the short or intermediate term. As IIHS and its survey data have noted, this is fully consistent with some levels of consumer expectation and desire about bumper performance and thus subject to predictable market demand support. Agency experience and testing indicate that such components are capable of affording protection at somewhat higher impact speeds than those previously required, in probable large part as a result of intentional over-design to ensure compliance in NHTSA testing. Thus, contrary to IIHS's contention, a significant portion of the performance of current bumpers would in any event be retained in the short run.

Of perhaps greater significance, however, some reduction in secondary weight is possible without complete redesign of a vehicle. As manufacturer comments and the FRIA recognized, weight-reducing changes can be made and are expected in such vehicle components as tires, brakes, and drivetrains.

Thus, the agency does not expect many vehicles to be produced with 2.5 mph bumpers that do not have some corresponding changes in secondary weight. To the extent that any such vehicles are produced in the short term, the associated costs are normal transition costs associated with any change in requirements. The possibility that the rulemaking may have such short-term costs is outweighed by the significant benefits that owners of future cars will experience as a result of the new standard.

The agency does not agree with the petitioner that there is uncertainty that secondary weight savings will occur when vehicles are redesigned. Based on generally recognized and accepted design theory, the incentives facing manufacturers and manufacturer comments, the agency concludes that secondary weight savings will actually occur. The petitioner provided no information supporting its assertion to the contrary but simply concluded that such savings were uncertain. Petitioner's assumptions are contradicted by the very SAE paper it submitted, which expressly assumed that primary weight reduction will be accompanied by significant secondary weight reduction. Indeed, the paper uses a secondary weight factor very close to the one used by the agency. The agency assumed a secondary weight reduction of .7 to 1.0 pound for each pound of primary weight reduction while the SAE paper assumed a secondary weight reduction of .6 to .9 pound.

Finally, even if the practice of deriving a variety of vehicles from a common base were to limit the achievement of secondary weight reduction for any particular vehicles, it would not *ipso facto* call into question the agency's range of .7 to 1.0 pounds. Both the agency's .7 to 1.0 pound range for the fleet average, based on reviewed manufacturer estimates, and the SAE paper's range of .6 to .9 pounds, which explicitly noted that complicating factor, took into account the effect of deriving different vehicles from a common base.

Fuel Savings

IIHS challenged the agency's estimate that 1.0 gallon of gasoline would be saved over the lifetime of a car for each pound of weight removed from a car. It noted that Magee's SAE paper suggested that the estimate should be 0.49 to 0.79 gallon per car for cars appearing in the market place five to ten years or more from now.

A supplementary memorandum prepared by the same author and submitted by Ford to the agency docket in connection with the agency's consideration of the reconsideration petition emphasizes the real uncertainties in estimating weight effects of fuel consumption and concludes that his "long-term estimates—depending on other assumptions—are in 'reasonable' or 'fairly-close' agreement with that given by NHTSA * * *."

Bearing in mind the probative weight properly to be assigned to such assertions by interested parties, the agency concludes that to the extent that there are any differences or inconsistencies between the estimates of Magee and those of the agency, the agency will not elect to rely exclusively upon the estimate of this author as opposed to its technical experts. There are a variety of reasons for this decision. First, while estimates concerning the amount of gasoline that will be saved over the lifetime of a car for each pound of weight removed vary significantly, Magee's estimate is lower than those set forth in most other similar studies reviewed. With one exception, the studies cited by Magee's report itself conclude that the figure for long run fuel savings should be in the range of 1.09 to 1.4 gallon, values significantly higher than the agency's own estimate of 1.0 gallon. IIHS did not explain why the agency's judgment on this point should now be considered incorrect, or why the value set forth in the Magee study should be accepted as superior to virtually all other studies or comments by manufacturers. While the agency has considered and assessed the report, it is unable to conclude that it must be considered uniquely superior to other studies.

Second, Magee's cited low estimate is based on at least one highly questionable assumption. He assumes that powertrain efficiencies will be significantly improved in the future and that those improvements would reduce by 15–30 percent the effect on fuel economy currently attributed to any weight changes. This assumption is unsupported by data or analysis and could not serve as the basis for agency judgment on the issue.

Relative Effectiveness Estimates

IIHS challenged the agency's overall estimate of the relative effectiveness of 5 mph and 2.5 mph bumpers. First, IIHS alleged that the agency ignored the results of that organization's own crash tests, which directly compared the performance of bumpers on three pairs of vehicles, the Subaru four-wheel drive compared to the Subaru two-door hatchback, the four-wheel drive AMC Eagle compared to the AMC Spirit, and the VW Rabbit pickup truck compared to the VW Rabbit. IIHS noted that one vehicle in each pair was required to meet the 5 mph standard, while the other vehicle was not, and asserted that the vehicles not meeting the 5 mph standard in fact had bumpers equivalent to 2.5 mph bumpers. IIHS argued as a result that comparison of performance could effectively serve as empirical comparison of the relative effectiveness of 5 mph versus 2.5 mph bumpers.

The agency fully considered the data presented by IIHS. As explained in the FRIA, the agency determined that its use as suggested by IIHS was wholly inappropriate and unsupportable from a scientific standpoint. The bumpers on those vehicles alleged to have 2.5 mph bumpers were not in fact or by design intended to meet a 2.5 mph standard. Further, the data presented by IIHS did not in any way demonstrate that the vehicles in fact *had* bumpers that could meet a 2.5 mph standard. Although the petitioner subjected the vehicles to

barrier tests at 2.5 mph, it did not subject them to the more critical *pendulum* test required by NHTSA's 2.5 mph standard. In terms of local loads to which a bumper system is subjected, the pendulum test is far more stringent than a barrier test. Therefore, the vehicles were not shown to have had bumpers meeting Part 581 requirements, and the entire basis for comparison as asserted by IIHS is undermined. If the vehicles asserted to have 2.5 mph bumpers had actually had bumpers that were the equivalent of 1.5 mph or 2.0 mph bumpers, comparison of the resulting test data with those for the 5.0 mph bumper vehicles would have substantially exaggerated the difference between 2.5 mph and 5 mph bumpers.

In addition, there are several other reasons which were set forth in the FRIA for the agency's inability to rely on IIHS data. For example, the vehicles in question are not sufficiently representative of the vehicle fleet for the agency to draw significant conclusions about the differences between 2.5 mph and 5 mph bumpers. Even if that were not the case, the data submitted by IIHS were inadequate to draw any conclusions about *overall* 2.5 mph and 5 mph bumper effectiveness in low speed collisions. Over the lifetime of an average car, the fractional number of crashes that occur at speeds near or above 5 mph is small. A much larger number occur at 0–3 mph. Yet IIHS conducted all of the tests which it submitted to the record at an impact speed of 5 mph only. No tests are known by the agency to have been conductd by IIHS at lower speeds, other than the above noted limited tests demonstrating that the unregulated bumpers could pass the less stringent barrier test at an impact speed of 2.5 mph.[2]

In its petition, IIHS noted the agency's statement that there were no data from which to conclude that the bumper systems tested by that organization were designed to, or would in fact comply with, the Part 581 requirements in 2.5 mph barrier and pendulum impacts. The petitioner alleged that the agency apparently ignored the fact that, at the November 1981 hearings on the rulemaking, the witness on behalf of IIHS explained that the VW Rabbit pickup truck's front bumper was essentially the bumper that Volkswagen *itself* had said it would install in compliance with a 2.5 mph standard.

The agency does not agree that the petitioner has demonstrated the necessary properties of the bumper in question or even the understanding or intention of VW in this regard. In fact, the IIHS witness stated at the hearing that IIHS itself "presumed" that the design on the VW pickup truck's front bumper was the one that VW would choose for the Rabbit passenger car, based upon IIHS' reading of the estimated weight savings allegedly indicated by that manufacturer in its comments, a perceived similarity between the VW pickup truck and passenger car bumpers (except for the energy absorbers included on passenger car bumpers), and the fact that manufacturers in general have indicated they will remove energy absorbers in going to 2.5 mph bumpers. VW itself has not stated to the record or as known to the agency anywhere else that it would use the pickup truck bumper design on its passenger cars in the event of an impact change from 5 to 2.5 mph. Moreover, the July 29, 1982, letter written by VW to IIHS and submitted to the record asserts that the weight savings figure used by IIHS in this regard was taken out of context. VW indicates in its letter that it may in fact redesign the bumpers, including the face bars, of its passenger cars under the new standard.

More important, even if IIHS were correct that the bumper design in question is the one VW will use under a 2.5 mph standard, the issue is still not resolved. As noted above, IIHS data for the three pairs of cars are too limited to draw conclusions about overall 2.5 mph and 5 mph bumper effectiveness, and do not take account of the small number of crashes occurring at speeds near or above 5 mph. The data for the pair of VW cars alone are still more limited, and commensurately less suitable for drawing reliable conclusions.

The agency notes that even as so limited in value, the resulting IIHS data comparing the combined damage of three types of 5 mph collisions for 2.5 mph and 5 mph bumpers, do not directly conflict with the agency's conclusions about the overall relative effectiveness of 2.5 mph and 5 mph bumpers. The agency's 1979 Assessment, which was used by the agency in comparing 2.5 mph an 5 mph bumper effectiveness, assumed that 5 mph bumpers were much more effective in 5 mph collisions than 2.5 mph bumpers. Moreover, the determination in the 1979 Assessment that 2.5 mph bumpers were 67 percent as effective as 5 mph bumpers was, in significant part, a reflection of the above noted fact that a very small number of crashes occur at speeds near 5 mph and above, as compared to the number which occur at speeds of 0 to 3 mph.

The agency believes that the best available evidence concerning the relative effectiveness of 2.5 and 5 mph bumpers is the theoretical relationship developed in the PRIA and FRIA through use of the agency's 1979 Assessment. Based on a combination of real world data and engineering estimates regarding effectiveness, the 1979 Assessment concluded that 2.5 mph bumpers were 67 percent as effective as 5 mph bumpers, i.e., that 2.5 mph bumpers prevent 67 percent of the damage prevented by 5 mph bumpers, relative to pre-standard bumpers. (The 67 percent figure is in part a function of the value of unrepaired damage and thus varies according to the value selected.)

After reviewing the challenge set forth in IIHS's petition, the agency continues to believe that it was appropriate to use the 1979 Assessment for purposes of the 67 percent ratio. As the agency explained in the PRIA and FRIA, there are very few empirical data concerning the effectiveness of 2.5 mph bumpers. The reason for this is that the only 2.5 mph bumpers ever installed on cars were those on the rear of 1973 cars. The PRIA did attempt to use the limited data available from those vehicles to estimate the effectiveness of front and rear 2.5 mph bumpers. However, commenters on all sides agreed that the 1973 rear bumpers were not representative of 2.5 mph bumpers.

As an alternative to using the data on 1973 rear 2.5 mph bumpers, the agency used the 1979 Assessment to estimate 2.5 mph bumper effectiveness. The agency applied the Assessment's 67 percent ratio to its real world estimate of 5 mph bumper effectiveness to derive an estimate of 2.5 bumper effectivness. None of the commenters on the proposal opposed this use of the ratio.

In its petition submitted after the final rule, IIHS did allege that certain of the assumptions underlying the 1979 Assessment are rebutted by IIHS crash test data. It further asserted that some of

[2] The agency notes that the results of IIHS's testing, as announced and displayed in films submitted to the docket and widely distributed to the press and public, are seriously misleading in another respect. IIHS compared the total amount of damage sustained by similar vehicles with alleged 5 mph and 2.5 mph bumpers in a series of crashes. Quite apart from the fact that the series of tests were extremely unrepresentative in terms of the number of crashes that a vehicle is likely to be involved in at speeds as high as 5 mph, the front into angle barrier and rear into pole tests included by IIHS were far more severe than any test required by Part 581. A very large portion of the differences in dollar damage between the vehicles alleged to have 5 mph and 2.5 mph bumpers is attributable to those severe tests. Presentation of test results in the manner used by IIHS could mislead the uninformed observer as to either NHTSA's test protocol or the relative ability of these undocumented "2.5" bumpers to withstand damage as compared to 5 mph systems in the type of crash situations likely to be experienced by a typical car in the real world.

the data were never validated and that the data and assumptions do not take Phase I and Phase II requirements into account.

With respect to these allegations, it should be noted that the agency did not use the 1979 Assessment for purposes other than developing the 67 percent ratio. The agency believes that data regarding on-the-road experience, such as the data used to estimate the benefits produced by 5 mph bumpers, are superior to engineering estimates. However, as the problem of estimating 2.5 mph bumper effectiveness illustrates, such data are often unavailable. Since the agency only used the 1979 Assessment for purposes of the 67 percent ratio, the only inquiry into its underlying assumptions which is relevant at this point is whether they could be incorrect in such a way as to significantly reduce that ratio.

The IIHS petition alleged that one of the underlying assumptions of the 1979 Assessment, that a bumper system loses all of its effectiveness in impacts that are twice the design speed, is rebutted by IIHS crash test data. According to that organization, even the FMVSS 215 bumper resulted in substantial reductions in damage in barrier impacts of 10 and 15 mph.

The agency does not believe that the data presented by IIHS establish any invalidity of the 1979 Assessment's assumption that a bumper system loses its effectiveness in impacts that are twice the design speed. This conclusion is based on several factors. First, the IIHS data come from front barrrier crashes which overstate the effectiveness that bumpers would have in the real world. The reason for this is that front barrier tests do not reflect collisions with objects, varying angles of collision, or the dynamic mismatch and override which occur in a significant portion of on-the-road collisions. Before using such test results to estimate bumper effectiveness in real world crashes, the agency would have to reduce the values substantially to account for those factors. If this were done, estimates of overall effectiveness at twice the design speed would only be a fraction of the values derived by IIHS test data.

Second, IIHS's conclusions are based upon a very small number of vehicles. Third, there was a great deal or year-to-year scatter in the data for individual vehicle types.

In any event, even if the 1979 Assessment had assumed some level of effectiveness at speeds more than double the design speed, the 67 percent ratio would not have been substantially changed. The reason for this is that while 5 mph bumpers would have been assumed to have some effectiveness at speeds above 10 mph, it would have been necessary to assume also that 2.5 mph bumpers would have some such effectiveness above the doubled value for that speed, i.e., above 5 mph.

IIHS also argued that the 1979 Assessment's figures on the frequency of crashes at different impact speeds, derived from a Ford study, have never been validated. The agency disagrees. The frequency values were based on extensive data. That data included the results of a survey taken of approximately 18,000 damaged vehicles that had been involved in accidents.

The agency believes that the Ford frequency of crash information was the best available when the 1979 Assessment was completed. The agency is unaware of any later data which are either superior to the Ford data or which indicate that the limited conclusions derived from such frequency of crash information are invalid. The petitioner neither identified nor submitted such data.

Finally, IIHS argued that these agency effectiveness estimates did not take account of the Phase I/Phase II requirements. The petitioner suggested that in making such estimates the agency assumed that designs which would allow damage to the bumper and attachments (Phase I) would be as effective as designs that permit no damage at all (Phase II).

Petitioner's arguments on this point are incorrect. As discussed above, the agency made no such assumption. The 67 percent effectiveness ratio was derived from the estimate in the 1979 Assessment that 2.5 mph Phase I bumpers would prevent 67 percent of the damage prevented by 5 mph Phase I bumpers. The agency believes that use of the same ratio is appropriate for comparing 2.5 mph Phase II bumpers with 5 mph Phase II bumpers or 2.5 mph FMVSS 215 bumpers with 5 mph FMVSS 215 bumpers.

Alleged Discrepancies

IIHS alleged that there are discrepancies in the various calculations used in NHTSA's analysis to estimate the differences in net benefits between 5 mph and 2.5 mph bumpers. For example, the petitioner noted that the press release announcing the agency's decision indicated that the new standard will yield an additional $28 in net benefits to consumers over the life of the vehicle, when compared to the current 5 mph bumpers. The net $28 in benefits were stated to have been based on vehicle price and fuel savings of $93 offset by an increase of $65 in higher repair, insurance and other costs.

IIHS argued that the $93 and $65 figures never appeared in the analysis and that the net benefit of $28 mentioned in the press release is the average result obtained from three different methods. This petitioner also argued that the agency's own most probable set of values for the various components of costs and benefits produced a net benefit result of $18.

The agency has examined the examples alleged by IIHS to be discrepant figures, and has determined that they represent nothing more than the different possible estimates of benefits which might result from the alternate methods of calculation used by the agency. As noted extensively in the preamble to the final rule, the comparable assessment of costs and benefits by alternative methods was one means by which the agency addressed and to the degree possible reduced the problems of uncertainty inherently associated with this type of rulemaking.

The specific figures of $93 in gross benefits and $65 in gross costs appear on page ii of the FRIA summary. Those figures were derived using the assumptions underlying each of three methods by which the agency calculated the most probable outcomes of net benefits. The figures are indeed averages of the three methods, just as the $28 is an average.

Contrary to the assertions of IIHS, the agency has never concluded, much less stated, that the most probable values for the various components of costs and benefits would yield a net benefit of $18. Instead, the set of assumptions used to derive the $18 figure (which appears at line 3, Table XI–4, FRIA) was one of several combinations of assumptions which the agency evaluated on pages XI–17 to 19 of the FRIA in an attempt to arrive at the respective, more probable outcomes for each such set of assumptions. Table XI–4 of the FRIA presents three such outcomes, with net benefits of $42, $23 and $18, respectively, which the agency considers to have an equal probability of occurrence. These benefit figures are the ones mentioned above as having been averaged to produce the $28 figure.

The IIHS petition alleged that, in calculating one of those three net benefit outcomes, the agency derived four net benefit figures, arbitrarily decided that one of them was not plausible, and then averaged the other three to obtain the net benefit outcome.

The agency disputes that construction of its assessment process. As part of its sensitivity analysis of this complicated

economic structure, the agency calculated net benefits using four combinations of extreme assumptions: high benefit range/low cost range, high benefit range/high cost range, low benefit range/low cost range, and low benefit range/high cost range. In one attempt to estimate and set forth the probable net benefits for the alternative standards, the agency calculated the average of the results of those combinations of extreme assumptions. The agency determined, however, that it was virtually impossible for one of the four combinations of extremes assumptions, the low benefit range with high cost range, to occur in reality. This conclusion was not arbitrary, but based on the recognition that for this particular combination of factural predicates to occur, inherently contradictory operations of market or price behavior would have to occur and diametrically opposed assumptions as to cause and effect would have to be made simultaneously. Therefore, the agency excluded that combination from the averaging process.

The agency fully discussed in the FRIA its reasons for rejecting the possibility that low benefit/high cost combination of assumptions could occur in reality. The IIHS petition did not address the agency's statements or suggest why they might be incorrect. The agency believes its conclusion was correct and, therefore, that it was appropriate not to use that combination for purposes of determining this one estimate of net benefits of the alternative standards.

Further, the particular methodology challenged by IIHS (averaging the three figures to obtain a likely outcome) is only one of three used by the agency to determine likely outcomes. The agency's ultimate decision was based on the entire analysis and is not dependent on the methodology as challenged by the petitioner. The outcome (the agency's decision) would not be changed by dropping the methodology entirely, or even by averaging in the set of extreme assumptions which the agency determined was inappropriate to use in the averaging process. The reason for this is that in any such case the agency would still: (1) find it necessary to reject the 5 mph/5 mph alternative since it was less cost effective than other standards, and (2) choose the 2.5 mph/2.5 mph standarad over the other alternatives. While the choice between the 5 mph/2.5 mph and 2.5 mph/2.5 mph standards would be very close in that situation, the agency would, under the rationale set forth in the preamble to the final rule, be forced to choose the 2.5 mph/2.5 mph standard since it best serves the agency's understanding of the Congressional intent in enacting the statute in the first place. It would result in the fewest known costs to achieve essentially the same expected net benefit, would allow manufacturers the greatest design freedom in attaining the same net benefit, and avoids a differential front and rear standard which would increase design costs and affect the amount of damage inflicted.

For all of these reasons, the results of the rulemaking are not affected by the issues raised by IIHS' challenge to the exclusion of the net benefit figures for the fourth combination of assumptions from the averaging process in determining one of the likely outcomes.

Late Submission

Late in the agency's review of the petitions for reconsideration, Allstate submitted a new analysis of insurance data for 1980 model year cars as compared to 1971–1972 and 1973–1974 model year cars. That company concluded that the 1980 systems produced substantial cost reductions. Moreover, Allstate argued that its data are not unique, since analyes of State Farm submitted to the docket demonstrate similar results.

The agency was unable to fully analyze or draw reliable conclusions from Allstate's data for two reasons. First, the data were presented in a summary format which did not enable the agency to evaluate the methodology employed by Allstate or compare the data with data of a similar type analyzed by the agency. Second, the analysis was submitted so late (almost five months after publication of the final rule) that efforts by the agency to obtain the type of information needed for a full evaluation and then to conduct such an evaluation would have resulted in a substantial delay in responding to the timely filed petitions for reconsideration.

However, the agency has no reason to believe that such an evaluation would in any way affect its various estimates provided in the FRIA or its decision to deny the petitions for reconsideration. The reductions in accident and insurance costs resulting from 5 mph bumpers were fully considered by the agency during the rulemaking. While the agency is unable to assess Allstate's arguments that its data are not unique and that analyses of State Farm submitted to the docket demonstrate similar results, the agency did fully consider data submitted by State Farm that were of a similar nature to those used by Allstate. See PRIA, chapter V; FRIA, chapter III (D) and VI. If Allstate submits its data in a more complete and useable format, the agency will consider them as part of its ongoing review of the Bumper Standard.

BILLING CODE 4910–59–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 611

[Docket No. 21213–250]

Foreign Fishing

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Interim rule; extension of comment period.

SUMMARY: NOAA issues an interim rule to establish a 1983 poundage fee schedule for foreign vessels fishing in the fishery conservation zone until a final schedule is made effective. NOAA also provide 30 days for comments on the rule. This action is necessary because interested parties claim not to have had sufficient time to comment on a rule proposed on November 12, 1982. This interim rule is identical to the proposed rule and the extension of the comment period will allow interested parties more time to prepare comments and ensure that foreign fishing may continue beyond December 31, 1982.

DATES: This interim rule is effective on January 1, 1983. Comments must be received on or before January 19, 1983.

FOR FURTHER INFORMATION CONTACT: Susan E. Jelley, National Marine Fisheries Service, 202–634–7432.

SUPPLEMENTARY INFORMATION: On November 12, 1982, NOAA published the proposed poundage fee schedule for 1983 at 47 FR 51336. A 30-day comment period on the proposed rule closed on December 13, 1982. NOAA wishes to provide sufficient time for comments and to give full and careful consideration to all comments received. Comments received to date, principally comments received from Governments

of foreign fishing nations, state that more time is needed to develop meaningful responses on the issues contained in the proposed rule published at 47 FR 51336. Translation problems have been cited in some instances. Drafters of such comments have stated that they do not wish to delay the implementation of a 1983 poundage fee schedule.

NOAA has considered these requests and believes legitimate reasons exist for granting an extension. Therefore, NOAA has decided to adopt the rule proposed at 47 FR 51336 as a interim final rule effective on January 1, 1983, and to provide 30 days from the date of publication of this notice for comments on the interim rule. Comments on the proposed rule, as well as additional comments received on the interim rule, will be considered prior to publication of a final rule.

Payments for foreign poundage fishing fees are made by letter of credit (L/C). NOAA provides annual estimates of levels at which L/C's must be maintained. Initially, the 1983 levels will be based on the interim fee schedule adopted here. However, because the first actual billings against L/C's will not occur until after April 15, 1983, and NOAA expects the final schedule to be effective well before that date, the actual billings for fish harvested on and after January 1, 1983, will be calculated on the basis of the final fee schedule.

Classification

This interim final rule is identical to the proposed rule, which was reviewed under the provisions of E.O. 12291. This action is taken under the emergency provisions of section 8(a)(1) of E.O. 12291. It is impracticable for NOAA to follow the procedures of the Executive Order in this action and concurrently provide additional time for comment while implementing a fee schedule on January 1, 1983. The previous findings that the fee schedule will not have a significant economic impact upon the environment, still apply.

The Administrator, NOAA, has determined that to delay implementation of this interim final rule for the 30 days required by 5 U.S.C. 553 would be contrary to the public interest, since it could disrupt foreign fishing and result in lost poundage fee revenues to the United States. Therefore, part of the 30-day delay in implementation is waived.

Proposed Rules

Federal Register
Vol. 47, No. 244
Monday, December 20, 1982

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 8

[Docket No. 82-26]

Assessment of Fees; National Banks; District of Columbia Banks

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: OCC proposes to amend Part 8 of Title 12, Code of Federal Regulations, to require that interest be paid to OCC in cases of delinquent payment of semiannual assessments or trust examination fees. The purpose of this amendment is to encourage banks to avoid delinquent payments, and to compensate OCC for income lost as the result of delinquent payments. Semiannual assessments will be considered deliquent if not received by January 31 or July 31 of each year. Trust examination fees will be considered delinquent if not received within 15 calendar days from the date of OCC's invoice. The amount of interest to be paid will be determined by applying the Treasury Department's current value of funds rate to unpaid balances. Interest charges will be computed daily on principal amounts only.

DATES: Comments should be received no later than January 19, 1983.

ADDRESSES: Comments should be directed to Docket No. 82-26 Communications Division, Office of the Comproller of the Currency, 490 L'Enfant Plaza East, SW., 3rd Floor, Washington, D.C. 20219, Attn: Christine Jones. Telephone (202) 447-1768. Comments will be available for inspection and photocopying.

FOR FURTHER INFORMATION CONTACT: Dennis Arczynski, Project Manager, Finance and Planning (202) 447-1878; or Duff Jordan, Attorney, Legal Advisory Service Division (202) 447-1880, Office of the Comptroller of the Currency, Washington, D.C. 20219

SUPPLEMENTARY INFORMATION: The Comptroller of the Currency is authorized by 12 U.S.C. 481 and 482 to make examinations of national banks and affilitates thereof, of district banks, and of certain other entities exercising fiduciary powers. These statutes also authorize the Comptroller to make assessments against these institutions to recover the expenses of these examinations. Pursuant to this authority, OCC has required that national banks and district banks make semiannual assessment payments in proportion to their total assets. 12 CFR 8.2. In addition, OCC has established procedures for making assessments for the expense of each trust examination. 12 CFR 8.7. In a significant proportion of instances, assessment payments are not received by OCC when due. To date, no regulatory provisions has been made to enforce prompt payment of these assessments.

The proposed regulation will enable OCC to collect interest on delinquent payments of semiannual assessments and trust examination fees. Interest will also be charged if a bank computes its assessment incorrectly and pays less than the amount required.

OCC wishes to adopt this regulation because certain banks subject to its jurisdiction have failed to make timely assessment payments in accordance with the requirements of 12 CFR Part 8. For example, 1,095 of 4,465 respondents (24.5%) were delinquent in making the semiannual assessment payment due January 31, 1982. Late payments totaled more than $10.1 million, or approximately 17% of all assessments received. During the time assessments are delinquent, OCC does not have use of these funds and loses interest revenue. Correspondingly, the delinquent banks effectively reduce the burden of their assessments by the amount of interest income derived from these funds. By allowing the imposition of interest charges, the proposed regulation will compensate OCC for this lost income, and will eliminate the advantage obtained by the delinquent banks.

The proposed interest charges will be based on the United States Treasury Department's rate for delinquent payments to all departments of the Federal Government. The Treasury Department publishes this rate on a quarterly basis. For the first three quarters in 1982, this rate was 14.39%, 13.22%, and 14.26%. This rate was chosen (1) because it is the government-wide standard used for delinquent payments to Federal departments and (2) because it changes on a quarterly basis, which simplifies necessary interest computations.

Interest will be charged for each calendar day that payment is delinquent. The amount of interest payable will be determined for each day by multiplying the total amount delinquent by the daily equivalent of the rate published at the end of the preceding quarter. If this proposal had been in effect for the January 1982 assessment, OCC would have received approximately $13,600 in interest for delinquent payments.

OCC proposes to adopt this regulation as a means to encourage banks to avoid delinquent payments. Alternative methods of ensuring prompt payment, such as providing banks with additional notice of the dates payments are due, were determined by the OCC staff to be ineffective. The proposed interest charges will not impose penalties upon delinquent banks, but will simply eliminate the cost advantage to banks of making delinquent payments. The interest rate assessed will be the same for large and small banks, because the interest income foregone by OCC is the same percentage of the delinquent assessment regardless of the source of funds.

The proposed regulation does not impose additional requirements on banks subject to OCC jurisdiction, but instead attempts to ensure that existing requirements are met. Banks may completely avoid the effects of this regulation by making payments as required by regulation. This proposal makes clear that payments are to be received by OCC on designated dates, rather than that payments are to be sent on those dates. Banks which can transfer funds quickly will consequently be at an advantage, since interest lost by these banks during the period of transfer will be minimized. OCC anticipates that banks will use electronic funds transfer (EFT) systems where this is possible, so as to minimize transfer times. Because OCC anticipates that banks subject to its jurisdiction will be using EFT systems by June 1983, any

disadvantage to banks presently without such systems should be only temporary.

The public comment period on this proposed regulation is limited to 30 days so that a final regulation may be issued before the first 1983 semiannual assessments, which are due January 31, 1983.

Special Studies

The Secretary of the Treasury certified that this regulation will not have a "significant impact on a substantial number of small businesses," as that phrase is used in the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis has been prepared. The proposed regulation will not impose additional reporting or recordkeeping requirements on any banks subject to the jurisdiction of the Comptroller, nor will the regulation have any other significant impact on those banks. The interest charges imposed will ordinarily be insubstantial, and will be offset in large part by interest obtained by the delinquent banks from the use of overdue funds.

A Regulatory Impact Analysis is not required because the OCC has determined that the proposal is not a "major rule" as defined by Executive Order 12291. The proposal will not have an annual effect on the economy of $100 million or more, will not result in a major increase in costs or prices to consumers, individual industries, Federal, State or local government agencies, or geographic regions, nor will it have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises.

List of Subjects in 12 CFR Part 8

National banks, Assessment fees.

PART 8—[AMENDED]

For the reasons set forth in the preamble, 12 CFR Part 8 is proposed to be amended as follows:

(1) By revising the authority citation to read as follows:

Authority: R.S. 5240, as amended, 12 U.S.C. 481, 482, 12 U.S.C. 3102, and in Sec. 3, 47 Stat. 1566, 26 D.C. Code 102.

(2) By adding a new § 8.8 to read as follows:

§ 8.8 Payment of Interest on Delinquent Assessments and Trust Examination Fees.

Each national bank and each district bank shall pay to the Comptroller of the Currency interest on its delinquent payments of semiannual assessments. In addition, each national bank and each entity with a trust department examined by the OCC shall pay to the Comptroller of the Currency interest on its delinquent payments of trust examination fees. Semiannual assessment payments will be considered delinquent if they are received after the time for payment specified in § 8.2. Trust examination fees will be considered delinquent if not received by the Office within 15 calendar days from the OCC invoice date. The interest to be paid will be simple interest, calculated for each day payment is delinquent by multiplying the applicable interest rate by the amount delinquent. The rate of interest charged by OCC will be the United States Treasury Department's current value of funds rate (the "TFRM rate"); that rate is issued under the Treasury Fiscal Requirements Manual and is published quarterly in the **Federal Register.** The interest rates applicable to a delinquent payment will be determined as follows:

(a) For delinquent days occurring from January 1 to March 31, the rate will be the TFRM rate that is published the preceding December for the first quarter of the ensuing year.

(b) For delinquent days occurring from April 1 to June 30, the rate will be the TFRM rate that is published the preceding March for the second quarter of the year.

(c) For delinquent days occurring from July 1 to September 30, the rate will be the TFRM rate that is published the preceding June for the third quarter.

(d) For delinquent days occuring from October 1 to December 31, the rate will be the TFRM rate that is published the preceding September for the fourth quarter.

Dated: November 15, 1982.

C. T. Conover,

Comptroller of the Currency.

BILLING CODE 4810-33-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82-CE-36-AD]

Airworthiness Directives; Piper Models PA-23-235 and PA-23-250 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt a new Airworthiness Directive (AD) which would require installation of a revised Airplane Flight Manual (AFM) containing zero fuel weight limitations in certain Piper Models PA-23-235 and PA-23-250 airplanes. The manufacturer and FAA have determined that the zero fuel weights anticipated during the design, analysis and tests of the airplanes structure may be exceeded by some operators who use the airplane to haul high fuselage loads for short distances. Because such operations may exceed the structural limitations of the wings, the manufacturer published in applicable AFM revisions of the zero fuel weight limitation for these airplanes. This proposed AD would make incorporation of these revisions in the affected AFMs and compliance with these zero fuel weights mandatory.

DATES: Comments must be received on or before February 23, 1983. Compliance: As prescribed in the body of the AD.

ADDRESSES: Airplane Flight Manuals (Piper Reports) applicable to this AD may be obtained from Piper Aircraft Corporation, 820 East Bald Eagle Street, Lock Haven, Pennsylvania 17745 or the Rules Docket at the address set forth herein. Send comments on the proposal in duplicate to Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 82-CE-36-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION: C. Kallis, Airframe Section, ANE-172, New York Aircraft Certification Office, Federal Building, JFK International Airport, Jamaica, New York 11430; Telephone 212-995-2875.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All Communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of comments received. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 82–CE–36–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Discussion

Piper Aircraft Corporation and the FAA have become aware that some operators are using their Piper Models PA–23–235 and PA–23–250 airplanes to haul heavy parts, cargo, mail, checks and similar material for relatively short distances. This usage of airplanes which incorporate substantial quantities of electronics or other fuselage installed equipment may cause the structural capability of the wings to be exceeded under maximum design gust conditions as the wing carried fuel load approaches zero or minimum allowed quantities.

To eliminate the possibility of structural damage to the wings and/or operation of the airplanes with reduced margins of safety under these conditions, the manufacturer has established zero fuel weight limitations for these airplanes and published them in revisions to the applicable AFMs. The FAA has determined that adherence to these zero fuel weights is necessary to assure that the design level of safety of these airplanes is realized during normal operation.

When incorporated into the Limitations Section of the AFM as Operating Limitations, FAR 91.31 requires that zero fuel weights be observed by the operator. The FAA finds that to assure the continued safe operation of these airplanes the incorporation of the applicable current AFMs in the affected airplanes and adherence to the zero fuel weight limitations therein is necessary. Since the condition described herein is likely to exist or develop in other Piper Models PA–23–235 and PA–23–250 airplanes of the same design, the AD would make the aforementioned incorporation and adherence mandatory.

There are approximately 6,334 airplanes affected by the proposed AD. The cost of the AD is estimated to be $31,650 to the private sector.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new AD:

Piper: Applies to Models PA–23–235 (S/N 27–505 through S/N 27–622) and PA–23–250 (S/N 27–1 and up) airplaines certificated in any category.

Compliance: Required as indicated unless already accomplished.

To prevent possible wing structure damage:

(a) Within 30 days after the effective date of this AD, attach a copy of this AD to the Airplane Flight Manual in the Limitations Section and operate the airplane in accordance with the Zero Fuel Limitations specified herein:

Zero Fuel Weight Limitations

Models PA–23–235 and PA–23–250 (S/Ns 27–1 thru 27–1999), Zero Fule Weight—4,000 lb.

Models PA–23–250 (S /Ns 27–2000 and up).

*Zero Fuel Weight—4400 lbs.

*Except Turbocharged.

Zero Fuel Weight 4,500 lbs.

(b) Within 12 months after the effective date of this AD, install the appropriate Airplane Flight Manuals as indicated below in the airplane:

Airplane Flight Manuals (Piper Reports)

PA–23–235, S/Ns 27–505 thru 27–622—Report 1207 Rev. B.

PA–23–250, S/Ns 27–1 thru 27–1999—Report 1036 Rev. B.

PA–23–250, S/Ns 27–2000 thru 27–2504—Report 1204 Rev. C.

PA–23–250, S/Ns 27–2505 thru 27–3836—Report 1308 Rev. B. (4800 lbs. Gross Weight).

PA–23–250, S/Ns 27–3838 thru 27–3943—Report 1360 Rev. B. (5200 lbs. Gross Weight).

PA–23–250, S/Ns 27–3837, 27–3944 thru 27–4425, 27–4427 thru 27–4573—Report 1520 Rev. D.

PA–23–250, S/Ns 27–4426, 27–4574 thru 27–7554168—Report 1630 Rev. 16.

PA–23–250, S/Ns 27–7654001 and up—Report 1948 Rev. 2.

(c) The installation of this AD in the Airplane Flight Manual and/or installation of the appropriate Airplane Flight Manual in the airplane may be accomplished by the owner/operator of the airplane. This person must make the prescribed entry indicating compliance with this AD in the Airplane Maintenance Records.

(d) An equivalent method of compliance with this AD may be used if approved by the Chief, New York Aircraft Certification Office, FAA, Federal Building, JFK International Airport, Jamaica, New York 11430.

Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a) 1421 and 1423); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655 (c)); and § 11.85 of the Federal Aviation Regulations (14 CFR 11.85)

Note.—For reasons discussed earlier in the preamble, the FAA has determined that this document: (1) Involves a proposed regulation that is not major under the provisions of Executive Order 12291, (2) is not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) in addition, I certify under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A draft regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Kansas City, Missouri, on December 6, 1982.

Murray E. Smith,

Director, Central Region.

[Airspace Docket No. 82–ASW–60]

Proposed Revocation of Transition Area: Seymour, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Aviation Administration proposes to revoke the transition area at Seymour, TX. The intended effect of the proposed action is to eliminate controlled airspace no longer needed for protection of aircraft. This action is necessary since the transition area is no longer required and the instrument flight procedure based on this airspace has been canceled.

DATE: Comments must be received on or before January 20, 1983.

ADDRESS: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8 a.m. and 4:30 p.m. The FAA Rules Docket is located in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stephenson, Airspace and Procedures Branch, ASW–535, Air Traffic Division, Southwest Region,

Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101; telephone (817) 624–4911, extension 302.

SUPPLEMENTARY INFORMATION:

History

Federal Aviation Regulation Part 71, Subpart G § 71.181, as republished in Advisory Circular AC 70–3 dated January 29, 1982, contains the description of transition areas designated to provide controlled airspace for the benefit of aircraft conducting instrument flight rules (IFR) activity. Revocation of the transition area at Seymour, TX, will necessitate an amendment to this subpart. This amendment will be required at Seymour, TX, since the instrument flight procedure requiring this airspace has been canceled

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. (Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals.) Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 82–ASW–80." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, or by calling (817) 624–4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should contact the office listed above.

List of Subjects in 14 CFR Part 71

Control zones, Transition areas, Aviation safety.

Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Seymour, TX, Revoked

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Fort Worth, TX, on December 8, 1982.

F. E. Whitfield,

Acting Director, Southwest Region.

Proposed Alteration of VOR Federal Airways V–3, V–35, V–51, V–157, V–267, V–295, and V–492

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter VOR Federal Airways V–3, V–35, V–51, V–157, V–267, V–295, and V–492 in Central and South Florida. This action would renumber certain alternate airway segments in support of International Civil Aviation Organization (ICAO) agreement to phase out alternate airway descriptions from the National Airspace System, revoke segments that are no longer needed for flight planning or Air Traffic Control (ATC) to help reduce chart clutter, and realign other airways to accommodate recent traffic flow changes in South Florida.

DATE: Comments must be received on or before January 19, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Southern Region, Attention: Manager, Air Traffic Division, Docket No. 82–ASO–29, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: George Hussey, Airspace Regulations and Obstructions Branch (ATT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 82–ASO–29." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All

comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revoke V–35 west alternate between Biscayne Bay, FL, and the DEEDS intersection; V–267 east alternate between Biscayne Bay FL, and Palm Beach, FL; V–51 east alternate between Biscayne Bay, FL, and Pahokee, FL; V–157 west alternate between the VEGIE intersection and LaBelle, FL; and V–157 west alternate Between LaBelle, FL, and Lakeland, FL; renumber V–267 east alternate between Palm Beach, FL; realign V–492 between LaBelle, FL, and Palm Beach, FL; V–295 Between Orlando, FL, and Cross City, FL; and establish new VOR Airways V–531 from Biscayne Bay, FL, Intersection Biscayne Bay 262°T(262°M) and Fort Myers, FL, 137°T(136°M) radials to LaBelle, FL, and V–529 from Biscayne Bay, FL, to LaBelle, FL. Alternate airways segments that are no longer needed for flight planning or ATC are being revoked to help reduce chart clutter. Certain segments that are retained have been renumbered in support of the ICAO agreement to phase out alternate descriptions from the National Airspace System. Other airways are realigned or established to accommodate arrival/departure transition areas in South Florida and conform with recent traffic flow changes. Alternate airway segments not addressed will be amended in subsequent dockets. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3 dated January 29, 1982.

List of Subjects in 14 CFR Part 71

VOR federal airways, Aviation safety.

Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. *V–3 [amended]*
   By deleting the words ", including an E alternate via INT Biscayne Bay 021° and Palm Beach 166° radials"
2. *V–35 [Amended]*
   By deleting the words ", including a west alternate from Biscayne Bay via INT Biscayne Bay 262° and Fort Myers 137° radials to the INT of Biscayne Bay 288° and Fort Myers 137° radials"
3. *V–51 [Amended]*
   By deleting the words ", including an east alternate from Biscayne Bay, Fort Lauderdale, FL, INT Fort Lauderdale 339° and Pahokee 124° radials"
4. *V–157 [Amended]*
   By deleting the words ", including a W alternate from INT Miami 222°and Fort Myers, FL, 137° radials to LaBelle via INT Fort Myers 137° and LaBelle 162° radials" "and ", including an E alternate via INT LaBelle 004° and Lakeland 132° radials"
5. *V–267 [Amended]*
   By deleting the words ", including an east alternate from Biscayne Bay, INT Biscayne Bay 40° and Palm Beach, FL, 201° radials; Palm Beach: INT Palm Beach 326° and Orlando 162° radials"
6. *V–531 [New]*
   By adding "V–531 From Palm Beach, FL; INT Palm Beach 326°T(326°M) and Orlando, FL, 162°T(162°M) radials; to Orlando."
7. *V–492 [Amended]*
   By deleting the words "INT LaBelle 101° and Palm Beach, FL, 272° radials; Palm Beach, including a north alternate from LaBelle to Palm Beach via INT La Belle 043° and Palm Beach 298° radials" and substituting for them the words "Pahokee, FL; Palm Beach, FL"
8. *V–295 [Amended]*
   By deleting the words "INT Orlando 283° and Ocala, FL, 156° radials;"
9. *V–529 [New]*
   By adding "V–529 From Biscayne Bay, FL; INT Biscayne Bay 262°T(262°M) and La Belle, FL, 158°T (157°M) radials; to La Belle."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore— (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on December 9, 1982.

B. Keith Potts,

Manager, Airspace and Air Traffic Rules Division.

[Airspace Docket No. 82–ASO–55]

Proposed Establishment of Temporary Restricted Areas; Camp LeJeune, NC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate temporary restricted areas in the vicinity of Camp LeJeune, NC, to contain hazardous air activity associated with a major joint military exercise. Applicable areas would be included in the Continental Control Area. This action would prohibit unauthorized flight operations by nonparticipating aircraft within the proposed restricted areas during their designated times of use. This notice is also intended to inform aviation interests of associated nonrulemaking action to establish temporary military operations areas in support of the subject exercise.

DATE: Comments must be received on or before February 3, 1983.

ADDRESS: Send comments on the proposal in triplicate to: Director, FAA Southern Region, Attention: Manager, Air Traffic Division, Docket No. 82–ASO–55, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320.

Send comments on environmental aspects to: Captain C. M. Zucker, USN, CINCLANT N37, Norfolk, VA 23511; telephone: Autovon—690–6575.

Send comments on land use aspects to: Mr. Roy S. Futrell or Mr. C. M. Wash, Maneuver Real Estate Office, Army Corps of Engineers, P.O. Box 99, Cory, NC 27511; Telephone: Commercial—919–755–4071.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is

located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: George Hussey, Airspace Regulations and Obstructions Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 82–ASO–55." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

Proposals

The FAA is considering amendments to § 71.151 of Part 71 and § 73.53 of Part 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) that would designate temporary restricted areas identified as R–5505A through G, Camp LeJeune, NC, to contain hazardous air activity associated with a major joint military exercise. Applicable areas would be included in the Continental Control Area. This exercise will provide necessary training for several military commands operating under the sponsorship of the United States Atlantic Command, Norfolk, VA. The air activities associated with the exercise will be such that simultaneous flight by nonparticipating aircraft cannot be safely conducted within the proposed temporary restricted areas when they are in use by the military. These activities will consist of high performance military aircraft and helicopters engaged in fast tempo air-to-air and air-to-ground air operations where pilots may be restricted from properly clearing themselves from nonparticipating aircraft. This situation creates a hazard and requires designation of temporary restricted areas. Approximately 237 aircraft would be used to conduct approximately 291 fixed wing and 150 helicopter daily sorties. Participating aircraft operating outside the exercise areas will file individual flight plans to the maximum extent practicable. The boundary abutments to existing special use airspace areas are necessary to accommodate inter-area transition into and out of adjacent areas which will also be utilized extensively during the exercise. Communications equipment would be installed and maintained between appropriate military and FAA facilities to coordinate movement of nonparticipating aircraft through the exercise areas when military activity permits. Additionally, a reverse charge telephone number and VHF radio communications frequency would be established and published for pilots of nonparticipating aircraft to coordinate directly with the military if desired. The proposed temporary restricted areas would be designated as joint use to permit utilization of the airspace by the controlling agency for authorized transit by nonparticipating VFR and IFR traffic when military activity permits. The military would provide reasonable access to private or public use land within the proposed temporary restricted areas. The United States Atlantic Command, Norfolk, VA, will serve as lead agency for purposes of compliance with Environmental Policy Act (NEPA). Additionally, this notice is intended to inform interested persons of nonrulemaking proposal 82–ASO–484NR, which would establish temporary military operations areas (MOA's) in support of the subject military exercise wherein high performance military jet aircraft are engaged in unusual maneuvers prior to providing air support for exercise activities within the temporary restricted areas. The temporary MOA's are described as follows:

1. Byrd Corridor Temporary MOA

Boundaries. Beginning at lat. 35°04'30" N., long. 76°04'30" W., to lat. 35°00'30" N., long. 76°01'20" W., thence southwest along W–122A and W–122D to lat. 34°43'30" N., long. 76°22'00" W., to lat. 34°47'00" N., long. 76°24'30" W., thence to point of beginning.
Designated altitudes. 3,000 feet MSL to, but not including, FL 180.
Time of designation. Intermittent, April 27 through May 11, 1983.
Controlling agency. Federal Aviation Administration, ARTC Center (Washington), Leesburg, VA.
Using agency. United States Atlantic Command, Norfolk, VA.

2. LeJeune A Temporary MOA

Boundaries. Beginning at lat. 35°19'20" N., long. 79°07'20" W.; to lat. 35°19'20" N., long. 78°37'30" W.; to lat. 35°16'30" N., long. 78°12'00", W.; to lat. 35°11'00" N., long. 78°00'00" W.;to lat. 35°05'30" N., long. 77°17'00" W.; to lat. 34°55'00" N., long. 77°28'00" W.; thence counterclockwise along an 8.4 NM radius ARC centered at lat. 34°50'00" N., long. 77°36'30" W.; to lat. 34°58'00" N., long. 77°40'00".W.; to lat. 35°02'55" N., long. 79°05'40". W.; thence counterclockwise along the eastern boundary of R–5311 to lat. 35°10'10" N., long. 79°07'30" W.; to point of beginning
Designated altitudes. 12,000 feet MSL to, but not including, FL 180.
Time of designation. Intermittent, April 27 through May 6, 1983.
Controlling agency. Federal Aviation Administration, ARTC Center (Washington), Leesburg, VA.
Using agency. United States Atlantic Command, Norfolk, VA.

3. LeJeune B Temporary MOA

Boundaries. Beginning at lat. 35°19'10" N., long. 79°16'45" W.;to lat. 35°19'10" N., long. 79°07'30" W.; to lat. 35°10'10" N., long. 79°07'30" W.; thence counterclockwise along the northern boundary of R–5311 to lat. 35°07'05" N., long. 79°22'50" W.; to lat. 35°15'30" N., long. 79°16'45" W.; thence point of beginning.
Designated altitudes. 100 feet AGL to, but not including, FL 180.
Time of designation. Intermittent, April 27 through May 6, 1983.

Controlling agency. Federal Aviation Administration, ARTC Center (Washington), Leesburg, VA.
Using agency. United States Atlantic Command, Norfolk, VA.

4. Lejeune C Temporary MOA

Boundaries. Beginning at lat. 35°02'55"N., long 79°05'40"W.; to lat. 34°55'20"N., long. 79°08'15"W.; to lat. 34°55'20"N., long. 79°20'30"W.; to lat. 35°07'05"N., long. 79°22'50"W.; thence counterclockwise along the southern boundary of R–5311 to point of beginning (excluding that airspace within a 1½ NM radius of Readord, NC, and the Raeford, NC, Airport).
Designated altitudes. 100 feet AGL to, but not including, FL 180
Time of designation. Intermittent April 27 through May 6, 1983.
Controlling agency. Federal Aviation Administration, ARTC Center (Washington), Leesburg, VA.
Using agency. United States Atlantic Command, Norfolk, VA.

5. Kingstree Temporary MOA

Boundaries. Beginning at lat. 33°30'00"N., long. 78°52'50"W.; thence southwest along the boudary of W–177A to lat. 33°10'00"N., long. 79°06'45"W.; to lat. 33°24'00"N., long. 79°37'00"W.; to lat. 33°25'00"N., long. 79°55'00"W.; to lat. 33°30'00"N., long. 80°09'30"W.; to lat. 33°52'30"N., long. 79°53'30"W.; to lat. 33°49'30"N., long. 79°48'00"W.; to lat. 33°48'30"N., long. 79°38'00"W.; to lat. 33°50'30"N., long. 79°25'00"W.; to lat. 33°49'00"N., long. 79°19'00"W.; to lat. 33°37'50"N., long. 79°07'20"W.; thence to point of beginning.
Designated altitudes. 14,000 feet MSL up to and incuding 17,000 feet MSL.
Time of designation. Intermittent April 27, through May 11, 1983.
Controlling agency. Federal Aviation Administration, ARTC Center (Washington), Leesburg, VA.
Using agency. United States Atlantic Command, Norfolk, VA.

Section 71.151 of Part 71 and § 73.53 of Part 73 of the Federal Aviation Regulations were republished in Advisory Circular AC 70–3 dated January 29, 1982.

Proposed Amendments

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.151 of Part 71 and § 73.53 of Part 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) as follows:

§ 71.151 [Amended]

1. In § 71.151 by adding:

R–5505A through G, Camp LeJeune, NC
Continous from April 27 through May 6, 1983; Intermittent, May 7–11, 1983.

§ 73.53 [Amended]

2. In § 73.53 by adding:

R–5505A Camp LeJeune, NC [New]

Boundaries. ---

14 CFR Part 75

[Airspace Docket No. 82-AWA-22]

Proposed Establishment of Jet Route

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish Jet Route/High Level J/HL-542 from Brandon, Manitoba, Canada, to Dickinson, ND. The Canadian Government has requested this jet route so that an additional point of entry into Canadian airspace would be available to international air carriers proceeding overseas. This action would facilitate flight planning and save fuel by providing a direct route into Canadian airspace.

DATE: Comments must be received on or before February 3, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Great Lakes Region, Attention: Manager, Air Traffic Division, Docket No. 82-AWA-22, Federal Aviation Administration, 2300 East Devon Street, Des Plaines, IL 60018.

The Official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; Telephone (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 82-AWA-22." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

Proposals

The FAA is considering an amendment to § 75.100 of Part 75 of the Federal Aviation Regulation (14 CFR Part 75) to establish new Jet Route/High Level J/HL-542 between Brandon, Manitoba, Canada, and Dickinson, ND. The Canadian Government has requested this proposal to establish a route into Canada in order to permit an additional point of entry into Canadian airspace for the international air carriers proceeding overseas, and this action supports that proposal. Section 75.100 of Part 75 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3 dated January 29, 1982.

Jet routes, Aviation safety.

Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 75.100 of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as follows:

J-542 [New]

Jet Route No. J-542 From Dickinson, ND; to Brandon, Manitoba, Canada. The airspace within Canada is excluded.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on December 10, 1982.

BILLING CODE 4910-13-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 16

[Docket No. R-82-1042]

Implementation of the Privacy Act of 1974

AGENCY: Office of the Secretary, HUD.

ACTION: Proposed rule.

SUMMARY: This rule exempts HUD's "Investigation Files," a system of records maintained by the Department's Office of Inspector General, from compliance with the applicable provisions of the Privacy Act. The Secretary has determined that, because the "Investigation Files" pertain principally to the enforcement of criminal laws, this system of records may be excepted from the Privacy Act under the general exemption authority of the Privacy Act.

DATE: Comment due date: February 18, 1983.

ADDRESS: Interested persons are invited to submit comments regarding this rule to the Office of General Counsel, Rules Docket Clerk, Room 10278, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410.

Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Robert E. English, Privacy Act Officer, Room 4178, 451 Seventh Street, SW., Washington, D.C. 20410, Telephone Number (202) 755-5320. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The Privacy Act of 1974 (5 U.S.C. 552(a)) was enacted "to assure that personal information about individuals collected by Federal agencies is limited to that which is legally authorized and necessary and is maintained in a manner which precludes unwarranted intrusions upon individual privacy," section 32.100, Paragraph 1 of the OMB Privacy Guidelines, as published on July 9, 1975 at 40 F.R. 28948. The OMB Privacy Guidelines also require each agency to publish rules implementing the Privacy Act for that agency, section 32.100, Paragraph 5(a)(10).

The Department's implementation of the Privacy Act is set forth in Part 16 of Title 24, Code of Federal Regulations. The purpose of this Part is to "establish policies and procedures" for the implementation of the Privacy Act, 24 CFR 16.1 Part of that implementation includes the publication of systems of records which are exempt from certain requirements of the Privacy Act, as determined by the Secretary, pursuant to either the general of specific exemption authority of the Act, 5 U.S.C. 552a(j) or (k). A general exemption is set forth at 24 CFR 16.14 and specific exemptions at 24 CFR 16.15.

The specific exemption provision of the Privacy Act authorizes exemption for systems of records from many of the notice and access requirements of the Act but does not affect the applicability of the remaining Privacy Act requirements. HUD's Office of Inspector General, as part of the Department's compliance with the privacy Act, maintains a system of records identified as "Investigation files, HUD/DEPT. 24." A description of the system was last published on November 4, 1981 at 46 FR 54878 at 54885. HUD's specific exemptions listed in 24 CFR 16.15 identify this system of records as exempt from certain Privacy Act requirements pursuant to 5 U.S.C. 552a(k) (2) and (5). These two specific exemption categories cover investigative material compiled: (1) For law enforcement purposes (other than material within the scope of the general exemption provision); and (2) for the purpose of determining suitability, eligibility or qualification for Federal civilian employment or Federal contracts.

The general exemption provision authorizes exemption from all of the Privacy Act's requirements except for certain recordkeeping and publication requirements, 5 U.S.C. 552a(j). It is applicable to any system of records maintained by an agency or component thereof which performs as its principal function activity pertaining to the enforcement of criminal laws. In addition, such records must consist of one of three categories of criminal records. One such category, applicable to HUD's OIG system of records, involves information compiled for the purpose of a criminal investigation and associated with an identifiable individual.

HUD's Office of Inspector General—in particular, the Assistant Inspector General for Investigation—performs, as its principal function, activities pertaining to enforcement of criminal laws, including efforts to prevent, control or reduce crime. The "Investigation Files" system of records consists primarily of information compiled for the purpose of criminal investigations, including reports of informants and investigators, that are associated with identifiable individuals. The Secretary has determined, therefore, that a general exemption under section 552a(j)(2) of the Privacy Act, is applicable to this system of records. Accordingly, the proposed rule would amend 24 C.F.R. 16.14 by adding a new general exemption (in a new paragraph (b)).

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order 12291 on Federal Regulations. An analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, state or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD Regulations in 24 CFR Part 50, which implement section 102(2)(c) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The finding of No Significant Impact is available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Room 10278, 451 Seventh Street, SW., Washington, D.C. 20410.

Pursuant to the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. This finding is based upon the fact that the Privacy Act is hot applicable to corporate and most partnership records unless retrievable by the name of a natural person in which case the business entity itself would not be directly affected. Moreover, the effect of the rule is not to substantively alter existing procedures.

This rule was not listed in the Department's Semi-Annual Agenda of Regulations published in the **Federal Register** on August 7, 1981 (46 FR 41708) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

List of Subjects in 24 CFR Part 16

Privacy.

PART 16—[AMENDED]

Accordingly, the Department would amend 24 CFR Part 16 by adding a new paragraph (b) to § 16.14 to read as follows:

§ 16.14 General exemptions.

* * * * *

(b) The Secretary of Housing and Urban Development has determined that the Office of the Assistant Inspector General for Investigation performs, as its principal function, activities pertaining to the enforcement of criminal laws. The records maintained by that office in a system identified as "HUD/DEPT-24, Investigation Files," primarily consist of information compiled for the purpose of criminal investigations and are associated with identifiable individuals. Therefore, the Secretary has determined that this system of record shall be exempt, pursuant to 5 U.S.C. 552a(j)(2), from all requirements of the Privacy Act except 5 U.S.C. 552a(b), (c)(1) and (2), (e)(4)(A) through (F), (e)(6), (7), (9), (10), and (11), and (i) unless elsewhere exempted.

(Privacy Act of 1974; 5 U.S.C. 552a(j)(2); Sec. 7(d), Department of Housing and Urban Development Act; 42 U.S.C. 3535(d).

Dated: November 17, 1982.

Samuel R. Pierce, Jr.,

Secretary.

[FR Doc. 82-34425 Filed 12-17-82; 8:45 am]

BILLING CODE 4210-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 110

[CGD3-82-31]

Anchorage Grounds; Delaware Bay and River

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: At the request of the Delaware River Port Authority, the U.S. Coast Guard is proposing a change to the existing regulation governing Anchorage A (Big Stone Anchorage) in the Delaware Bay off the entrance to the Mispillion River. At present this regulation states that the anchorage is for the specific purpose of allowing deep draft tankers to anchor and lighter their cargo. This proposal, if adopted, would eliminate all references to tanker lightering in the regulation and designate Anchorage A as a general anchorage. This action would identify the intent that shippers transporting commodities other than oil may utilize Anchorage A as both a holding anchorage and an anchorage for lightering operations.

DATE: Comments must be received on or before February 18, 1983.

ADDRESS: Comments may be mailed to: Captain Daniel B. Charter Jr., Captain of the Port, Philadelphia, U.S. Coast Guard Base, Gloucester City, New Jersey, 08030.

FOR FURTHER INFORMATION CONTACT: Captain Daniel B. Charter Jr., Captain of the Port, Philadelphia, U.S. Coast Guard Base, Gloucester City, NJ 08030 (Tel. 609-456-1370 or 215-923-4320) between 7:00 A.M. and 4:30 P.M. Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD3-82-31), identify the specific section of the proposal to which their comments apply, and give the reasons for each comment. Persons wishing acknowledgment of their comments should include a stamped, self-addressed postcard. All comments received before expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rule making process.

Drafting Information: The principal persons involved in drafting this rule are LTJG George Arbutina, Project Manager, COTP Philadelphia and LCDR James J. D'Alessandro, Project Attorney, Legal Office, Third Coast Guard District.

Discussion of Proposed Regulations: At present, Anchorage A as described in 33 CFR 110.157(a)(1) serves a much broader function than the tanker lightering referred to in the regulation. Coast Guard statistics indicate that less than 22 percent of the vessels in the anchorage at any given time are actually in the process of conducting oil transfer operations. Vessels not conducting transfer operations include vessels waiting to lighter, lightered vessels awaiting a berth at a facility upriver, fully offloaded vessels awaiting sailing orders, and both loaded and fully offloaded Oil/Bulk/Ore ("OBO") vessels carrying various cargoes.

In the 1970's, it appeared there would be increased demands for oil lightering due to continued increases in petroleum usage in this area. Tank vessels frequently had to obtain waivers to anchor outside the established anchorage due to congestion within the anchorage. A notice of proposed rulemaking was issued, a public hearing held and a final rule published in May 1982 to enlarge the anchorage. The language regarding tankship lightering was unchanged in the amendment.

Statistics provided to the Delaware River Port Authority by the Philadelphia Maritime Exchange indicate that Anchorage A was utilized by an average of only two vessels at any given time during the July–December 1981 period. This statistic and the May 1982 enlargement of Anchorage A to approximately three times its previous size suggest that overutilization of Anchorage A is presently not a concern. The President of the Pilots Association for the Delaware Bay and River has suggested that the enlarged anchorage is suitable for at least twelve large vessels. Only six times during the period of the Philadelphia Maritime Exchange survey were there four or more vessels at anchor in the anchorage. There is also some additional safe holding ground adjacent to the current anchorage which could be utilized if required. Expanded operations involving cargoes other than oil will not create space management problems in the anchorage and oil tanker lightering operations in the anchorage will continue unimpeded. If space management is required due to increased future operations, adequate authority exists to control utilization of the area. Coast Guard observations indicate the Maritime Exchange survey may understate the actual utilization of Anchorage A. However, these observations also confirm the assumption that congestion is not a problem.

This proposed regulation is nonsignificant in accordance with guidelines set forth in "Policies and Procedures for Simplification, Analysis and Review of Regulations" (DOT Order 2100.5 of May 22, 1980). An economic evaluation of the proposal has not been conducted as its impact will be minimal. An assessment of the probable environmental impacts of removing the specific designation for this anchorage is being prepared. The redesignation of Anchorage A as a general anchorage does not impact on business competition, State or local government, or the regulations of other programs or agencies. Moreover, this proposal is not a major rule as defined by Executive Order 12291 of February 17, 1981. This proposal once enacted, will not adversely affect the economy, result in any increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions, or result in any adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States based enterprises to compete with foreign enterprises in domestic or export markets.

In accordance with Section 605(b) of the Regulatory Flexibility Act (94 Stat. 1164) it is certified that these proposed rules would not have a significant impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 110

Anchorage grounds.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 110 of Title 33, Code of Federal Regulations, as set forth below.

PART 110—ANCHORAGE REGULATIONS

By revising 33 CFR 110.157(a)(1) to read as follows:

§ 110.157 Delaware Bay and River.

(a) *The anchorage grounds.*—(1) *Anchorage A off the entrance to the Mispillion River.* In Delaware Bay southwest of Brandywine Channel beginning at latitude 38°53'57" N., longitude 75°06'00" W.; thence northwesterly to latitude 39°01'22" N., longitude 75°13'25" W., thence southwesterly to latitude 39°00'49" N., longitude 75°14'57" W., thence southeasterly to latitude 38°53'22" N., longitude 75°09'26" W. thence northeasterly to the point of beginning. Supervision over the anchoring of vessels and over all cargo transfer operations in Anchorage A is exercised by the Captain of the Port, Philadelphia. The regulations in paragraph (b)(1) and (b)(2) of this section do not apply to this anchorage.

* * * * *

(Sec. 7, 38 Stat. 1053 as amended (33 U.S.C. 471); sec. 6(g)(1), 80 Stat. 940 (49 U.S.C. 1655(g)(1) 49 CFR 1.28(c)(1))

Dated: December 9, 1982.

J. L. Fear,

Captain, United States Coast Guard, Deputy Commander, Third Coast Guard District.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 86

[AMS-FRL-2271-6]

Control of Air Pollution From New Motor Vehicles and New Motor Vehicle Engines; Designation of High-Altitude Locations

AGENCY: Environmental Protection Agency.

ACTION: Notice of public hearing.

SUMMARY: EPA will hold a public hearing on the Notice of Proposed Rulemaking (NPRM) for the designation of high-altitude locations published on November 10, 1982 (47 FR 50929). That proposed action would revise the present designation of high-altitude locations to exclude those counties in states which do not have an auto-related air quality problem.

DATES: The hearing will be held on January 11, 1983 and will convene at 9:00 a.m. and adjourn at such time as is necessary to complete the testimony. Written comments on the proposal will be accepted until February 10, 1983.

ADDRESSES: The hearing will be held at the Federal Court of Appeals, Division Two, Fourth Floor, U.S. Courthouse, 1921 Stout Street, Denver, Colorado. Written comments should be submitted (preferaby 4 copies) to: Central Docket Section (A-130), Environmental Protection Agency, Docket No. A-82-31, 401 M Street, SW., Washington, D.C. 20460. Docket No. A-82-31 is located at the U.S. EPA, Central Docket Section, West Tower Lobby, Gallery 1, 401 M Street, SW., Washington, D.C. 20460. The docket may be inspected between 8:00 a.m. and 4:00 p.m. on weekdays. As provided in 40 CFR Part 2, a reasonable fee may be charged for photocopying.

FOR FURTHER INFORMATION CONTACT: Mr. Daniel P. Heiser, Emission Control Technology Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, MI 48105, (313) 668-4274.

SUPPLEMENTARY INFORMATION:

I. Background

The proposed rulemaking action would revise the present designation of counties in which high-altitude vehicles are required to be sold. The new designation criteria would exclude all current high-altitude counties in a given state, when no such county in that state is projected to be in violation of the NAAQS for CO and ozone by the end of 1982. As a result of the new criteria, vehicles complying with high-altitude emission standards would only be required to be sold in portions of four states (Colorado, Nevada, New Mexico, and Utah).

In the NPRM (47 FR 50929), EPA stated that it would hold a hearing only if it was requested to do so by November 22, 1982. A request for a hearing was received by the Agency from the Nevada franchised Auto Dealers Association. EPA is therefore responding to that request and will hold a hearing on the date and at the place described above.

II. Participation

Any person desiring to make a statement at the hearing should provide written notice of such intention to the contact person indicated above by January 6, 1983. This notice should include an estimate of the length of the testimony and any need for audio-visual equipment. If possible, we request that an advance copy of the proposed statement or material be included.

The record of the hearing will be left open for 30 days (through February 10, 1983) following the close of the hearing to allow submission of rebuttal and supplementary information. Any documents submitted during this period of time should be sent to the EPA Central Docket Section at the address shown above. It is also requested, but not required, that a copy of this submittal be sent directly to the contact person indicated above.

Commenters desiring to submit proprietary information should separate it from the other comments to the greatest extent possible, and label it "Confidential Business Information." Submissions containing such proprietary information should be sent directly to the appropriate Agency contact indicated above, and not to the Docket, to ensure that proprietary information is not inadvertently placed in the public docket.

Information covered by such a claim will be disclosed by EPA only to the extent, and by means of the procedures, set forth in 40 CFR Part 2. If no claim of confidentiality accompanies the information when it is received by EPA, it may be made available to the public without further notice to the commenter.

Mr. Charles L. Gray is hereby designated as the Presiding Officer of the hearing. He will be responsible for maintaining order, excluding irrelevant or repetitious material, scheduling presentations and notifying participants of the time at which they may appear.

The hearing will be conducted informally. Technical rules of evidence will not apply. A written transcript of the hearing will be taken. Anyone desiring to purchase a copy of this transcript should make arrangements individually with the court reporter recording the hearing.

Dated: December 10, 1982.

Kathleen M. Bennett,

Assistant Administrator for Air, Noise and Radiation.

40 CFR Part 228

[WH-FRL 1990-6]

Ocean Dumping; Proposed Site Designation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA today proposes to designate the existing 106 Mile Ocean Dump Site, located in an area in the Atlantic Ocean about 100 nautical miles off Delaware Bay, as an approved ocean dumping site for the authorized disposal of aqueous industrial materials. EPA also proposes to designate this site as an approved ocean dumping site for the authorized disposal of municipal sewage treatment sludges ("municipal sludge") for a period of five years during which time studies on the environmental effects of dumping the sludge will be conducted.

EPA also today announces in a separate notice that it is considering petitions for commencement of rulemaking to amend 40 CFR 228.12(b)(4) to redesignate the Sewage Sludge Dump Site in the New York Bight Apex (the 12 Mile Site) and is also considering redesignation of the Alternate Sewage Sludge Dump Site in the New York Bight (the 60 Mile Site). The designation of both sites expired on December 31, 1981.

DATE: Comments on this action must be received on or before February 18, 1983.

ADDRESSES: Send comments to: Mr. T. A. Wastler, Chief, Marine Protection Branch (WH-585), EPA, Washington, D.C. 20460.

The Environmental Impact Statement and the Assessment Report are available for public inspection at the following locations:

EPA Public Information Reference Unit (PIRU), Room 2404 (rear), 401 M Street Southwest, Washington, DC

EPA Region II Library, Room 1002, 26 Federal Plaza, New York, New York

FOR FURTHER INFORMATION CONTACT: Mr. T. A. Wastler, 202/755-0356.

SUPPLEMENTARY INFORMATION:

I. Background

A. Statute

Title I of the Marine Protection, Research, and Sanctuaries Act, as amended ("MPRSA" or "the Act"), 33 U.S.C. 1401 et seq., provides that "no person shall transport from the United States * * * any material for the purpose of dumping it into ocean waters" without an ocean dumping permit. 33 U.S.C. 1411. Additionally, the Act specifically prohibits the dumping after December 31, 1981, of "sewage sludge" and, with limited exceptions, "industrial waste." In this context "sewage sludge" is defined as wastes from municipal treatment plants, the ocean dumping of which "may unreasonably degrade or endanger human health or welfare, or amenities, or the marine environment, ecological systems, and economic potentialities." 33 U.S.C. 1412a(d). Similarly, "industrial waste" is defined as the waste generated by a manufacturing or processing plant, the ocean dumping of which "may unreasonably degrade or endanger human health or welfare, or amenities, or the marine environment, ecological systems, and economic potentialities." 33 U.S.C. 1412a(d).

Section 102(a) of the MPRSA provides that "the Administrator may issue permits * * * for the transportation * * * of material for the purpose of dumping it into ocean waters, or for the dumping of material into [ocean] waters * * * where the Administrator determines that such dumping will not unreasonably degrade or endanger human health, welfare, or amenities or the marine environment, ecological systems, or economic potentialities." Section 102(a) requires the Administrator to promulgate criteria to be used in evaluating all such permit applications.

Section 102(c) of the MPRSA provides that the "Administrator may, considering the criteria established pursuant to subsection (a) of this section, designate recommended sites or times for dumping and, when he finds it necessary to protect critical areas, shall, after consultation with the Secretary [of the Army], also designate sites or times within which certain materials may not be dumped."

B. Regulations

Pursuant to provisions of the Act, EPA has promulgated implementing regulations which provide criteria both for the issuance of ocean dumping permits (Part 227) and for the designation and management of approved sites (Part 228) for the disposal of wastes.

40 CFR Part 228 establishes criteria to be applied in the designation of ocean dumping sites for use in permitted activities. Section 228.5 of these criteria requires that a site be chosen so that its use will not significantly interfere with other activities in the ocean; that areas of fisheries, shellfisheries, and heavy commercial or recreational navigation be avoided; that the dumping not adversely affect any beach, shoreline, or marine sanctuary; that sites be defined so as to localize any adverse impacts of the dumping and to permit adequate monitoring; and that sites beyond the Continental Shelf be selected, where feasible. Section 228.6 of the criteria specifies in greater detail the factors to be considered, such as the location of the site in relation to breeding or feeding areas of aquatic species, beaches, or areas of scientific or historical importance; the potential for disposal to interfere with navigation, fishing, or mineral extraction; and other factors relating to the geologic and hydrologic condition of the site.

The regulations provide that such sites will be designated by publication of a list of approved sites in 40 CFR 228.12. A list of Approved Interim and Final Ocean Dumping Sites was published on January 11, 1977, 42 FR 2461 et seq. and updated as new sites were designated or designations extended. The latest update was made on December 9, 1980, 45 FR 81042 et seq. Even after designation, the use of a site for dumping must be authorized by a permit issued pursuant to Part 227.

C. Proposed Action

By this action EPA is proposing to designate as an "Approved Ocean Dumping Site" for continuing use the Ocean Waste Dump Site (106 Mile Site) in the Atlantic Ocean located about 100 nautical miles due east of Delaware Bay. The proposed rulemaking regarding the 106 Mile Site is another in the series of ocean disposal site designations performed in compliance with a consent agreement entered in "National Wildlife Federation v. Costle," No. 80-0405, D.D.C.

D. Available Information

Descriptions and analyses of waste disposal at the 106 Mile Site are contained in the "Final Environmental Impact Statement for 106-Mile Ocean Waste Disposal Site Designation" ("the EIS"), which was published in February 1980. The National Oceanic and Atmospheric Administration (NOAA) has conducted several studies on the effects of ocean dumping, including municipal sludge, at this site. Most of this work was included in "Assessment Report on the effects of Waste Dumping in 106-Mile Ocean Waste Disposal Site: Dumpsite Evaluation Report 81-1" (May 1981). The results of some of the monitoring conducted at the 106 Mile Site are included in "Ocean Dumping of

Industrial Wastes," (B. H. Ketchum, D. R. Kester, and P. K. Park, eds., 1981). These studies have shown no significant adverse impacts resulting from the dumping of aqueous industrial wastes which comply with the Part 227 Criteria at the 106 Mile Site. Although studies of municipal sludge dumping to date have been limited in scope, they present no data that municipal sludge dumping would be harmful at that site.

II. The 106 Mile Site

A. Site Location and Characteristics

The 106 Mile Site is located off the Continental Shelf approximately 196 kilometers southeast of Ambrose Light, New York, and 167 kilometers east of Cape Henlopen, Delaware. The site occupies an area of approximately 1,648 square kilometers with coordinates of 38d 40' to 39d 00' N latitude and 72d 00' to 72d 30' W longitude. The depth of the site ranges from 1,440 to 2,750 meters. There is significant dispersion and a permanent thermocline (temperature gradient) at this site.

B. History of Dumping at the Site

Since 1961 the 106 Mile Site generally has been used for the disposal of aqueous industrial wastes and digester cleanout sludges. In 1973, EPA designated this area as an "interim" site to be used primarily for the disposal of such industrial wastes. A site is designated as "interim" when the environmental studies to designate it for continuing use have not been completed. As part of the studies necessary to designate this site, EPA initiated the preparation of a draft EIS to evaluate the use of this site for continued disposal of industrial wastes.

Although the 106 Mile Site was initially considered primarily as a site for industrial wastes, the possibility of its use for the dumping of municipal sludges generated by a number of treatment plants in New Jersey and New York created significant interest. These plants now dump their municipal sludges at the 12 Mile Site.

C. Public Hearing

On May 31 and June 1, 1977, EPA conducted a public hearing in Toms River, New Jersey (Toms River Hearing), to gather information and obtain public comment on the possible relocation of municipal sludge dumping farther offshore. The hearing included discussion of whether such dumping should occur at sites such as the 106 Mile Site which are off the Continental Shelf. Testimony on this issue was inconclusive, and the final decision of the hearing directed that the 106 Mile Site EIS include an assessment of municipal sludge disposal at the site.

As a result of the Toms River Hearing and a subsequent settlement agreement in "American Littoral Society v. Costle, " Civil Action No. 77–11073 (D.N.J.), the EIS contained an evaluation of the feasibility of dumping municipal sludges generated in the New York-New Jersey Metropolitan area at the 106 Mile Site. The EIS recommended designation of the 106 Mile Site as an ocean dumping site for receipt of both aqueous industrial wastes and municipal sludge. (EIS at xxii to xxiv.)

D. Application of Regulatory Criteria

This site has been evaluated in light of the factors listed in §§ 228.5 and 288.6 of the Ocean Dumping Regulations and Criteria. These criteria require, first, that a site be chosen so that its use will only minimally, if at all, interfere with other activities in the ocean, and that areas of fisheries, shellfisheries, and heavy commercial or recreational navigation be avoided. Section 228.5(a). The 106 Mile Site is not near significant shellfish beds, fish habitat, breeding, spawning, or nursery grounds, public recreation areas, or sites of major commercial fishing or navigation. (EIS at 3–8 to 3–11.) Further, the existence of significant dispersive currents and a permanent thermocline at the 106 Mile Site permits rapid dilution or dispersion of toxic suspended or dissolved materials, which should minimize adverse impacts to marine life at that site. (EIS at 2–37.)

The criteria also require that the dumping not adversely affect any beach, shoreline, marine sanctuary or shellfishery. Section 228.5(b). The 106 Mile Site is not in close proximity to any such areas and therefore would not be expected to adversely affect them. The expected rapid dilution and dispersion of materials dumped at this site should render the materials harmless before they reach any areas of environmental or economic significance. (EIS at 2–36.)

Sites are to be defined so as to localize impacts of the dumping and to permit adequate monitoring. Section 228.5(d). Although the dispersive nature of the 106 Mile Site may not localize impacts, it is expected to minimize impacts to the marine environment. Monitoring is feasible at the 106 Mile Site (EIS at 2–36) although more costly than at shallower, nearshore sites.

The criteria also require the selection of sites beyond the Continental Shelf where feasible. Section 228.5(e). The 106 Mile Site is located off the Shelf.

Thus, EPA believes that the 106 Mile Site satisfies the site designation criteria for an approved ocean dumping site. However, there are some differences between the aqueous wastes currently dumped at this site, which have been throughly studied, and municipal sludges. Therefore, EPA believes that the designation of the site should be treated differently for each of these types of wastes.

The wastes presently permitted to be dumped at the 106 Mile Site are primarily aqueous solutions and are discharged slowly over a large area, permitting extensive dilution and dispersion. Monitoring by acoustic means has shown that pycnoclines (density gradients) act as barriers to downward movement of these liquid waste materials and of some suspended particulate waste materials. Therefore, EPA is proposing to designate the 106 Mile Site to allow the continued disposal of aqueous industrial materials at that site. Aqueous industrial materials are those that are miscible with seawater and will not form or do not include a significant solid phase and which have been determined to comply with the Part 227 criteria. EPA will not propose to designate this site for the disposal of other industrial materials until adequate studies of the probable impacts of those materials on the site have been completed.

Unlike the aqueous industrial materials, however, municipal sludge has solid components which can be expected to settle out. Since materials with solid components have not been dumped in significant amounts at the 106 Mile Site and only limited research has been conducted to date on their impacts, the fate of such settleable materials cannot be predicted with absolute certainty. While the high level of dispersion, great depths, and thermocline at this site make it unlikely that there would be significant deposition on the seabed, the presence of southwesterly currents may result in some settling on the Outer Continental Shelf.

In light of the knowledge that any deposition would occur at a very slow rate (EIS at 5–9 to 5–12), EPA is proposing to designate this site for the disposal of municipal sludges for five years to permit further studies of the site and careful monitoring of the impacts of any municipal sludge disposal at the site.

III. Request for Comments on the Proposed Action

Comments are sought on a *proposal to designate the existing 106 Mile Site for the receipt of aqueous industrial wastes and municipal sewage treatment sludges,* including restricting the

disposal of municipal treatment sludges to a period of five years.

All comments and any relevant information or studies which EPA should consider should be submitted to the addressee identified at the beginning of this notice by February 18, 1983.

IV. Review Under the Regulatory Flexibility Act and Executive Order 12291

Under the Regulatory Flexibility Act, EPA is required to perform a Regulatory Flexibility Analysis for all rules which may have a significant impact on a substantial number of small entities. Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis.

EPA has determined that this proposal will not have a significant impact on small entities and it is not a "major" regulation under Executive Order 12291, since the proposed actions will not result in an annual effect on the economy of $100 million or more, a major increase in costs or prices for consumers, industries, Federal, State, or local government agencies or geographic regions, or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The proposal will have the effect of providing additional disposal options to a limited number of industrial and municipal sources, but does not impose any additional regulatory requirements on those sources. Consequently, this proposal does not trigger the requirements for a Regulatory Flexibility Analysis or Regulatory Impact Analysis.

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

List of Subjects in 40 CFR Part 228

Water pollution control.

(33 U.S.C. 1412 and 1418.).

Frederic A. Eidsness, Jr.,

Assistant Administrator for Water.

PART 228—[AMENDED]

In consideration of the foregoing, Subchapter H of Chapter I of Title 40 is proposed to be amended by adding to § 228.12 a paragraph (b)(16) for an ocean dumping site under the management of the EPA Region II Regional Office as follows:

§ 228.12 Delegation of management authority for interim ocean dumping sites.

* * * * *

(b) * * *

(16) 106 Mile Ocean Waste Site—Region II. Location: Latitude—38d 40′ to 39d 00′ N; Longitude—72d 00′ to 72d 30′ W. Size: 1,648 square kilometers. Depth: Ranges from 1,440 to 2,750 meters. Primary Use: Aqueous industrial materials and municipal sewage treatment sludges (note restriction below). Period of Use: Continuing use for aqueous industrial materials; five years for municipal sewage treatment sludges. Restriction: Aqueous industrial materials are those that are miscible with seawater and will not form or include a significant solid phase, the ocean dumping of which will not unreasonably degrade or endanger human health or welfare, or amenities, or the marine environment, ecological systems, and economic potentialities. Municipal sewage treatment sludges are sludges generated in a publicly owned treatment works, the ocean dumping of which will not unreasonably degrade or endanger human health or welfare, or amenities, or the marine environment, ecological systems, and economic potentialities. This site may not be used for the disposal of other materials (except for the purpose of research or under emergency conditions) until adequate studies of their probable impacts at the site have been completed.

40 CFR Part 228

[WH-FRL 1990-6a]

Ocean Dumping; Receipt of Petitions To Redesignate a Site and Request for Comments on the Possible Redesignation of Another Site

AGENCY: Environemental Protection Agency (EPA).

ACTION: Notice of petitions for rulemaking and announcement of consideration of commencement of rulemaking.

SUMMARY: EPA today requests comments on petitions for commencement of rulemaking to amend 40 CFR 228.12(b)(4) to redesignate the Sewage Sludge Dump Site in the New York Bight Apex (the 12 Mile Site) for continuing use. EPA is also considering redesignating the Alternate Sewage Sludge Dump Site in the New York Bight (the 60 Mile Site). The designation of both sites expired on December 31, 1981.

In a separate action, EPA today also proposes to designate for continuing use the existing interim-designated 106 Mile Ocean Waste Dump Site located in the Atlantic Ocean about 100 nautical miles off Delaware Bay (the "106 Mile Site) as an approved ocean dumping site for the authorized disposal of aqueous industrial materials. EPA also proposes to designate that site as an approved ocean dumping site for the authorized disposal of municipal sewage treatment sludges ("municipal sludge") for a period of five years, during which time studies on the environmental effects of dumping sludge will be conducted.

DATE: Comments on these actions must be received on or before February 18, 1983.

ADDRESSES: Send comments to: Mr. T. A. Wastler, Chief, Marine Protection Branch (WH-585), EPA, Washington, DC 20460.

The Environmental Impact Statement and petitions are available for public inspection at the following locations:

EPA Public information Reference Unit (PIRU), Room 2404 (rear), 401 M Street Southwest, Washington, DC; or

EPA Region II Library, Room 1002, 26 Federal Plaza, New York, New York.

FOR FURTHER INFORMATION CONTACT: Mr. T. A. Wastler, 202/755-0356.

SUPPLEMENTARY INFORMATION:

I. Background

A. Statute

Title I of the Marine Protection, Research, and Sanctuaries Act, as amended ("MPRSA" or " the Act"), 33 U.S.C. 1401 et seq., provides that "no person shall transport from the United States * * * any material for the purpose of dumping it into ocean waters" without an ocean dumping permit. 33 U.S.C. 1411. Additionally, the Act specifically prohibits the dumping after December 31, 1981, of "sewage sludge." In this context "sewage sludge" is defined as wastes from municipal treatment plants, the ocean dumping of which "may unreasonably degrade or endanger human health or welfare, or amenities, or the marine environment ecological systems, and economic potentialities." 33 U.S.C. 1412a(d).

Section 102(a) of the MPRSA provides that "the Administrator may issue permits * * * for the transportation * * * of material for the purpose of dumping it into ocean waters, or for the dumping of material into (ocean) waters * * * where the Administrator determines that such dumping will not unreasonably degrade or endanger human health, welfare, or amenities or the marine environment, ecological systems, or economic potentialities."

Section 102(a) also requires the Administrator to promulgate criteria to be used in evaluating all such permit applications.

Section 102(c) of the MPRSA provides that the "Administrator may, considering the criteria established pursuant to subsection (a) of this section, designate recommended sites or times for dumping and, when he finds it necessary to protect critical areas, shall, after consultation with the Secretary (of the Army), also designate sites or times within which certain materials may not be dumped."

B. Regulations

Pursuant to provisions of the Act, EPA has promulgated implementing regulations which provide criteria both for the issuance of ocean dumping permits (Part 227) and for the designation and management of approved sites (Part 228) for the disposal of wastes.

40 CFR Part 228 establishes criteria to be applied in the designation of ocean dumping sites for use in permitted activities. Section 228.5 of these criteria requires that a site be chosen so that its use will not significantly interfere with other activities in the ocean; that areas of fisheries, shellfisheries, and heavy commercial or recreational navigation be avoided; that the dumping not adversely affect any beach, shoreline, or marine sanctuary; that sites be defined so as to localize any adverse impacts of the dumping and to permit adequate monitoring; and that sites beyond the Continental Shelf be selected, where feasible. Section 228.6 of the criteria specifies in greater detail the factors to be considered, such as the location of the site in relation to breeding or feeding areas of aquatic species, beaches, or areas of scientific or historical importance; the potential for disposal to interfere with navigation, fishing, or mineral extraction; and other factors relating to the geologic and hydrologic condition of the site.

The regulations provide that such sites will be designated by publication of a list of approved sites in 40 CFR 228.12. A list of Approved Interim and Final Ocean Dumping Sites was published in January 11, 1977, 42 FR 2461 et seq., and updated as new sites were designated or designations extended. The latest update was made on December 9, 1980, 45 FR 81042 et seq. Even after designation, the use of a site for dumping must be authorized by a permit issued pursuant to Part 227.

C. Actions Under Consideration

EPA is considering whether to redesignate the Sewage Sludge Dump Site in the New York Bight Apex (the 12 Mile Site) and the Alternate Sewage Sludge Dump Site in the New York Bight (the 60 Mile Site). Consideration of the proposal to redesignate the 12 Mile Site is based on petitions submitted by New York City and six New Jersey sewerage authorities (the Bergen County Utilities Authority, the Joint Meeting of Essex and Union Counties, the Linden Roselle Sewerage Authority, the Middlesex County Utilities Authority, the Passaic Valley Sewerage Commissioners, and the Rahway Valley Sewerage Authority) to commence rulemaking proceedings to extend that designation. Since the 60 Mile Site was designated as an alternate to the 12 Mile Site and since both designations expired December 31, 1981, EPA is requesting public comment on the possible redesignation of one or both sites.

D. Available Information

Descriptions of the 12 Mile Site and the 60 Mile Site and analyses of the effects of waste disposal at the 12 Mile Site are contained in the "Final Environmental Impact Statement on the Ocean Dumping of Sewage Sludge in the New York Bight" ("the EIS"), which was issued in September 1978. Since then, the 12 Mile Site has been carefully studied and monitored by both EPA and the National Oceanic and Atmospheric Administration (NOAA). These studies have shown that the 12 Mile Site is seriously degraded, as is the entire New York Bight Apex area.

The 60 Mile Site has not been the focus of any monitoring programs since no ocean dumping has occurred at that site to date. Therefore, the available information on the 60 Mile Site is primarily that contained or referred to in the EIS.

II. Sites

A. 12 Mile Site

1. *Site location and characteristics.* The 12 Mile Site is located in the New York Bight Apex on the Continental Shelf approximately 20 kilometers south of Long Island and east of New Jersey. The site occupies an area of approximately 22.7 square kilometers with coordinates of 40d 22′ 30″ to 40d 25′ 00″N latitudes and 73d 41′ 30″ to 73d 45′ 00″W longitudes. The depth of the site is about 27 meters. Currents are variable, with a general onshore bottom drift, and surface currents driven by wind and river flow.

As described in more detail in EIS, the Bight Apex is subject to contamination from many sources, such as the open water disposal of dredged materials and municipal sludges and estuarine discharges of municipal and industrial wastes. Municipal sludge ocean dumping is estimated to account for only one to ten percent of the total contaminant input to the New York Bight Apex. However, it may account for significantly more of the PCB's and mercury in that area.

2. *History of dumping at the site.* Municipal sludge has been dumped at the 12 Mile Site since 1924 by communities in New York and New Jersey. Under EPA's regulations implementing the Act, over 200 communities have ceased the ocean dumping of municipal sludges at the 12 Mile Site and implemented land-based disposal methods. Less than a dozen authorities (30 treatment plants) are now dumping at the site.

Although the number of municipal sludge dumpers has decreased since passage of the Act, the volume of sludge dumped at the 12 Mile Site has increased from 4.6 million tons in 1973 to 6.7 million tons in 1981. This increase is primarily due to the upgrading of plants from primary to secondary treatment and the resultant increase in production of municipal sludge in the New York-New Jersey Metropolitan area for which disposal was required.

On May 18, 1979, the 12 Mile Site was designated as an approved municipal sludge disposal site. (45 FR 29052.) At the same time, an alternate site, the 60 Mile Site, was designated in case dumping at the nearshore site became unacceptable for environmental or public health reasons. Both designations expired December 31, 1981. These designations were based on the information and analysis presented in the EIS, including the assumption that ocean dumping at either site would end on December 31, 1981. Since that date the ocean dumping of municipal sludge has been permitted as a direct result of a court order in which the judge allowed continued ocean dumping under specific conditions while EPA takes action on petitions that the designation of the 12 Mile Site be extended and evaluates applications for continued dumping of municipal sludges.

3. *Petitions.* The petitions filed by New York City and six New Jersey authorities for commencement of rulemaking to extend the designation of the 12 Mile Site cite the lack of degradation outside the dumpsite, the unlikelihood of improvement if dumping were stopped there, and the additional cost of moving to a new dumpsite as reasons for extending the designation of the 12 Mile Site. No additional factual information on the site was presented. EPA has requested that the petitioners

provide technical information to support their petition and has allowed 90 days for its submission. EPA will provide an opportunity for public review and comment, including a possible public hearing on that information when it is available.

4. *Environmental issues.* Those opposed to the continued use of the 12 Mile Site fear that sludge is responsible for high levels of toxicants in fish and shellfish, repetive algal blooms, fish kills, fin rot, and beach washups which adversely affect recreational use of the shore and adjacent waters. Those in favor of continued use of the site claim that continued use would not further degrade the area and that cessation of municipal sludge dumping at the site will not significantly improve the environment of the area around the site. Further, they argue that moving the dumping farther offshore would result in additional costs and the degradation of a less degraded, or undegraded, site.

The major issues to be considered regarding redesignation of the 12 Mile Site are highlighted below, and comments are solicited on these issues.

a. *Shellfish contamination.* There is serious bacterial contamination of edible commercial and sport shellfish in the New York Bight Apex, to the extent that shellfishing has been prohibited by the Food and Drug Administration (FDA) in most of the area. (EIS at 45.) This contamination may be due to the large volume of inadequately treated sewage being discharged to the Hudson-Raritan estuary, runoff, dredged material dumping, and municipal sludge dumping. Sludge dumping is not a major contributor to the bacterial contamination of the Apex as a whole. (EIS at 34, Table 10, and 36–40.) However, it is believed that shellfishing may be reopened in the eastern third of the Apex if dumping at the 12 Mile Site were discontinued.

b. *Benthic impacts.* Studies by EPA, NOAA, and FDA indicate that the benthic community at and near the 12 Mile Site has been adversely impacted by heavy metal and organic contaminants (EIS at 145 and 151.) This is due, at least in part, to the fact that the 12 Mile Site is located in busy navigation channels which restricts the permissible dumping rate, resulting in less immediate dispersion than would be possible if a slower dumping rate could be used. Consequently, the solid components of the sludge settle at and around this site to a greater extent than they otherwise would. More importantly, the site is small in area, shallow, and receives a significant amount of sludge each year. Since the area of impact (in excess of 15 square nautical miles) is more than twice the size of the site and includes portions of the sensitive Hudson Shelf Valley, the assimilative capacity of the site has been exceeded. Other sources of contamination in the area may also contribute to this degradation.

c. *Public health hazard.* Despite public concern, studies by EPA, NOAA, and FDA do not demonstrate that continued use of the site poses a current health hazard other than through contamination of shellfish. These studies show that there is only a slight potential for these wastes from the 12 Mile Site to reach nearshore waters and that no bacterial (coliform) contamination of coastal beaches can be shown to result from the dumping. Little or no data are available in the EIS on the potential for bioaccumulation of heavy metals and synthetic organics or their impact on health risks.

d. *The effects of cessation of dumping.* Municipal sludge may be the source of most of the pollutants at and near the 12 Mile Site, but of less than 10 percent of most of the pollutants in the New York Bight Apex. (EIS at 38, Figure 4.) The quality of the existing site and its surrounding area could not be expected to improve significantly even if sludge dumping were terminated. (EIS at 4.) New York City and other petitioners argue that the cessation of dumping municipal sludge will not alleviate any of the above conditions in the Apex as a whole, although there might be some improvement at the immediate area of the site. Further, the petitioners argue that there is no evidence that the sludge is responsible for bacterial contamination at the beaches, or has any relationship to the regularly occurring algal blooms or large fish kills which have occurred in the area, such as in 1976. They also argue that, until the numerous other sources of pollution in this area are eliminated, there is reason to believe that the continued use of this site for the dumping of municipal sludge will not further degrade the New York Bight Apex or the site. New York City's petition states that, "while the dumping * * * is currently harmless in the manner and location in which it is practiced, there is no justification for shifting the dumpsite and causing possible contamination of currently unaffected areas." There is concern, however, about the potential effects of the expected dumping of greatly increased volumes of sludge at this site. The City of New York is currently constructing two new treatment plants, North River and Red Hook, which are estimated to produce 300,000 tons of sludge annually when completed.

B. 60 Mile Site

1. Site location and characteristics. The 60 Mile Site is located in the northern area of the New York Bight on the Continental Shelf approximately 46 kilometers south of Long Island. The site occupies an area of approximately 676 square kilometers with coordinates of 40d 10' 30" to 40d 13' 30"N latitudes and 72d 40' 30" to 72d 43' 30"W longitudes. The depth of the site is 40 to 60 meters.

The area of the site, as currently defined, is not large enough to provide rapid dilution of multiple sludge discharges to acceptable concentrations. Therefore, dumping activities would have to be spaced several hours apart in order to avoid violation of EPA's environmental standards. This problem might be avoided by enlarging the site. An area much larger than the defined site has been studied (EIS at 87–139), so that the information needed to redefine the boundaries of the site is available. Therefore, EPA is considering redefining the boundaries of the 60 Mile Site to enlarge it if it is redesignated.

2. History of dumping at the Site. On May 18, 1979, the 60 Mile site was designated as an alternate to the 12 Mile Site for municipal sludge disposal. This designation, like the designation for the 12 Mile Site, expired December 31, 1981.

Since the 60 Mile Site was designated in 1979 as an alternate site only, and since the need for its use has not arisen, no ocean dumping has occurred at the site to date. However, in considering the petitions to redesignate the 12 Mile Site, EPA is considering whether the 60 Mile Site is also an appropriate site for the disposal of municipal sludge.

3. Environmental issues. Environmental conditions at the 60 Mile Site are described in detail in the EIS.

The major issues to be considered regarding redesignation of the 60 Mile Site are highlighted below, and comments are solicited on these issues.

a. *Public health hazard.* At the time of EIS preparation, there was no significant commercial fishing of bottom-dwelling species or recreational use at this site; this would have minimized the potential for adverse impacts of ocean dumping to the public health or welfare. However, since 1978, significant commercial harvesting of scallops, black bass, flounder, lobster, and tilefish has been noted in the area of the site.

b. *The potential effects of dumping.* The 60 Mile Site is in an undegraded area with highly dispersive currents. The use of the 60 Mile Site would adversely affect the benthos at and near the site by adding heavy metals, bacteria, and organic matter. As the benthic community adapted, it would become less diverse. Effects on the benthos would be severe, but localized. Only a small percentage of the sludge would be expected to actually reach the bottom.

Sludge dumping would cause bacterial and viral contamination of shellfish at and near the site. Shellfish (and other benthic organisms) would also concentrate heavy metals in their tissues. To prevent the use of contaminated shellfish, it would be necessary to prohibit shellfishing in the vicinity of the site.

Sludge particles that settled on the bottom could be resuspended under stormy conditions and transported to adjacent areas. However, sensitive marine resources such as the Hudson Shelf Valley are probably far enough from the area to remain uncontaminated by such transported sludge.

Sludge dumping would release materials which would remain in suspension, but none of these materials would be expected to reach any beach in other than trace amounts.

III. Request for Comments on the Proposed Actions

Comments are sought on the petitions of New York City and six New Jersey municipal authorities for *commencement of rulemaking to redesignate the 12 Mile Site* for the disposal of municipal sludges and on EPA's *consideration of redesignating an enlarged 60 Mile Site* for the disposal of municipal sludges.

All comments and any relevant information or studies which EPA should consider should be submitted to the addressee identified at the beginning of this notice by February 18, 1982.

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6465]

Proposed Base Flood Elevation and Zone Designation Determinations for City of Sunnyvale, Santa Clara County, Calif.; Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited in the proposed base flood elevations and zone designations as described below.

The proposed base flood elevations and zone designations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in the newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the floodprone area and the proposed base flood elevations and zone designations are available for review at the Public Library, 665 West Olive Avenue, Sunnyvale, California.

Send comments to: Honorable Dianne McKenna, Mayor, City of Sunnyvale, 456 West Olive Avenue, P.O. Box 60607, Sunnyvale, California 94088.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Office of Natural and Technological Hazards, Federal Emergency Management Agency, Washington, DC 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: The Associate Director, State and Local Programs and Support, gives notice of the proposed base flood elevations and zone designations for Butler County, Kansas, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 67.

These base flood elevations and zone designations together with the flood plain management measures required by Section 60.3 of the program regulations, are the minimum that are required. It should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. The proposed base flood elevations and zone designations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed special flood hazard area for Calabazas Creek and Guadalupe Slough are contained in the respective channels and have been identified as Zone A. Along the San Francisco Bay, the proposed base flood elevation has been revised from 8 feet National Geodetic Vertical Datum (NGVD) to 7 feet NGVD, and the zone designations remain Zones V1 and A1. In the area located east of Calabazas Creek and south of Kifer Road, the proposed zone designations identified as Zone AO with a depth of 1 foot, and Zone AH with a base flood elevation of 50 feet NGVD, have been added. In the area located between Wildwood Avenue and Route 237 and between Lawrence Expressway and the levee, the proposed zone designation has been revised to Zone B.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, herby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

44 CFR Part 67

[Docket No. FEMA-6464]

Proposed Base Flood Elevation and Zone Designation Determinations for City of Imperial Beach, San Diego County, Calif.; Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations and zone designations as described below.

The proposed base flood elevations and zone designations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in the newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations and zone designations are available for review at the Planning Department, Imperial Beach City Hall, 825 Imperial Beach Boulevard, Imperial Beach, California.

Send comments to: Honorable Brian P. Bilbray, Mayor, City of Imperial Beach, 825 Imperial Beach Boulevard, Imperial Beach, California 92032.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Associate Director, State and Local Programs and Support, gives notice of the proposed base flood elevations and zone designations for the City of Imperial Beach, California, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 67.

These base flood elevations and zone designations, together with the flood plain management measures required by Section 60.3 of the program regulations, are the minimum that are required. It should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. The proposed base flood elevations and zone designations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Along the Tijuana River, the proposed base flood elevations range from 6 feet National Geodetic Vertical Datum (NGVD) to 17 feet NGVD, and the zone designation remains Zone A4. Along Oneonta Slough, in the area generally located south of Coronado Avenue and between First Street and Fifth Street, the proposed zone designation is Zone AH, with a proposed elevation of 6 feet NGVD. Along the Pacific Ocean, the proposed zone designations and base flood elevations are as follows: Zone V1 (el 6), Zone A3 (el 7), Zone A2 (el 7), Zone A2 (el 8), Zone A2 (el 9), Zone A4 (el 10), Zone A4 (el 9), Zone A4 (el 8) and Zone A4 (el 7).

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

[Docket No. FEMA-6466]

Proposed Base Flood Elevation and Zone Designation Determination for Town of Gypsum, Eagle County, Colo.; Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations and zone designations as described below.

The proposed base flood elevations and zone designations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in the newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations and zone designations are available for review at the Gypsum Town Hall, 300 First Street, Gypsum, Colorado.

Send comments to: Honorable Eldon L. Bindley, Mayor, Town of Gypsum, P.O. Box 237, Gypsum, Colorado 81631.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Wahington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Associate Director, State and Local Programs and Support, gives notice of the proposed base flood elevations and zone designations for the Town of Gypsum, Colorado in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 67.

These base flood elevations and zone designations, together with the flood plain management measures required by Section 60.3 of the program regulations, are the minimum that are required. It should not be construed to mean the

community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. The proposed base flood elevations and zone designations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base flood elevations and zone designations, in the recently annexed area located in the northwesternmost portion of the Town, are as follows;

Source of flooding and location	Elevation, national geodetic vertical datum (feet)	Zone designation
Eagle River:		
At the western corporate limits	[illegible]	A2.
At a point located approximately 225 feet downstream of Price Lane extended.	[illegible]	A2.
At a point located approximately 975 feet upstream of Price Lane extended.	[illegible]	A2.

The remaining portion of the annexed area has been identified as Zones B and C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

Proposed Special Flood Hazard Area Determinations for City of Las Vegas, Clark County, Nevada; Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed special flood hazard areas as described below.

The proposed special flood hazard areas are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in the newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed special flood hazard areas are available for review at the Land Development and Flood Control Division of the Department of Public Service, 400 East Stewart Avenue, Las Vegas, Nevada.

Send comments to: Honorable William H. Briare, Mayor, City of Las Vegas, 400 East Stewart Avenue, Las Vegas, Nevada 89101.

FOR FURTHER INFORMTION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Associate Director, State and Local Programs and Support, gives notice of the proposed special flood hazard areas for the City of Las Vegas, Nevada in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 67.

These special flood hazard areas, together with the flood plain management measures required by Section 60.3 of the program regulations, are the minimum that are required. It should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. The proposed special flood hazard areas will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed special flood hazard areas, identified as Zones A, AO with a depth of 1 foot, and AO with a depth of 2 feet, have been added throughout the City, on Panels 15, 20 and 25 of 35. Additional annexed areas have been identified as Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

44 CFR Part 67

[Docket No. FEMA-6468]

Proposed Zone Designation and Flood Depth Determinations for Tillamook County, Oregon; Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed zone designation and flood depth as described below.

The proposed zone designation and flood depth are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in the newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the floodprone areas and the proposed zone designation and flood depth are available for review at the Office of the County Commissioners, Tillamook County Courthouse, 201 Laurel Avenue, Tillamook, Oregon.

Send comments to: Mr. Franklin E. Knight, Chairman, Board of County Commissioners, Tillamook County Courthouse, 201 Laurel Avenue, Tillamook, Oregon 97141.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Associate Director, State and Local Programs and Support, gives notice of the proposed zone designation and flood depth for Tillamook County, Oregon in Accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 67.

The zone designation and flood depth, together with the flood plain management measures required by Section 60.3 of the program regulations, are the minimum that are required. It should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. The proposed zone designation and flood depth will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed zone designation of Zone A0, with a depth of 2 feet, has been added on Panels 160 and 170, along the Wilson River, in the area generally located between Makinster Road, the Wilson River and Wilson River Loop Road. This new designation would replace the existing Zone C and Zone A1, elevation 10 feet National Geodetic Vertical Datum (NGVD), designation for the above mentioned area. In addition, the corporate limits for the City of Bay City and City of Tillamook have been adjusted to resolve any inconsistencies.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

BILLING CODE 6718–03–M

44 CFR Part 67

[Docket No. FEMA-6431]

Harris County, Texas; National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations previously published at 47 FR 47890 on October 28, 1982. This correction notice provides a more accurate representation of the Flood Insurance Study and Flood Insurance Rate Map for the City of Seabrook, Harris County, Texas.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the correction to the Notice of Proposed Determinations of base (100-year) flood elevations for selected location in the City of Seabrook, Harris County, Texas, previously published at 47 FR 47890 on October 28, 1982, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a).

Pursuant to the provisions of 5 USC 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new

requirement; of itself it has no economic impact.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Adopted: November 29, 1982.

Released: December 13, 1982.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Anchorage, Alaska), BC Docket No. 82–811, RM–4207, RM–4233.

1. The Commission has before it two separate petitions to add FM Class C Channel 256 to Anchorage, Alaska, filed by KENI Associates and by Borealis Broadcasting, Inc. Channel 256 is not available for the assignment to Anchorage inasmuch as it would be mutually exclusive with Channel 259 which has been recently assigned to Wasilla, Alaska (BC Docket No. 82–358), released November 16, 1982. Our engineering staff has determined that two other Class C channels are available for assignment to Anchorage, *i.e.*, Channels 251 and 255.

2. The two proposed assignments could provide a ninth and tenth FM broadcast service to Anchorage. Both petitioners have stated they would apply for an Anchorage channel.

3. These assignments would be contingent on avoiding interference to the FCC monitoring station at Anchorage.

4. The proposed amendments to the Table of Assignments, *infra*, also reflect a pending proceeding to substitute Channel 287 for Channel 288A (BC Docket 82–709).

5. In view of the above, we believe that it is appropriate to solicit comments on the proposed amendment of the FM Table of Assignments, § 73.202(b) of the Commission's Rules as follows:

City	Channel No.	
	Present	Proposed
Anchorage, Alaska	263, 267, 271, 276A, 281, 288A, 293, 298	251, 255, 263, 267, 271, 276A, 281, 287, 293, 298

6. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. Interested parties may file comments on or before January 24, 1983, and reply comments on or before February 8, 1983, and are advised to read the Appendix for the proper procedures.

8. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification That Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making To Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

9. For further information concerning this proceeding, contact Philip S. Cross, Broadcast Bureau, (202) 632–5414. However, members of the public should note that from the times a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(1), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.281(b)(6) and 0.204(b) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assigment is also expected to

file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d)of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in the Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

47 CFR Parts 81 and 83

[PR Docket No. 82-798; FCC 82-526]

Removal of Unnecessary Reporting and Recordkeeping Requirements

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This Notice proposes to eliminate certain reporting and record keeping requirements in the Maritime Services. These proposals result from the FCC's program to reduce paperwork requirements. The proposed amendments are intended to eliminate unnecessary regulations.

DATES: Comments must be received on or before January 13, 1983, and reply comments must be received on or before January 28, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Robert H. McNamara, Private Radio Bureau (202) 632-7175.

SUPPLEMENTARY INFORMATON:

47 CFR Part 81

Coast stations, Radio, Telegraph, Telephone.

47 CFR Part 83

Reporting and recordkeeping requirements, Vessels.

Adopted: December 2, 1982.

Released: December 14, 1982.

In the matter of amendment of Parts 81 and 83 of the rules to eliminate unnecessary reporting, recordkeeping and record retention requirements. PR Docket No. 82-798, FCC 82-526.

1. In this Notice of Proposed Rule Making we are proposing to eliminate reporting, recordkeeping and record retention requirements in the Maritime Services (Parts 81 and 83 of the Commission's rules) which we believe impose unnecessary burdens on the maritime community.

Part 81

2. In Part 81 (Stations on Land in the Maritime Services and Alaska-Public Fixed Stations) we are proposing to amend 29 rule sections.[1] In regard to recordkeeping and record retention requirements, we are proposing to delete the necessity to maintain logs and reduce the mandated documentation for all maritime stations other than public coast stations. These records are seldom if ever utilized for any regulatory purpose. Under this proposal, licensees of limited coast stations, marine utility stations, marine fixed stations, marine receiver stations and shipyard stations would no longer be required to maintain logs. Additionally, the list of documents required to be available at such stations would be reduced or deleted entirely. For example, the requirement to have on hand Parts 81 and 83 of the rules is being eliminated for these stations as well as Alaska-public fixed stations. We are also proposing to simplify the log and documentation requirements affecting public coast telephone and public coast telegraph stations. However, since these stations are common carriers providing a public correspondence service for the maritime industry, we are not proposing such major changes as indicated for other maritime stations. Further, certain record retention requirements are imposed on these common carriers by Part 42 of the rules.

2. We are proposing to eliminate or simplify notification requirements concerning: certain changes in station location, station operations during emergencies, discontinuance of station operations (other than public coast stations), and the cooperative use of limited coast station facilities. No use has been made of the subject information. Accordingly, we feel these notification requirements are unnecessary.

4. In addition, we are proposing to simplify a number of rule sections relating to the filing of applications for stations licensed under Part 81 and to clarify and edit various rule sections which reference or relate to other sections proposed to be amended.

Part 83

5. In Part 83 (Stations on Shipboard in the Maritime Services) we are proposing to amend 18 rule sections [2] which relate to record keeping or reporting requirements imposed on licensees of ship radio stations. In essence, we are seeking to eliminate the requirement for ships to maintain radio logs and specified documents except where the

---

[1] The specific sections of Part 821 proposed to be amended are: 81.24, 81.26, 81.31, 81.41, 81.49, 81.70, 81.73, 81.74, 81.75, 81.76, 81.115, 81.194, 81.224, 81.314, 81.352, 81.369, 81.370, 81.457, 81.458, 81.477, 81.521, 81.522, 81.523, 81.524, 81.525, 81.535, 81.536, 81.552, and 81.703.

[2] The specific sections of Part 83 proposed to be amended are: 83.2, 83.70, 83.115, 83.157, 83.164, 83.331, 83.340, 83.367, 83.368, 83.369, 83.405, 83.406, 83.436, 83.550, 83.819, 83.1015, 83.1016, and 83.1017.

requirement is contained in a treaty or statute.[3] Also, simplification of a number of notification and record keeping requirements for vessels compelled to be equipped with radio are proposed.

6. The proposed changes will delete the necessity for recreational boaters to maintain a radio station log and have Part 83 of the rules. Specified documentation relating to emergency position indicating radiobeacons (EPIRB's) and auto alarms are proposed to be deleted. We are also proposing to simplify a number of log, documentation and notification requirements pertaining to compulsory radio-equipped ships as well as survival craft stations and on-board stations.[4] Like similar requirements under Part 81, the subject information is seldom utilized and, therefore, we consider these rules to be an unnecessary burden on the maritime public. In addition, we have included editorial amendments where appropriate.

7. The proposed amendments to the Commission's rules as set forth in the attached Appendix are issued under the authority contained in sections 4(i) and 300(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r).

8. Under procedures set out in § 1.415 of the Rules and Regulations, 47 CFR 1.415, interested persons may file comments on or before January 13, 1983, and reply comments on or before January 28, 1983. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commision may take into consideration information and ideas not contained in the comments provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the

9. In accordance with the provisions of § 1.419 of the Rules and Regulations, 47 CFR 1.419, formal participants shall file an original and 5 copies of their comments and other materials. Participants wishing each Commissioner to have a personal copy of their comments should file an original and 11 copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

10. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally Section 1.1231 of the Commission's rules, 47 CFR 1.1231.

11. The rule amendments proposed in this proceeding, while expected to benefit the maritime public by eliminating unnecessary reporting and record keeping requirements will not result in a significant economic impact on any person or entity. Therefore, the Commission has determined that Sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) do not apply to this rule making proceeding, because the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

12. Regarding questions on matters covered in this document contact Robert H. McNamara (202) 632–7175.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 81 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

1. Section 81.24 is revised to read as follows:

§ 81.24 Applications made on prescribed forms.

Applications for authorizations for stations on land in the maritime services shall be submitted on the prescribed forms which may be obtained from the Commission at Washington, D.C. 20554 or from any of its field offices. Applications should be filed at least 60 days prior to the date the grant of an authorization is desired.

§ 81.26 [Removed]

2. Part 81 is amended by removing § 81.26.

3. Section 81.31 is amended by adding a new paragraph (d) to read as follows:

§ 81.31 Supplemental information required.

* * * * *

(d) Each application for a new public coast station operating on frequencies in the band 156–162 MHz shall include as supplementary information a chart, with supporting data, showing the service area contour computed in accordance with Subpart R of this part.

4. Section 81.41 is revised to read as follows:

§ 81.41 Application for special temporary authority.

(a) Applications for special temporary authority may be filed either formally (by submission of an FCC Form 503) or informally (by letter or telegram) to operate new facilities, or to operate existing facilities in a manner beyond that authorized in the current authorization. The nature of the emergency, equipment failure or other circumstances which, in the opinion of the applicant justifies issuance of a special temporary authorization, must be fully described in the request.

---

[3] The International Radio Regulations, the International Convention for the Safety of Life at Sea, the Great Lakes Agreement, the Cummunications Act and the Bridge-to-Bridge Radiotelephone Act all impose certain radio requirements on specific classes of vessels.

[4] Survival craft stations are located on lifeboats, liferafts or other survival equipment and are used solely for safety purposes. On-board stations include mobile units and repeaters used for intraship communications primarily on large ships.

(b) Informal requests for special temporary authority shall contain the following information:

(1) Name, address, and citizenship status of applicant;

(2) Statement of facts on which the request is based, including estimated duration of proposed use;

(3) Class of station and nature of service;

(4) Location of station including, when appropriate, geographical coordinates;

(5) Equipment to be used, specifying manufacturer and model number, frequencies desired, types of emission, power, and other pertinent information; and

(6) Description of proposed antenna structure, if any.

(c) Information presently on file with the Commission may be included by reference.

§ 81.49 [Removed]

5. Part 81 is amended by removing § 81.49

§ 81.70 [Amended]

6. In § 81.70 paragraphs (c), (d) and (e) are removed.

7. Section 81.73 is revised to read as follows:

§ 81.73 Operation during emergency.

The licensee of any station subject to this part may, during a period of emergency in which the normal communication facilities are disrupted as a result of hurricane, flood, earthquake, or similar disaster, utilize such station for emergency communication service in a manner other than that specified in the instrument of authorization or in the rules and regulations governing the operation of such stations. As soon as possible after the beginning of such emergency use, notice shall be sent to the Commission's Engineer in Charge of the radio district in which the station is located, stating the nature of the emergency and the emergency use made of the station. The Commission may, at any time, order the discontinuance of any such emergency communication undertaken under this section.

8. Section 81.74 is revised to read as follows:

§ 81.74 Notice of discontinuance, reduction, or impairment of service.

(a) Applications by public coast stations for authority to discontinue, reduce or impair service shall comply with the provisions of Part 63 of the Commission's rules. If such changes in station operation include discontinuance, reduction or suspension of a watch required to be maintained on 500 kHz. 2182 KHz, or 156.8 MHz, notification thereof shall be given by the licensee to the nearest district office of the U.S. Coast Guard as soon as practicable. Where applicable, such notification shall include the estimated or known time of resumption of the subject watch.

(b) In the event that a limited coast station reduces or suspends a watch required to be kept on 500 kHz, 2182 kHz or 156.8 MHz, notification thereof shall be given by the licensee to the nearest district office of the U.S. Coast Guard as soon as practicable.

§ 81.76 [Removed]

9. Part 81 is amended by removing § 81.75.

10. Section 81.76 is revised to read as followed:

§ 81.76 Cancellation of license.

When stations subject to this part permanently discontinue operation, the licensee shall send the station license to the Commission's office at P.O. Box 1040 Gettysburg, Pennsylvania 17325.

11. Section 81.115(a) is revised to read as follows:

§ 81.115 Retention and availability of radio station logs.

(a) Station logs required by this part shall be retained by the licensee for a period of one year from the date of entry, and when applicable for such additional periods as required by the following subparagraphs:

(1) Station logs relating to a distress situation or disaster shall be retained for 3 years from the date of entry:

(2) Station logs relating to an investigation by the Commission, of which the licensee has been notified shall be retained until the licensee is specifically authorized in writing to destroy them.

(3) Station logs relating to any claim or complaint of which the station licensee has notice shall be retained until the claim or complaint has been satisfied or barred by statute limiting the time for filing suits upon such claims.

* * * * *

12. Section 81.194 is revised to read as follows:

§ 81.194 Maintenance of station log.

(a) Where a radio station log is required, the log shall be kept in an orderly manner, and in such detail that the information required for particular class of station concerned is readily available. Key letters or abbreviations may be used if their proper meaning or explanation is contained elsewhere in the same log. The log or any portion thereof shall not be erased, obliterated, or wilfully destroyed within the period of retention required by § 81.115. Corrections may be made by the person originating the entry by striking out the erroneous portion, initialing the correction made, and indicating the date of correction.

(b) For each station whose antenna structure is required to the illuminated, appropriate entries shall be made in the station log in conformity with the requirements of Part 17 of this chapter.

(c) The station licensee and the licensed radio operator in charge of the station shall be responsible for compliance with this section

13. Section 81.224 is revised to read as follows:

§ 81.224 Station logs.

Public coast stations using telegraphy shall maintain an accurate radiotelegraph log during their hours of service as specified below:

(a) The entry "on duty" shall be made by the operator beginning a duty period, followed by his signature. The entry "off duty" shall be made by the operator being relieved or terminating a duty period, followed by his signature. All log entries shall be currently completed and all entries shall, unless otherwise stated, be made by a licensed operator on duty.

(b) The date and time of making an entry shall be shown opposite the entry.

(c) Coast stations which are required under Subpart G to maintain a watch on the designated radiotelegraph distress and calling frequency (500 kHz) shall enter the time this watch is begun, suspended or ended.

(d) All distress or safety related calls transmitted or received shall be entered, together with the frequency used and the position if available, of any vessel in need of assistance.

(e) Failure of apparatus to operate as required, failure of power supply, and incidents tending to unduly delay communication shall be entered.

(f) All measurements of the transmitter frequency(s) shall be entered, including such deviations from the assigned frequency(s) as may be observed, and a statement of any corrective action taken.

(g) Entries shall be made giving pertinent details of all installation, service, or maintenance work performed which may affect the proper operation of the station. The entry shall be made, signed and dated by the responsible licensed operator who supervised or performed the work, and unless he is regularly employed on a full-time basis at the station and has his operator license properly posted, shall also include his mail address and the class.

serial number, and expiration date of his license.

(h) Entries shall be made concerning the operation of the antenna tower lights when such entries are required by § 81.193.

14. Section 81.314 is revised to read as follows:

§ 81.314 Station logs.

Public coast stations using telephony shall maintain an accurate radiotelephone log during their hours of service as specified below:

(a) the entry "on duty" shall be made by the operator beginning a duty period, followed by his signature. The entry "off duty" shall be made by the operator being relieved of or terminating a duty period, followed by his signature. All log entries shall be currently completed and all entries shall, unless otherwise stated, be made by a licensed operator on duty.

(b)The date and time of making an entry shall be shown opposite the entry.

(c) Failure of apparatus to operate as required, failure of power supply, and incidents tending to unduly delay communication shall be entered.

(d) All measurements of the transmitter frequency(s) shall be entered, including such deviations from the authorized carrier frequency(s) as may be observed, and a statement of any corrective action taken.

(e) An entry shall be made giving pertinent details of all installation, service, or maintenance work performed which may affect the proper operation of the station. The entry shall be made, signed and dated by the responsible licensed operator who supervised or performed the work, and unless he is regularly employed on a full-time basis at the station and has his operator licensed properly posted, shall also include his mail address and the class, serial number, and expiration date of his license.

(f) Entries shall be made concerning the operation of the antenna tower lights when such entries are required by § 81.193.

§ 81.352 [Amended]

15. Section 81.352 is amended by: (A) in paragraph (a) (1) removing the proviso clause; (B) removing paragraph (a)(3); and (C) in paragraph (b)(2) removing the last sentence.

§ 81.369 [Removed]

16. Part 81 is amended by removing § 81.369.

§ 81.370 [Removed]

17. Part 81 is amended by removing § 81.370.

§ 81.457 [Removed]

18. Part 81 is amended by removing § 81.457.

§ 81.458 [Removed]

19. Part 81 is amended by removing § 81.458.

§ 81.477 [Removed]

20. Part 81 is amended by removing § 81.477.

21. Section 81.521 is revised to read as follows:

§ 81.521 Eligibility for shipyard base stations.

A license to operate a shipyard base station will be issued only as a secondary use for licensed limited coast stations serving a shipyard regularly engaged in construction or repair of commercial transport vessels and/or Government vessels.

22. Section 81.522 is revised to read as follows:

§ 81.522 Eligibility for shipyard mobile stations.

A license to operate shipyard mobile stations will be issued only to the licensee of a shipyard base station.

§ 81.523 [Removed]

23. Part 81 is amended by removing § 81.523.

§ 81.524 [Amended]

24. Part 81 is amended by removing § 81.524.

§ 81.525 [Removed]

25. Section 81.525 is amended by removing the words "pursuant to the provisions of §§ 81.522 and 81.524" from paragraph (a).

§ 81.535 [Removed]

26. Part 81 is amended by removing § 81.535.

§ 81.536 [Removed]

27. Part 81 is amended by removing § 81.536.

§ 81.552 [Removed]

28. Part 81 is amended by removing § 81.522.

§ 81.703 [Removed]

29. Part 81 is amended by removing § 81.703.

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

§ 83.2 [Amended]

1. Section 83.2 is amended by removing paragraph (z).

§ 83.70 [Amended]

2. Section 83.70 is amended by removing paragraph (f).

§ 83.115 [Amended]

3. Section 83.115 is amended by removing and reserving paragraph (c) and the "note" at the end of the section.

§ 83.157 [Amended]

4. Section 83.157 is amended by removing paragraph (b)(3).

5. Section 83.184 is revised to read as follows:

§ 83.184 Maintenance of station log.

(a) The log shall be kept in an orderly manner, and in such detail that the information required for the particular class of station concerned is readily available. Key letters or abbreviations may be used if their proper meaning or explanation is contained elsewhere in the same log.

(b) The log or any portion thereof shall not be erased, obliterated, or wilfully destroyed within the period of retention required by § 83.115. Correction may be made of such log but only by the person originating the entry by striking out the erroneous portion, initialing the correction made, and indicating the date of correction.

(c) The station licensee and the licensed radio operator in charge of the station shall be responsible for compliance with this section.

§ 83.331 [Removed]

6. Part 83 is amended by removing § 83.331.

7. Section 83.340 is amended by removing paragraphs (d) and (e) by adding the words "subject to Title III, Part II of the Communications Act or the radio provisions of the Safety of Life at Sea Convention, which is" after the third word "station" in paragraph (a)(1), and by adding new paragraph (a)(13) to read as follows:

§ 83.340 Station logs.

(a) * * *

(13) Ship stations authorized to transmit on frequencies within the band 405–535 kHz, shall maintain a written record of the adjustments to the transmitting and receiving equipment used for operation on the assigned frequencies 410 kHz and 500 kHz and at least two authorized working frequencies within this band.

* * * * *

8. Section 83.367 is amended by removing footnote 1 and revising paragraph (b) to read as follows:

§ 83.367 Station documents.

* * * * *

(b) Ship radiotelephone stations not subject to the Safety Convention shall be provided with documents listed in

paragraphs (a)(1), (2), (3), and (6) of this section. However, ship radiotelephone stations not subject to compulsory equipment requirements of the Communications Act, Great Lakes Agreement, or other applicable statute or treaty, need only be provided with the documents listed in paragraphs (a)(1) and (2) of this section.

9. Section 83.368 is amended by removing paragraphs (f) and (g), and by revising paragraph (a) and the introductory text of paragraph (b) to read as follows:

§ 83.368 Radiotelephone station log.

(a) Ship radiotelephone stations subject to Title III, Part II of the Communications Act or the radio provisions of the Safety of Life at Sea Convention shall maintain a station log. Pages of the log shall be numbered in sequence and each page shall include the name of the vessel and the radio call sign of the station. All entries which show transmitter operation shall be made and signed by the licensed operator. Watch entries, and signature of each person keeping the required watch, shall be so related that they constitute a certification by each such person as to when he began and ended each period of his watch during the voyage. The date and time of each occurrence or incident required to be entered in the log shall be shown opposite the entry, and the time shall be counted from 0000 to 2400, beginning at midnight. Stations on board vessels engaged on international voyages, other than on the Great Lakes or inland waters, shall use Greenwich mean time (G.m.t.); stations on board vessels navigated on the Great Lakes and subject to the Great Lakes Agreement shall use eastern standard time (e.s.t.); other stations may use G.m.t. or local standard time. The appropriate symbol, G.m.t., e.s.t., c.s.t., P.s.t., etc., shall be entered at the head of the column in which time is entered.

(b) The ship radiotelephone station log shall include the following entries:

* * * * *

§ 83.369 [Removed]

10. Part 83 is amended by removing § 83.369.

11. Section 83.405 is amended by removing paragraph (f) and revising the introductory text of paragraph (d) to read as follows:

§ 83.405 Special provisions applicable to ship-radar stations.

* * * * *

(d) The following requirements apply to ship-radar stations provided for compliance with the Safety of Life at Sea Convention:

* * * * *

§ 83.406 [Removed]

12. Part 83 is amended by removing § 83.406.

§ 83.456 [Removed]

13. Part 83 is amended by removing § 83.456.

14. In § 83.556 paragraph (e) is revised to read as follows:

§ 83.556 General requirements for survival craft radio equipment.

* * * * *

(e) Simple instructions for the operation of the equipment shall be prominently and permanently attached to it. These instructions shall include information concerning the erection of the antenna(s), automatic transmission and manual transmission of the international distress and alarm signals on the frequency 500 kHz.

* * * * *

§ 83.819 [Amended]

15. Section 83.819 is amended by removing paragraphs (a)(4), (a)(5) and (a)(6), and paragraph (b) and renumbering paragraph (c) as (b).

16. Section 83.1015 is revised to read as follows:

§ 83.1015 (VHF Marine Rule 15) Do I have to keep a radio log?

You do not have to keep a radio log.

17. In § 83.1016 paragraph (a) is revised to read as follows:

§ 83.1016 (VHF Marine Rule 16) Do I need a copy of the FCC's rules?

(a) You do not need to keep a copy of the FCC's rules. However, you are responsible for compliance with the FCC's rules.

* * * * *

§ 83.1017 [Amended]

18. In § 83.1017 the words "radio log," are removed.

47 CFR Part 95

[PR Docket No. 82-799; FCC 82-527]

Amendment To Eliminate Individual Station Licenses in the Radio Control (R/C) Radio Service and the Citizens Band (CB) Radio Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This notice of Proposed Rule Making proposes to amend the Radio Control (R/C) Radio Service Rules and the Citizens Band (CB) Radio Service Rules to discontinue the issuance of individual station licenses. These amendments are proposed to relieve applicants of an unnecessary paperwork burden and would substantially decrease the Commission's administrative costs.

DATES: Comments are due by January 19, 1983, and replies by February 3, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: John Borkowski, Private Radio Bureau, Washington, D.C. 20554.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 95

Radio.

Adopted: December 2, 1982.
Released: December 14, 1982.

In the matter of amendment of Part 95 of the Commission's Rules to Eliminate Individual Station Licenses in the Radio Control (R/C) Radio Service and the Citizens Band (CB) Radio Service. Pr Docket No. 82-799, FCC 82-527.

I. Introduction

1. The Federal Communications Commission proposes to eliminate individual licensing of stations in the Radio Control (R/C) Radio Service and the Citizens Band (CB) Radio Service and, instead, to permit operation of these radio stations without individual licenses.[1]

II. Background

2. The CB Radio Service was created to make available to the public a low-cost, short-range, two-way voice radio service for both personal and business communications.[2] The R/C Radio Service was created to make available to the public a private, one-way short-distance, non-voice communications service for the remote operation of devices. Its primary use has been for the control of model aircraft, model boats, and model cars.

3. Although there have been some modifications to the technical and operational rules governing both the R/C and CB services, they have remained essentially unchanged in purpose since

[1] Individual station licenses, in this context, refer to R/C or CB radio station licenses now issued to eligible persons, including individuals, corporations, partnerships, associations or governmental entities other than those specifically prohibited by statute from holding such licenses. See Footnote 3, *infra*.

[2] *See California Citizens Band Assn., Inc.* v. *United States*, 375 F2d. 43, 9 RR2d 2037 (9th Cir. 1967), *cert. denied*, 389 U.S. 844. (1967).

their inception. These services have attracted millions of users. There are approximately 6 million R/C and CB licensees. The Commission expects to receive some 600,000 applications in FY 1983 for new, renewed, and modified licenses in both the R/C and CB Radio Services.

4. Licensing of R/C and CB stations has always differed from licensing of other private radio stations because of the broad eligibility and operational provisions of these services. Individualized R/C and CB licensing is not used to assign specific frequencies, output power or hours of operation. All R/C and CB licensees are authorized to operate on legal R/C or CB frequencies with legal power at any time of the day. Applicants are not required to show financial or technical qualifications, and need only meet minimal eligibility requirements (12 years of age for R/C, 18 years of age for CB, and not a foreign government or a representative thereof or a federal government agency).[3] Each application in these services is computer processed with minimal review.

5. Spectrum management in the R/C and CB radio services is accomplished by way of type acceptance and operating rules, rather than by licensing. R/C and CB transmitters are type accepted to assure that they can only be operated on legal frequencies with legal power. Frequency assignments, power limitations and antenna height restrictions are determined by rule making, not by licensing.

6. We have estimated that in Fiscal Year (FY) 1983 we will spend approximately $361,000 for R/C and CB radio station licensing. This includes costs for ten full time permanent positions within the Private Radio Bureau, two computer-related positions within the Managing Director's Office, and additional miscellaneous expenses for forms, postage, computer operation and microfiche licensing records.

III. Discussion

7. Recognizing that the high costs for licensing individual stations in the R/C and CB radio Services may not justify the limited public interest benefits of such licensing, Congress recently amended the Communications Act of 1934 to permit us to grant authority to operate R/C and CB radio stations without individual licenses. *See* Public Law (Pub. L.) 97–259, Section 113(a), enacted September 13, 1982. *See also* 47 U.S.C. 307(e)

8. It appears that licensing individual stations in the R/C and CB Radio Services provides only a minimal public interest benefit, at best. Spectrum management in both services is assured by type acceptance and operating standards. Yet individual station licensing in these services costs us about $361,000 a year, and requires user preparation and submission of, literally, hundreds of thousands of applications for new, modified and renewed licenses, all of which receive, necessarily, only cursory review. Elimination of individual station licensing in the R/C and CB Radio Services will reduce the associated paperwork burden on the public for filling out temporary permits, application forms, and change of name and address forms by 68,000 burden hours in FY 1983 and each fiscal year thereafter.

9. Thus, we believe it would be in the public interest to eliminate licensing of individual R/C and CB radio stations, and have proposed to do this in the Notice.

IV. Proposal

10. We propose to eliminate all individual station licenses in the R/C and CB Radio Services.[4] Instead, we would, by rule, authorize operation of these stations without individual licenses. As of the day an *Order* adopting these rules would be issued, all existing R/C and CB licenses would be void. All pending applications for such licenses, and all applications for such licenses subsequently received, would result in no official Commission action.[5]

11. We also propose to eliminate all individual station call signs in the R/C and CB Radio Services. In the Citizens Band Radio Service, in lieu of call sign identification, we would instead require identification by the license plate number of any truck, automobile or motorcycle registered in the CB operator's name. If the operator does not have a registered truck, automobile or motorcycle we would require identification by the operator's residence street address. We recognize that international regulations require identification and we believe this proposal complies with that requirement.[6] However, we seek comment on whether it is desirable to require identification of CB radio communications. We also seek comment on whether rules regarding identification of CB communications would assist in the resolution of interference problems without Commission intervention, and on whether identification would facilitate the effective utilization of voluntary and uncompensated Citizens Band radio operators under new paragraph 4 of 47 U.S.C. 154(f). Additionally, if CB identification is desirable, we seek comment on whether license plate numbers are the most appropriate unique identifiers, and, if not, what alternative identifier is preferable. In the Radio Control Radio Service, we would retain rules not requiring identification of communications (*see* 47 CFR 95.227).[7]

12. Eliminating individual R/C and CB station licenses should not seriously affect our international treaty agreements. International Telecommunication Union Regulations require federal licensing of radio stations. However, Pub. L. 97–259 exempted R/C and CB radio stations from the individual licensing provisions of the Act. This enables the Commission to proposed to broadly authorized the general operation of R/C and CB radios without the necessity of processing individual licenses. We believe this satisfies ITU licensing regulations. See Footnote, 4, *infra.* International requirements for unique station identification can also be satisfied. The Commission herein proposes a method to comply with alternative means of station identification without assigning individual call signs. The removal of individually assigned station identifiers (call signs), however, would make it impossible to meet with International Frequency Registration Board (IFRB) notification requirements. To place this

[3] 47 U.S.C. 310(a) prohibits the issuance of a license to a foreign government or a representative thereof. 47 U.S.C. 305 prohibits the issuance of a license to stations "belonging to and operated by" the United States.

[4] Although not yet ratified by the United States, Radio Regulation No. 2020 (Article 24), was amended in 1979, effective January 1, 1982, to permit licenses issued "in an appropriate form." It is our view that this permits other than individual station licenses.

[5] In this regard, during the pendency of this proceeding, all R/C and CB stations must be licensed. However, we intend to strictly adhere to the time constraints for filing of renewal applications set forth at 47 CFR 1.928(c): "within 90 days but not later than 30 days prior to the end of the license term."

[6] ITU Radio Regulation No. 737, Mar 2 (Article 19) states: "A station shall be identified by a call sign or other recognized means of identification. Such recognized means of identification may be one or more of the following necessary for complete identification: name of station, location of station, operating agency, official registration mark, flight identification number, selective call number or signal, selective call identification number or signal, characteristic of emission or other clearly distinguishing features recognized internationally." This provision survives in substance as Radio Regulation No. 2069, Geneva, 1979.

[7] While Article 19 of the ITU Radio Regulations requires identification of stations, Footnote 1 to Radio Regulation 735 of Article 19 recognizes that "identifying signals for certain radio systems (e.g., radiodetermination, radio relay systems and space systems) is not always possible." We believe that systems used in the Radio Control Service, which are typically designed to transmit signals to control mechanical devices, fall within this exception.

concern in perspective, the United States has never given notification of CB call signs to the IFRB. Because of the large number of CB licensees, the task is impossible without automated techniques that are not now available. This has not caused any significant problems *per se,* however, because violators rarely identify by call sign and cross-checking of IFRB data would not generally be helpful. The actual reaction of the international community to a proposal to eliminate individual R/C and CB station licenses, however, is not known.

13. We would retain, with appropriate modifications, the requirement that manufacturers pack a copy of the CB rules with each transmitter. *See* 47 CFR 95.645(f). This should tend to insure that the public will continue to be apprised of the substance of our Rules and the necessity to abide by them.

14. Finally, we propose to delete minimum age requirements for operating in the R/C and CB Radio Services. In the past, when we have proposed reductions of the age requirement for CB licenses, we have, notwithstanding comments largely in support thereof, refrained from changing the minimum age due to inability to absorb the likely additional resource impact from the projected number of additional license applications. *See Citizens Radio Service,* 60 FCC2d 762, 767 (July 29, 1976). With the elimination of individual station licenses in these services, Commission resource impact no longer stands in the way of deleting minimum age requirements.

15. We emphasize that the elimination of individual station licenses would result in no diminution of the operating privileges or responsibilities of R/C and CB users. An operator of an R/C and CB radio station would still be required to comply with the Act and with the rules of each service. *See* 47 U.S.C. 307(e)(2). While we "would no longer have the ability to revoke" and R/C or CB license, *Congressional Record—House,* H 6539, August 19, 1982, forfeitures and cease and desist orders would be used as enforcement tools. Congress has mandated that if we choose to eliminate individual station licenses in "the (CB) service, forfeiture authority should be exercised in a way that demonstrates a commitment to preserving the integrity of the CB service through enforcement." *Id.* Upon eliminating individual R/C and CB station licenses, we would continue to exercise our forfeiture authority in these services in exactly the same manner as we have in the past.

16. We would, for compliance purposes, treat persons violating R/C or CB rules while using non-modified, type accepted equipment as persons operating in either of the respective services but in violation of Commission rules. Conversely, a person violating R/C or CB rules which could be violated only by alteration of equipment, will, if using modified or non-type-accepted equipment, be considered as operating without proper authorization in violation of sections 301 and 302 of the Act.

17. We recognize that this proposal would necessarily impact upon Canadian, Mexican and United States CB'ers travelling between countries. During the course of this proceeding we intend to coordinate the proposed elimination of R/C and CB station licenses in the United States with Canada and Mexico.

V. Conclusion

18. Notice is hereby given that it is proposed to amend 47 CFR Part 95 of the Commission's Rules as set forth in the attached appendix.[8]

VI. Procedural Matters

19. For purposes of this non-restricted notice and comment rule making proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a Notice of Proposed Rule Making until the time a Public Notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final Order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of the oral presentation, that written summary must be served on the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the secretary has been served, and must also state by docket number the proceeding to which it relates. *See generally* Section 1.1231 of the Commission's Rules, 47 CFR 1.1231. A summary of the Commission's procedures governing *ex parte* contacts in informal rule makings is available from the Commission's Consumer Assistance Office, FCC, Washington, D.C. 20554, (202) 632–7000.

20. Authority for issuance of this Notice is contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r). Pursuant to applicable procedure set forth in § 1.415 of the Commission's Rules, interested persons may file comments on or before January 19, 1983 and reply comments on or before February 3, 1983.[9] All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information is placed in the public file and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

21. In accordance with Section 1.419 of the Commission's Rules, 47 CFR 1.419, formal participants must file an original and five copies of their comments and other materials. Participants who wish each Commissioner to have a personal copy of their commens should file an original and eleven copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

22. The Commission hereby certifies the rules proposed would not, if promulgated, have a significant economic impact on a substantial number of small entities, since they merely eliminate a licensing requirement that imposed little economic burden on individual applicants. Accordingly, pursuant to Section 605 of the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, we have determined that sections 603 and 604 of the Regulatory Flexibility Act, 5 U.S.C. 603 and 604, do not apply to this rule making proceeding.

[8] In the interest of clarity, we have set forth new Subparts C and D of Part 95 in the Appendix in their entirety.

[9] Extensions of time for mailing difficulties over the forthcoming holiday seasons will not be granted. Commenters are encouraged to plan ahead to avoid such difficulties.

23. It is ordered that the Secretary shall cause a copy of this Notice to be served upon the Chief Counsel for Advocacy of the Small Business Administration, and that the Secretary shall also cause a copy of this Notice to be published in the **Federal Register.**

24. For further information about this proceeding contact John Borkowski, Personal Radio Branch, Special Services Division, FCC, Washington, D.C. 20554, (202) 632-7197 or (202) 632-4964.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communication Commission.

William J. Tricarico,

Secretary.

Appendix

The FCC proposes to amend Part 95 of its Rules, Subpart C (47 CFR 95.210 and following), Subpart D (47 CFR 95.401 and following), and 47 CFR 95.645(f) in Subpart E, as set forth below:

1. Subpart C. Radio Control (R/C) Radio Service is completely revised to read as follows:

PART 95—PERSONAL RADIO SERVICES

* * * * *

Subpart C—Radio Control (R/C) Radio Service

General Provisions

Sec.

95.201 (R/C Rule 1) What is the Radio Control (R/C) Radio Service?
95.202 (R/C Rule 2) How do I use these rules?
95.203 (R/C Rule 3) Do I need a license?
95.204 (R/C Rule 4) Am I eligible to operate an R/C station?
95.205 (R/C Rule 5) Are there any special restrictions on the location of my R/C station?

How To Operate an R/C Station

95.206 (R/C Rule 6) On what channels may I operate?
95.207 (R/C Rule 7) How high may I put my antenna?
95.208 (R/C Rule 8) What equipment may I use at my R/C station?
95.209 (R/C Rule 9) How much power may I use?
95.210 (R/C Rule 10) What communications may be transmitted?
95.211 (R/C Rule 11) What communications are prohibited?
95.212 (R/C Rule 12) May I be paid to use my R/C station?
95.213 (R/C Rule 13) Who is responsible for R/C communications I make?
95.214 (R/C Rule 14) Do I have to limit the length of my communications?
95.215 (R/C Rule 15) Do I identify my R/C communications?
95.216 (R/C Rule 16) May I operate My R/C station transmitter by remote control?

Other Things You Need To Know

95.217 (R/C Rule 17) What are the penalties for violating these rules?
95.218 (R/C Rule 18) How do I answer a discrepancy notice?
95.219 (R/C Rule 19) What must I do if the FCC tells me that my R/C station is causing interference?
95.220 (R/C Rule 20) How do I have my R/C station transmitter serviced?
95.221 (R/C Rule 21) May I make any changes to my R/C station transmitter?
95.222 (R/C Rule 22) Do I have to make my R/C station available for inspection?
95.223 (R/C Rule 23) What are my station records?
95.224 (R/C Rule 24) How do I contact the FCC?

Authority: Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.

Subpart C—Radio Control (R/C) Radio Service

General Provisions

§ 95.201 (R/C Rule 1) What is the Radio Control (R/C) Radio Service?

The R/C Service is a private, one-way, short distance non-voice communications service for the operation of devices at remote locations.

§ 95.202 (R/C Rule 2) How do I use these rules?

(a) You must comply with rules (see R/C Rule 17 for the penalties for violations) when you operate a station in the R/C service from:

(1) Within or over the territorial limits of places where radio services are regulated by the FCC (see R/C Rule 3);

(2) Aboard any vessel or aircraft registered in the United States; *OR*

(3) Aboard any unregistered vessel or aircraft owned or operated by a United States citizen or company.

(b) Your R/C station must comply with technical rules found in Subpart E of Part 95.

(c) Where the rules use the word "you", "you" means a person operating an R/C station.

(d) Where the rules use the word "person," the rules are concerned with an individual, a corporation, a partnership, an association, a joint stock company, a trust, a state, territorial or local government unit, or other legal entity.

(e) Where the rules use the term "FCC," that means the Federal Communications Commission.

(f) Where the rules use the term "R/C station," that means a radio station transmitting in the R/C Radio Service.

§ 95.203 (R/C Rule 3) Do I need a license?

You do not need an individual license to operate an R/C station.

You are authorized to operate your R/C station from:

(a) Within or over any area of the world where radio services are regulated by the FCC. Those areas are within the territorial limits of:

(1) The fifty United States.

(2) The District of Columbia.

Caribbean Insular Areas

(3) Commonwealth of Puerto Rico.

(4) Navassa Island.

(5) United States Virgin Islands (50 islets and cays).

Pacific Insular Areas

(6) American Samoa (seven islands).

(7) Baker Island.

(8) Commonwealth of Northern Mariannas Islands.

(9) Guam Island.

(10) Howland Island

(11) Jarvis Island.

(12) Johnston Island (Islets East, Johnston, North and Sand).

(13) Kingman Reef.

(14) Midway Island (Islets Eastern and Sand).

(15) Palmyra Island (more than 50 islets).

(16) Wake Island (Islets Peale, Wake and Wilkes).

(b) Any other area of the world, except within the territorial limits of areas where radio services are regulated by—

(1) An agency of the United States other than the FCC. (You are subject to its rules.)

(2) Any foreign government. (You are subject to its rules.)

(c) An aircraft or ship, with the permission of the captain, within or over any area of the world where radio services are regulated by the FCC or upon or over international waters. You must operate your R/C station according to any applicable treaty to which the United States is a party.

§ 95.204 (R/C Rule 4) Am I eligible to operate an R/C station?

You may operate an R/C station unless:

(a) You are a foreign government, a representative of a foreign government, or a federal government agency; *OR*

(b) The FCC has issued a cease and desist order to you, and the order is still in effect.

§ 95.205 (R/C Rule 5) Are there any special restrictions on the location of my R/C stations?

(a) If your R/C station is located on premises controlled by the Department of Defense, you may be required to comply with additional regulations imposed by the commanding officer of the installation.

(b) If your R/C station will be constructed on land of environmental or historical importance (such as a location significant in American history, architecture or culture), you may be required to provide information and to comply with §§ 1.1305–1.1319 of the FCC's Rules.

How To Operate an R/C Station

§ 95.206 (R/C Rule 6) On what channels may I operate?

(a) Your R/C station may transmit only on the following channels (frequencies):

Frequencies (MHz)	To operate—
26.995	Any kind of device (any object or apparatus, except an R/C transmitter).
27.045	
27.095	
27.145	
27.195	
27.255	
26.995	A model aircraft device (any small imitation of an aircraft).
27.045	
27.095	
27.145	
27.195	
27.255	
72.01	
72.03	
72.05	
72.07	
72.08	See paragraph (e).
72.09	
72.11	
72.13	
72.15	
72.16	See paragraph (e).
72.17	
72.19	
72.21	
72.23	
72.24	See paragraph (e).
72.25	
72.27	
72.29	
72.31	
72.32	See paragraph (e).
72.33	
72.35	
72.37	
72.39	
72.40	See paragraph (e).
72.41	
72.43	
72.45	
72.47

(b) You must share the channels with other R/C stations. You must cooperate in the selection and use of the channels. You must share the channel 27.255 MHz with stations in other radio services. There is no protection from interference on any of these channels.

(c) Your R/C station may not transmit simultaneously on more than one channel in the 72–76 MHz band when your operation would cause harmful interference to the operation of other R/C stations.

(d) Your R/C station must stop transmitting if it interferes with:

(1) Authorized radio operations in the 72–76 MHz band; *OR*

(2) Televison reception on TV channels 4 or 5.

(e) Authorization for the use of the following frequencies is withdrawn effective December 20, 1982: 72.08, 72.16, 72.24, 72.32, 72.40, 72.96 and 75.64 MHz.

§ 95.207 (R/C Rule 70 How high may I put my antenna?

(a) "Antenna" means the radiating system (for transmitting, receiving or both) and the structure holding it up (tower, pole or mast). It also means everything else attached to the radiating system and the structure.

(b) If your antenna is mounted on a hand-held portable unit, none of the following limitations apply.

(c) If your antenna is installed at a fixed location, it (whether receiving, transmitting or both) must comply with either one of the following:

(1) The highest point must not be more than 6.10 meters (20 feet) higher than the higest point of the building or tree on which it is mounted; *OR*

(2) The highest point must not be more than 18.3 meters (60 feet) above the ground.

(d) If your R/C station is located near an airport, and if your antenna structure is more than 6.1 meters (20 feet) high, you may have to obey additional restrictions. The highest point of your antenna must not exceed one meter above the airport elevation for every hundred meters of distance from the nearest point of the nearest airport runway. Differences in ground elevation between your antenna and the airport runway may complicate this formula. If your R/C station is near an airport, you may contact the nearest FCC filed office, listed in Section 0.121 of the Commission's Rules for a worksheet to help you figure the maximum allowable height of your antenna. Consult Part 17 of the FCC's Rules for more information.

Warning: Installation and removal of R/C station antennas near powerlines is dangerous. For your safety, follow the installation directions included with your antenna.

§ 95.208 (R/C Rule 8) What equipment may I use at my R/C station?

(a) Your R/C station may transmit only with:

(1) An FCC type accepted (or type approved) R/C transmitter (Type accepted means the FCC has determined that certain radio equipment is capable of meeting recommended standards for operation); *OR*

(2) A non-type accepted R/C transmitter on channels 26.995–27.255 MHz, *IF*;

(i) It is "crystal controlled", *AND*

(ii) It complies with the technical standards (See Part 95, Subpart E).

(3) Use of a transmitter outside of the band 26.995–27.255 MHz which is not type accepted (or type approved) voids your authority to operate the station. Use of a transmitter in the band 26.995–27.255Mhz which is not crystal controlled or which does not comply with the technical standards voids your authority to operate the station.

(b) You mau examine a list of type accepted transmitters at any FCC field office.

(c) Your R/C station may transmit with a transmitter assembled from a kit.

(d) You must not make, or have made, any internal modification to a type-accepted transmitter. (See R/C Rule 21.) Any internal modification to a type-accepted transmitter cancels the type-acceptance, and use of such a transmitter voids your authority to operate the station.

§ 95.209 (R/C Rule 9) How much power may I use?

(a) Your R/C station transmitter power output must not exceed the following value under any conditions:

Channel	Transmitter power (carrier power)
27.255 MHz	25 watts.
26.995–27.195 MHz	4 watts.
72–76 MHz	0.75 watts.

(b) Use of a transmitter which has power output in excess of that authorized voids your authority to operate the station.

§ 95.210 (R/C Rule 10) What communications may be transmitted?

(a) You may only use your R/C station to transmit one-way communications. (One-way communications are transmissions which are not entended to establish communication with another station.)

(b) You may only use your R/C station for the following purposes:

(1) The operator turns on and/or off a device at a remote location (Refer to Diagram 1); *OR*

(2) A sensor at a remote location turns on and/or off an indicating device for the operator. (Refer to Diagram 2.) Only channels 26.995 to 27.255 MHz (see R/C Rule 16) may be used for this purpose. (A remote location means a place distant from the operator.)

(c) Your R/C station may only transmit non-voice:

(1) Amplitude modulated emissions (A9);

(2) Unmodulated on-off emissions (A9); *OR*

(3) Frequency (or phase) modulated emissions (F9) on the 72–76 MHz channels only.

§ 95.211 (R/C Rule 11) What communications are prohibited?

You must not use an R/C station—

(a) In connection with any activity which is against federal, state or local law;

(b) To transmit any message other than for operation of devices at remote locations (no voice, telegraphy, etc.);

(c) To intentionally interfere with another station's transmissions;

(d) To operate another R/C transmitter by remote control (See R/C Rule 16); *OR*

(e) To transmit two-way communications.

§95.212 (R/C Rule 12) May I be paid to use my R/C station?

(a) You may not accept direct or indirect payment for transmitting with an R/C station.

(b) You may use an R/C station to help you provide a service, and be paid for that service, as long as you are paid only for the service and not for the actual use of the R/C station.

§95.213 (R/C Rule 13) Who is responsible for R/C communications I make?

You are responsible for all communications which are made by you from an R/C station.

§ 95.214 (R/C Rule 14) Do I have to limit the length of my communications?

(a) You must limit your R/C communications to the minimum practical time.

(b) The only time your R/C communications may be a continuous signal for more than 3 minutes is when operation of the device requires at least one or more changes during each minute of the communications.

(c) Your R/C station may transmit a continuous signal without modulation only if:

(1) You are using it to operate a model aircraft device; *AND*

(2) The presence or absence of the signal operates the device.

(d) If you show that you need a continous signal to insure the immediate safety of life or property, the FCC may make an exception to the limitations in this rule.

§ 95.215 (R/C Rule 15) Do I identify my R/C communications?

You need not identify your R/C communications.

§ 95.216 (R/C Rule 16) May I operate my R/C station transmitter by remote control?

(a) You may not operate an R/C transmitter by radio remote control. (See R/C Rule 11.)

(b) You may operate an R/C transmitter by wireline remote control if you obtain specific approval in writing from the FCC. To obtain FCC approval, you must show why you need to operate your station by wireline remote control. Send your request and justification to FCC, Gettysburg, Pa. 17325. If you receive FCC approval, you must keep the approval as part of your station records. (See R/C Rule 23.)

(c) Remote control means operation of an R/C transmitter from any place other than the location of the R/C transmitter. Direct mechanical control or direct electrical control by wire from some point on the same premises, craft or vehicles as the R/C transmitter is not considered remote control.

Other Things You Need to Know

§ 95.217 (R/C Rule 17) What are the penalties for violating these rules?

(a) If the FCC finds that you have willfully or repeatedly violated the Communications Act or the FCC Rules, you may have to pay as much as $2,000 for each violation, up to a total of $5,000. (See section 503(b) of the Communications Act.)

(b) If the FCC finds that you have violated the Communications Act or the FCC Rules, you may be ordered to stop whatever action caused the violation. (See section 312(b) of the Communications Act.)

(c) If the federal court finds that you have willfully and knowingly violated any FCC Rule, you may be fined up to $500 for each day you committed the violation. (See section 6502 of the Communications Act.)

(d) If a federal court finds that you have willfully and knowingly violated any provision of the Communications Act, you may be fined up to $10,000, or you may be imprisoned for one year, or both. (See section 501 of the Communications Act.)

§ 95.218 (R/C Rule 18) How do I answer discrepancy notices?

(a) If it appears to the FCC that you have violated the Communications Act or FCC rules, the FCC may send you a discrepancy notice.

(b) Within the time period stated in the notice, you must answer with:

(1) A complete written statement about the apparent discrepancy;

(2) A complete written statement about any action you have taken to correct the apparent violation and to prevent it from happening again; *AND*

(3) The name of the person operating at the time of the apparent violation.

(c) You must not shorten your answer by references to other communications or notices.

(d) You must send your answer to the FCC office which sent you the notice.

(e) You must keep a copy of your answer in your station records (See R/C Rule 23).

§ 95.219 (R/C Rule 19) What must I do if the FCC tells me that my R/C station is causing interference?

(a) If the FCC tells you that your R/C station is causing interference for technical reasons, you must follow all

instructions in the official FCC notice. (This notice may require you to have technical adjustments made to your equipment.)

(b) You must comply with any restricted hours of R/C station operation which may be included in the official FCC notice.

§ 95.220 (R/C Rule 20) How do I have my R/C station transmitter serviced?

(a) You may adjust an antenna to your R/C transmitter and you may make radio checks. (A radio check means a one-way transmission for a short time in order to test the transmitter.)

(b) Each internal repair and each internal adjustment to your FCC type accepted R/C transmitter (see R/C Rule 8) must be made by or under the direct supervision of a person licensed by the FCC as a General Radiotelephone Operator.

(c) Except as provided in paragraph (d) of this section, each internal repair and each internal adjustment of an R/C transmitter in which signals are transmitted must be made using a nonradiating ("dummy") antenna.

(d) Brief test signals (signals not longer than one minute during any five minute period) using a radiating antenna may be transmitted in order to:

(1) Adjust a transmitter to an antenna;

(2) Detect or measure radiation of energy other than the intended signal; *OR*

(3) Tune a receiver to your R/C transmitter.

§ 95.221 (R/C Rule 21) May I make any changes to my R/C station transmitter?

(a) You must not make or have anyone else make any internal modification to your R/C transmitter.

(b) Internal modification does not include:

(1) Repair or servicing of an R/C station transmitter (see R/C Rule 20); *OR*

(2) Changing plug-in modules which were type-accepted as part of your R/C transmitter.

(c) You must not operate an R/C transmitter which has been modified by anyone in any way, including modification to operate on unauthorized frequencies or with illegal power. (See R/C Rules 8 and 9.)

§ 95.222 (R/C Rule 22) Do I have to make my R/C station available for inspection?

(a) If an authorized FCC representative requests to inspect your R/C station, you must make your R/C station and records available for inspection.

(b) An R/C station includes all of the radio equipment you use.

§ 95.223 (R/C Rule 23) What are my station records?

Your station records include the following documents, as applicable:

(a) A copy of each response to an FCC violation notice. (See R/C Rule 18.)

(b) Each written permission received from the FCC. (See R/C Rule 16.)

§ 95.224 (R/C Rule 24) How do I contact the FCC?

(a) Write to your nearest FCC Field Office listed in Section 0.121 of the Commission's Rules if you:

(1) Want to report an interference complaint; *OR*

(2) Want to know if the FCC has type-aocepted a transmitter for R/C.

(b) Write to the FCC, Private Radio Bureau, Personal Radio Branch, Washington, D.C. 20554 if you have questions about the R/C Rules.

95.427 (CB Rule 27) How do I contact the FCC?

Authority: Secs. 4,303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154,303.

Subpart D—Citizens Band (CB) Radio Service

General Provisions

§ 95.401 (CB Rule 1) What is the Citizens Band (CB) Radio Service?

The CB Radio Service is a private, two-way, short-distance voice communications service for personal or business activities. The CB Radio Service may also be used for voice paging.

§ 95.402 (CB Rule 2) How do I use these rules?

(a) You must comply with these rules (See CB Rule 20 for the penalties for violations) when you operate a station in the CB Service from:

(1) Within or over the territorial limits of places where radio services are regulated by the FCC (see CB Rule 3);

(2) Aboard any vessel or aircraft registered in the United States; *OR*

(3) Aboard any unregistered vessel or aircraft owned or operated by a United States citizen or company.

(b) Your CB station must comply with technical rules found in Subpart E of Part 95.

(c) Where the rules use the word "you", "you" means a person operating a CB station.

(d) Where the rules use the word "person," the rules are concerned with an individual, a corporation, a partnership, an association, a joint stock company, a trust, a state, territorial or local government unit, or other legal entity.

(e) Where the rules use the term "FCC", that means the Federal Communications Commission.

(f) Where the rules use the term "CB station", that means a radio station transmitting in the CB Radio Service.

§ 95.403 (CB Rule 3) Do I need a license?

You do not need an individual license to operate a CB station. You are authorized to operate your CB station from:

(a) Within or over any area of the world where radio services are regulated by the FCC. Those areas are within the territorial limits of:

(1) The fifty United States.

(2) The District of Columbia.

Caribbean Insular Areas

(3) Commonwealth of Puerto Rico.

(4) Navassa Island.

(5) United States Virgin Islands (50 islets and cays).

Pacific Insular Areas

(6) American Samoa (seven islands).

(7) Baker Island.

(8) Commonwealth of Northern Mariannas Islands.

(9) Guam Island.

(10) Howland Island

(11) Jarvis Island.

(12) Johnston Island (Islets East, Johnston, North and Sand).

(13) Kingman Reef.

(14) Midway Island (Islets Eastern and Sand).

(15) Palmyra Island (more than 50 islets).

(16) Wake Island (Islets Peale, Wake and Wilkes).

(b) Any other area of the world, except within the territorial limits of areas where radio services are regulated by—

(1) An agency of the United States other than the FCC. (You are subject to its rules.)

(2) Any foreign government. (You are subject to its rules.)

(c) An aircraft or ship, with the permission of the captain, within or over any area of the world where radio services are regulated by the FCC or upon or over international waters. You must operate your CB station according to any applicable treaty to which the United States is a party.

§ 95.404 (CB Rule 4) Am I eligible to operate a CB station?

You may operate a CB station unless:

(a) You are a foreign government, a representative of a foreign government, or a federal government agency; *OR*

(b) The FCC has issued a cease and desist order to you, and the order is still in effect.

§ 95.405 (CB Rule 5) Are there any special restrictions on the location of my CB station?

(a) If your CB station is located on premises controlled by the Department of Defense you may be required to comply with additional regulations imposed by the commanding officer of the installation.

(b) If your CB station will be constructed on land of environmental or historical importance (such as a location significant in American history, architecture or culture), you may be required to provide information and to comply with §§ 1.1305–1.1319 of the FCC's Rules.

How to Operate a CB Station

§ 95.406 (CB Rule 6) On what channels may I operate?

(a) Your CB station may transmit only on the following channels (frequencies):

Channel	Frequency (megahertz-MHz)
1	[illegible]
2	[illegible]
3	[illegible]
4	27.005
5	27.015
6	[illegible]
7	27.035
8	[illegible]
9	[illegible]
10	27.075
11	[illegible]
12	27.105
13	27.115
14	27.125
15	27.135
16	27.155
17	27.165
18	27.175
19	27.185
20	27.205
21	27.215
22	27.225
23	[illegible]
24	27.235
25	27.245
26	[illegible]
27	27.275
28	[illegible]
29	27.295
30	27.305
31	27.315
32	27.325
33	[illegible]
34	27.345
35	27.355
36	[illegible]
37	27.375
38	[illegible]
39	27.395
40	27.405

[1] See paragraph (b).

(b) Channel 9 may be used only for emergency communications or for traveler assistance.

(c) You must, at all times and on all channels, give priority to emergency communication messages concerning the immediate safety of life or the immediate protection of property.

(d) You may use any channel for emergency communications or for traveler assistance.

(e) You must share each channel with other users.

(f) The FCC will not assign any channel for the private or exclusive use of any particular CB station or group of stations.

(g) The FCC will not assign any channel for the private or exclusive use

of CB stations transmitting single sideband or AM.

§ 95.407 (CB Rule 7) How high may I put my antenna?

(a) "Antenna" means the radiating system (for transmitting, receiving or both) and the structure holding it up (tower, pole or mast). It also means everything else attached to the radiating system and the structure.

(b) If your antenna is mounted on a hand-held portable unit, none of the following limitations apply.

(c) If your antenna is installed at a fixed location, it (whether receiving, transmitting or both) must comply with either one of the following:

(1) The highest point must not be more than 6.10 meters (20 feet) higher than the highest point of the building or tree on which it is mounted; *OR*

(2) The highest point must not be more than 18.3 meters (60 feet) above the ground.

(d) If your CB station is located near an airport, and if your antenna structure is more than 6.1 meters (20 feet) high, you may have to obey additional restrictions. The highest point of your antenna must not exceed one meter above the airport elevation for every hundred meters of distance from the nearest point of the nearest airport runway. Differences in ground elevation between your antenna and the airport runway may complicate this formula. If your CB station is near an airport, you may contact the nearest FCC field office listed in Section 0.121 of the Commission's Rules for a worksheet to help you figure the maximum allowable height for your antenna. Consult Part 17 of the FCC's Rules for more information.

Warning: Installation and removal of CB station antennas near powerlines is dangerous. For your safety follow the installation directions included with your antenna.

§ 95.408 (CB Rule 8) What equipment may I use at my CB station?

(a) You must use an FCC type-accepted CB transmitter at your CB station. You can identify an FCC type-accepted transmitter by the type-acceptance label placed on it by the manufacturer. You may examine a list of type-accepted equipment of any FCC Field Office or at FCC Headquarters. Use of a transmitter which is not FCC type-accepted voids your authority to operate the station.

(b) You must not make, or have made, any internal modification to a type-accepted CB transmitter. (See CB Rule 24.) Any internal modification to a type-accepted CB transmitter cancels the type-acceptance, and use of such a transmitter voids your authority to operate the station.

§ 95.409 (CB Rule 9) How much power may I use?

(a) Your CB station transmitter power output must not exceed the following values under any conditions:

AM (A3)—4 watts (carrier power).

SSB—12 watts (peak envelope power).

(b) If you need more information about the power rule, see the technical rules in Subpart E of Part 95.

(c) Use of a transmitter which has carrier or peak envelope power in excess of that authorized voids your authority to operate the station.

§ 95.410 (CB Rule 10) May I use power amplifiers?

(a) You may not attach the following items (power amplifiers) to your type-accepted CB transmitter in any way:

(1) External radio frequency (RF) power amplifiers (sometimes called linears or linear amplifiers); *OR*

(2) Any other devices which, when used with a radio transmitter as a signal source, are capable of amplifying the signal.

(b) There are no exceptions to this rule and use of a power amplifier voids your authority to operate the station.

(c) The FCC will presume you have used a linear or other external RF power amplifier if—

(1) It is in your possession or on your premises; *AND*

(2) There is other evidence that you have operated your CB station with more power than allowed by CB Rule 9.

(d) Paragraph (c) of this section does not apply if you hold a license in another radio service which allows you to operate an external RF power amplifier.

§ 95.411 (CB Rule 11) What communications may be transmitted?

(a) You may use your CB station to transmit two-way plain language communications. Two-way plain language communications are communications without codes or coded messages. Operating signals such as "ten codes" are not considered codes or coded messages. You may transmit two-way plain language communications only to other CB stations, to units of your own CB station or to authorized government stations on CB frequencies about—

(1) Your personal or business activities or those of members of your immediate family living in your household;

(2) Emergencies (see CB Rule 17);

(3) Traveler assistance (see CB Rule 17); *or*

(4) Civil defense activities in connection with official tests or drills conducted by, or actual emergencies announced by, the civil defense agency with authority over the area in which your station is located.

(b) You may use your CB station to transmit a tone signal only when the signal is used to make contact or to continue communications. (Examples of circuits using these signals are tone operated squelch and selective calling circuits.) If the signal is an audible tone, it must last no longer than 15 seconds at one time. If the signal is a subaudible tone, it may be transmitted continuously only as long as you are talking.

(c) You may use your CB station to transmit *one-way communications* (messages which are not intended to establish communications between two or more particular CB stations) only for emergency communications, traveler assistance, brief tests (radio checks) or voice paging.

(d) You may use your CB station to transmit in a foreign language, as long as you identify your CB station in the English language.

§ 95.412 (CB Rule 12) What communications are prohibited?

(a) You must not use a CB station—

(1) In connection with any activity which is against federal, state or local law;

(2) To transmit obscene, indecent or profane words, language or meaning;

(3) To interfere intentionally with the communications, of another CB station;

(4) To transmit one-way communications, except for emergency communications traveler assistance, brief tests (radio checks), or voice paging;

(5) To advertise or solicit the sale of any goods or services;

(6) To transmit music, whistling, sound effects or any material to amuse or entertain;

(7) To transmit any sound effect solely to attract attention;

(8) To transmit the word "MAYDAY" or any other international distress signal, except when your station is located in a ship, aircraft or other vehicle which is threatened by grave and imminent danger and you are requesting immediate assistance;

(9) To communicate with, or attempt to communicate with, any CB station more than 250 kilometers (155.3 miles) away;

(10) To advertise a political candidate or political campaign; (you may use your CB radio for the business or organizational aspects of a campaign, if you follow all other applicable rules);

(11) To communicate with stations in other countries, except General Radio Service stations in Canada; *or*

(12) To transmit a false or deceptive communication.

(b) You must not use a CB station to transmit communications for live or delayed rebroadcast on a radio or television broadcast station. You may use your CB station to gather news items or to prepare programs.

§ 95.413 (CB Rule 13) May I be paid to use my CB station?

(a) You may not accept direct or indirect payment for transmitting with a CB station.

(b) You may use a CB station to help you provide a service, and be paid for that service, as long as you are paid only for the service and not for the actual use of the CB station.

§ 95.414 (CB Rule 14) Who is responsible for CB communications I make?

You are responsible for all communications which are made by you from a CB station.

§ 95.415 (CB Rule 15) Do I have to limit the length of my communications?

(a) You must limit your CB communications to the minimum practical time.

(b) If you are communicating with another CB station or stations, you, and the stations communicating with you, must limit each of your conversations to no more than five continuous minutes.

(c) At the end of your conversation, you, and the stations communicating with you, must not transmit again for at least one minute.

§ 95.416 (CB Rule 16) How do I identify my CB communications?

(a) You must identify your CB communications by the license plate number of any truck, automobile or motorcycle registered in your name. If you do not have a truck, automobile or motorcycle registered in your name, you must use your residence street address for identification instead.

(b) You must identify your CB transmissions at the end of each communication.

(c) Your identification must be clearly given in the English language. A phonetic alphabet may be used as an aid for identification. A "handle," unit designator or special identifier may be used in addition to, but not instead of, your required identification.

§ 95.417 (CB Rule 17) How do I use my CB station in an emergency or to assist a traveler?

(a) You must at all times and on all channels, give priority to emergency communications.

(b) When you are directly participating in emergency communications, you do not have to comply with the rule about length of transmissions (CB Rule 15). You must obey all other rules.

(c) You may use your CB station for communications necessary to assist a traveler to reach a destination or to receive necessary services. When you are using your CB station to assist a traveler, you do not have to obey the rule about length of transmissions (CB Rule 15). You must obey all other rules.

§ 95.418 (CB Rule 18) May I operate my CB station transmitter by remote control?

(a) You may not operate a CB station transmitter by radio remote control.

(b) You may operate a CB transmitter by wireline remote control if you obtain specific approval in writing from the FCC. To obtain FCC approval, you must show why you need to operate your station by wireline remote control. Send your request and justification to FCC, Gettysburg, Pa. 17325. If you receive FCC approval, you must keep the approval as part of your station records. (See CB Rule 26.)

(c) Remote control means operation of a CB transmitter from any place other that the location of the CB transmitter. Direct mechanical control or direct electrical control by wire from some point on the same premises, craft or vehicle as the CB transmitter is not considered remote control.

§ 95.419 (CB Rule 19) May I connect my CB station transmitter to a telephone?

(a) You may connect your CB station transmitter to a telephone if you comply with all of the following:

(1) You or someone else must be present at your CB station and must—

(i) Manually make the connection (the connection must not be made by remote control);

(ii) Supervise the operation of the transmitter during the connection;

(iii) Listen to each communication during the connection; *and*

(iv) Stop all communications if there are operations in violation of these rules.

(2) Each communication during the telephone connection must comply with all of these rules.

(3) You must obey any restriction that the telephone company places on the connection of a CB transmitter to a telephone.

(b) The CB transmitter you connect to a telephone must not be shared with any other CB station.

(c) If you connect your CB transmitter to a telephone, you must use a phone patch device which has been registered with the FCC.

Other Things You Need To Know

§ 95.420 (CB Rule 20) What are the penalties for violating these rules?

(a) If the FCC finds that you have willfully or repeatedly violated the Communications Act or the FCC Rules, you may have to pay as much as $2,000 for each violation, up to a total of $5,000. (See section 503(b) of the Communications Act.)

(b) If the FCC finds that you have violated any section of the Communications Act or the FCC Rules, you may be ordered to stop whatever action caused the violation. (See section 312(b) of the Communications Act.)

(c) If a federal court finds that you have willfully and knowingly violated any FCC Rule, you may be fined up to $500 for each day you committed the violation. (See section 502 of the Communications Act.)

(d) If a federal court finds that you have willfully and knowingly violated any provision of the Communications Act, you may be fined up to $10,000, or you may be imprisoned for one year, or both. (See section 501 of the Communications Act.)

§ 95.421 (CB Rule 21) How do I answer a discrepancy notice?

(a) If it appears to the FCC that you have violated the Communications Act or these rules, the FCC may send you a discrepancy notice.

(b) Within the time period stated in the notice, you must answer with:

(1) A complete written statement about the apparent discrepancy;

(2) A complete written statement about any action you have taken to correct the apparent violation and to prevent if from happening again; *AND*

(3) The name of the person operating at the time of the apparent violation.

(c) You must not shorten your answer by references to other communications or notices.

(d) You must send your answer to the FCC office which sent you the notice.

(e) You must keep a copy of your answer in your station records. (See CB Rule 26.)

§ 95.422 (CB Rule 22) What must I do if the FCC tells me that my CB station is causing interference?

(a) If the FCC tells you that your CB station is causing interference for technical reasons you must follow all instructions in the official FCC notice. (This notice may require you to have technical adjustments made to your equipment.)

(b) You must comply with any restricted hours of CB station operation which may be included in the official notice.

§ 95.423 (CB Rule 23) How do I have my CB station transmitter serviced?

(a) You may adjust an antenna to your CB transmitter and you may make radio checks. (A radio check means a one way transmission for a short time in order to test the transmitter.)

(b) Each internal repair and each internal adjustment to your FCC type-accepted CB transmitter (See CB Rule 8) must be made by or under the direct supervision of a person licensed by the FCC as a General Radiotelephone Operator.

(c) Except as provided in paragraph (d) of this section, each internal repair and each internal adjustment of a CB transmitter in which signals are transmitted must be made using a nonradiating ("Dummy") antenna.

(d) Brief test signals (signals not longer than one minute during any five minute period) using a radiating antenna may be transmitted in order to:

(1) Adjust an antenna to a transmitter;

(2) Detect or measure radiation of energy other than the intended signal; *OR*

(3) Tune a receiver to your CB transmitter.

§ 95.424 (CB Rule 24) May I make any changes to my CB station transmitter?

(a) You must not make or have any one else make any internal modification to your CB transmitter.

(b) Internal modification does not include:

(1) Repair or servicing of a CB station transmitter (see CB Rule 23); *OR*

(2) Changing plug-in modules which were type accepted as part of your CB transmitter.

(c) You must not operate a CB transmitter which has been modified by anyone in any way, including modification to operate on unauthorized frequencies or with illegal power. (See CB Rules 8 and 10.)

§ 95.425 (CB Rule 25) Do I have to make my CB station available for inspection?

(a) If an authorized FCC representative requests to inspect your CB station, you must make your CB station and records available for inspection.

(b) A CB station includes all of the radio equipment you use.

§ 95.426 (CB Rule 26) What are my station records?

Your station records include the following documents, as applicable.

(a) A copy of each response to an FCC violation notice. (See CB Rule 21.)

(b) Each written permission received from the FCC. (See CB Rule 18.)

§ 95.427 (CB Rule 27) How do I contact the FCC?

(a) Write to your nearest FCC Field Office listed in Section 0.121 of the Commission's Rules if you:

(1) Want to report an interference complaint; *OR*

(2) Want to know if the FCC has type-accepted a transmitter for CB.

(b) Write to the FCC, Private Radio Bureau, Personal Radio Branch, Washington, D.C. 20554 if you have questions about the CB Rules.

3. Paragraph (f) of § 95.645 of the Rules is revised to read:

§ 95.645 Additional requirements for type acceptance.

* * * * *

(f) A copy of Subpart D of Part 95 of the Commission's Rules, to be current at the time of packing of the transmitter, shall be furnished with each transmitter.

DEPARTMENT OF COMMERCE

International Trade Administration

Certain Softwood Products From Canada; Postponement of Countervailing Duty Preliminary Determinations

AGENCY: Department of Commerce.

ACTION: Postponement of Countervailing Duty Preliminary Determinations.

SUMMARY: The countervailing duty preliminary determinations involving certain softwood products (see Appendix A) from Canada are being postponed as the investigations have been determined to be extraordinarily complicated. We intend to issue the countervailing duty preliminary determinations not later than March 7, 1983.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Roland MacDonald, Office of Investigations, Import Administration, U.S. Department of Commerce, 14th & Constitution Avenue, NW., Washington, DC 20230/(202) 377-4087.

SUPPLEMENTARY INFORMATION: On November 3, 1982, we announced our initiation of countervailing duty investigations to determine whether producers, manufacturers, or exporters of certain softwood products from Canada receive any benefits from the federal and provincial governments of Canada that are subsidies (47 FR 49878). The notice stated that we would issue preliminary determinations by December 31, 1982.

As detailed in the notices of initiation of the countervailing duty investigations, the petition alleges that the federal and provincial governments of Canada provide various programs which constitute subsidies to producers, manufacturers, or exporters of certain softwood products. The alleged subsidy practices are numerous and raise complex and novel issues. For these reasons we determine that these investigations are extraordinarily complicated in accordance with section 703(c)(1)(B)(i) and that additional time is necessary to make these preliminary determinations in accordance with section 703(c)(1)(B)(ii) of the Tariff Act of 1930, as amended ("the Act"). We intend to issue these preliminary determinations not later than March 7, 1983.

(Sec. 703(c)(2) of the Act)

Dated: December 9, 1982.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

Appendix A—Description of Products

For purposes of these investigations:

1. The term *"softwood lumber"* covers those products included in the *Tariff Schedules of the United States Annotated (1982) (TSUSA)* in items 202.03–202.30 (rough, dressed, or worked softwood lumber) specifically excluded are drilled and treated lumber, wood siding, and edge-glued or end-glued wood not over 6 feet in length or over 15 inches in width. "Rough lumber" is "lumber just as it comes from the saw; whether in its original sawed size or edged, resawn, crosscut, or trimmed to smaller sizes." "Dressed lumber" is "lumber which has been dressed or surfaced by planing on at least one edge or face." "Worked lumber" is "lumber which has been matched (tongue-and-grooved), shiplapped (rabbeted or lapped joint), or patterned on a matching machine, sticker, or molder."

2. The term *"softwood shakes and shingles"* "refers to wood products most frequently made from red cedar, that are used for roofing or siding." Softwood shakes, "approved durable wood of random widths ranging from 4 inches to 14 inches come in four types: Hand-split and resawn, taper split, straight-split and taper sawn. "Softwood shingles are tapered pieces of approved durable wood, sawed both sides, of random widths ranging from 3 inches to 14 inches and in lengths of 16 inches, 18 inches or 24 inches: for purposes of this investigation, the term softwood shakes and shingles refers only to those products designated in *Tariff Schedules of the United States Annotated (1982) (TSUSA)* as item 200.85.

3. The term *"software fence"* refers to three types of fences: picket, stockade, and rail. Picket fences are made of wood pickets

nailed to horizontal back rails which are fastened to the supporting posts. The pickets vary in length and thickness, lengths range from 24" to 92", and thickness varies from ½" to 3". The species of wood fences is usually cedar for the post and conifers or softwoods for the backrails and pickets. Rail fences consist of line post and horizontal rails. Cedar is generally used for the line posts and cedar or conifers or northern softwoods are used for the rails. Stockade fences vary in height from 3 feet to 10 feet. Widths are usually 7 feet or 8 feet. Line posts are generally cedar, and stockade sections are made from northern softwoods. This investigation covers softwood fences both assembled and unassembled, which fall under *TSUSA* item 200.75.

BILLING CODE 3510-25-M

Computer Systems Technical Advisory Committee; Partially Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Computer Systems Technical Advisory Committee was initially established on January 3, 1973, and rechartered on September 18, 1981, in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Committee advises the Office of Export Administration with respect to questions involving (A) Technical specifications and policy issues relating to those specifications which are of concern to the Department, (B) worldwide availability of products and systems, including quantity and quality, and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to computer systems or technology, and (D) exports of the aforementioned commodities subject to unilateral and multilateral controls which the United States establishes or in which it participates including proposed revisions of any such controls.

TIME AND PLACE: January 12, 1983, at 1:00 p.m. The meeting will take place at the Main Commerce Building, Room 3708, 14th Street and Constitution Ave., NW., Washington, D.C.

AGENDA:

General Session

(1) Opening remarks by the Acting Chairman.

(2) Presentation of papers or comments by the public.

(3) Nomination and election of a chairman.

(4) Report on the current work program of the subcommittees:

(a) Foreign Availability;

(b) Hardware; and

(c) Licensing Procedures.

(5) New business.

Executive Session

(6) Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

PUBLIC PARTICIPATION: The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 29, 1981, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executrive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: 202-377-4217.

FOR FURTHER INFORMATION OR COPIES OF THE MINUTES CONTACT: Mrs. Margaret A. Cornejo, Committee Control Officer, Office of Export Administration, Room 2613, U.S. Department of Commerce, Washington, D.C. 20230, telephone: 202-377-2583.

Dated: December 14, 1982.

John K. Boidock,

Director, Office of Export Administration.

BILLING CODE 3510-25-M

Foreign Availability Subcommittee of the Computer Systems Technical Advisory Committee; Open Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Computer Systems Technical Advisory Committee was initially established on January 3, 1973, and rechartered on September 18, 1981 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on October 5, 1981 pursuant to the charter of the Committee. The Foreign Availability Subcommittee was formed to ascertain if certain kinds of equipment are available in non-COCOM and Communist countries, and if such equipment is available, then to ascertain if it is technically the same or similar to that available elesewhere.

TIME AND PLACE: January 11, 1983, at 1:30 p.m. The meeting will take place at the Main Commerce Building, Room 3708, 14th Street and Constitution Ave., NW., Washington, D.C.

AGENDA:

General Session

(1) Opening remarks by the Subcommittee Chairman.

(2) Presentation of papers or comments by the public.

(3) Discussion of proposed changes to the Export Administration Act.

(4) Status of the Department of Commerce foreign availability implementation plan.

(5) Discussion of the agenda for 1983.

PUBLIC PARTICIPATION: The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written Statements may be submitted at any time before or after the meeting.

FOR FURTHER INFORMATION OR COPIES OF THE MINUTES CONTACT: Mrs. Margaret A. Cornejo, Committee Control Officer, Office of Export Administration, Room 2613, U.S. Department of Commerce, Washington, D.C. 20230, telephone: 202-377-2583.

Dated: December 14, 1982.

BILLING CODE 3510-25-M

Hardware Subcommittee of the Computer Systems Technical Advisory Committee; Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Computer Systems Technical Advisory Committee was initially established on January 3, 1973, and rechartered on September 18, 1981 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on October 5, 1981

pursuant to the charter of the Committee.

The Hardware Subcommittee was formed to continue the work of the Performance Characteristics and Performance Measurements Subcommittee, pertaining to (1) Maintenance of the processor performance tables and further investigation of total systems performance; and (2) investigation of array processors in terms of establishing the significance of these devices and determining the differences in characteristics of various types of these devices.

TIME AND PLACE: January 12, 1983, at 9:00 a.m. The meeting will take place at the Main Commerce Building, Room 3708, 14th Street and Constitution Avenue, NW., Washington, D.C.

The Subcommittee will meet only in Executive Session to discuss matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 29, 1981, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government in the Sunshine Act, Pub. L. 94–409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the meeting will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and properly classified under Executive Order 12356. A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: 202–377–4217.

BILLING CODE 3510-25-M

Licensing Procedures Subcommittee of the Computer Systems Technical Advisory Committee; Open Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Computer Systems Technical Advisory Committee was initially established on January 3, 1973, and rechartered on September 18, 1981 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on October 5, 1981 pursuant to the charter of the Committee. The Licensing Procedures Subcommittee was formed to review the procedural aspects of export licensing and recommend areas where improvements can be made.

TIME AND PLACE: January 11, 1983, at 10:00 a.m. The meeting will take place at the Main Commerce Building, Room 3708, 14th Street and Constitution Ave., NW., Washington, D.C.

AGENDA:

General Session

1. Opening remarks by the Subcommittee Chairman.
2. Presentation of papers or comments by the public.
3. Review the minutes of the previous meeting.
4. Outstanding communications to OEA:
   a. Procedures on licences for exhibits.
   b. Acceleration of post-COCOM procedures.
5. Report on the re-write of the Export Administration Regulations.
6. Report on processing time for front-door licensing.
7. Report on the study of the Distribution License.
8. New business.

PUBLIC PARTICIPATION: The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

BILLING CODE 3510-25-M

Prestressed Concrete Steel Wire Strand From the United Kingdom; Final Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Final Determination of Sales at Less Than Fair Value.

SUMMARY: We have determined that prestressed concrete steel wire strand ("PC strand") from the United Kingdom is being, or is likely to be, sold in the United States at less than fair value. The U.S. International Trade Commission ("ITC") will determine within 45 days of publication of this notice whether these imports are materially injuring, or are threatening to materially injure, a U.S. industry.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Brian Kelly, Office of Compliance, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D,.C. 20230 (202–377–2923).

SUPPLEMENTARY INFORMATION:

Case History

On March 4, 1982, we received a petition in proper form from counsel on behalf of American Spring Wire Corporation of Bedford Heights, Ohio; Armco Inc., of Middletown, Ohio; Florida Wire and Cable Company of Jacksonville, Florida; Bethlehem Steel Corporation of Bethlehem, Pennsylvania; Pan American Ropes, Inc., of Houston, Texas; and Shinko Wire America, Inc., of Houston, Texas; filed on the behalf of the U.S. industry producing PC strand. The petitioners alleged that PC strand from the United Kingdom is being or is likely to be sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930 ("the Act") (19 U.S.C. 1673), and that such sales are materially injuring, or are threatening to materially injure, a U.S. industry.

On October 6, 1982, we preliminarily determined that PC strand from the United Kindom is being, or is likely to be, sold in the United States at less than fair value (47 FR 44132–33). Our preliminary notice gave interested parties an opportunity to submit views in writing and orally, and on November 17, 1982, we held a public hearing.

Scope of the Investigation

For the purpose of this investigation, the term "prestressed concrete steel wire strand" covers wire strand of steel, other then stainless steel, for prestressing concrete, as currently

provided for in item 642.1120 of the *Tariff Schedules of the United States Annotated.*

To the best of our knowledge a single British firm, Bridon Wire, Ltd., produced all of the PC strand exported from the United Kingdom to the United States during the review period, and we limited our investigation to that firm.

This investigation covers the period from July 1 to December 31, 1981, for purchase price sales, and from October 1, 1981 to March 31, 1982, for exporter's sales price transactions.

Methodology of Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

We used purchase price, as defined in section 772(b) of the Act, to represent the United States price for a portion of the sales by Bridon Wire in which the merchandise was sold to unrelated purchasers prior to its importation into the United States. For the remainder of Bridon's sales we used exporter's sales price, because the merchandise was sold to unrelated purchasers in the United States after the date of importation.

We calculated both purchase price and exporter's sales price, as appropriate, on the basis of the ex-warehouse U.S. price; c.i.f. landed, duty paid price; or the delivered customer's works, packed price to unrelated purchasers in the United States. We made deductions, where applicable, for foreign inland freight, ocean freight and insurance, U.S. duty, brokerage charges, and U.S. inland freight and insurance. Where we used exporter's sales price, we made additional deductions for credit expenses and other selling expenses.

Foreign Market Value

There were sufficient sales in the home market to allow the use of home market prices as the basis for foreign market value. For the purposes of determining such or similar merchandise under section 771 of the Act, we made comparisons using strand of the same grade as that sold in the United States, and used the dimensions closest to those of the product sold in the United States.

The home market prices for Bridon Wire were based on delivered or ex-works packed prices to unrelated purchasers. From these prices we deducted, where appropriate, discounts and U.K. inland freight and insurance. We made adjustments, where appropriate, for differences between home market and U.S. credit costs, recoiling charges, and packing charges.

Where we compared exporter's sales price with foreign market value, we deducted credit expenses and recoiling charges, instead of adjusting for the differences. We subtracted an amount for indirect selling expenses equal to that found for United States sales.

Verification

We verified, to the extent possible, all information used in making this final determination. We were granted access to the books and records of the British manufacturer and the related U.S. company. We used standard verification procedures, including on-site inspection of the manufacturer's operations and examination of accounting records and randomly selected documents containing relevant information.

Results of Investigation

We made fair value comparisons on all of the sales to the United States made by Bridon Wire, Ltd. We found margins on all of the sales compared. The margins range from 15.37 to 150.49 percent. The overall weighted average margin on all sales compared is 33.89 percent.

Petitioner's Comments

Comment 1

The Department cannot adjust home market price for differences in circumstances of sale without a causal link between the differences in the cost of selling the merchandise in the home and U.S. markets and the differences in home and U.S. prices. In its preliminary analysis, the Department failed to establish this causal link, and no evidence has subsequently been presented to justify it. The Department therefore should not make the adjustment.

DOC Position

In accord with past practice, we adjusted for circumstances of sale based on our conclusion that differences in cost constitute a reasonable indication of the differences in price. Section 353.15(d) of the Commerce Regulations states that reasonable allowances will be made for the differences in cost to the seller of differences in circumstances of sale. The regulation is consistent with section 773(a)(4) of the Act, which states that any allowance will be made for any price difference "wholly or partly" due to differences in circumstances of sale. See *Brother Industries, Ltd., et al. v. United States,* 3 C.I.T. ——, Slip Op. 82–34 (April 30, 1982).

Comment 2

To the extent that the ITA made deductions for inland freight and discounts in the computation of foreign market value without establishing that such adjustments were directly related to the sales under consideration, petitioners object to the deductions.

DOC Position

Where necessary, the Department has, in accordance with longstanding administrative practice, relied on averaged figures for home market adjustments, including freight and some discounts. The Department has the authority to use averaged figures for establishing foreign market value during an investigation. For both freight and discounts the figures used were directly traceable to the product under investigation, though not to particular sales.

Comment 3

Average U.S. credit costs should not be used. The Department should obtain and use sale-specific credit costs.

DOC Position

The Department received a sale by sale breakdown of U.S. credit expenses during the verification of Bridon's American affiliate, Springfield Industries, Inc., and applied it in computing these final results.

Comment 4

The Department erred in deducting credit expenses and recoiling charges from both the U.S. and home market prices in exporter's sales price situations. The law only allows adjustments for the differences in circumstances of sale.

DOC Position

Section 772(e) of the Act gives the Department the authority to make deductions for direct expenses on the U.S. side. See *Brother Industries, Ltd., et al. v. United States,* 3 C.I.T. ——, Slip Op. 82–34 (April 30, 1982).

Comment 5

The Department did not have the authority to investigate the classification of selling expenses during verification. This constitutes gathering new information, which is not the purpose of verification.

DOC Position

The Department is under an obligation to verify as much information as possible in an investigation. This

includes verifying claims of no expenses as well as those of positive figures. Therefore, if either direct or indirect expenses are reported as zero, we verify the figure as we would any other.

Comment 6

The Department underestimated U.S. interest expenses incurred by Springfield by failing to account for the time the goods spent in transit to the United States, and ignoring in general the inventory interest expense associated with selling the goods from warehouse.

DOC Position

The Department uses actual credit expenses in making any difference in credit expense adjustments. We did not impute credit charges to a period in which the firm was not actually covering the sale of goods directly with short-term debt. Any interest expenses incurred for inventory prior to sale of the goods were captured through the inclusion of Springfield's overhead within U.S. selling expenses. These are properly categorized as indirect selling—not credit—expenses.

Comment 7

The Department should adjust U.S. price for any commission paid by Bridon to Springfield.

DOC Position

The commission was simply an intra-corporate transfer of funds. In determining the costs of bringing the merchandise to the U.S. customer, we are interested in actual costs incurred by the corporate entity as a whole, not in simple funds transfers.

Comment 8

The Department should not accept the additional information submitted on November 30, 1982.

DOC Position

We did not use the supplemental submission of November 30 because it was untimely.

Comment 9

The Department should further investigate to ascertain whether it has covered all manufacturers exporting PC Strand to the U.S.

DOC Position

We have referred to both British sources and our own import statistics. We have found no evidence that firms other than Bridon actually sold PC strand in the United States during the review period.

Final Determination

Based on our investigation and in accordance with section 735(a) of the Act, we have reached a final determination that prestressed concrete steel wire strand from the United Kingdom is being, or is likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act.

Continuation of Suspension of Liquidation

Liquidation will continue to be suspended on all entries of PC strand that are entered into the United States, or withdrawn from warehouse, for consumption. The U.S. Customs Service will continue to require the posting of a cash deposit, bond, or other security in the amount of the weighted average margin of the FOB price for the listed firm and 33.69 percent of the FOB price for all other British producers. The security amounts established in our preliminary determination of October 6, 1982, are no longer in effect.

ITC Notification

We are notifying the ITC and making available to it all nonprivileged and nonconfidential information relating to this determination. We will allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information, either publicly or under and administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration. If the ITC determines that material injury or threat of material injury does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. If the ITC determines that such injury does exist, we will issue an antidumping order, directing Customs officers to assess an antidumping duty on prestressed concrete steel wire strand from the United Kingdom entered, or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United States price. This determination is being published pursuant to section 735(d) of the Act (19 U.S.C. 1673(d)).

Dated: December 14, 1982.

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

[FR Doc. 82-34928 Filed 12-17-82; 8:45 am]

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

North Pacific Fishery Management Council, its Scientific and Statistical Committee and its Advisory Panel; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The North Pacific Fishery Management Council, established by section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94-265), has established a Scientific and Statistical Committee (SSC) and Advisory Panel (AP) to assist the Council in carrying out its responsibilities under the Act. The Council, its SSC and AP will hold separate public meetings, but the Council will also meet in joint public session with the Alaska Board of Fisheries.

DATES: The Council and Alaska Board of Fisheries meeting will convene on Tuesday, January 4, 1983, at 9 a.m., in the Gold Room of the Baranof Hotel, Juneau, Alaska, to hear technical reports on the status of the salmon resource. On Wednesday, January 5, and Thursday, January 6, 1983, the Council and the Board will reconvene to hear public testimony on proposed 1983 amendments to the Troll Salmon Fishery Management Plan (FMP), discuss regulations for 1983, and select preferred options for public review. This joint session is expected to adjourn at approximately 5 p.m., on January 6. The Council will meet in separate public session on Friday, January 7, 1983, from 9 a.m. to noon, in the Gastineau Room of the Baranof Hotel, to conclude Council business.

The SSC meeting will convene on Monday, January 3, 1983, at approximately 1:30 p.m., in the Capitol Room of the Baranof Hotel and will adjourn at approximately 5 p.m., on Tuesday, January 4, 1983. The AP will meet on Monday, January 3, 1983, at approximately 1 p.m., in the Gastineau Room of the Baranof Hotel, adjourning at approximately 5 p.m.; reconvene on Tuesday, January 4, 1983, at approximately 9 a.m., and adjourn at approximately 5 p.m. The meetings may be lengthened or shortened depending upon progress on the agenda items.

PROPOSED AGENDA: *Council*—A detailed agenda will be sent to the public around December 17, 1982. The Council will consider the 1983 amendment package for the troll salmon fishery off Alaska, which includes alternatives regarding optimum yield, time and area closures and gear restrictions. The Council will

select its preferred options for the 1983 amendment package, and will also review and possibly give final approval for Secretarial review of Amendment #9 to the Tanner Crab FMP. The proposed amendment would increase the National Marine Fisheries Service's Regional Director's flexibility in setting seasons. The Council may also give the plan development team direction on frameworking the FMP. Time permitting, the Council may also consider FMP's and amendments for herring, king crab, Gulf of Alaska groundfish and Bering Sea/Aleutian Islands groundfish, applications from ships of foreign nations to fish in the fishery conservation zone off Alaska, as well as various contracts. All or parts of this meeting may be conducted in joint session with the Alaska Board of Fisheries.

SSC and AP—Same as Council.

FOR FURTHER INFORMATION CONTACT: North Pacific Fishery Management Council, P.O. Box 3136DT, Anchorage, Alaska 99510, Telephone: (907) 274–4563.

Dated: December 15, 1982.

Joe P. Clem,

Acting Chief, Operations Coordination Group. National Marine Fisheries Service.

BILLING CODE 3510-22-M

DEPARTMENT OF DEFENSE

Department of the Air Force

Privacy Act of 1974; System of Records Amendment

AGENCY: Department of the Air Force (AF), DoD.

ACTION: Amendment of Air Force System of Record Notice.

SUMMARY: The Air Force is amending one system of records notice to conform to the requirements of the "Debt Collection Act of 1982" to permit use of that Act to collect debts owed the government. The notice is also being substantially rewritten in the interest of clarity, accuracy and readability.

EFFECTIVE DATE: The amendments will be effective on January 19, 1983 unless public comments are received which result in a contrary determination.

FOR FURTHER INFORMATION CONTACT: Mr. Jon Updike, HQ USAF/DAD(S), The Pentagon, Washington, D.C. 20330, telephone 202/694–3431.

SUPPLEMENTARY INFORMATION: These amendments are necessary to conform to the requirements of the "Debt Collection Act of 1982" (Pub. L. 97–365; 96 Stat. 1749 *et seq.*).

The Air Force systems of records inventory subject to the Privacy Act of 1974, Title 5, United States Code, Section 552a (Pub. L. 93–579; 44 Stat. 1896 *et seq.*), has been published in the **Federal Register** as follows:

FR Doc. 81–897 (47 FR 6443) January 21, 1981
FR Doc. 82–674 (47 FR 2544) January 18, 1982
FR Doc. 82–2886 (47 FR 5285) February 4, 1982
FR Doc. 82–4481 (47 FR 7478) February 19, 1982
FR Doc. 82–9886 (47 FR 14936) April 7, 1982
FR Doc. 82–10539 (47 FR 16827) April 20, 1982
FR Doc. 82–3029 (47 FR 5004) November 4, 1982

None of these amendments require a new or altered system report under the provisions of 5 U.S.C. 552a(o).

M. S. Healy,

OSD Federal Register Liaison Officer. Department of Defense.

December 13, 1982.

Amendments

F17708 OEACYVD

System Name:

Indebtedness and Claims (46 FR 6580).

Changes:

System Identification:

Change to, "F177 AFAFC G."

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

In addition to the previous provisions, which have been completely rewritten, the following new uses are added: "Data necessary to identify an individual involved in a claim is disclosed to a consumer reporting agency whenever a financial status report is requested for use in pursuing collection under the Federal Claims Collection Act. Whenever AFAFC has exhausted its internal collection actions, the debt may be forwarded to a private collection agency for collection servicing."

F177 AFAFC G

SYSTEM NAME:

Indebtedness and Claims.

SYSTEM LOCATION:

Air Force Accounting and Finance Center, Lowry Air Force Base, Denver, CO 80279. Denver Federal Archives and Record Center, Bldg 48, Denver Federal Center, Denver, CO 80225.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty and retired military personnel, Air Force civilian employees and former employees, Air Force Reserve and Air National Guard personnel, Air Force Academy cadets, dependents of military personnel, exchange officers and foreign nationals.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of current and former military members and civilian employees pay accounts showing entitlements, deductions, payments made, and any indebtedness resulting from deductions and payments exceeding entitlements. These records include, but are not limited to: individual military pay records, substantiating documents such as military pay orders, pay adjustment authorizations, military master pay account print out from Joint Uniform Military Pay System (JUMPS), records of travel payments, financial record data folders, miscellaneous vouchers, personal financial records, credit reports, promissory notes, individual financial statements, and correspondence. Applications for waiver of erroneous payments or for remission of indebtedness with supporting documents, including but not limited to, statements of financial status (personal income and expenses), statements of commanders, statements of Accounting and Finance Officers, correspondence with members and employees. Claims of individuals requesting additional payments for service rendered with supporting documents including, but not limited to, time and attendance reports, leave and earnings statements, travel orders, travel vouchers, statements of non-availability of quarters and mess, paid receipts, and correspondence with members and employees. Delinquent accounts receivable from base Accounting and Finance Officers including, but not limited to, returned checks, medical services billings, collection records, and summaries of the Air Force Office of Special Investigation and Federal Bureau of Investigation reports. Reports from probate courts regarding estates of deceased debtors. Reports from bankruptcy courts regarding claims of the US against debtors.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

31 U.S.C. Chapter 18—Compromise and Collection of Federal claims; 10 U.S.C. 2774, Claims for overpayment of pay and allowances, other than travel and transportation allowances, 9837 (d), settlement of accounts: deductions from pay; 5 U.S.C. 5584 Claims for overpayment of pay and allowances, other than travel and transportation expenses and allowances and relocation expenses; 12 U.S.C. 1715, Mortgage insurance for servicemen; Pub. L. 97–365, Debt Collection Act of 1982.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Used to determine eligibility for: (1) Waiver of erroneous payments, (2) remission of indebtedness, or (3) payments for services rendered. Also, information is required to attempt collection of all claims from individuals on claims of the United States, for money or property arising out of the activities of the United States Air Force. Claims may be compromised, terminated, or suspended when warranted by information collected. Data necessary to identify an individual involved in a claim is disclosed to a consumer reporting agency whenever a financial status report is requested for use in pursuing collection under the Federal Collection Act. Whenever AFAFC has exhausted its internal collection actions, the debt may be forwarded to a private collection agency for collection servicing. The debt may be referred to the Department of Justice under 31 U.S.C. 952, Federal Claims Collection Act of 1966, for investigation or civil or criminal litigation as appropriate. Information is used to establish debts and respond to letters received from individuals. After action is completed, files are closed and filed in individual records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders and in machine-readable form.

RETRIEVABILITY:

Filed by name and Social Security Number (SSN).

SAFEGUARDS:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Records are stored in security file containers/cabinets, protected by guards and controlled by personnel screening and visitor registers.

RETENTION AND DISPOSAL:

Retained in office files for one year after annual cut-off, transferred to the Denver Federal Archives and Record Center for nine additional years, and then sold to salvage paper companies to be destroyed by shredding, tearing, mascerating, pulping or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Comptroller of the Air Force, Headquarters United States Air Force. Director, Accounting and Finance, United States Air Force. (USAF).

NOTIFICATION PROCEDURE:

Information as to whether the record system contains information on an individual may be obtained from AFAFC/DAD, Denver, CO 80279, telephone (303) 370–7553. Requester should be able to provide sufficient proof of identity, such as name, Social Security Number, military status, duty station or place of employment, or other information verifiable from the record itself.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to AFAFC/DAD, Denver, CO 80279, telephone (303) 370–7553. Requester should be able to provide sufficient proof of identity, such as name, Social Security Number, military status, duty station or place of employment, or other information verifiable from the record itself.

CONTESTING RECORD PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager.

RECORD SOURCE CATEGORIES:

Information obtained from financial and medical institutions; automated system interfaces; police and investigating officers; the public media; a state or local government; and source documents such as reports; credit bureaus; Bureau of Employees Compensation, Veterans Administration; Social Security Administration; Internal Revenue Service; Federal Housing Administration; health insurance companies; U.S. Army Finance and Accounting Center; Navy Finance Center; Base Accounting and Finance Officers, Major Comands; Comptroller General; and correspondence with individual concerned or his representative.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 3910–01–M

DEPARTMENT OF ENERGY

Procurement and Assistance Management Directorate

AGENCY: Department of Energy.

ACTION: Notice of suspension and proposed debarment.

SUMMARY: This notice announces that the Department of Energy (DOE) has suspended Earl R. Postell and all organizations with which he is or may become affiliated, from participating in any new DOE contract or subcontract. In addition, Mr. Postell has been advised that DOE proposes to debar him and all such affiliated organizations for a period not to exceed three years beginning on January 22, 1983.

DATE: The suspension became effective on December 13, 1982, and shall last until the proposed debarment becomes effective or for 12 months, whichever occurs earlier.

FOR FURTHER INFORMATION CONTACT: James Nelson, Procurement and Assistance Management Directorate, Room 1I–018, Forrestal Building, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, telephone 202/252–1150

SUPPLEMENTARY INFORMATION: The suspension and proposed debarment actions are being taken in accordance with the procedures set forth in Federal Procurement Regulations (FPR) Temporary Regulation No. 65, 41 CFR Subpart 1–1.6, 47 FR 43692 (October 4, 1982), and the DOE Procurement Regulations (DOE–PR), 41 CFR Subpart 9–1.6. In addition to Earl R. Postell, the known affiliated organizations affected by the suspension and proposed debarment actions are E&P Associates, Inc., and Alexandria Graphics and Reproduction Service. Mr. Postell's address is 418 Hume Avenue, Alexandria, Virginia 22301. The address of all the known affiliates is the same: 418 Hume Avenue, Alexandria, Virginia 22301.

During the period of suspension and subsequent debarment, DOE will neither accept nor consider a bid or proposal submitted by Mr. Postell or by any organization with which he is affiliated. In addition, DOE will not approve any new contract between him or any such affiliated organization and a DOE contractor.

The suspension and proposed debarment are based on Mr. Postell's November 2, 1982, indictment by a Federal Grand Jury in the United States Disrtrict Court for the Eastern District of Virginia for violation of Title 18 of the United States Code, sections 201(c) and 2. The Federal indictment charges Mr. Postell with 18 counts of mail fraud and bribery. Mr. Postell has been advised that he has right to submit, by no later then January 12, 1983, a written request for a hearing and a reply to the notice of proposed debarment.

As required under DOE–PR 9–1.602, Mr. Postell and the above named affiliated organizations have been placed on the DOE Consolidated List of Debarred, Suspended, and Ineligible Contractors which is distributed periodically to DOE Contracting Officers. DOE has also notified the General Services Administration (GSA) of this suspension action. When the proposed debarment becomes effective, GSA shall be notified in accordance with FPR Temporary Regulation No. 65, 41 CFR Subpart 1–1.6, 47 FR 43692 (October 4, 1982).

Issued in Washington, D.C., on December 13, 1982.

Hilary J. Rauch,

Director, Procurement and Assistance, Management Directorate.

BILLING CODE 6450–01–M

Dose Assessment Advisory Group; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting.

NAME: Dose Assessment Advisory Group (DAAG).

DATE AND TIME: Thursday, January 6, 1983—8:30 a.m.—5:00 p.m.; Friday, January 7, 1983—8:30 a.m.—4:30 p.m.

PLACE: U.S. Department of Energy, Nevada Operations Office Auditorium, 2753 South Highland Drive, Las Vegas, Nevada.

CONTACT: Marshall Page, Jr., Deputy Project Manager, Off-Site Radiation Exposure Review Project, Nevada Operations Office, U.S. Department of Energy, Box 14100, Las Vegas, Nevada 89114, Telephone: 702–734–3194.

PURPOSE OF GROUP: To provide the Secretary of Energy and the Manager, Nevada Operations Office, (NV) with advice and recommendations pertaining to the Off-Site Radiation Exposure Review Project (ORERP). This project concerns the evaluation and assessment of the amount of radiation received by members of the offsite population surrounding the Nevada Test Site (NTS) as a result of the nuclear test operations conducted at the NTS.

TENTATIVE AGENDA:

January 6, 1983:

- Welcome and Introduction.
- DAAG Recommendations from May meeting.
- Overview of work since meeting of May 6–7, 1982.
- Review of Aerial Surveys of Fallout Fields—1951 through 1958.
- Review of all "Hotspots".
- Evaluation of ANNIE Fallout Pattern.
- Extension of Lifestyle Survey.
- H+12 Hour mR/hr and Time of Arrival Estimates for Dose Modeling.
- ORERP Data Base Update.
- CIC Status.
- Update on NURE and Sticky Paper Data Analyses.
- Progress on External Dose Assessment Model.
- Status on Milk Distribution Study.
- Sensitivity Uncertainty and Accuracy of the PATHWAY Model.
- Progress on Internal Dose Assessment Model.
- Discussion and Comments by DAAG Members.
- Public Comments and Questions (5 minute rule).

January 7, 1983:

- Review of Soil Sampling Sites.
- Site Selection: *in situ* Gamma Measurement Results, Methodology, Grading, and Criteria for Sites Selected for Soil Sampling.
- Review of Soil Collection Efforts—Sampling Techniques and Grading Criteria.
- Review of Soil Preparation Techniques and Results to Date.
- Laboratory Procedures Review.
- Description of Quality Assurance Program.
- Evaluation and Assessment of ORERP Soil Sampling Program.
- Selection Progress of 100 Soil Sampling Sites.
- Discussion of Future Activities and Time Scales.
- Discussion and Recommendations by DAAG to ORERP.
- Public Comments and Questions (5 minute rule).

PUBLIC PARTICIPATION: The meeting is open to the public. The Chairperson of the Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Marshall Page at the address or telephone number listed above.

TRANSCRIPTS: Available for public review and copying at the Public Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC, between 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on December 15, 1982.

Howard H. Raiken,

Deputy Advisory Committee, Management Officer.

BILLING CODE 6450–01–M

Economic Regulatory Administration

Amcole Energy Corp.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order (PRO) which was issued to Amcole Energy Corporation (Amcole) of Dallas, Texas, and several working interest owners (the owners) of a crude oil producing property operated by Amcole. This PRO charges Amcole and the owners with pricing violations in the amount of $207,221.10 connected with the sale of crude oil at prices in excess of those permitted by 10 CFR 212, Subpart D during the same period March 1, 1975 through October 31, 1977.

This PRO supersedes a PRO that was issued to Amcole on August 13, 1982 and subsequently withdrawn by ERA. Notice of the earlier PRO was published in the **Federal Register** at 47 FR 36885 on August 24, 1982.

A copy of the PRO, with confidential information deleted, may be obtained from James A. Martin, Deputy Director, Crude and NGL & Litigation Support Group, Economic Regulatory Administration, Department of Energy, P.O. Box 35228, Dallas, Texas 75235, or by calling (214) 767–7407. Within fifteen (15) days of publication of this notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, 12th & Pennsylvania Ave., N.W., Room 3426, Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Dallas, Texas, on the 1st day of December, 1982.

Ben L. Lemoe,

Director, Dallas Field Office, Economic Regulatory Administration.

Anshutz Petroleum Marketing Corp., Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Office of Special Counsel (OSC) of the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to

Anshutz Petroleum Marketing Corporation of New York, New York. This Proposed Remedial Order charges Anshutz with pricing violations in the amount of $1,030,174.00 plus interest, connected with the sale of regular and unleaded motor gasoline during the period May through July 31, 1979.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from Robert J. McKee, Jr. Director, Philadelphia Field Office, ERA (215)597–2633. Within 15 days of publication of this notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, 12th & Pennsylvania Avenue, N.W., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Philadelphia, Pennsylvania, on the 7th day of December, 1982.

Reinauer Petroleum Co.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Office of Special Counsel (OSC) of the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Reinauer Petroleum Company of Hackensack, New Jersey. This Proposed Remedial Order charges Reinauer with pricing violations in the amount of $269,891.00 plus interest, for the period April 1, 1979 through September 30, 1979. The alleged violations arise from the sales of regular and unleaded motor gasoline at Reinauer's company operated retail stations, as well as its sales to branded, unbranded Quik-stop and commercial customers during the violation period.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from Robert J. McKee, Jr., Director, Philadelphia Field Office, ERA (215) 597–2633. Within 15 days of publication of this notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, 12th and Pennsylvania Ave., NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Philadelphia, Pennsylvania, on the 7th day of December, 1982.

BILLING CODE 6450–01–M

[Docket No. ERA–FC–82–032]

Powerplant and Industrial Fuel Use Act of 1978; Electric Utility Conservation Plans

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Approval of Conservation Plans.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) has received a number of electric utility conservation plans developed and submitted for DOE approval pursuant to section 808 of the Powerplant and Industrial Fuel Use Act of 1978, as amended, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act"). Pursuant to 10 CFR 508.5(b), DOE hereby gives Notice of Approval of Conservation Plans submitted by the electric utility owners or operators listed in the SUPPLEMENTARY INFORMATION section below.

The public file for each of the listed electric utility owners or operators containing this Notice of Approval of Conservation Plans and all other pertinent documents is available for inspection at the Department of Energy, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E–190, Washington, D.C. 20585, telephone (202) 252–6020. Approval of each conservation plan is based on ERA's consideration of the entire record of the proceeding, including any comments received during the public comment period for each plan.

DATE: In accordance with 10 CFR 508.5(b), this Notice shall take effect on December 20, 1982.

FOR FURTHER INFORMATION CONTACT:

Clifford Tomaszewski, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA–073 F, 1000 Independence Avenue, SW., Washington, D.C. 20585 (202) 252–2201

Henry Garson, Esq., Acting Assistant General, Counsel for Coal Regulations, Office of the General Counsel, Forrestal Building, Room 6D–033, 1000 Independence Avenue, SW., Washington, D.C. 20585 (202) 252–6947

SUPPLEMENTARY INFORMATION: Section 1023 of the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35

(OBRA) amended FUA by adding a new section 808, entitled "Electric Utility Conservation Plan."

Section 808 requires utilities which own or operate any existing electric powerplant which used natural gas as a primary energy source between August 14, 1980 and August 13, 1981, and which also plan to use natural gas in any electric powerplant, to develop and submit to DOE for approval a conservation plan to conserve electric energy. The plan must set forth the means to achieve the conservation of electric energy at a level equal to 10 percent of the electric energy output of the utility sold within its own system which was attributable to natural gas during the four calendar quarters ending on June 30, 1981. Approved plans must be fully implemented during the five year period following DOE approval.

Notices of Receipt of the proposed conservation plans described below, providing for a thirty (30) day public comment period during which interested persons were invited to submit written comments concerning the content of any such proposed conservation plan, were published in the **Federal Register** on August 12 and 27, 1982 and September 17, 1982 (47 FR 35033, 37952 and 41163, respectively). No comments on these proposed plans were received.

Based upon the entire record of this proceeding, ERA has determined that the conservation plans of each of the following utilities meet the requirements for approval contained in 10 CFR 508.8. ERA is restricted by the 120 day time limitation imposed by the Act on the plan approval process as to the amount of information which can be analyzed in order to ascertain the environmental significance of approval of these plans. However, based on the information contained in each utility's submittal, ERA has determined, pursuant to 10 CFR 508.5, that the conservation programs contained in the plan of each utility listed below should not produce environmental consequences significant enough to warrant detailed documentation pursuant to the National Environmental Policy Act or its implementing regulations (40 CFR § 1500 *et seq.*). Thus this action clearly does not represent a major Federal action significantly affecting the quality of the human environment. Pursuant to CFR 508.5 and section 808(d)(1) of FUA, DOE hereby approves the electric utility conservation plans submitted by the utilities listed below.

Each of the electric utilities whose plans approved herein shall annually submit a report to ERA pursuant to 10 CFR 508.7 identifying the steps taken during the preceding year to implement its approved plan. Each such report shall be submitted within thirty (30) days after the close of a calendar year, beginning with the close of calendar year 1983. The report shall be sent to: Robert L. Davies, Director, Fuels Conversion Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA-093, 1000 Independence Avenue, SW., Washington D.C. 20585.

The following utilities' conservation plans are approved:

Utilities and FC Case No.

Carolina Power and Light Company, Raleigh, N.C., 50441-9999-99-49

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Cases Filed Week of November 12 Through November 19, 1982

During the Week of November 12 through November 19, 1982, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy. Submissions inadvertently omitted from earlier lists have also been included.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

Dated: December 14, 1982.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of Nov. 12 through Nov. 19, 1982]

Date	Name and Location of Applicant	Case No.	Type of Submission
Jan. 26, 1982	M&M Minerals Corporation, et al., Jackson, Mississippi	HRZ-0112	Interlocutory Order. If Granted: The Proposed Remedial Order issued by the Southeast District Office of the Economic Regulatory Administration to M&M Minerals Corporation, et al. (Case No. HRO-0016) would be dismissed.
Apr. 2, 1982	M&M Minerals Corporation, et al., Jackson, Mississippi	HRD-0085	Motion for Discovery. If Granted: Discovery would be granted to M&M Minerals Corporation, et al. regarding information on certain other cases pending with the Office of Hearings and Appeals.
May 7, 1982	M&M Minerals Corporation, et al., Jackson, Mississippi	HRD-0087	Motion for Discovery. If granted: Discovery would be granted to M&M Minerals Corporation, et al. regarding information obtained from Traders Oil & Royalty Company (Case No. BRO-1312).

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS—Continued

[Week of Nov. 12 through Nov. 19, 1982]

Date	Name and Location of Applicant	Case No.	Type of Submission
May 26, 1982	M&M Minerals Corporation, et al., Jackson, Mississippi	HRD-0088	Motion for Discovery. If granted: Discovery would be granted to M&M Minerals Corporation, et al. regarding new information contained in the Economic Regulatory Administration's Response to the firm's Statement of Objections in Case No. HRO-0018.
Sept. 10, 1982	M&M Minerals Corporation, et al., Jackson, Mississippi	HRD-0089	Motion for Discovery. If granted: Discovery would be granted to M&M Minerals Corporation, et al. regarding information contained in the Economic Regulatory Administration's supplement to its Response to the firm's Statement of Objections in Case No. HRO-0018.
Nov. 12, 1982	Crown Central Petroleum Corporation, Baltimore, Maryland	HRS-0019	Request for Stay. If granted: Crown Central Petroleum Corporation would receive a stay of its obligation to respond to a Proposed Remedial Order (Case No. HRO-0072) pending the resolution of a request for a preliminary injunction in a related judicial proceeding before the U.S. District Court for the District of Maryland.
Nov. 12, 1982	State of Mississippi, Jackson, Mississippi	HFA-0097	Appeal of an Information Request Denial. If granted: The October 22, 1982 Information Request Denial issued by the Chicago Office would be rescinded and the State of Mississippi would receive access to the remaining part of the document entitled *Proposed Siting Program For An Exploratory Shaft.*
Nov. 15, 1982	Office of Special Counsel/Texaco, Inc., Washington, D.C.	HRZ-0111	Interlocutory Order. If granted: Texaco, Inc. would be directed to produce to the Office of Special Counsel documents indentified in its privilege indices of September 3, 1982, September 22, 1982, and September 30, 1982.
Nov. 15, 1982	Sage Creek Refining Company, Cowley, Wyoming	HYX-0058	Request for Supplemental Order. If granted: The DOE would review the entitlements exception relief granted to Sage Creek during its fiscal year ending in 1981 to determine whether the level of relief accorded the firm was appropriate.
Nov. 15, 1982	Siler Oil Company, Washington, Indiana	HEE-0049	Exception to the Reporting Requirements. If granted: Siler Oil Company would not be required to file Form EIA-9A, "Monthly No. 2 Distillate Sales Report".
Nov. 16, 1982	Central Louisiana Electric Company, Inc., Pineville, Louisiana.	HEE-0050	Exception to the Reporting Requirements. If granted: Central Louisiana Electric Company would not be required to file Form EIA-782A, "Monthly Petroleum Product Sales Report".
Nov. 16, 1982	Jerry L. Peterson, Arvada, Colorado	HFA-0098	Appeal of an Information Request Denial. If granted: The October 15, 1982, Information Request Denial issued by the Albuquerque Operations Office would be rescinded, and Mr. Jerry L. Peterson would receive access to a copy of the file concerning his clearance at Rockwell International's Rock Flats Plant.
Nov. 16, 1982	Nuclear Fuel, New York, New York	HFA-0099	Appeal of an Information Request Denial. If granted: The October 14, 1982, Information Request Denial issued by the Oak Ridge Operations Office would be rescinded, and Nuclear Fuel would receive access to the names of U.S. utilities that have purchased uranium "constructively delivered" to the Electricity Supply Company Commission (Escom), of South Africa and to the names of utilities that have delivered uranium feedstock to Escom's account along with amounts involved.
Nov. 17, 1982	Department of Interior, Washington, D.C.	HEE-0051	Price Exception. If granted: The Department of Interior would be permitted to recertify the crude oil produced from offshore leases in the Gulf of Mexico to market prices for sales to Laketon Asphalt Refining, Inc.
Nov. 18, 1982	Kreshtool, Wier & Wasterstein, Wilmington, Delaware	HFA-0100	Appeal of an Information Request Denial. If granted: The Information Request Denial would be rescinded, and Kreshtool, Wier & Wasterstein would receive access to the EIA Report entitled *Gasoline Prices.*
Nov. 18, 1982	West Coast Oil Company, Los Angeles, California	HRD-0090	Motion for Discovery. If granted: Discovery would be granted to West Coast Oil Company in connection with the firm's Statement of Objection submitted in response to the July 30, 1982, Proposed Remedial Order (Case No. HRO-0087) issued to it.
Nov. 19, 1982	Borg-Warner Central Environmental Systems, York, Pennsylvania.	HXE-0052	Exception from the Energy Conservation Program for Consumer Products. If granted: Borg-Warner Central Environmental Systems would receive an exception from the provisions of 10 CFR 430 which would permit the firm to modify the energy efficiency test procedures applicable to its Enmond heat pump.

Energy Information Administration

Alternative Fuel Price Ceilings and Incremental Price Threshold for High Cost Natural Gas

The Natural Gas Policy Act of 1978 (NGPA) (Pub. L. 95–621) signed into law on November 9, 1978, mandated a new framework for the regulation of most facets of the natural gas industry. In general, under Title II of the NGPA, interstate natural gas pipeline companies are required to pass through certain portions of their acquisition costs for natural gas to industrial users in the form of a surcharge. The statute requires that the ultimate cost of gas to the industrial facility should not exceed the cost of the fuel oil which the facility could use as an alternative.

Pursuant to Title II of the NGPA, Section 204(e), the Energy Information Administration (EIA) herewith publishes for the Federal Energy Regulatory Commission (FERC) computed natural gas ceiling prices and the high cost gas incremental pricing threshold which are to be effective January 1, 1983. These prices are based on the prices of alternative fuels.

FOR FURTHER INFORMATION CONTACT: Leroy Brown, Jr., Energy Information Administration, 1000 Independence Avenue SW., Room BE–034, Washington, D.C. 20585, Telephone: (202) 252–6077.

Section I

As required by FERC Order No. 50, computed prices are shown for the 48 contiguous States. The District of Columbia's ceiling is included with the ceiling for the State of Maryland. FERC, by an Interim Rule issued on March 2, 1981, in Docket No. RM79–21, revised the methodology for calculating the monthly alternative fuel price ceilings for State regions. Under the revised methodology, the applicable alternative fuel price ceiling published for each of the contiguous States shall be the lower of the alternative fuel price ceiling for the State or the alternative fuel price ceiling for the multistate region in which the State is located.

The price ceiling is expressed in dollars per million British Thermal Units (BTU's). The method used to determine the price ceilings is described in Section III.

State	Dollars per million BTU's
Alabama	3.99
Arizona [1]	4.07
Arkansas [1]	3.82
California	4.04
Colorado [2]	3.99
Connecticut [1]	4.11
Delaware [1]	4.02
Florida	3.90
Georgia [1]	[illegible]
Idaho [2]	3.99
Illinois	3.88
Indiana	[illegible]
Iowa [1]	3.95
Kansas [1]	3.95
Kentucky [1]	[illegible]
Louisiana [1]	3.82
Maine [1]	4.11
Maryland [1]	4.02
Massachusetts	[illegible]
Michigan	3.64
Minnesota [1]	3.70
Mississippi [1]	4.04
Missouri [1]	3.95
Montana [2]	[illegible]
Nebraska [1]	3.95
Nevada [1]	4.07
New Hampshire [1]	4.11
New Jersey	3.93
New Mexico	[illegible]
New YorkD3.99	
North Carolina [1]	4.04
North Dakota [1]	[illegible]
Ohio	3.77
Oklahoma [1]	[illegible]
Oregon [1]	4.07
Pennsylvania [1]	[illegible]
Rhode Island [1]	4.11
South Carolina [1]	4.04
South Dakota [1]	3.95
Tennessee [1]	4.04
Texas	[illegible]
Utah [2]	[illegible]
Vermont [1]	4.11
Virginia [1]	4.04
Washington [2]	4.07
West Virginia [1]	3.90
Wisconsin	3.77
Wyoming [2]	[illegible]

[1] Region based price as required by FERC Interim Rule, issued on March 2, 1981, in Docket No. RM79–21.

[2] Region based price computed as the weighted average price of Regions E, F, and H.

Section II. Incremental Pricing Threshold for High Cost Natural Gas

The EIA has determined that the volume-weighted average price for No. 2 distillate fuel oil landed in the greater New York City Metropolitan area during October 1982 was $43.04 per barrel. In order to establish the incremental pricing threshold for high cost natural gas, as identified in the NGPA, Title II, Section 203(a)(7), this price was multiplied by 1.3 and converted to its equivalent in millions of BTU's by dividing by 5.8. Therefore, the incremental pricing threshold for high cost natural gas, effective January 1, 1983, is $9.42 per milion BTU's.

Sectiion III. Method Used To Compute Price Ceilings

The FERC, by Order No. 50, issued on September 29, 1979, in Docket No. RM79–21, established the basis for determining the price ceilings required by the NGPA. FECR also, by Order No. 167, issued in Docket No. RM81–27 on July 24, 1981, made permanent the rule that established that only the price paid for No. 6 high sulfur content residual fuel oil would be used to determine the price ceilings. In addition, the FECR, by Order No. 181, issued on October 6, 1981, in Docket No. RM81–28, established that price ceilings should be published for only the 48 contiguous States on a permanent basis.

A. Data Collected

The following data were required from all companies identified by the EIA as sellers of No. 6 high sulfur content (greater than 1 percent sulfur content by weight) residual fuel oil: For each selling price, the number of gallons sold to large industrial users in the months of August 1982, September 1982, and October

1982.[3] All reports of volume sold and price were identified by the State into which the oil was sold.

. B. Method Used To Determine Alternative Price Ceilings

(1) *Calculation of Volume-Weighted Average Price.* The prices which will become effective January 1, 1983, (shown in Section I) are based on the reported price of No. 6 high sulfur content residual fuel oil, for each of the 48 contiguous States, for each of the 3 months, August 1982, September 1982, and October 1982. Reported prices for sales in August 1982 were adjusted by the percent change in the nationwide volume-weighted average price from August 1982 to October 1982. Prices for September 1982 were similarly adjusted by the percent change in the nationwide volume-weighted average price from September 1982 to October 1982. The volume-weighted 3-month average of the adjusted August 1982 and September 1982, and the reported October 1982 prices were then computed for each State.

(2) *Adjusted for Price Variation.* States were grouped into the regions identified by the FERC (see Section III.C.). Using the adjusted prices and associated volumes reported in a region during the 3-month period, the volume-weighted standard deviation of prices was calculated for each region. The volume-weighted 3-month average price (as calculated in Section III.B.(1) above) for each State was adjusted downward by two times this standard deviation for the region to form the adjusted weighted average price for the State.

(3) *Calculation of Ceiling Price.* The lowest selling price within the State was determined for each month of the 3-month period (after adjusting up or down by the percent change in oil prices at the national level as discussed in Section III.B.(1) above). The products of the adjusted low price for each month times the State's total reported sales volume for each month were summed over the 3-month period for each State and divided by the State's total sales volume during the 3 months to determine the State's average low price. The adjusted weighted average price (as calculated in Section III.B.(2)) was compared to this average low price, and the higher of the values was selected as the base for determining the alternative fuel price ceiling for each State. For those States which had no reported sales during one or more months of the 3-month period, the appropriate regional volume-weighted alternative fuel price was computed and used in combination with the available State data to calculate the State's alternative fuel price ceiling base. The State's alternative fuel price ceiling base was compared to the alternative fuel price ceiling base for the multistate region in which the State is located and the lower of these two prices was selected as the final alternative fuel price ceiling base for the State. The appropriate lag adjustment factor (as discussed in Section III.B.4) was then applied to the alternative fuel price ceiling base. The alternative fule price (expressed in dollars per gallon) was multiplied by 42 and divided by 6.3 to estimate the alternative fuel price ceiling for the State (expressed in dollars per million BTU's).

There were no reported sales in Region G for the months of August, September, and October 1982. The alternative fuel price ceilings for the States in Reigon G were determined by calculating the volume-weighted average price ceilings for Region E, Region F, and Region H.

(4) *Lag Adjustment.* The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for which data are collected and the beginning of the month for which ceiling prices become effective. It was determined that *Platt's Oilgram Price Report* publication provides timely information relative to the subject. The prices found in *Platt's Oilgram Price Report* publication are given for each trading day in the form of high and low prices for No. 6 residual oil in 21 cities thorughout the United States. The low posted prices for No. 6 residual oil in these cities were used to calculate a national and a regional lag adjustment factor. The national lag adjustment factor was obtained by calculating a weighted average price for No. 6 sulfur residual fuel oil for the ten trading days ending December 14, 1982, and dividing that price by the corresponding weighted average price computed from prices published by Platt's for the month of October 1982. A regional lag adjustment factor was similarly calculated for four regions. These are: one for FERC Regions A and B combined; one for FERC Region C; one for FERC Regions D, E, and G combined; and one for FERC Regions F and H combined. The lower of the national or regional lag factor was then applied to the alternative fuel price ceiling for each State in a given region as calculated in Section III.B.(3).

Listing of States by Region

States were grouped by the FERC to form eight distinct regions as follows:

Region A	*Region B*
Connecticut	Delaware
Maine	Maryland
Massachusetts	New Jersey
New Hampshire	New York
Rhode Island	Pennsylvania
Vermont	

Region C	*Region D*
Alabama	Illinois
Florida	Indiana
Georgia	Kentucky
Mississippi	Michigan
North Carolina	Ohio
South Carolina	West Virginia
Tennessee	Wisconsin
Virginia	

Region E	*Region F*
Iowa	Arkansas
Kansas	Louisiana
Missouri	New Mexico
Minnesota	Oklahoma
Nebraska	Texas
North Dakota	
South Dakota	

Region G	*Region H*
Colorado	Arizona
Idaho	California
Montana	Nevada
Utah	Oregon
Wyoming	Washington

Issued in Washington, D.C., December 17, 1982.

Albert H. Linden, Jr.,

Deputy Administrator, Energy Information Administration.

[FR Doc. 82-34608 Filed 12-17-82; 10:35 am]

BILLING CODE 6450-01-M

[3] Large Industrial User—A person/firm which purchases No. 6 fuel oil in quantities of 4,000 gallons or greater for cosumption in a business, including the space heating of the business premises. Electric utilities, governmental bodies (Federal, State, or Local), and the military are excluded.

ENVIRONMENTAL PROTECTION AGENCY

[OPRM-FRL 2270-2]

Agency Forms Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests that have been forwarded to the Office of Management and Budget (OMB) for review. The information collection requests listed are available to the public for review and comment.

FOR FURTHER INFORMATION CONTACT: David Bowers, Office of Standards and Regulations, Information Management Section, (PM-223), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, telephone (202) 382-2742 or FTS 382-2742.

SUPPLEMENTARY INFORMATION:

Solid Waste Programs

• Title: RCRA C Compliance Survey (EPA ID 0944).

Abstract: This is a study by EPA's Office of Policy Analysis of businesses and other nongovernmental institutions that generate hazardous wastes. It is a voluntary, one-time effort that will allow EPA to measure the level of regulatory compliance of the Resource Conservation Recovery Act (RCRA) Phase I hazardous waste program. The results will be used in formulating future RCRA programs.

Respondents: Business and other nongovernment institutions that generate hazardous wastes.

—EPA ID 0076, NPDES Permittee Report of Extra Monitoring Data, was cleared on September 20 (OMB #2040–0007).

—EPA ID 0095, Precertification Exemption, Test Exemption, was cleared on October 7 (OMB #2060–0007).

—EPA ID 0097, Stage I Vapor Recovery Inspection Forms, was cleared on October 7 (OMB #2060–0008).

—EPA ID 0101, Vehicle Owners Manuals and Warranty Statements, was cleared on October 8 (OMB #2000–0167).

—EPA ID 0114, Motor Vehicle Tampering Survey, was cleared on October 7 (OMB #2060–0010).

—EPA ID 0115, Request for Testing Exemption, was cleared on October 7 (OMB #2060–0011).

—EPA ID 0163, TSCA Inspection Related Forms, was cleared on October 4 (OMB #2070–0007).

—EPA ID 0182, Unleaded Gasoline Field Inspection, was cleared on October 7 (OMB #2060–0009).

—EPA ID 0229, NDPES Discharge Monitoring Report, was cleared on September 15 (OMB #2040–0004).

—EPA ID 0234, Laboratory Performance Evaluation (Water Samples), was cleared on September 20 (OMB #2000–0044).

—EPA ID 0327, Development and Submission of State Contingency Plans, was cleared on October 8 (OMB #2050–0003).

—EPA ID 0368, Underground Injection Control Federal Reporting, was cleared on October 8 (OMB #2040–0002).

—EPA ID 0553, Exposure Assessment for Mobile Source Pollutants, was cleared on September 9 (OMB #2060–0003).

—EPA ID 0565, Environmental Assessment Data Systems, was cleared on October 7 (OMB #2000–0413).

—EPA ID 0686, Permit Application Requirement—All Major Modifications and Sources in Attainment Areas, was cleared on September 20 (OMB #2060–0003).

—EPA ID 0824, Ocean Dumping—Consolidated Report, was cleared on September 15 (OMB #2040–0008).

—EPA ID 0827, Construction Grants Consolidated Request, was cleared on November 15 (OMB #2040–0027).

—EPA ID 0844, Municipal Wastewater Treatment Facility Construction Grant State Project Priority Lists, was cleared on October 1 (OMB #2000–0414).

—EPA ID 0861, NPDES—Compliance Inspection Report Forms, was cleared on September 15 (OMB #2040–0003).

—EPA ID 0943, Cooperative Agreement with States for Removal, was cleared on October 13 (OMB #2050–0004).

—EPA ID 0976, Annual Reports by Hazardous Waste Management Facilities, was cleared on September 20 (OMB #2050–0005).

—EPA ID 1001, PCB Exemptions for Closed and Controlled Waste Manufacturing Processes, was cleared on October 13 (OMB #2070–0008).

—EPA ID 1007, Notice of Purges for New Coal Preparation Plants, was cleared on October 15 (OMB #2040–0026).

FEDERAL COMMUNICATIONS COMMISSION

[CC Docket No. 82–814, File No. 20844–CD–P(3)–81 et al.]

Rogers L. Dennis d.b.a. Dennis Mobilfone, et al.; Order Designating Applications for Hearing

Adopted: December 7, 1982.

Released: December 16, 1982.

In re applications of Rogers L. Dennis d.b.a. Dennis Mobilfone, for a construction permit for a new station to operate on frequencies 454.100, 454.1750, 454.200, 454.2500, 454.275, and 454.300 MHz in the Domestic Public Land Mobile Radio Service (DPLMRS) at Abilene, Texas, CC Docket No. 82–814, File No. 20844–CD–P–(3)–81; for a construction permit for a new station for to operate on frequencies 454.025, 454.075 and 454.150 MHz in the DPLMRS at Trent, Texas, CC Docket No. 82–815, File No. 20847–CD–P–(3)–81; Mobile Phone of Texas, Inc., for a construction permit to add a new location for Station KKX709 to operate on frequencies 454.025, 454.075, 454.150 and 454.325 MHz in the DPLMRS at Abilene, Texas, CC Docket No. 82–816, File No. 21234–CD–P–(4)–81; for a construction permit to add a new location for Station KWT985 to operate on frequencies 454.100 and 454.200 MHz in the DPLMRS at Albany, Texas, CC Docket No. 82–817, File No. 21217–CD–P–(6)–81; for a construction permit to add a new location for Station KFL902 to operate on frequencies 454.225, 454.250 and 454.300 MHz for in the DPLMRS at Breckenridge, Texas, CC Docket No. 82–818, File No. 21582–CD–P–(3)–81; for a construction permit to add a new station to operate on frequencies 454.175 and 454.275 MHz in the DPLMRS at Coleman, Texas, CC Docket No. 82–819, File No. 21238–CD–P–(2)–82; for a construction permit to add a new station on frequencies 454.300 and 454.350 MHz in the DPLMRS at Hamlin, Texas, CC Docket No. 82–820, File No. 21236–CD–P–(2)–81; for a construction permit to add a new station on frequencies 454.175 and 454.275 MHz in the DPLMRS at Stamford, Texas, CC Docket No. 82–821, File No. 21237–CD–P–(2)–81; for a construction permit to add a new station to operate on frequencies 454.225 and 454.250 MHz in the DPLMRS at Winters, Texas, CC Docket No. 82–822, File No 21215–CD–P–(2)–81; and Wilbur, Inc. d.b.a. Western Communication Service for a construction permit to add a new location for Station KKG416 to operate on frequencies 454.225 and 454.300 MHz in the DPLMRS at San Angelo, Texas, CC Docket No. 82–823, File No. 21395–CD–P–(2)–81; designating applications for consolidated hearing on stated issues.

Adopted December 7, 1982.

Released December 16, 1982.

1. Presently before the Chief, Mobile Services Division, pursuant to delegated authority are the captioned applications of Western Communication Service (WCS), Rogers L. Dennis d.b.a. Dennis

Mobilfone (DM) and Mobile Phone of Texas, Inc. (MPT). In various combinations these applications are electrically mutually exclusive.[1] Therefore, a comparative hearing will be held to determine which application or applicants would better serve the public interest. Except to the extent indicated below, we find that WCS, DM and MPT are legally, technically and otherwise qualified to construct and operate the proposed facilities.

2. DM filed a Petition to Deny (PTD) MPT's applications at Abilene, Coleman, Hamlin and Stamford. Responsive pleadings have been filed. In its petition, DM alleges that all captioned MPT applications fail to comply with § 22.15(i)(2) of FCC Rules,[2] since they do not reflect the existence of other facilities in and around Abilene, or the application filed simultaneously for additional facilities in Merkel, Texas, some 15 miles from Abilene.[3] In its opposition, MPT states that its other facilities are all licensed as Mobile Phone of Texas, Inc., so that there is no question as to who the real party in interest is; that the other facilities are not in the same general geographic area; and that "simultaneous applications" (filed on the same day as the captioned application) are not "pending" applications. MPT also filed an amendment showing its existing call signs and locations.

3. Contrary to MPT's contention; § 22.15(i)(2) requires a DPLMRS applicant to identify all applications including simultaneously filed ones for facilities in the same geographic area. It is undisputed that Merkel and Abilene are nearby communities. We find therefore that MPT's proposed facilities are in the same general geographic area and that MPT was required to list those stations under § 22.15(i)(2). Since MPT has now provided the required information, we will not return MPT's application.

4. *DM Need Showing.* The DM Abilene application requests 3 channels each at location 1 and 2. Our staff has determined that the reliable service area contours of locations 1 and 2 overlap by over 50%. In accordance with Mobile Services Division (MSD) practice prior to and at the time of receipt of DM's application,[4] because of the 50% or greater overlap all six channels are considered as one trunk group. The application indicates that 178 two-way mobile units have indicated that they need and would subscribe to fully automatic radiotelephone service. Again, the practice of the MSD at the time of receipt of the captioned applications was to discount expressions of interest by 50%. This indicates a need for 89 units. Data sampled from loading studies submitted with DPLMRS applications indicate that, on the average, the busy-hour occupancy per two-way unit is about 0.9 minutes. The expected occupancy of the proposed facilities will be therefore $0.9 \times 89 = 80.1$ minutes. Occupied time is customarily converted to erlangs [5], for purposes of projecting expected channel blocking. Eighty point one (80.1) minutes equals 1.34 erlangs. From the Erlang C tables this figure would indicate a need for 3, not 6, channels, with 18% of calls blocked during the busy hour.[6] DM's Trent application shows expressions of interest from 132 mobile units, or 66 units after 50% discounting. The expected occupancy is therefore $66 \times 09 = 59.4$ minutes or 0.99 erlangs. This indicates a need for 2, not 3, channels, with 33% of the calls being blocked during the busy hour. In view of the foregoing, we will designate as an issue whether DM's Trent and Abilene applications have demonstrated a need for the three and six frequencies requested.

5. Accordingly, it is ordered, that the captioned applications of Rogers L. Dennis d.b.a. Dennis Mobilfone, File Nos. 20844–CD–P–(4)–81 and 20847–CD–P–(3)–81, Mobile Phone of Texas, Inc., File Nos. 21234–CD–P–(2)–81, 21217–CD–P–(6)–81, 21582–CD–P–(3)–81, 21238–CD–P–(2)–81, 21236–CD–P–(2)–81, 21237–CD–P–(2)–81, and 21215–CD–P–(2)–81, and Wilbur, Inc., d.b.a. Western Communication Service, File No. 21395–CD–P–(2)–81, are designated for hearing in a consolidated proceeding pursuant to Section 309(e) of the Communications Act of 1934, as amended, upon the following issues:

(a) To determine whether Rogers L. Dennis d.b.a. Dennis Mobilfone has demonstrated a need for more than 2 channels at Trent and more than 3 channels at Abilene.

(b) To determine on a comparative basis, the nature and extent of service proposed by each applicant, including the rates, charges, maintenance, personnel, practices, classifications, regulations, and facilities pertaining thereto;

(c) To determine on a comparative basis, the areas and populations that each applicant will serve within the prospective interference-free area within the 39 dBu contours,[7] based upon the standards set forth in § 22.504(a) of the Commission's Rules,[8] and to determine and compare the relative demand for the proposed services in said areas; and

(d) To determine, in light of the evidence adduced pursuant to the foregoing issues, what disposition of the referenced applications would best serve the public interest, convenience and necessity.

6. It is further ordered, that with respect to issue (a) the burden of proof and the burden of proceeding with the introduction of evidence is placed upon Rogers L. Dennis d/b/a Dennis Mobilfone and that with respect to issues (b), (c) and (d) the ultimate burden of proof is placed on each of the applicants as the issue affects them.

7. It is further ordered, that the hearing shall be held at a time and place and before an Administrative Law Judge to be specified in a subsequent Order.

---

[1] WCS's application for frequency 454.225 MHz is electrically mutually exclusive (MX'd) with the MPT application at Winters. WSC's application for frequency 454.300 MHz is MX'd with the DM application at Abilene. DM's application for 454.300 MHz at Abilene is MX'd with MPT applications at Hamlin and at Breckenridge. DM's application for 454.025, 454.75 and 454.150 MHz at Trent is MX'd with MPT's application at Abilene. DM's application for 454.100 and 454.200 MHz at Abilene is MX'd with MPT's application at Albany. DM's application for 454.174 and 454.275 MHz at Abilene is MX's with MPT's application at Stamford. DM's application for 454.250 MHz at Abilene is MX'd with MPT's application at Winters.

[2] Section 22.15(i)(2) reads in pertinent part: All applications for new or additional facilities shall identify any other pending applications in this service for new or additional facilities for the same general geographic area that applicant, or any principal thereof, may be a party to or have an interest in, either directly or indirectly.

[3] In File No. 21239–CD–P–2–81, MPT applied for authority to add frequencies 454.050 and 454.125 MHz to station KWH316.

[4] These practices were subsequently enunciated in Public Notice, Mimeo 002411, dated July 27, 1981.

[5] An erlang is the amount of traffic carried by one channel busy 100 percent of the time.

[6] MSD practice has been to withhold authorization of additional channels when the blocking ratio is less than 50%. This standard was adopted by the Commission on an interim basis in its Further Notice of Proposed Rulemaking, Docket No. 20870, 84 FCC 2d 857 (1981). The Erland C tables, used to determine the probability of blocking for a given number of channels and traffic load in erlangs, were made available to the public in a Public Notice, Mimeo No. 0411, dated December 31, 1980.

[7] For the purpose of this proceeding, the interference-free area is defined as the area within the 39 dBu contour as calculated from § 22.504, in which the ratio of desired-to-undesired signal is equal to or greater than R in FCC Report No. R–6404, equation 8.

[8] Section 22.504(a) of the Commission's Rules and Regulations describes a field strength contour of 39 decibels above one microvolt per meter as the limit of the reliable service area for base stations engaged in two-way communications service on frequencies in the 450 MHz band. Propagation data set forth in § 22.504(b) are the proper bases for establishing the location of service contours F(50,50) for the facilities involved in this proceeding. (The applicants should consult with the Bureau counsel with the goal of reaching joint technical exhibits.)

8. It is further ordered, that the Chief, Common Carrier Bureau, is made a party to the proceeding.

9. It is further ordered, that the applicants shall file written notices of appearances under § 1.221 of the Commission's Rules within 20 days of the release of this Order.

10. The Secretary shall cause a copy of this order to be published in the **Federal Register.**

William F. Adler,

Chief, Mobile Services Division, Common Carrier Bureau.

BILLING CODE 6712-01-M

[File No. 26103-CL-P-(5)-82; et al.]

Advanced Mobile Phone Service, Inc., et al.; Designating Applications for Consolidated Hearing on Stated Issues

Memorandum Opinion and Order Granting Application and Designating Applications for Hearing

Adopted: December 8, 1982.

Released: December 14, 1982.

In re application of Advanced Mobile Phone Service, Inc., for a Construction Permit to establish a cellular system operating on frequency block B in the Domestic Public Cellular Radio Telecommunications Service to serve the Buffalo, New York, modified Standard Metropolitan Statistical Area; File No. 26103-CL-P-(5)-82.

In re Applications of Western Union Telegraph Company, Celcom Communications Corporation of Buffalo, and Cellular Mobile Corp., for a Construction Permit to establish a cellular system operating on frequency block A in the Domestic Public Cellular Radio Telecommunications Service to serve the Buffalo, New York, Modified Standard Metropolitan Statistical Area; CC Docket No. 82-824, File No. 26070-CL-P-(7)-82, File No. 26156-CL-P-(8)-82, and File No. 26167-CL-P-(8)-82.

1. Presently before the Chief, Common Carrier Bureau, under delegated authority, are the captioned applications, filed by Advanced Mobile Phone Service, Inc. (AMPS), Western Union Telegraph Company (WU), Celcom Communications Corporation of Buffalo (Celcom), and Cellular Mobile Corporation (CMC), for cellular radio systems to serve the Buffalo, New York,[1] Standard Metropolitan Statistical Area (SMSA). WU filed a Petition to Deny AMPS' application.[2] Each of the nonwireline applicants filed Petitions to Deny the other nonwireline applications. Responsive pleadings have been filed.

2. Because we find that the public interest would be served thereby, we are granting the AMPS application.[3] As discussed below, we find that the petitions fail to raise any substantial and material issues requiring designation for hearing. However, the CMC, Celcom and WU applications are electrically mutually exclusive, and accordingly, we are designating those applications for a comparative hearing in accordance with the Commission's Report and Order in CC Docket No. 79-318, 86 FCC 2d 469 (1981), *modified, Memorandum Opinion and Order on Reconsideration,* 89 FCC 2d 58 (1982), and *further modified, Memorandum Opinion and Order on Further Reconsideration,* 90 FCC 2d 571 (1982). We are also requiring that WU modify its application as set forth below.

AMPS Application

3. A petition to defer Commission action on the AMPS application was filed by CMC. We find that it is premature to rule on the petition at this time, for the reasons stated by the Commission in deferring action on identical petitions in the Chicago market. *See Memorandum Opinion and Order Granting Application and Designating Applications for Hearing (Chicago Order),* FCC 82-452, released November 1, 1982, at para. 16.

4. WU argues that AMPS has failed to supply an adequately detailed schedule of proposed charges in its response to item 41 of FCC Form 401 and that AMPS' response is deficient and evasive. WU further alleges that AMPS had the advantage of reviewing the rate structure of its future competitors before specifying its own rates and that AMPS' failure to project its schedule of proposed charges is anticompetitive. We find that Exhibit 8 of AMPS' application, which provides an estimated range of proposed rates, is sufficient to enable us to find that AMPS' proposal will be in the public interest. WU's allegation that AMPS' action is anticompetitive is without merit. To the extent that the allegation refers to the proposed rates, it is premature. These are proposed rates, and the actual rates to be charged by any licensed cellular carrier for the Buffalo market are, in the first instance, within the jurisdiction of New York State regulatory authorities, *NR Recording and Communications, Inc.,* 87 FCC 2d 469 (1981); *Commonwealth Telephone Company,* 61 FCC 2d 246 (1976). If, after AMPS' rates have been considered by the New York Public Service Commission, specific allegations are raised that those rates are anticompetitive, we will then consider the issue. *Id.* See also *Memorandum Opinion and Order on Reconsideration,* 89 FCC 2d 58 at para. 84.

5. WU also argues that AMPS' interconnection arrangements in Exhibit 18 of its application are too vague to allow a potential nonwireline competitor to design a compatible system in accordance with § 22.913(a)(9) of the Rules.[4] We find that this argument is also without merit. Exhibit 18 of AMPS' application and the documents made available by American Telephone and Telegraph Company and described in our May 19, 1982, *Public Notice,* "Cellular Radio System Interconnection Information," Mimeo 4146, provide sufficient information to satisfy Section 22.913(a)(9) at present. WU has not identified any specific deficiency in AMPS' interconnection showing that impairs the potential interconnection rights of WU or the other nonwireline applicants in Buffalo. *See* the Commission's *Report and Order, supra,* at paras. 53-57, and the *Reconsideration Order, supra,* at paras. 47-51.[5] Furthermore, as stated in its *Memorandum Opinion and Order on Further Reconsideration,* 90 FCC 2d 571 (1982), at para. 16, the Commission has not yet adopted a firm policy as to what form of interconnection may be reasonable in any particular situation. Rather, subject to the wireline carrier's duty to provide reasonable and technically suitable interconnection, the Commission has left the particular arrangements to be negotiated among the carriers involved and to be the subject of an intercarrier agreement. *Report and Order, supra,* at para. 56. In addition, many interconnection issues common to all prospective cellular

---

[1] As noted in the caption, AMPS, a wholly-owned subsidiary of the American Telephone and Telegraph Company (AT&T), is requesting the wireline allocation (frequency block B) and WU, Celcom, and CMC are requesting the non-wireline allocation (frequency block A) in the Buffalo Market.

[2] A petition to defer Commission action on the AMPS application was filed by CMC. *See* paragraph 3, *infra*

[3] Section 22.901 of our Rules requires that cellular service be provided by an AT&T affiliate only through a separate subsidiary. AMPS has demonstrated in its application that it has met this requirement. Our Rules also require that AMPS submit a cellular capitalization plan for Commission approval. AMPS did submit its plan on May 25, 1982. Our decision here is subject to, and conditioned on, action on the capitalization plan. *See* para. 18, *infra.* We recognize that further approval may be required when ownership in AMPS in Buffalo is changed pursuant to the impending AT&T reorganization.

[4] 47 CFR 22.913(a)(9).

[5] Other arguments raised here by WU regarding interconnection have been addressed in the above Commission decisions and will not be repeated here.

applicants and licensees are presently the subject of discussion among the cellular radio interconnection working groups.[6] Therefore, we conclude that AMPS has satisfied the requirements of our Rules with respect to interconnection.

Celcom Application

6. WU and CMC argue that Celcom has not provided reasonable assurance of the availability of its proposed transmitter sites and has not demonstrated its financial qualifications. WU also argues that Celcom's application does not conform with the Commission's cellular design concepts.

7. *Site availability.* Celcom has attached copies of its site agreements to its reply pleading which adequately demonstrate site availability. To the extent that ambiguity in the application itself prompted WU and CMC to raise objections, that ambiguity is now resolved, and we will not designate an issue based on site availability. *See Alabama Citizens for Responsive Public Television, Inc.*, 59 FCC 2d 1 (1976).

8. *Financial qualifications.* WU advances a number of objections to Celcom's financial qualifications. First, WU argues that Celcom failed to itemize the cost of construction for each cell, and that it failed to furnish a total figure for projected costs of constructing the Buffalo system in compliance with the standards for demonstrating financial qualifications. Second, WU argues that Celcom cannot rely on a letter of commitment for $8.2 million from the Michigan National Bank because the letter refers to the Michigan National Bank as the lead bank in a consortium of banks consisting of holding company affiliates of Michigan National Bank, Mellon Bank and Pittsburgh National Bank. Absent evidence of commitments by the latter two banks, WU alleges that the letter does not provide reasonable assurance of the availability of the loan. Third, WU asserts that Michigan National Bank cannot lend Associated Communications Corp. (Associated), Celcom's parent, and its other cellular subsidiaries $113.5 million because this amount exceeds the bank's lending limit to one customer under federal law. Fourth, WU argues that, since Associated's subsidiaries are relying on the financing package from Michigan National Bank for all of Associated's cellular commitments, Celcom will not have unimpaired or otherwise uncommitted funds of $8.2 million available in Buffalo. Fifth, WU alleges that the Michigan National Bank loan is contingent on collateral that already has been encumbered (Associated's agreement to hypothecate all of its shares of Telecommunications, Inc. common stock to the bank); thus, the loan cannot be relied on to support Celcom's financial capabilities. Sixth, WU alleges that Celcom cannot rely on its parent corporation for its financial showing because Associated is in a precarious financial condition, and it is questionable whether it can meet its own needs for capital. Finally, WU alleges that Celcom's high debt-to-equity ratio and the fact that it is deferring substantial repayments of loan principal beyond its first year of operation make its proposal deficient in that Celcom lacks sufficient funds to survive its second year of operation. Consequently, WU urges the Commission to look beyond one year. As for the second year of operations, WU contends that the failure of Celcom to conduct a viable need survey precludes it from relying upon projected revenues as a source of financing. CMC, in more abbreviated objections, alleges that Celcom has not adequately demonstrated its costs, and failed to demonstrate it has funds to meet these costs.

9. First, in its reply Celcom clarifies its construction costs and operating expenses for one year. Celcom's construction costs for Buffalo are estimated at $4,482,500; this figure is contained in Appendix A to Exhibit 5 of the affirmative case. Celcom also states that initial and operating expenses for the first of operations will total $2,805,727. This figure is contained in Appendix A to Exhibit 5 of the application.[7] Showings of estimated total construction costs and operating expenses for one year satisfy the requirements of our rules, and Celcom is not required to demonstrate the itemized costs for each cell.

10. Second, to finance its system Celcom relies on an $8.2 million loan from the Michigan National Bank. This loan is evidenced by a letter of commitment from the bank dated June 2, 1982, which states that this bank is the lead bank in a consortium of banks consisting of holding company affiliates of Michigan National Bank, Mellon Bank and Pittsburgh National Bank. The letter describes the terms and conditions of the loan, including security provisions, and provides for prior written notice to the FCC before any radio facilities may be repossessed. As additional collateral, Associated is to secure its guarantee by pledging all of its shares of Telecommunications Inc. common stock. Under applicable precedent this letter is acceptable as reasonable assurance that $8.2 million will be available to Celcom for its Buffalo system. *Multi-State Communications, Inc.* v. *FCC*, 59 F. 2d 1117 (D.C. Cir. 1978); *Chicago Order, supra, Merrimack Valley Broadcasting Inc.* 82 FCC 2d 166 (1980).

11. Third, there is a letter from Robert I. Hart, Vice-President, Michigan National Bank dated August 11, 1982, as Attachment F to Celcom's reply. This letter states that Michigan National Corporation may lend up to $42 million to a single borrower (Associated) by apportioning such loan among the bank's various subsidiaries and holding company affiliates of Michigan National Bank, Lansing. It is their intent so to apportion loans to Associated's cellular subsidiaries among Michigan National Bank, Lansing, and its holding company affiliates. In the reply Celcom asserts that the other members of the consortium, Mellon and Pittsburgh National and their holding company affiliates, will pick up the other shares. Thus the $113.5 million loan commitment does not exceed the consortium's lending authority.

12. We address the fourth, fifth and sixth points, which are interrelated, together. Attachment A to Celcom's reply consists of a letter from the Michigan National Bank dated July 30, 1982. The letter states that Michigan National Bank, Mellon Bank and Pittsburgh National are prepared to make all the loans to Associated's cellular subsidiaries, the combined amount of the loans totaling $113.5 million. The letter also states that Mellon and Pittsburgh Banks were

[6] *See* our Public Notices of May 20, 1982, Mimeo 4164, and August 4, 1982, Mimeo 5587, regarding these groups.

[7] Attachment A to Exhibit 5 of the application contained a projected income statement for the Buffalo system for four years after grant of construction permit ("this time period extends approximately one year beyond the completion of the construction of the the initial system"). Attachment B to this Exhibit contained a month by month breakdown of capital requirements for the four-year period, taking into account projected revenues, construction, and other initial and operating expenses. To facilitate review of the application, separate statements of construction costs and operating expenses such as Celcom provided in its reply are preferred. WU also alleges that Celcom's costs estimates are not reasonable. We find that WU and CMC have failed to raise any serious questions that have not been adequately explained by Celcom in its reply. The general allegation that one applicant's estimated costs are lower than another's is insufficient to warrant the addition of a financial issue in hearing. Moreover, Celcom's estimates do not appear unreasonable on their face. *E.g.*, Salem Broadcasting Co., Inc., 37 FCC 2d 115 (Rev. Bd. 1972), and Chicago Order, *supra*.

contacted and agreed to participate.[8] The letter goes on to state that the three banks were aware of: (a) Associated's existing revolving credit agreement with Mellon Bank effective October 29, 1981, (b) Associated's plans to increase the revolving credit amount and (c) Associated's agreement with Mellon Bank to apply the proceeds from any future sales of Telecommunications stock towards the payment of the outstanding balance on the revolving credit agreement. The letter also states that the banks believe that the loans are adequately secured by the commitments of Associated, including its pledge of Tele-Comm, Inc. stock. This pledge, or hypothecation, is not inconsistent with the revolving credit agreement, and the increase in the revolving credit agreement does not detract from the banks' willingness to lend to the Associated subsidiaries the specified amounts. Finally the letter states that all the banks are aware that Associated has filed other noncellular applications with the FCC; that Associated has reported operating losses in recent quarters; that Associated has received authority to purchase an additional radio common carrier business; and that these facts do not detract in any respect from the willingness of the banks to lend to Associated's subisdiaries the amounts specified.[9]

13. Finally, Celcom's application, Appendix D to Exhibit No. 5, contained a statement from Associated agreeing to guarantee the loan made to Celcom and if necessary to pledge its stock in TCI. It further stated that the bank is aware of Associated's similar undertakings in support of the applications of Celcom's sister subsidiaries for cellular mobile telephone systems in other markets. The letter stated that the bank has assured Associated that these undertakings will be sufficient to support all of the commitments it has made to finance each of these proposals. The exhibit also contained Associated's quarterly Securities and Exchange Commission Form 10–Q for the quarter ended March 31, 1982. Associated's net liquid assets pursuant to this report total about $2.8 million. See *Chicago Order, supra* at para. 8.

14. We find that Celcom has provided reasonable assurance that the loan will be available to it. We also find that the financial institutions have expressly acknowledged their awareness of Associated's organization and their satisfaction with the collateral provided. Given these circumstances, there is no basis to second guess the lending institutions' judgment, as WU would have us do, and we need not inquire further into the availability of the loans. In addition, we find Associated and its subsidiaries have demonstrated reasonable assurance of $113.5 million to finance their cellular commitments in the eight markets in which they have applied. To the extent that issues against Associated or any of its subsidiaries in other markets are similar to the ones raised here, these findings will control the disposition of those issues. Any financial issues relevant to specific markets will, of course, be resolved in subsequent orders. Accordingly, we find that no financial issues will be designated against Associated or any of its subsidiaries based on the availability of these loans.

15. Turning to WU's final point, WU asks us to inquire into whether Celcom can operate beyond one year based on a series of broadcast decisions beginning with *Ultravision Broadcasting Co., et al.*, 1 FCC 2d 544 (1965), *A–C Broadcasters, et. al.*, 10 FCC 2d 256 (1967); *Robert Cowan Wagner*, 38 FCC 2d 1187 (1973) and *Midwest St. Louis, Inc.*, 65 FCC 2d 673 (1977). In *Ultravision* the Commission adopted a requirement that applicants for commercial broadcast facilities demonstrate financial ability to operate for one year after completion of construction. In *A–C Broadcasters, et al., supra*, the Commission decided to inquire into an applicant's *second-year* financial qualifications where the applicant did not plan to begin making any repayments of principal and interest on its loans until the second year of operation. In *Midwest, supra*, the Commission said that the "presumption of financial survival after one-year's operation may be rebutted if an applicant's financial proposal is characterized by a high debt-to-equity ratio and deferrals of substantial debt payments outside the first year." *Id.* at 675.

16. The Commission requires cellular applicants to demonstrate financial ability to operate for one year. See 47 CFR 22.917. Celcom has satisfied this requirement. The Commission did not invoke *Ultravision* and its progency for its consideration of cellular applications. In addition, for the following reasons, we do not find it appropriate to inquire into whether an applicant will be able to operate beyond one year, in our consideration of cellular applications.

17. Ultravision and its progency were premised on a broadcast applicant's completing all construction of the station before service could begin. Cellular licensees, in contrast, must complete construction within three years but may begin providing service when the system is partially complete. Thus, they may generate revenue from operations to offset capital costs and operating expenses even as construction progresses. They do not have to complete an expensive system and then try to sell air time or wait until advertising revenues begin to accrue, as do broadcasters. In this regard § 22.917 provides that applicants shall submit additional information (e.g., for the period of proposed construction plus one year operation, a statement of projected revenues and expenses). A forecast of operating revenues based on demand projections where (1) there will be only two systems per market rather than a multitude of entrenched competitors, and (2) there is a recognized pent-up demand for service, clearly distinguishes the cellular service from the cited broadcast cases' underlying rationale.

18. The cellular environment is so different from the broadcast environment that the Commission's concerns about thin capitalization and high debt-to-equity ratios are not particularly relevant here. Given the number of nonwireline applicants in most markets, the high cost of cellular systems, and the competitiveness of the licensing process, if not the marketplace, we could not reasonably apply the same debt-to-equity ratios and other financing standards that were applied in broadcast license cases years ago. Moreover, the Commission has abandoned the *Ultravision* test. *See* Financial Qualifications Standard for Aural Broadcasting Applicants, 69 FCC 2d 407 (1978), and New Financial Qualifications Standard for Broadcast Television Applicants, 72 FCC 2d 784 (1981). In the Public Notice for Aural Broadcast Applicants the Commission stated: "we have been unable to

---

[8] Associated subsidiaries referred to above are: Celcom Communications Corp. of Georgia, $8.5 million; Celcom Communications Corp. of Pennsylvania, $15.6 million; California Celcom Communications Corp., $15 million; Celcom Communications Corp. of Pittsburgh, $14.5 million; Celcom Communications Corp., $23.4 million (NY); Celcom of Florida, $9 million; and Celcom of Michigan, $18.3 million, including the $8.2 million for Buffalo. All of these loans were evidenced by a letter of commitment from the bank for each individual market.

[9] On September 13, 1982 Associated's President submitted a letter under § 1.65 of the Rules which states that the October 29, 1981, revolving credit agreement was terminated on August 26, 1982, and Associated has entered into a new revolving credit agreement secured by an interest in the stock of Associated subsidiaries which are FCC licenses of certain radio stations and a security interest in the stock of another subsidiary, Associated American Artists, Inc. In addition, the amounts advanced under the agreement are not to exceed 50 percent of the market value of TCI stock owned by Associated.

conclude that the failure rate of AM or FM radio stations has been substantially affected by Ultravision." *See also, Merrimack Valley Broadcasting, Inc.*, 82 FCC 2d 166 (1980), where the Commission stated that there is no longer a place for our traditional second year financial issue.

19. We conclude that Celcom has adequately demonstrated its financial qualifications to construct its proposed system and operate it for one year as required by § 22.917 of the Rules.[10]

20. *Cellular design concept.* WU argues that Celcom's alleged failure to furnish a statistically valid need survey raises serious questions about the validity of its cellular system design and its projected method of expansion, rendering the application deficient under Rules § 22.913(a) (4) and (5).[11] Our rules do not require submission of a need survey. Celcom has submitted exhibits describing its system design and expansion plans which meet our requirements. System design and proposed system expansion are issues to be examined in the comparative portion of this proceeding. *Report and Order, supra,* at 502–03. Accordingly, we decline to designate a basic qualifying issue with respect to this matter.

WU Application

21. Celcom argues that WU's application must be dismissed because its proposed cellular Geographic Service Area (CGSA) extends into the Rochester, New York, SMSA, which is a central SMSA, in violation of Rules § 22.903(a).[12] CMC claims that WU has failed to demonstrate site availability[13] and has improperly proposed to provide cellular mobile equipment to customers under tariff.

22. *Extension of CGSA.* WU's proposed Cellular Geographic Service Area (CGSA) for Cell Site F (Lockport) extends into the central Rochester SMSA.[14] Pursuant to Rule 22.903(a), a CGSA may not extend into another central SMSA. In the *Chicago Order, supra,* the Commission allowed an applicant to cure this defect with a conforming amendment. Therefore, we will require here that WU file a conforming amendment to bring the nonconforming CGSA and 39 dBu contour for Cell F (Lockport) into compliance with the rules. the amended 39 dBu contour and CGSA shall not cover any area in the SMSA not previously covered by the nonconforming 39 dBu contour. This amendment should consider the effects, if any, that this change may have on other parts of the application. Due to this circumstance, brief extensions of time may be granted at the discretion of the administrative law judge.

23. *Tariff Issue.* CMC's argument that WU improperly proposes to provide mobile equipment under tariff is without merit. In its reply, WU states that the schedule of equipment charges, which was attached to its model tariff, was not intended to be part of the tariff. Further, WU unequivocably states that it has no intention to offer mobile equipment under tariff.[15] Accordingly, we find nothing improper in WU's listing cellular mobile equipment charges in its application.

CMC Application

24. *Financial qualifications.* Celcom and WU argue that CMC has not demonstrated its financial qualifications to construct and operate its proposed system. We find this argument to be without merit. Graphic Scanning Corp. (Graphic), CMC's parent company, has committed itself to fund $5,300,000 for the Buffalo CMC Cellular system. The Graphic commitment letter covers the projected costs of construction and operation for one year and specifically states that none of these funds have been committed to other cellular system applications or to other projects.[16] We find that this satisfies the requirement of Rules § 22.917(b) that resources used to demonstrate financial ability regarding one cellular system may not include funds committed elsewhere. In the *Chicago Order,* FCC 82–452, the Commission found that Graphic and its cellular subsidiaries have provided reasonable assurance that they will have sufficient funds available to cover construction of 30 cellular systems in the top 30 markets. The Commission further concluded that no financial issues should be designate for hearing against any Graphic subsidiary based on the ability of Graphic to finance the construction and operation for one year of 30 cellular systems. Those findings control the disposition of the arguments here.

25. We have also considered the other objections made against CMC's application and we find that they raise no substantial issues. These allegations involve (a) site availability, which we find CMC has adequately demonstrated; (b) lack of technical qualifications or ineptness in preparing the application, which either fail to raise a substantial issue[17] or (with respect to the technical proposals) will be examined in the comparative portion of this proceeding; and (c) character allegations against Graphic, which will be examined as stated at note 21 and para. 35, *infra.*

Conclusions

26. Based on our analysis of the applications and our resolution of the contested issues in this order, we find the applicants to be legally, technically, financially and otherwise qualified to construct and operate their proposed cellular systems. As indicated in our previous discussions, the captioned WU application does not comply with one of the cellular rules. In the *Chicago Order,* at para. 17, the Commission determined that inflexible application of the rules to applications in the 30 largest markets would not be in the public interest. Accordingly, we are requiring WU to bring its application into conformance with the rules as specified in this order. We emphasize that the amendment ordered here may not be used to give WU a comparative advantage in the hearing proceeding. As the Commission stated in the *Chicago Order,* in markets for which applications have not yet been filed, strict conformance with the rules will be required, and absent unusual circumstances, the applicants will not be allowed to amend nonconforming applications. We further find that the grant of the AMPS application as

[10] Assuming, *arguendo,* that we followed the broadcast cases as urged by WU, we would not have designated a second year financial issue against Celcom. This is not a case where the applicant established its financial qualifications only because it deferred fixed charges; Celcom did not defer substantial debt payments outside the first year, and it's estimates show it would be paying interest on its loan and all other fixed costs in its first year of operations.

[11] 47 CFR 22.913(a)(4)(5).

[12] 47CFR 22.903(a).

[13] Like Celcom, *see* para. 7, *supra,* WU adequately answered all questions about site availability in its reply pleading. Accordingly, we will not address this objection further.

[14] *See* Public Notice, "Cellular Application Filing Procedures,:: Mimeo 2973, March 24, 1982, Mimeo 567, November 1, 1982.

[15] The Commission has prohibited tariffing of cellular mobile equipment as part of a common carrier communication service. *See* Reconsideration Order, *supra,* at para. 59.

[16] WU also filed a Motion to strike two letters attached to CMC's reply pleading concerning CMC's financial showing. The information submitted was appropriate for responding to the Petitions to Deny the application and will not prejudice any other party. Both letters merely clarified letters submitted in the application. Accordingly, the Motion to Strike is denied.

[17] One technical point raised by WU was the identification of CMC's proposed control point location in the engineering exhibits attached to CMC's FCC Form 401. The control point was not identified directly in response to items 10 and 11 of the Form 401. While CMC's engineering exhibits do demonstrate that CMC has selected a control point location, applicants are expected to complete items 10 and 11, instead of cross-referencing the engineering exhibits, to facilitate review of the application.

conditioned below, will serve the public interest, convenience and necessity.

27. Accordingly, it is ordered that the application of Advanced Mobile Phone Service, Inc., File No. 26103–CL–P–(5)–82, IS GRANTED, conditioned upon the Commission's action on the AT&T Cellular Capitalization Plan submitted on May 25, 1982, as provided by § 22.901(d)(3) of the Commission's Rules.[18]

28. It is further ordered, pursuant to Section 309 of the Communications Act of 1934, as amended, that the applications of Western Union Telegraph Company, file No. 26070–CL–P–(7)–82, Celcom communications corporation of Buffalo, file No. 26156–CL–P–(8)–82, and Cellular Mobile Corp., file No. 26167–CL–P–(8)–82, are designated for hearing in a consolidated proceeding upon the following issues:[19]

(a) to determine on a comparative basis the geographic area and population that each applicant proposes to serve;[20] to determine and compare the relative demand for the services proposed in said areas; and to determine and compare the ability of each applicant's cellular system to accomodate the anticipated demand for both local and roamer service;

(b) To determine on a comparative basis each applicant's proposal for expanding its system capacity in a coordinated manner within its proposed CGSA in order to meet anticipated increasing demand for local and roamer service; [21]

(c) To determine on a comparative basis the nature and extent of the service proposed by each applicant, including each applicant's proposed rates, charges, maintenance, personnel, practices, classifications, regulations and facilities (including switching capabilities); [22] and

(d) To determine, in light of the evidence adduced under the foregoing issues, what disposition of the referenced applications would best serve the public interest, convenience and necessity.

29. It is further ordered that the Separated Trial Staff (the Hearing Division and other individuals specifically designated) of the Common Carrier Bureau is made a party to the proceeding.[23]

30. It is further ordered, that the applicants shall file written notices of appearances under §22.916(b)(3) of the Commission's Rules within 10 days after publication of this order in the **Federal Register.**

31. It is further ordered, that the hearing shall be held according to the procedures specified in §22.916 of the Rules, except as otherwise noted herein, at a time and place and before an Administrative Law Judge to be specified in a later order.

32. It is further ordered, that exceptions to the initial decision of the Administrative Law Judge under §1.276 of the Commission's Rules shall be taken directly to the Commission.

33. It is further ordered, that Western Union Telegraph Company is directed to file the conforming amendment specified in this order within 15 days after publication of this order in the **Federal Register** and that all applicants are directed to file rebuttal cases under §22.916(b)(4) of the Rules within 45 days rather than 30 days after publication of this order in the **Federal Register.**

34. It is further ordered that, the Petitions to Deny filed by Western Union Telegraph Company, Celcom Communications Corporation of Buffalo and Cellular Mobile Corporation and Western Union Telegraph Company's Motion to Strike are denied.

35. It is further ordered, that any authorization granted to CMC as a result of the comparative hearing shall be conditioned on, and without prejudice to, reexamination and reconsideration of that company's qualifications to hold a cellular license following a decision in the hearing designated in *A.S.D. Answering Service, Inc., et al.*, FCC 82–391, released August 24, 1982, and shall be specifically conditioned upon the outcome of that proceeding.

36. It is further ordered, that any authorization granted as a result of this proceeding shall be conditioned upon obtaining the appropriate antenna structure clearances and Canadian coordination where needed.

37. This Order is issued under §0.291 of the Commission's Rules and *Order Delegating Authority*, FCC 82–435, released October 6, 1982, and is effective on its release date. Petitions for reconsideration under Section 1.106 or applications for review under §1.115 of the Rules may be filed within the time limits specified in those sections. See also Rule 1.4(b)(2).

38. The Secretary shall cause a copy of this order to be published in the **Federal Register.**

Gary M. Epstein,

Chief, Common Carrier Bureau.

[FR Doc. 82–34349 Filed 12–17–82; 8:45 am]

BILLING CODE 6712–01–M

---

[18] The authorization also will be conditioned upon AMPS obtaining the appropriate antenna structure clearances. AMPS will not be authorized to render service to the public during service tests even after it files FCC Form 403 for a license to cover. Service to the public cannot commence until the covering license becomes effective. Equipment tests, however, may be conducted. AMPS' authorization (FCC form 403) will reflect these conditions.

[19] There are two issues that are not to be considered in the comparative hearing. The first is the financial qualifications of the applicants. Financial ability is a basic rather than a comparative qualification for cellular licensing. Cellular Communications Systems, 86 FCC2d 469, 501–02 (1981). We have found the applicants included in the comparative hearing to be financially qualified. The second issue not to be considered is the qualifications of Cellular Mobile corporation or its parent Graphic, to the extent that such qualifications may be affected by the issues included in the Commission' s order designating certain 35 and 43 MHz paging applications for hering. A.S.D. Answer Service, Inc., *et al. (ASD)*, FCC 82–391, released August 24, 1982. Those issues will be thoroughly reviewed in that separate proceeding and should not be reargued in the context of a cellular hearing. As set forth in para. 32, *infra*, the Commission reserves the right to reexamine and reconsider the qualifications of Cellular Mobile Corporation to hold a cellular license should *ASD* be resolved adversely to any of CMC's affiliate or parent companies or to any of their principals. *See Chicago Order*, at n. 19.

[20] For purposes of comparison, the geographic area that an applicant proposes to serve includes that area within the proposed 39 dBu contours which, in turn, falls within the proposed Cellular Geographic Service Area and the relevant Standard Metropolitan statistical Area. Consideration should be given to the presence of densely populated regions, highways and areas likely to have high mobile usage characteristics as well as indications of a substantial public need for the services proposed. *See* 86 FCC 2d at 502.

[21] In making this comparison, preference should be given to designs entailing efficent frequency use, including not only the applicant's plans with regard to cell-splitting and additional channels, but also the degree of frequency reuse the system will be capable of, and the applicant's ability to coordinate the use of channels with adjacent or nearby cellular systems. *See* 86 FCC 2d at 502-03.

[22] *See* 86 FCC 2d at 503 for a discussion of the relative importance of the evidence submitted under this issue.

[23] Members of the Separated Trial Staff are non-decision making personnel and they will not participate in decision making or agency review on an *ex parte* basis in this case, either directly or through contact with other Common Carrier Bureau personnel. Any investigative or prosecuting functions will be performed by the Separated Trial Staff in connection with its role as a party to the adjudication of these cellular radio applications. All other personnel of the Common Carrier Bureau, unless identified in a subsequent order as required to be separated, are designated as decision-making and they may advise the Commission as to the ultimate disposition of any appeal of an Initial Decision in this proceeding. *See* Communications Act of 1934 as amended section 409(c) (47 U.S.C. 409(c); Administrative Procedure Act section 554(d) (5 U.S.C. 554(d)); §1.1221 of the Commission Rules.

[FCC 82–542]

Prescription of Revised Percentages of Depreciation Pursuant to the Communications Act, as Amended, for Bell Telephone Co. of Nevada, et al.

AGENCY: Federal Communications Commission.

ACTION: Depreciation Rate Prescription Order.

SUMMARY: Pursuant to Section 4(i) and 220(b) of the Communications Act of 1934, as amended, 47 U.S.C. 4(i) and 220(b), Federal Communications Commission has ordered the Bell system operating companies to apply the percentages of depreciation which are set forth in Appendices 1 and 2 [1] of the Order. The nine Bell companies filed for revised depreciation rates for various accounts and submitted studies and data to substantiate their request. The intended effect of this action is to charge, as accurately as circumstances will allow, the cost of the consumption of depreciable assets to the periods in which the assets are useful in the production of revenues.

EFFECTIVE DATE: The Companies are to apply the depreciation rates as of the date or dates set forth in Appendices 1 and 2 of the Order. In no case is an effective date prior to January 1, 1982.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Kenneth P. Moran, Chief, Depreciation Rates Branch, (202) 634–1730.

SUPPLEMENTARY INFORMATION:

In the matter of the Prescription of Revised Percentages of Depreciation pursuant to Section 220(b) of the Communications Act of 1934, as amended for: Bell Telephone Company of Nevada, The Bell Telephone Company of Pennsylvania, Cincinnati Bell, Incorporated, The Diamond State Telephone Company, The Mountain States Telephone and Telegraph Company, New England Telephone and Telegraph Company, New Jersey Bell Telephone Company, Pacific Northwest Bell Telephone Company, The Pacific Telephone and Telegraph Company.

Order

Adopted: December 8, 1982.

Released: December 1, 1982.

I. Introduction

1. Section 220(b) of the Communications Act of 1934, as amended, 47 U.S.C. 220(b), states that the Commission shall, as soon as practicable, prescribe classes of property for which depreciation charges may be included in operating expenses and the percentages of depreciation which shall be charged to each of the classes. It also states that the Commission may, when it deems necessary, modify the classes and percentages so prescribed.

2. By this order we prescribe revised percentages of depreciation (depreciation rates) for the nine Bell Operating Telephone Companies (BOTC's) listed on page 1 using both the straight line vintage group remaining-life (remaining-life) and straight line equal life group (SLELG) methods.

II. Background

A. *Remaining-Life Method.* 3. Prior to 1981, we had only used the straight line vintage group whole-life (whole-life) depreciation method in prescribing depreciation rates for telephone companies' plant. Using this method, we had attempted to determine the appropriate depreciation accruals applicable to each year's operations using current estimates of life and net salvage. As estimates of life and net salvage changed over time, the whole-life rates were changed in accordance with these changes in estimates. However, using whole-life concepts, no attempt was made to adjust the rates to allow for reserve surpluses or deficits resulting from the cumulative over- or under-estimation of life and net salvage factors. This changed with our final decision in FCC Docket No. 20188, 83 FCC 2d 267 (1980), *reconsideration,* 87 FCC 2d 916 (1981), where we revised Part 31 of the Rules and Regulations, the "Uniform System of Accounts for Class A and B Telephone Companies," to allow the use of the remaining-life depreciation method. The remaining-life method is designed to distribute the unrecovered cost (original cost less the sum of the depreciation reserve and future net salvage) of a group of assets over its estimated average life expectancy; thus, this procedure includes an adjustment which allocates any reserve deficit or surplus over the estimated average remaining life.

4. As noted in Docket No. 20188, prior to 1981 the BOTC's did not maintain depreciation reserves by plant account, but rather as one overall reserve balance. Therefore, remaining-life rates could not be determined for the BOTC's until their overall depreciation reserves were allocated to the various plant accounts. In our Supplemental Opinion and Order in Docket No. 20188, 87 FCC 2d 1112 (1981), we concluded that the historical recordation of debits and credits is the method by which the accumulated depreciation reserve should be allocated to individual plant accounts and thereafter maintained. We stated that carriers should disaggregate the overall reserve and that henceforth each carrier should maintain depreciation reserves for each category of property for which we prescribe depreciation rates.

5. We directed the staff to phase in the implementation of remaining-life depreciation rates in conjunction with the normal triennial represcription cycle (see paragraph 11). Implementation began with the companies that were regularly schedules for review in 1981. Those companies submitted studies requesting revised depreciation rates using remaining-life method. After a complete review, we adopted remaining-life depreciation rates for those companies in January. *See* FCC 82–39, 88 FCC 2d 1223 (1982). Remaining-life rates for the carriers normally scheduled for review in 1982 (see the list on page 1 of this order) were reviewed in detail this year. Our findings and conclusions regarding these rates are discussed beginning in paragraph 27.

B. *Straight Line Equal Life Group Method.* 6. In Docket No. 20188, we also amended our rules to permit the use of the SLELG depreciation method for new additions to plant as an alternative to the straight line vintage group (SLVG) method, provided that adequate data is available for the proper application of the method.

7. The primary differences between the SLELG and SLVG methods lie in the definition of the basic depreciation groups and in the approach each takes in spreading the original cost of assets comprising the basic groups over their estimated average service lives. While SLVG forms its basic groups by combining all units placed in one year (i.e., a vintage group), SLELG creates its basic groups by combining all units within each vintage group which share an equal life expectancy (i.e., an equal life group). While the SLVG method is designed to depreciate 100% of the original cost of a vintage, on average, over the life cycle of each vintage, the SLELG method is designed to depreciate 100% of the original cost of each plant unit over its life. As a consequence, if projections are accurate, the SLELG method should allow for depreciation at a rate more representative of the actual consumption of units of property than SLVG. We concluded in Docket No. 20188 that the proper application and monitoring of this method would not only enhance the carriers' cash flow and present to all interested parties a more accurate and objective financial picture of the carriers' operations and capital requirements, but would also benefit their customers by encouraging innovation and the introduction of new technology.

8. Under both the SLVG and SLELG methods, retirement projections, service life estimates, and depreciation rates are normally determined, in part, through

[1] Appendices 1 and 2 are filed as a part of the original document.

the use of survivor curves. These survivor curves define the relationship between the age of plant investment and the relative percentage expected to remain in service. Under the SLELG methodology, the survivor curves assume an added significance—that of defining the basic (equal life) groups. Under the SLVG method, most surviror curves have been selected only after the staff has completed detailed statistical analysis of historical retirement data. With the added significance of the survivor curves in the SLELG method, the availability and analysis of historical retirement data become even more important.

9. We recognized the importance of adequate data in Docket No. 20188 where we found that the SLELG method is acceptable, provided that:

> * * * It is assured that adequate data is available for proper application of the method; that record keeping and reporting practices will enable monitoring of the reasonableness of the rate of allocation of both original cost and provisions for salvage and removal; that such allocation of original cost will achieve allocation over the service life of the property neither more nor less than 100% of the investment net of salvage value.

Accordingly, we directed the staff to take such measures as may be necessary to insure the measurability and accountability of the results under the SLELG method.

10. We further directed the staff to phase in the implementation of SLELG depreciation rates beginning with the outside plant accounts, followed by the central office equipment accounts, and concluding with all other plant accounts. In accordance with this directive, the staff reviewed SLELG rates for the outside plant accounts for four GTE companies last year, and in January of this year we adopted SLELG rates for new additions to most of the outside plant accounts for those carriers. *See* FCC 82–53, 88 FCC 2d 1567 (1982). In addition, SLELG rate proposals were reviewed for the outside plant accounts for most of the remaining companies not scheduled to undergo a complete review of depreciation rates in 1982. As a result of that review, we adopted SLELG rates for most of the outside plant accounts for those companies in July. *See* FCC 82–353, 90 FCC 2d 964 (1982) and FCC 82–354, 90 FCC 2d 997 (1982). SLELG rates for the central office equipment and outside plant accounts of the carriers listed on page 1 of this order were also reviewed in detail this year. Our findings and conclusions regarding these rates are discussed below beginning in paragraph 28.

C. *Companies Scheduled for Review During 1982.*

11. Since the late 1940's, the Commission has reviewed and prescribed the depreciation rates of approximately one-third of the larger FCC-subject telephone companies each year. In most cases we have prescribed rates for a carrier only after the following actions have been completed:

(1) Submittal of depreciation studies by the carrier.

(2) Staff review of the carrier's filings and studies in support of its proposed life and salvage factors.

(3) Independent staff analysis of such information as the carrier's plant mortality data and equipment retirement plans.

(4) Preparation of preliminary staff recommendations.

(5) Discussion of the carrier's filings and the preliminary Commission staff proposals at a conference in which representatives of the carrier and the staffs of the respective state commissions and the FCC participate (i.e., a three-way meeting).

12. In conjunction with the normal triennial represcription cycle, the nine companies whose rates are under consideration here submitted studies proposing new depreciation rates based upon revised life and salvage estimates, using the remaining-life method for all plant accounts and the SLELG method for new additions to the outside plant and central office equipment accounts. These studies were reviewed in detail by the staff, which then prepared its own preliminary life, net salvage, and rate proposals and forwarded them to the companies and the respective state commissions. Some of the state commissions prepared similar studies and recommendations. Three-way meetings were held at which the life, net salvage, and rate proposals of all three parties were thoroughly discussed.

13. Because this was the first time SLELG rates were being proposed for the central office equipment accounts, considerable analysis was required. As a result, in certain instances, the staff was unable to submit its SLELG recommendations prior to the three-way meeting. After completing its analysis and arriving at recommendations, the staff, on October 4, 1982, issued a public notice (Report No. 2967)[2] entitled, "Depreciation Rate Prescriptions Proposed For Domestic Telephone Companies." This public notice summarized the FCC staff's proposals for new or revised depreciation rates and the change in depreciation expense that would result if those proposed depreciation rates were approved. On October 5, 1982, the staff transmitted to each company and respective state commission a copy of the October 4 public notice, schedules containing the proposed remaining-life and SLELG rates, and a discussion of the staff analysis underlying the proposed SLELG depreciation rates. After further analysis and discussion (primarily through telephone conversations and correspondence) the staff revised its SLELG proposals for certain of the central office equipment accounts. In an October 19, 1982 letter to the companies and the respective state commissions, the staff discussed these changes and the underlying reasons for the changes.

14. For most of the companies under review, agreements regarding the life, and net salvage estimates were reached between our staff, the companies, and the respective state commission staffs. There were a few instances in which three-way agreement was not reached and those instances are discussed below, beginning in paragraph 27.

III. Summary of Comments

15. Comments in response to the October 4 public notice were received from the state regulatory commissions of California, Maine, New Mexico, Oregon, Washington and Wyoming. American Telephone and Telegraph Company (AT&T) filed comments on behalf of itself and the BOTC's. Pacific Northwest Bell (PNB) and Cincinnati Bell (CBI) filed separate comments.

16. All respondents who commented on effective dates supported the prescription of depreciation rates on the effective dates requested by the companies. AT&T noted that in the past the BOTC's usually opted for revised rates effective retroactively to the first of the year in which they had been filed. AT&T now believes that it has become necessary to allow for alternative effective dates, depending on the circumstances of each company, in order to provide a better opportunity for each company to match its revenues with its depreciation expenses. AT&T noted that the Commission has already recognized the need to allow depreciation rates effective at various times throughout the year of filing in its Order on Reconsideration in Docket No. 20188, *supra*. PNB, CBI, and the California Commission generally concurred with the AT&T opinion on effective dates. CBI noted that it believes the choice of effective date is its own under § 43.43(e) of our rules. It also commented that if a January 1, 1982, retroactive effective date were adopted, CBI would have to charge an extra five

[2] The public notice was erroneously dated October 1, 1982; however, October 4, 1982 is the correct issue date.

months of depreciation expense against its 1982 operations. CBI further stated that it had not budgeted for this extra expense and has no possibility of matching this expense with actual revenues approved by the state commissions. PNB commented along the same lines emphasizing the need to prevent a substantial mismatch of revenues and depreciation expense. The California Commission stated that it was concerned that the FCC's adoption of retroactive effective dates could have an adverse impact on Pacific Telephone & Telegraph's (PT&T's) earnings level, equity value, and bond rating and that it would not be in the interest of either the company or the ratepayer. California stated that, if the proposed changes in depreciation expense were approved retroactively, PT&T would show a large, unrecovered depreciation expense with no corresponding revenues until new revenue rates were approved by California in 1983. California commented that it has, in the past, allowed concurrent booking of depreciation rate changes and the resulting revenue rate changes. The Oregon Commission recommended the approval of the effective dates proposed by PNB.

17. The proposed use of the remaining-life and SLELG depreciation methods was questioned in comments from the Maine, New Mexico and Wyoming commissions. These commissions asserted that it is their right to rule on the use of these methods for their intrastate jurisdictions. The California Commission noted that it supports the use of the remaining-life method, but that it objects to the use of the SLELG method because its adoption would increase subscriber rates and impose an added administrative burden. AT&T and the Oregon Commission supported the use of both the remaining-life and SLELG methods.

18. AT&T and PNB agreed with the FCC staff on most of the SLELG rates proposed; however, they disagreed with the FCC staff position that SLELG treatment should not be allowed for the COE-Step-by-Step and COE-Crossbar accounts on the grounds that they are "dying" accounts that will be almost fully retired within a few years. AT&T stated that, although these are "dying" accounts, investment of significant size will be added to these accounts over the next several years and that remaining-life rates would provide first year accruals of only one-half those provided by SLELG rates. AT&T also asserted that its detailed retirement plans for these accounts provide a sound basis on which to determine SLELG depreciation rates. Additionally, it stated that the FCC, in approving the SLELG method, left room for judgment as to what constitutes adequate data, and that in the exercise of this judgment weight should be given to the Commission's decision that SLELG is a preferred method. AT&T contended that the use of the SLELG method for "dying" accounts is important in that it helps prevent the deferral of capital recovery beyond the physical life of the property.

19. AT&T and PNB stated that it is appropriate to use SLELG rates for accounts, such as aerial wire, in which aged retirements are not maintained by most carriers. They stated that failure to do so would be tantamount to continuing to tolerate the infirmities of SLVG. They further stated that the records currently maintained by the BOTC's are adequate to support SLELG depreciation rates for these accounts.

20. AT&T, PNB, and the Oregon and Washington commissions stated that PNB's proposed depreciation rates for the COE-Electronic account are appropriate. AT&T and PNB stated that the life estimates for the COE-Electronic account were developed using the life cycle approach and were supported by PNB's planning engineers. They argued that the Commission should prescribe the rates proposed by PNB and not rely on "narrow, technical" factors to reject this company-specific estimate in favor of the FCC staff's proposal.

IV. Discussion of Issues

A. *Effective Dates.* 21. With few exceptions, prior to 1981, depreciation rates were prescribed retroactively to the beginning of the year in which they were filed. This appeared to be a reasonable practice inasmuch as the rates were based on depreciation studies as of that date (i.e., January 1). In 1981, with the initial implementation of the remaining-life and SLELG depreciation methods, many companies requested effective dates other than January 1, 1981. The companies maintained that, because of the controversy surrounding the Commission's approval of the new methods, it would be difficult to get approval of revenue rate increases from state commissions until the FCC had actually ordered new depreciation rates. The companies were also concerned that the states would not allow any retroactive revenue rates to match retroactive prescription of depreciation rates. After considering the regulatory and financial reporting aspects of this issue, we determined that, during this transitional period from whole-life to remaining-life and SLELG methods, we would allow the booking of the new rates on the various effective dates proposed by the companies. *See* FCC 82-39, *supra*.

22. This year the companies filed for effective dates ranging from January 1, 1982 to January 1, 1983. They argued that Section 43.43(e) of our rules and our Order on Reconsideration in Docket No. 20188, supra, allow—at the discretion of the company—the booking of new depreciation rates retroactively to a date no earlier than the first of the year in which they were filed. Section 43.43(e) of our rules states:

> Unless otherwise directed . . . proposed changes in depreciation rates shall be filed at least ninety (90) days prior to the last day of the month with respect to which the revised rates are first to be applied . . . and such rates *may be made retroactive* to a date not prior to the beginning of the year in which the filing is made. [Emphasis added.]

The companies also cited the Order on Reconsideration in Docket No. 20188, 87 FCC 2d 916 at paragraph 16, where we stated:

> * * * Retroactive application of the depreciation rates to the beginning of the year is permissive, not mandatory.

23. We maintain our belief that as a matter of sound accounting, depreciation rates should be applied on dates corresponding as closely as possible to the date of the underlying depreciation study. In Docket No. 20188, we determined that proper capital recovery is predicated, in large measure, upon the timely application of the correct depreciation rates. We also noted that, if inaccurate depreciation rates are applied, the resulting misstatement of operating expenses could harm present and potential investors and, ultimately, ratepayers by denying them and the regulators an accurate, objective financial picture of the companies' operations and capital requirements.

24. Nevertheless, we agree with the companies that, during this period of continuing transition to the new methods, retroactive booking of depreciation rates would create uncertainties which, contrary to our intent, may deny some companies a reasonable opportunity to achieve capital recovery. The use of these new methods has resulted in both significant depreciation expense changes and in the requirement for additional company studies to support prescriptions. There has also been resistance on the part of some states to accept remaining-life and SLELG rates at all, and there may be a concomitant reluctance by certain state commissions to grant intrastate revenue rate increases until we actually

prescribe depreciation rates using the new methods. We shall, therefore, accept the effective dates as filed by the companies.

B. *Use of SLELG.* 25. In our decision in Docket No. 20188 we considered the arguments expressed by the parties for and against the use of the SLELG method and determined that, provided adequate data is available, the use of SLELG rates is appropriate. In the discussion in the Final Report and Order we found that the use of SLELG comports with the mandate of Section 1 of the Communications Act, "to make available . . . a rapid, efficient, nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges . . ." 47 U.S.C. § 151. We reaffirmed our decision allowing the use of SLELG in the Order on Reconsideration as well as in three prescription orders approved this year (i.e., FCC Nos. 82–53, 82–353, and 82–354). Nevertheless, several states have again questioned whether the use of SLELG rates is warranted. Inasmuch as these states have not raised any new arguments or evidence regarding the use of SLELG rates, we have no basis to reverse our decision on this matter. Our rules, as amended in Docket No. 20188, clearly allow the use of SLELG for accounts in which adequate data is available to properly apply and monitor it. Therefore, we will allow its use.

C. *Preemption of States.* 26. Several state commissions stated that they have not approved remaining-life and SLELG procedures for their jurisdictions. The presence or absence of state commission approval of remaining-life and SLELG rates does not control the prescription of remaining-life or SLELG rates in this order. The prescription of depreciation rates is plainly a matter within the Commission's jurisdiction under Section 220(b) of the Communications Act. We do not decide in this order the effect of our prescribing these rates for intrastate ratemaking purposes. Rather, the preemptive effect of this Commission's accounting and/or depreciation determinations is before us in a separate proceeding initiated by a further *Petition for Reconsideration* filed by AT&T in Docket No. CC 79–105, 85 FCC 2d 818 (1981), *recon.*, 89 FCC 2d 1094 (1982), and a *Petition for Declaratory Ruling* filed by the General Telephone Company of Ohio.

D. *Life and Net Salvage Factors.* 27. Three-way agreement at the staff level (i.e., the staffs of the FCC, the companies, and the state commissions) as to life and salvage factors was reached in nearly all accounts and jurisdictions, with the following exceptions: Mountain Bell in Wyoming for COE-Crossbar, New England Telephone in Maine for various central office equipment, terminal equipment and outside plant accounts, and Pacific Northwest Bell in Idaho, Oregon, and Washington for COE-Electronic. After the three-way meetings, the companies filed for revised depreciation rates proposing their own recommendations where three-way agreement was not reached. The October 4, 1982, public notice on which comments were requested, reflected the FCC staff's proposals for these accounts. In certain instances the company and FCC staff positions were identical.

28. At the three-way meeting and in subsequent correspondence, the Wyoming Commission voiced its objections to the COE-Crossbar depreciation rate proposed by Mountain Bell. It stated that it is not economically sound to dispose of modern equipment (i.e., crossbar) that is providing adequate service. On the other hand, Mountain Bell has analyzed its central offices and determined an equipment modernization program that it believes will minimize overall revenue requirements to its customers. The FCC staff reviewed the company's proposed retirement program for Wyoming and found that it was not unusual or accelerated compared with other jurisdictions. In fact, retirements in Wyoming are planned at a slower rate than in most jurisdictions. We do not decide here whether the company's retirement program is sound or otherwise in the public interest. This issue is a matter which can be resolved in state and Federal rate proceedings when the carrier seeks to recover its depreciation expenses. Our purpose here, in the depreciation process, is to forecast if Mountain Bell's retirement program is attainable and if it is likely to be carried out. In other words, the effort here is to estimate the life and salvage characteristics and not to decide upon the propriety of company policy. The retirement program in Wyoming is more conservative than retirement programs for most BOTC jurisdictions; as a result, we believe it is not unreasonable to expect that the program will be carried out. Consequently, we agree with the carrier's filing in this instance.

29. At the three-way conference the Maine Commission expressed its concern that New England Telephone and Telegraph Company's (NET's) proposed life estimates for many accounts were too short. Maine stated that NET's planned crossbar retirements were not considered to be in the best interests of the rate-paying public. NET disagreed. It stated that replacing crossbar switching offices with electronic switching offices is in the best interest of both the company and its customers. Among the reasons NET offered in support of crossbar replacement are projected savings in maintenance expense and floor space requirements and benefits derived from increased revenues from new vertical services. Again, we do not decide here whether the company's crossbar replacement program is in the public interest, but rather, if the program is attainable and is likely to be carried out. Staff analysis shows that, to date, the COE-Crossbar retirements forecast by NET have been on target. Furthermore, NET's overall retirement program is somewhat conservative in comparison with other jurisdictions. As a result, at this time we have very little reason to doubt that the replacement of COE-Crossbar will take place in accordance with the timetable described by the company. We, therefore, believe that NET's life estimates for COE-Crossbar are credible.

30. The Maine Commission also stated that lives proposed by NET for several terminal equipment accounts were also too short. Maine stated that life indications for the Telephone and Miscellaneous account remained high despite competition. The company stated its belief that changes in customer demand, equipment obsolescence, competition and regulation will cause an acceleration of retirements in the future, thus causing life indications to decline. We agree with the Maine Commission that an increase in life over that underlying the currently prescribed rate is justified. However, NET has proposed an increase in life of over two years. We believe that, in the next several years, the factors cited by NET will likely pull the life indications down; therefore, the two year increase already proposed by the company appears to be believable. Our staff has found that recent PBX retirement levels in Maine support NET's life estimates for the PBX accounts. We, therefore, agree with the company's proposals in these accounts.

31. For several outside plant accounts, the Maine Commission stated that life indications are high and that there is no justification for the short lives proposed by NET. In contrast, NET argued that if it were to limit its long term plans to the use of its present copper cable plant, it would be unnecessarily limiting the services that it could provide its future customers. NET believes that technological improvements, competition and customer demand will

cause significant increases in retirements and decreases in lives of the outside plant facilities. We believe that, although life indications have not shown significant decreases yet, the deployment of fiber optic technology will likely impact the lives of the existing outside plant facilities. In addition, it is clear that the company has firm plans for implementing fiber optic cable routes which will likely increase retirements of the copper cable plant in the next few years. The staff also notes that the lives proposed for Maine are comparable to the lives which were agreed to for the other states in which NET operates. We, therefore, find the company's proposals in the attached appendices to be appropriate.

32. No agreement regarding the life estimate for COE-Electronic was reached at the three-way meeting for any of the three states in which PNB operates. The staff of the Idaho Commission stated that it believed PNB's life proposal for that state was unreasonably low. The FCC staff did not disagree with PNB's life proposal for Idaho, but found that its life proposals for Oregon and Washington were too low and were largely unsupported. Inasmuch as the investment in this account is the most modern, technologically advanced equipment available, PNB could not base its proposals on well-defined equipment replacement studies. Instead it based its proposals on product life cycle studies similar to those used by other BOTC's. The results of such studies for technologically advanced equipment (i.e., electronic switching equipment) are extremely questionable, because without knowing when a succeeding technology will be available—or even what that technology is likely to be—it is virtually impossible to define the timing of the product life cycle. Nevertheless, based upon such studies, PNB proposed reductions in equipment lives of 49% in Oregon and 45% in Washington, and, in both cases, it proposed lives several years shorter than those found to be appropriate in any other BOTC jurisdiction.

33. The staff reviewed PNB's studies in detail and became convinced that a significant reduction in life was appropriate; however, it could find no valid reason why PNB's lives should be expected to be shorter than those of all other BOTC's. In fact, a review of PNB's records indicates that, since the late 1960's, its rate of deployment of electronic switching has been virtually identical to that of the entire Bell System. Contrary to PNB's claim for Oregon and Washington, we believe that its lives should be comparable to those used by other BOTC's. We therefore agree with the lives proposed by the staff for Oregon and Washington. We note that PNB's proposal for Idaho is, in fact, in line with other BOTC jurisdictions and we agree with its proposal.

34. In FCC 82–353, 90 FCC 2d 964 (1982), we pointed out that, when there is a strong relationship between the age of retirements and net salvage, future net salvage estimates for embedded plant do not apply to future additions of plant. In the companies' most recent depreciation studies for the COE/Circuit and COE-Radio accounts, net salvage percentages and the age of retirements were demonstrated to be highly correlated. As a result, the future net salvage estimates used in determining the remaining-life rates for embedded plant are not appropriate for use in determining SLELG rates for new additions to plant. The staff analyzed these accounts and made the necessary adjustments to convert future net salvage factors originally derived for embedded plant to future net salvage factors for use with new additions to plant. The adjustments were provided to the carriers and state commissions in October, and no objections were raised. As a result, we support the staff's proposals for SLELG future net salvage percentages in these accounts.

E. *Accounts for which SLELG Rates are not Recommended.* 35. In our final decision in Docket No. 20188 we found that the SLELG method is acceptable if adequate data is available for the proper application of the method and if the carriers' record keeping practices will allow for the monitoring of the reasonableness of the rates. In each of the three SLELG prescription orders that we have approved to date (i.e., FCC No. 82–53,, 88 FCC 2d 1567 (1982), FCC No. 82–353, 90 FCC 2d 964 (1982) and FCC No. 82–354, 90 FCC 2d 997 (1982)), we concluded that aged retirement data is a minimum requirement for the proper application and monitoring of SLELG rates. In this proceeding AT&T and PNB commented that they believe SLELG rates should be allowed for all accounts regardless of whether aged retirement data is maintained. Neither AT&T nor PNB offered any new argument or evidence to support their contention. Thus, there is no basis on which to rescind the reporting requirements established in Docket No. 20188, and we conclude that it is inappropriate to prescribe SLELG rates for accounts in which vintage retirement data is not maintained.

36. The staff proposes that new additions to the COE-Step-by-Step and COE-Crossbar accounts not be depreciated using the SLELG method. They argue that it is impractical to determine reasonable future survivor curves for these additions because these accounts consist of classes of equipment which are being rapidly retired from service. The staff proposes that new additions, as well as embedded plant, in these accounts be depreciated using the remaining-life method, and asserts that the remaining-life method will assure timely and complete recovery of capital. AT&T and the Oregon Commission disagreed and argued that the interest of the FCC in Docket No. 20188 would be frustrated by not applying SLELG rates to these accounts.

37. The staff notes that estimated survivor curves for COE-Step-by-Step and COE-Crossbar have *not* been deterimned in previous depreciation studies and that it is impractical to do so at this time. This is because it has not been demonstrated that the companies can accurately estimate future additions or retirements for individual switching units. With the majority of remaining lives for electromechanical equipment in the three to seven year range, the error of these estimates will likely be significant. New additions to these accounts will clearly have very short and volatile estimated remaining lives, making the development of reliable survivor curves virtually impossible. Without reliable survivor curves the development of an SLELG depreciation rate is illusory. This is because the remaining life "corrections" and curve shape changes would rapidly alter the overall depreciation rate for the account. We previously stated that SLELG rates should be used if adequate data exists to properly apply the method. Inasmuch as the future survivor curves cannot be practically determined, we do not believe that the proper application of the method can be accomplished for these accounts.

38. Additionally, as noted by AT&T, the current Bell System investment in the electromechanical accounts is approximately $13 billion, virtually all of which will be retired over the next ten years. The current annual additions to central equipment are nearly $7 billion. In this context we find that the $600 million being added annually to the electromechanical accounts, which consists largely of reused (i.e., previously installed) equipment and associated labor, is not significant.

39. AT&T is probably correct that the current remaining-life rates may be ony one-half the first year SLELG rates.

However, an examination of this by the staff revealed that, if remaining lives were updated annually, the resultant remaining-life rates would be comparable to the first year SLELG rates for COE-Step-by-Step and would average one-third lower for COE-Crossbar. In most cases remaining-life rates are *higher* than SLELG rates by the end of the second year. Considering the aforementioned volatility of the life and curve shape estimates underlying the SLELG method, we find that the additional accruals provided by the SLELG method are insignificant over the first two years of application.

40. We do not agree with AT&T that the use of the remaining-life method risks any deferral of capital recovery beyond the remaining-lives of the assets. Remaining-life rates are designed to completely depreciate invested capital over the remaining life of a group of assets. This feature was the primary reason that we changed our rules in Docket No. 20188 to allow the use of the remaining-life method. We concur with the staff's reasoning and find that the remaining-life method should be used for depreciation of the COE-Step-by-Step and COE-Crossbar accounts.

41. While we agree with the staff's reasoning on the use of the remaining-life method for the electromechanical accounts, we also believe that to assure full and timely capital recovery on these short remaining-life assets, some special measure is required. We, therefore, direct the staff to update remaining-life depreciation rates for these accounts on an annual basis as requested by the companies or as is deemed necessary by the staff. These updates will assure that capital recovery is not unnecessarily deferred.

F. *Original Cost and Net Salvage Rates for SLELG.* 42. We are only prescribing SLELG rates for the original cost portion for the first four years of new additions to most central office and outside plant accounts. These rates will be applied until the next triennial review of depreciation for these companies. At that time the actual results of the use of the SLELG method will be evaluated, and methods and rates will be modified as necessary.

43. Present carrier accounting practices do not allow carriers to accumulate net salvage data by vintage for all classes of plant. For example, retirement of a complete line of poles may involve removal of poles of several different vintages, but would normally result in a single aggregate cost of removal and salvage from reuse or sale. In this situation it is not feasible to allocate that cost of removal or salvage among the different vintages in a meaningful manner. For this reason, instead of prescribing net salvage depreciation rates for each vintage, we are prescribing a single net salvage depreciation rate which is to be applied to all new vintages until the next regular review. *See* FCC 82-53, FCC 82-353, and FCC 82-354.

G. *Accounts for which Remaining-Life Rates are not Recommended.* 44. In FCC Docket No. 79-105, *supra*, we amended the accounting rules for station connections and ordered that all FCC-subject carriers identify an assign the investment in Account 232, Station Connections, to at least two subclasses of plant—Station Connections—Inside Wire and Station Connections—Other. Our order required carriers to expense future costs associated with the Station Connections—Inside Wire subclass on a phase-in or flash-cut basis and to continue to capitalize future costs associated with the Station Connections—Other subclass. Because the retirement ratios and mortality dispersion patterns of the Station Connections—Other subclass are not similar to those for the account as a whole, the depreciation rates prescribed in the past for the entire Station Connections account could not be applied to the Station Connections—Other subclass. Instead, new rates had to be developed. The staff and AT&T held discussions and concluded that, in most cases, a 5% depreciation rate should be used until there was sufficient data to ascertain specific mortality characteristics which could then be used to prescribe more precise depreciation rates for this subclass. Consequently, in 1981, all AT&T companies filed requested for permission to adopt a 5% depreciation rate for the Station Connections—Other subclass. And, in January, in FCC Order No. 82-39, *supra*, we prescribed a 5% rate for all of the carriers whose rates are under consideration here.

45. In a separate proceeding initiated by an AT&T petition for rulemaking, (see our notice of proposed rulemaking in FCC Docket No. 82-679, 47 FR 44767) significant changes in the accounting rules for Station Connections—Other are under consideration. This proceeding will likely be concluded early in 1983. In the interim, we do not believe it prudent to change the existing 5% depreciation rate for this account.

46. In a few accounts with minimal plant balances, the use of the remaining-life method would result in negative depreciation rates because the reserve balances were in excess of service values (i.e., original cost less net salvage). The staff reviewed several of these instances and found that the primary cause was the transfer of plant from one account to another without a corresponding transfer of reserve amounts. The prescription of a negative depreciation rate is not consistent with generally accepted accounting principles. Therefore, we will adopt the use of a 0% depreciation rate for all accounts where the calcuation of remaining-life depreciation rates would result in a negative rate. We recognize that this action does ot totally resolve the problem (i.e., reserves greater than service values). However, the problem is technical in nature and can probably best be resolved at the staff level. We direct the staff to work with the carriers to determine what reserve transfers, if any, are required.

H. *Conclusion.* 47. Having considered the positions set forth by the companies are respective state commissions at the three-way meetings, the responses to the staff's review letters and public notice, the recommendations to the staff, and the proposals of the companies, we find the remaining-life and SLELG rates listed in the appendices to be appropriate.

V. Ordering Clauses

48. Pursuant to Sections 4(i) and 220(b) of the Communications Act of 1934, as amended, 47 U.S.C. 4(i) and 220(b), it is ordered, That the percentages of depreciation set forth in the Appendices to this order are prescribed effective on the dates listed. Appendix 1 contains remaining-life rates and Appendix 2 contains SLELG rates.

49. It is further ordered, That the companies shall submit to the Commission whole-life as well as remaining-life depreciation studies during the next represcription period.

50. It is further ordered, That the companies shall notify this Commission within 10 days of any deviation from the depreciation percentages and practices prescribed in this order.

Note.—Because of the continuing effort to minimize publishing costs, Appendices 1 and 2 (Schedules of Annual Percentages of Depreciation) will not be printed herein. However, copies of this document in its entirety are available through the distribution centers listed in the FCC Office of Public Affairs, Room 202, 1919 M St., N.W., Washington, D.C. 20554. A copy is also available for inspection in the FCC Dockets Branch, Room 239, and the FCC Library, Room 639, both located at 1919 M St., N.W., Washington, D.C.

Federal Communications Commission.
William J. Tricarico,
Secretary.

BILLING CODE 6712-01-M

[FCC 82-543]

Prescription of Revised Percentages of Depreciation Pursuant to Communications Act, as Amended, for General Telephone Co. of Northwest, Inc., et al.

AGENCY: Federal Communications Commission.

ACTION: Depreciation Rate Prescription Order.

SUMMARY: Pursuant to the Communications Act of 1934, as amended, Federal Communications Commission has ordered the named General Telephone Companies to apply the percentages of depreciation which are set forth in Appendices 1 and 2 [1] of the Order. The three named companies filed for revised depreciation rates for various accounts and submitted studies and data to substantiate their request. The intended effect of this action is to charge, as accurately as circumstances will allow, the cost of consumption of depreciable assets to the periods in which the assets are useful in the production of revenues.

EFFECTIVE DATE: The Companies are to apply the depreciation rates as of the date or dates set forth in Appendices 1 and 2 of the Order. In no case is an effective date prior to January 1, 1982.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554

FOR FURTHER INFORMATION CONTACT: Kenneth P. Moran, Chief, Depreciation Rates Branch, (202) 634-1730.

SUPPLEMENTARY INFORMATION:

In the Matter of The Prescription of Revised Percentages of Depreciation pursuant to Section 220(b) of the Communications Act of 1934, as amended for: General Telephone Company of the Northwest, Inc., General Telephone Company of the Southeast, Hawaiian Telephone Company.

Adopted December 8, 1982.

Released December 14, 1982.

I. Introduction

1. Section 220(b) of the Communications Act of 1934, as amended, 47 U.S.C. 220(b), states that the Commission shall, as soon as practicable, prescribe classes of property for which depreciation charges may be included in operating expenses and the percentages of depreciation which shall be charged to each of the classes. It also states that the Commission may, when it deems necessary, modify the classes and percentages so prescribed.

2. By this order we prescribe revised percentages of depreciation (depreciation rates) for the three GTE companies listed above using both the straight line vintage group remaining-life (remaining-life) and straight line equal life group (SLELG) methods.

II. Background

A. *Remaining-Life Method.* 3. Prior to 1981, we had only used the straight line vintage group whole-life (whole-life) depreciation method in prescribing depreciation rates for telephone companies' plant. Using this method, we had attempted to determine the appropriate depreciation accruals applicable to each year's operations using current estimates of life and net salvage. As estimates of life and net salvage changed over time, the whole-life rates were changed in accordance with these changes in estimates. However, using whole-life concepts, no attempt was made to adjust the rates to allow for reserve surpluses or deficits resulting from the cumulative over- or under-estimation of life and net salvage factors. This changed with our final decision in FCC Docket No. 20188, 83 FCC 2d 267 (1980), *reconsideration,* 87 FCC 2d 916 (1981), where we revised Part 31 of the Rules and Regulations, the "Uniform System of Accounts for Class A and B Telephone Companies," to allow the use of the remaining-life depreciation method. The remaining-life method is designed to distribute the unrecovered cost (original cost less the sum of the depreciation reserve and future net salvage) of a group of assets over its estimated average life expectancy; thus, this procedure includes an adjustment which allocates any reserve deficit or surplus over the estimated average remaining life.

4. We directed the staff to phase in the implementation of remaining-life depreciation rates in conjunction with the normal triennial represcription cycle (see paragraph 10). For GTE, implementation began with the companies that were regularly scheduled for review in 1981. Those companies submitted studies requesting revised depreciation rates using the remaining-life method. After a complete review, we adopted remaining-life depreciation rates for those companies in January. *See* FCC 82-40, 88 FCC 2d 1354 (1982). Remaining-life rates for the carriers normally scheduled for review in 1982 (see the list on page 1 of this order) were reviewed in detail this year. Our findings and conclusions regarding these rates are discussed beginning in paragraph 16.

B. *Straight Line Equal Life Group Method.* 5. In Docket No. 20188, we also amended our rules to permit the use of the SLELG depreciation method for new additions to plant as an alternative to the straight line vintage group (SLVG) method, provided that adequate data is available for the proper application of the method.

6. The primary differences between the SLELG and SLVG methods lie in the definition of the basic depreciation groups and in the approach each takes in spreading the original cost of assets comprising the basic groups over their estimated average service lives. While SLVG forms its basic groups by combining all units placed in one year (i.e., a vintage group), SLELG creates its basic groups by combining all units within each vintage group which share an equal life expectancy (i.e., an equal life group). While the SLVG method is designed to depreciate 100% of the original cost of a vintage, on average, over the life cycle of each vintage, the SLELG method is designed to depreciate 100% of the original cost of each plant unit over its life. As a consequence, if projections are accurate, the SLELG method should allow for depreciation at a rate more representative of the actual consumption of units of property than SLVG. We concluded in Docket No. 20188 that the proper application and monitoring of this method would not only enhance the carriers' cash flow and present to all interested parties a more accurate and objective financial picture of the carriers' operations and capital requirements, but would also benefit their customers by encouraging innovation and the introduction of new technology.

7. Under both the SLVG and SLELG methods, retirement projections, service life estimates, and depreciation rates are normally determined, in part, through the use of survivor curves. These survivor curves define the relationship between the age of plant investment and the relative percentage expected to remain in service. Under the SLELG methodology, the survivor curves assume an added significance—that of defining the basic (equal life) groups. Under the SLVG method, most survivor curves have been selected only after the staff has completed detailed statistical analysis of historical retirement data. With the added significance of the survivor curves in the SLELG method,

[1] Appendices 1 and 2 are filed as a part of the original document.

the availability and analysis of historical retirement data becomes even more important.

8. We recognized the importance of adequate data in Docket No. 20188 where we found that the SLELG method is acceptable, provided that:

> * * * it is assured that adequate data is available for proper application of the method; that record keeping and reporting practices will enable monitoring of the reasonableness of the rate of allocation of both original cost and provisions for salvage and removal; that such allocation of original cost will achieve allocation over the service life of the property neither more nor less than 100% of the investment net of salvage value.

Accordingly, we directed the staff to take such measures as may be necessary to insure the measurability and accountability of the results under the SLELG method.

9. We further directed the staff to phase in the implementation of SLELG depreciation rates beginning with the outside plant accounts, followed by the central office equipment accounts, and concluding with all other plant accounts. In accordance with this directive, the staff received SLELG rates for the outside plant accounts for four GTE companies last year, and in January of this year we adopted SLELG rates for new additions to most of the outside plant accounts for those carriers. *See* FCC 82–53, 88 FCC 2d 1567 (1982). In addition, SLELG rate proposals were reviewed for the outside plant accounts for most of the remaining GTE companies not scheduled to undergo a complete review of depreciation rates in 1982. As a result of that review, we adopted SLELG rates for most of the outside plant accounts for those companies in July. *See* FCC 82–354, 90 FCC 2d 997 (1982). SLELG rates for the central office equipment and outside plant accounts for the carriers listed on page 1 of this order were also reviewed in detail this year. Our findings and conclusions regarding these rates are discussed beginning in paragraph 16.

C. *Companies Scheduled for Review During 1982.* 10. Since the late 1940's, the Commission has reviewed and prescribed the depreciation rates of approximately one-third of the larger FCC-subject telephone companies each year. In most cases we have prescribed rates for a carrier only after the following actions have been completed:

(1) Submittal of depreciation studies by the carrier.

(2) Staff review of the carrier's filings and studies in support of its proposed life and salvage factors.

(3) Independent staff analysis of such information as the carrier's plant mortality data and equipment retirement plans.

(4) Preparation of preliminary staff recommendations.

(5) Discussion of the carrier's filings and the preliminary Commission staff proposals at a conference in which representatives of the carrier and the staffs of the respective state commissions and the FCC participate (i.e., a three-way meeting).

11. In conjunction with the normal triennial represcription cycle, the three GTE companies whose rates are under consideration here submitted studies proposing new depreciation rates based upon revised life and salvage estimates, using the remaining-life method for all plant accounts and the SLELG method for new additions to the outside plant and central office equipment accounts. These studies were reviewed in detail by the staff, which then prepared its own preliminary life, net salvage, and rate proposals and forwarded them to the companies and the respective state commissions. Some of the state commissions prepared similar studies and recommendations. Three-way meetings were held at which the life, net salvage, and rate proposals of all three parties were thoroughly discussed.

12. Because this was the first time SLELG rates were being proposed for the central office equipment accounts, considerable analysis was required. As a result, in certain instances, the staff was unable to submit its SLELG recommendations prior to the three-way meeting. After completing its analysis and arriving at recommendations, the staff on October 4, 1982, issued a public notice (Report No. 2967) [2] entitled, "Depreciation Rate Prescriptions Proposed For Domestic Telephone Companies." This public notice summarized the FCC staff's proposals for new or revised depreciation rates and the change in depreciation expense that would result if those proposed depreciation rates were approved. The staff transmitted to each company and respective state commission a copy of the October 4 public notice, schedules containing the proposed remaining-life and SLELG rates, and a discussion of the staff analysis underlying the proposed SLELG depreciation rates. For all of the companies under review, agreements regarding the life and net salvage estimates were reached between our staff, the companies, and the respective state commission staffs.

[2] The public notice was erroneously dated October 1, 1982; however, October 4, 1982 is the correct issue date.

III. Summary of Comments

13. Comments in response to the October 4 public notice were received from the North Carolina Utilities Commission and General Telephone Company of the Northwest.

14. General of the Northwest concurred with most of the staff's depreciation rate proposals; however, it took exception to the staff's failure to apply the SLELG method to the Automatic Switching (Analog) account in the states of Oregon and Washington.

15. The North Carolina Commission also concurred with the proposed remaining-life rates and noted that these rates were based on agreements reached between the FCC staff, and staff of the North Carolina Commission, and the General Telephone Company of the Southeast at the three-way meeting. North Carolina expressed its objection to the use of the SLELG method and noted that SLELG rates were not discussed at the three-way meeting.

IV. Discussion of Issues

A. *Effective Dates.* 16. With few exceptions, prior to 1981 depreciation rates were prescribed retroactively to the beginning of the year in which they were filed. This appeared to be a reasonable practice inasmuch as the rates were based on depreciation studies as of that date (i.e., January 1). In 1981, with the initial implementation of the remaining-life and SLELG depreciation methods, many companies requested effective dates other than January 1, 1981. The companies maintained that, because of the controversy surrounding the Commission's approval of the new methods, it would be difficult to get approval of revenue rate increases from state commissions until the FCC had actually ordered new depreciation rates. The companies were also concerned that the states would not allow any retroactive revenue rates to match retroactive prescription of depreciation rates. After considering the regulatory and financial reporting aspects of this issue, we determined that, during this transitional period from whole-life to remaining-life and SLELG methods, we would allow the booking of the new rates on the various effective dates proposed by the companies. *See* FCC 82–40, *supra.*

17. This year the companies filed for effective dates ranging from January 1, 1982 to January 1, 1983. They argued that Section 43.43(e) of our rules and our Order on Reconsideration in Docket No. 20188, *supra,* allow—at the discretion of the company—the booking of new

depreciation rates retroactively to a date no earlier than the first of the year in which they were filed. Section 43.43(e) of our rules states:

> Unless otherwise directed . . . proposed changes in depreciation rates shall be filed at least ninety (90) days prior to the last day of the month with respect to which the revised rates are first to be applied . . . and such rates *may be made retroactive* to a date not prior to the beginning of the year in which the filing is made." [Emphasis added.]

The companies also cited the Order on Reconsideration in Docket No. 20188, 87 FCC 2d 916 at paragraph 16, where we stated:

> * * * retroactive application of the depreciation rates to the beginning of the year is permissive, not mandatory.

18. We maintain our belief that as a matter of sound accounting, depreciation rates should be applied on dates corresponding as closely as possible to the date of the underlying depreciation study. In Docket No. 20188, we determined that proper capital recovery is predicated, in large measure, upon the timely application of the correct depreciation rates. We also noted that, if inaccurate depreciation rates are applied, the resulting misstatement of operating expenses could harm present and potential investors and, ultimately, ratepayers by denying them and the regulators an accurate, objective financial picture of the companies' operations and capital requirements.

19. Nevertheless, during this period of continuing transition to the new methods, retroactive booking of depreciation rates would create uncertainties which, contrary to our intent, may deny some companies a reasonable opportunity to achieve capital recovery. The use of these new methods has resulted in both significant depreciation expense changes and in the requirement for additional company studies to support prescriptions. There has also been resistance on the part of some states to accept remaining-life and SLELG rates at all, and there may be a concomitant reluctance by certain state commissions to grant intrastate revenue rate increases until we actually prescribe depreciation rates using the new methods. We shall, therefore, accept the effective dates as filed by the companies.

B. *Use of SLELG.* 20. In our decision in Docket No. 20188 we considered the arguments expressed by the parties for and against the use of the SLELG method and determined that, provided adequate data is available, the use of SLELG rates is appropriate. In the discussion in the Final Report and Order we found that the use of SLELG comports with the mandate of Section 1 of the Communications Act, "to make available . . . a rapid, efficient, nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges . . ." 47 U.S.C. § 151. We reaffirmed our decision allowing the use of SLELG in the Order on Reconsideration as well as in three prescription orders approved this year (i.e., FCC No. 82–53, 82–353, and 82–354). Nevertheless, the North Carolina Commission has again questioned whether the use of SLELG rates is warranted. Inasmuch as this state has not raised any new arguments or evidence regarding the use of SLELG rates, we have no basis to reverse our decision on this matter. Our rules, as amended in Docket No. 20188, clearly allow the use of SLELG for accounts in which adequate data is available to properly apply and monitor it. Therefore, we will allow its use.

C. *SLELG rates for Automatic Switching (Analog).* 21. General Telephone Company of the Northwest commented that, although the October 4 public notice did not reflect SLELG rates for new additions of analog electronic switching equipment in the states of Oregon and Washington, SLELG rates should be used. Our staff supports the use of SLELG rates for analog electronic switching equipment and although it inadvertantly excluded these rates from the public notice, it supported the use of such rates at the three-way conference. Because these matters were discussed at the three-way meeting, and because the public notice clearly stated that SLELG rates were under consideration for central office equipment, the states had a reasonable opportunity to review the company and FCC staff's SLELG proposals and submit their views for our consideration. We note that no comments objecting to the use of SLELG rates for central office equipment have been received from either state. We agree with the staff and the company that SLELG rates should be used for this account.

D. *Accounts for which SLELG Rates are not Recommended.* 22. In our final decision in Docket No. 20188 we found that the SLELG method is acceptable if adequate data is available for the proper application of the method and if the carriers' record keeping practices will allow for the monitoring of the reasonableness of the rates. In each of the three SLELG prescription orders that we have approved to date (i.e., FCC No. 82–53, 88 FCC 2d 1567 (1982), FCC No. 82–353, 90 FCC 2d 964 (1982) and FCC No. 82–354, 90 FCC 2d 997 (1982)), we concluded that aged retirement data is a minimum requirement for the proper application and monitoring of SLELG rates. We reaffirm our opinion that it is inappropriate to prescribe SLELG rates for accounts in which vintage retirement data is not maintained.

23. The staff proposes that new additions to the electromechanical switching accounts not be depreciated using the SLELG method. They argue that is impractical to determine reasonable future survivor curves for these additions because these accounts consist of classes of equipment which are being rapidly retired from service. The staff proposes that new additions, as well as embedded plant, in these accounts be depreciated using the remaining-life method, and asserts that the remaining-life method will assure timely and complete recovery of capital. In its comments General of the Northwest concurred with the staff's depreciation proposals.

24. While we agree with the staff that the remaining-life method should be used for new additions to the electromechanical accounts, we also believe that to assure full and timely capital recovery on these short remaining life assets, some special measure is required. We, therefore, direct the staff to update remaining-life depreciation rates for these accounts on an annual basis as requested by the companies or as is deemed necessary by the staff. These updates will assure that capital recovery is not unnecessarily deferred.

E. *Original Cost and Net Salvage Rates for SLELG.* 25. We are only prescribing SLELG rates for the original cost portion for the first four years of new additions to most central office and outside plant accounts. These rates will be applied until the next triennial review of depreciation for these companies. At that time the actual results of the use of the SLELG method will be evaluated, and methods and rates will be modified as necessary.

26. Present carrier accounting practices do not allow carries to accumlate net salvage data by vintage for all classes of plant. For example, retirement of a complete line of poles may involve removal of poles of several different vintages, but would normally result in a single aggregate cost of removal and salvage from reuse or sale. In this situation it is not feasible to allocate that cost of removal or salvage among the different vintages in a meaningful manner. For this reason, instead of prescribing net salvage depreciation rates for each vintage, we are prescribing a single net salvage depreciation rate which is to be applied

to all new vintages until the next regular review. *See* FCC 82–53, FCC 82–353, and FCC 82–354.

F. *Accounts for which Remaining-Life Rates are not Recommeded.* 27. In FCC Docket No. 79–105, *supra* we amended the accounting rules for station connections and ordered that all FCC-subject carriers identify and assign the investment in Account 232, Station Connections, to at least two subclasses of plant—Station Connections-Inside Wire and Station Connections-Other. Our order required carriers to expense future costs associated with the Station Connections-Inside Wire subclass on a phase-in or flash-cut basis and to continue to capitalize future costs associated with the Station Connections-Other subclass. Because the retirement ratios and mortality dispersion patterns of the Station Connections-Other subclass are not similar to those for the account as a whole, the depreciation rates prescribed in the past for the entire Station Connections account could not be applied to the Station Connections-Other subclass. Instead, new rates had to be developed. The staff and GTE held discussions and concluded that, in most cases, a 5% depreciation rate should be used until there was sufficient data to ascertain specific mortality characteristics which could then be used to prescribe more precise depreciation rates for this subclass. Consequently, in 1981, the GTE companies filed requests for permission to adopt a 5% depreciation rate for the Station Connections-Other subclass. And, in January, in FCC Order No. 82–40, *supra*, we prescribed a 5% rate for all of the carriers whose rates are under consideration here.

28. In a separate proceeding initiated by an AT&T petition for rulemaking, (see our notice of proposed rulemaking in FCC Docket No. 82–679, 47 FR 44767) significant changes in the accounting rules for Station Connections-Other are under consideration. This proceeding will likely be concluded early in 1983. In the interim, we do not believe it prudent to change the existing 5% depreciation rate for this account.

29. In a few accounts with minimal plant balances, the use of the remaining-life method would result in negative depreciation rates because the reserve balances were in excess of service values (i.e., original cost less net salvage). The staff reviewed several of these instances and found that the primary cause was the transfer of plant from one account to another without a corresponding transfer of reserve amounts. The prescription of a negative depreciation rate is not consistent with generally accepted accounting principles. Therefore, we will adopt the use of a 0% depreciation rate for all accounts where the calculation of remaining-life depreciation rates would result in a negative rate. We recognize that this action does not totally resolve the problem (i.e., reserves greater than in service values). However, the problem is technical in nature and can probably best be resolved at the staff level. We direct the staff to work with the carriers to determine what reserve transfers, if any, are required.

G. *Conclusion.* 30. Having considered the positions set forth by the companies and respective state commissions at the three-way meetings, the responses to the staff's review letters and public notice, the recommendations of the staff, and the proposals of the companies, we find the remaining-life and SLELG rates listed in the appendices to be appropriate.[3]

V. Ordering Clauses

31. Pursuant to Sections 4(i) and 220(b) of the Communications Act of 1934, as amended, 47 U.S.C. 4(i) and 220 (b), It is ordered, That the percentages of depreciation set forth in the Appendices to this order are prescribed effective on the dates listed. Appendix 1 contains remaining-life rates and Appendix 2 contains SLELG rates.

32. It is further ordered, That the companies shall submit to the Commission whole-life as well as remaining-life depreciation studies during the next represcription period.

33. It is further ordered, That the companies shall notify this Commission within 10 days of any deviation from the depreciation percentages and practices prescribed in this order.

Note.— Because of the continuing effort to minimize publishing costs, Appendices 1 & 2 (Schedules of Annual Percentages of Depreciation) will not be printed herein. However, copies of this document in its entirety are available through the distribution centers listed in the FCC Office of Public Affairs, Room 202, 1919 M St., N.W., Washington, D.C. 20554. A copy is also available for inspection in the FCC Dockets Branch, Room 239, and the FCC Library, Room 639, both located at 1919 M St., N.W., Washington, D.C.

[3] We do not decide in this order the effect of our prescribing these rates for intrastate ratemaking purposes. Rather, the preemptive effect of this Commission's accounting and/or depreciation determinations is before us in a separate proceeding initiated by a further *Petition for Reconsideration* filed by AT&T in Docket No. CC 79–105, 85 FCC 2d 818 (1981), *recon.*, 89 FCC 2d 1094 (1982), and a *Petition for Declaratory Ruling* filed by the General Telephone Company of Ohio.

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 82–34352 Filed 12–17–82; 8:45 am]

BILLING CODE 6712–01–M

[FCC 82–544]

Prescription of Revised Percentages of Depreciation Pursuant to Communications Act, as Amended, for Continental Telephone Co. of California and Continental Telephone Co. of Upstate New York, Inc.

AGENCY: Federal Communications Commission.

ACTION: Depreciation Rate Prescription Order.

SUMMARY: Pursuant to the Communications Act of 1934, as amended, Federal Communications Commission has ordered the named Continental Telephone Companies to apply the percentages of depreciation which are set forth in the Appendix [1] to the Order. The two named companies filed for revised depreciation rates for various accounts and submitted studies and data to substantiate their request. The intended effect of this action is to charge, is accurately as circumstances will allow, the cost of consumption of depreciable assets to the periods in which the assets are useful in the production of revenues.

EFFECTIVE DATE: The Companies are to apply the depreciation rates as of the date or dates set forth in the Appendix to the Order. In no case is an effective date prior to January 1, 1982.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Kenneth P. Moran, Chief Depreciation Rates Branch, (202) 634–1730.

SUPPLEMENTARY INFORMATION:

In the matter of The Prescription of Revised Percentages of Depreciation pursuant to Section 220(b) of the Communication Act of 1934, as amended for: Continental Telephone Company of California, Continental Telephone Company of Upstate New York, Inc.

Order

Adopted December 8, 1982.

Released December 13, 1982.

I. Introduction

1. Section 220(b) of the Communications Act of 1934, as amended, 47 U.S.C. 220(b), states that

[1] The appendix is filed as a part of the original document.

the Commission shall, as soon as practicable, prescribe classes of property for which depreciation charges may be included in operating expenses and the percentages of depreciation which shall be charged to each of the classes. It also states that the Commission may, when it deems necessary, modify the classes and percentages so prescribed.

2. By this order we prescribe revised percentages of depreciation (depreciation rates) for the two Continental Telephone Corporation companies listed above using the straight line vintage group remaining-life (remaining-life) method. This order is the first depreciation prescription order for Continental Telephone Company of California (Continental-California). Depreciation rates were previously prescribed for Continental Telephone Company of Upstate New York (Continental-Upstate New York).

II. Background

A. *Remaining-Life Method.* 3. Prior to 1981, we had only used the straight line vintage group whole-life (whole-life) depreciation method in prescribing depreciation rates for telephone companies' plant. Using this method, we had attempted to determine the appropriate depreciation accruals applicable to each year's operations using current estimates of life and net salvage. As estimates of life and net salvage changed over time, the whole-life rates were changed in accordance with these changes in estimates. However, using whole-life concepts, no attempt was made to adjust the rates to allow for reserve surpluses or deficits resulting from the cumulative over- or under-estimation of life and net salvage factors. This changed with our final decision in FCC Docket No. 20188, 83 FCC 2d 267 (1980), *reconsideration,* 87 FCC 2d 916 (1981), where we revised Part 31 of the Rules and Regulations, the "Uniform System of Accounts for Class A and B Telephone Companies," to allow the use of the remaining-life depreciation method. The remaining-life method is designed to distribute the unrecovered cost (original cost less the sum of the depreciation reserve and future net salvage) of a group of assets over its estimated average life expectancy; thus, this procedure includes an adjustment which allocates any reserve deficit or surplus over the estimated average remaining life.

4. We directed the staff to phase in the implementation of remaining-life depreciation rates in conjuction with the normal triennial represcription cycle (see paragraph 5). For Continental, implementation began with the Continental Telephone Company of Virginia which was regularly scheduled for review in 1981. This company submitted a study requesting revised depreciation rates using the remaining-life method. After a complete review, we adopted remaining-life depreciation rates for Continental-Virginia in January. *See* FCC 82-41, 88 FCC 2d 1344 (1982). Remaining-life rates or the two carriers normally scheduled for review in 1982 (i.e., Continental-California and Continental-Upstate New York) were reviewed in detail this year. Our findings and conclusions regarding these rates are discussed beginning in paragraph 12.

B. *Companies Scheduled for Review During 1982.* 5. Since the late 1940's, the Commission has reviewed and prescribed the depreciation rates of approximately one-third of the larger FCC-subject telephone companies each year. In most cases we have prescribed rates for a carrier only after the following actions have been completed:

(1) Submittal of depreciation studies by the carrier.

(2) Staff review of the carrier's filings and studies in support of its proposed life and salvage factors.

(3) Independent staff analysis of such information as the carrier's plant mortality data and equipment retirement plans.

(4) Preparation of preliminary staff recommendations.

(5) Discussion of the carrier's filings and the preliminary Commission staff proposals at a conference in which representatives of the carrier and the staffs of the respective state commission and the FCC participate (i.e., a three-way meeting).

6. In conjunction with the normal triennial represcription cycle, Continental-California and Continental-Upstate New York submitted studies proposing new depreciation rates based upon revised life and salvage estimates, using the remaining-life method for all plant accounts. These studies were reviewed in detail by the staff, which then prepared its own preliminary life, net salvage, and rate proposals and forwarded them to the companies and the respective state commissions. Three-way meetings were held at which the life, net salvage, and rate proposals of all three parties were thoroughly discussed. For all accounts of both companies, agreements regarding life and net salvage estimates were reached between our staff, the companies, and the respective state commission staffs.

7. As a result of the review discussed above, on October 4, 1982, the staff issued a public notice (Report No. 2967) [1] entitled, "Depreciation Rate Prescriptions Proposed for Domestic Telephone Companies." This public notice summarized the FCC staff's new or revised depreciation rates for Continental-Upstate New York and the change in depreciation expense that would result if these proposed depreciation rates were approved. The staff transmitted to the company and the New York Public Service Commission a copy of this public notice together with a schedule of the proposed remaining-life rates. On October 12, 1982, the staff issued an additional public notice (Report No. 2969), entitled as the first, summarizing the staff's new or revised depreciation rates for Continental-California and the change in depreciation expense that would result if these proposed rates were approved. The staff transmitted to the company and the California Public Utilities Commission a copy of this public notice together with a schedule of the proposed remaining-life rates. The following section summarizes the issues raised by the respondents to these public notices.

III. Summary of Comments

8. Continental-Upstate New York responded to the October 4 public notice, and the California Commission responded to the October 12 public notice.

9. Continental-Upstate New York noted that this prescription is not a routine review of prior whole-life rates, but rather the initial move into full remaining-life rates. It stated that remaining-life rates will produce a substantial increase in depreciation expense. In Continental's view, the approval of rates retroactively would not ". . . represent recovery of capital but, rather, an erosion of earnings." Continental urged that the FCC approve the requested effective date.

10. Continental-Upstate New York also stated that it is now seeking represcription of depreciation rates for Continental Telephone Company of Upstate New York, instead of Continental Telephone Company of New York as originally requested. When it filed its depreciation studies, it expected to complete a merger with five smaller Continental companies prior to the FCC prescription of new depreciation rates. Since Continental now expects the merger to take place in 1983, it requested that the FCC prescribe depreciation rates under the company's

[1] The public notice was erroneously dated October 1, 1982; however, October 4, 1982 is the correct issue date.

present name. Continental also stated that the five smaller Continental companies will adopt the prescribed depreciation rates, as if the merger had taken place prior to FCC prescription.

11. The California Commission urged that the January 1, 1983, effective date for Continental-California be approved as requested by the company. California has adopted the policy of making depreciation changes effective concurrent with the effective date of the resulting revenue rate changes. They stated that this policy eliminates the negative effects of a retroactive change. California alleged that the company would show a large unrecovered expense in the year that the depreciation rates were made effective if there was no corresponding revenue recovery. The possible negative effects on bond rating and equity value generated by a lack of coordination at the state and federal regulatory levels would not, in California's view, be in the best interest of Continental-California or its ratepayers.

IV. Discussion of Issues

A. *Rates for Continental-Upstate New York.* 12. The staff analyzed a depreciation study for Continental Telephone Company of New York, a new entity to be formed from the proposed merger of Continental-Upstate New York with five smaller Continental companies. This merger, which had been expected to be consummated in 1982, is now scheduled for early 1983. Accordingly, Continental has requested that we prescribe depreciation rates for the company under its current name, Continental Telephone Company of Upstate New York.

13. The depreciation study which Continental-Upstate New York submitted to the staff was based upon plant owned by Continental-Upstate New York and the five smaller companies. The company stated that the rates prescribed would be applied to both Continental-Upstate New York and the five smaller companies, as if the merger had already taken place. Continental-Upstate New York is the largest portion of the prospective merged company. The staff believes that depreciation rates determined solely for Continental-Upstate New York's facilities would approximate those determined from the study of the merged company. Therefore, we approve the prescription of depreciation rates for Continental-Upstate New York, and expect that the rates prescribed by this order will be applied to the accounts of the new company, Continental Telephone Company of New York, upon completion of the merger in 1983.

B. *Effective Dates.* 14. With few exceptions, prior to 1981 depreciation rates were prescribed retroactively to the beginning of the year in which they were filed. This appeared to be a reasonable practice inasmuch as the rates were based on depreciation studies as of that date (i.e., January 1). In 1981, with the initial implementation of the remaining-life and SLELG depreciation methods, many companies requested effective dates other than January 1, 1981. The companies maintained that, because of the controversy surrounding the Commission's approval of the new method, it would be difficult to get approval of revenue rate increases from State commissions until the FCC had actually ordered new depreciation rates. The companies were also concerned that the states would not allow any retroactive revenue rates to match retroactive prescription of depreciation rates. After considering the regulatory and financial reporting aspects of this issue, we determined that, during this transitional period from the whole-life to the remaining-life method, we would allow the booking of the new rates on the various effective dates proposed by the companies. *See* FCC 82–41, *supra.*

15. This year Continental-California filed for a January 1, 1983, effective date. Continental-Upstate New York filed for a December 1, 1982, effective date. The companies argued that Section 43.43(e) of our rules allow—at the discretion of the company—the booking of new depreciation rates retroactively to a date no earlier than the first of the year in which they were filed. Section 43.43(e) of our rules states:

> Unless otherwise directed * * * proposed changes in depreciation rates shall be filed at least ninety (90) days prior to the last day of the month with respect to which the revised rates are first to be applied * * * and such rates *may be made retroactive* to a date not prior to the beginning of the year in which the filing is made." [Emphasis added.]

16. We maintain our belief that as a matter of sound accounting, depreciation rates should be applied on dates corresponding as closely as possible to the date of the underlying depreciation study. In Docket No. 20188, we determined that proper capital recovery is predicated, in large measure, upon the timely application of the correct depreciation rates. We also noted that, if inaccurate depreciation rates are applied, the resulting misstatement of operating expenses could harm present and potential investors and, ultimately, ratepayers by denying them and the regulators an accurate, objective financial picture of the companies' operations and capital requirements.

17. Nevertheless, we agree with the California Commission that, during this period of continuing transition to the new method, retroactive booking of depreciation rates would create uncertainties which, contrary to our intent, may deny some companies a reasonable opportunity to achieve capital recovery. The use of the new method has resulted in both significant depreciation expense changes and in the requirement for additional company studies to support prescriptions. There has also been resistance on the part of some states to accept remaining-life rates at all, and there maybe a concomitant reluctance by certain state commissions to grant intrastate revenue rate increases until we actually prescribe depreciation rates using the new method. We shall, therefore, accept the effective dates as filed by the companies.

C. *Accounts for which Remaining-Life Rates are not Recommended.* 18. In FCC Docket No. 79–105, 85 FCC 2d 818 (1981), we amended the accounting rules for station connections and ordered that all FCC-subject carriers identify and assign the investment in Account 232, Station Connections, to at least two subclasses of plant—Station Connections-Inside Wire and Station Connections-Other. Our order required carriers to expense future costs associated with the Station Connections-Inside Wire subclass on a phase-in or flash-cut basis and to continue to capitalize future costs associated with the Station Connections-Other subclass. Because the retirement ratios and mortality dispersion patterns of the Station Connections-Other subclass are not similar to those for the account as a whole, the depreciation rates prescribed in the past for the entire Station Connections account could not be applied to the Station Connections-Other subclass. Instead, new rates had to be developed. The staff and the companies held discussions and determined that a 5% rate would be used for Continental-California and a 2.5% rate would be used for Continental-Upstate New York until there was sufficient data to ascertain specific mortality characteristics which could then be used to prescribe more precise depreciation rates. In January, in FCC Order No. 82–41, *supra*, we prescribed a 2.5% rate for Continental-Upstate New York.[3]

[3] Continental-California is having depreciation rates prescribed for the first time in this order.

10. In a separate proceeding initiated by an AT&T petition for rulemaking (see our notice of proposed rulemaking in FCC Docket No. 82–679, 47 FR 44767), significant changes in the accounting for Station Connections-Other are under consideration. This proceeding will likely be concluded early in 1983. In the interim, we do not believe it prudent to change the existing depreciation rates for this account.

20. In a few accounts with minimal plant balances, the use of the remaining-life method would result in negative depreciation rates because the reserve balances were in excess of service values (i.e., original cost less net salvage). The staff reviewed several similar instances and found that the primary cause was the transfer of plant from one account to another without a corresponding transfer of reserve amounts. The prescription of a negative depreciation rate is not consistent with generally accepted accounting principles. Therefore, we will adopt the use of a 0% depreciation rate for all accounts where the calculation of remaining-life depreciation rates would result in a negative rate. We recognize that this action does not totally resolve the problem (i.e., reserves greater than service values). However, the problem is technical in nature and can probably best be resolved at the staff level. We direct the staff to work with the carriers to determine what reserve transfers, if any, are required.

D. *Conclusion.* 21. Having considered the positions set forth by the companies and respective state commissions at the three-way meetings, the responses to the staff's review letters and public notices, the recommendations of the staff, and the proposals of the companies, we find the remaining-life rates listed in the Appendix to be appropriate.[4]

V. Ordering Clauses

22. Pursuant to Sections 4(i) and 220(B) of the Communications Act of 1934, as amended, 47 U.S.C. 4(i) and 220(b), IT IS ORDERED, That the percentages of depreciation set forth in the Appendix to this order are prescribed effective on the dates listed.

23. It is further ordered, that the companies shall submit to the Commission whole-life depreciation studies during the next as well as remaining-life represcription period.

24. It is further ordered, that the companies shall notify this Commission within 10 days of any deviation from the depreciation percentages and practices prescribed in this order.

Note: Because of the continuing effort to minimize publishing costs, the Appendix of this document will not be printed herein. However, copies of this document in its entirety may be obtained from the distribution centers listed in the FCC Office of Public Affairs, Room 202, 1919 M St., N.W., Washington, D.C. 20554. A copy is also available for inspection in the FCC Dockets Branch, Room 239, and the FCC Library, Room 639, both located at 1919 M St., N.W., Washington, D.C.

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

[4] We do not decide in this order the effect of our prescribing these rates for intrastate ratemaking purposes. Rather, the preemptive effect of this Commission's accounting and/or depreciation determinations is before us in a separate proceeding initiated by a further *Petition for Reconsideration* filed by AT&T in Docket No. CC 79–105, 85 FCC 2d 818 (1981), *recon.*, 89 FCC 2d 1094 (1982), and a *Petition for Declaratory Ruling* filed by the General Telephone Company of Ohio.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–673–DR]

Arkansas; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Arkansas (FEMA–673–DR), dated December 13, 1982, and related determinations.

DATE: December 13, 1982.

FOR FURTHER INFORMATION CONTACT: Sewall H. E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0501.

SUPPLEMENTARY INFORMATION: Pursuant to the authority vested in the Director of the Federal Emergency Management Agency by the President under Executive Order 12148, effective July 15, 1979, and delegated to me by the Director under Federal Emergency Management Agency Delegation of Authority, and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that, in a letter of December 13, 1982, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Arkansas resulting from severe storms, tornadoes, and flooding beginning on or about December 2, 1982, is of sufficient severity and magnitude to warrant a major-disaster declaration under Pub. L. 93–288. I, therefore, declare that such a major disaster exists in the State of Arkansas.

In order to provide Federal asistance, you are hereby authorized to allocate, from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance in the affected areas. You also are authorized to provide necessary Public Assistance in the affected areas, except that an acceptable State commitment shall be provided. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under Pub. L. 93–288 for public assistance will be limited to 75 percent of total eligible costs in the designated area.

The time period prescribed for the implementation of section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of Federal Emergency Management Agency under Executive Order 12148, and delegated to me by the Director under the Federal Emergency Management Agency Delegation of Authority, I hereby appoint Mr. Alton S. Ray, Jr. of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following area of the State of Arkansas to have been affected adversely by this declared major disaster:

For Individual Assistance only, the Counties of:

Conway	Pope
Faulkner	Pulaski
Garland	Randolph
Independence	Saline
Jackson	Sharp
Lawrence	Van Buren
Ouachita	White

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Dave McLoughlin,

Acting Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

[FEMA–672–DR]

Missouri; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Missouri

(FEMA–672–DE), dated December 10, 1982, and related determinations.

DATED: December 10, 1982.

FOR FURTHER INFORMATION CONTACT:
Sewall H. E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0501.

Notice: Pursuant to the authority vested in the Director of the Federal Emergency Management Agency by the President under Executive Order 12148, effective July 15, 1979, and delegated to me by the Director under Federal Emergency Management Agency Delegation of Authority, and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that, in a letter of December 10, 1982, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Missouri resulting from severe storms, tornadoes, and flooding beginning on or about December 1, 1982, is of sufficient severity and magnitude to warrant a major-disaster declaration under Pub. L. 93–288. I, therefore, declare that such a major disaster exists in the State of Missouri.

In order to provide Federal assistance, you are hereby authorized to allocate, from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance in the affected areas. You also are authorized to provide necessary Public Assistance in the affected areas, except that an acceptable State commitment shall be provided. Consistent with the requirement that Federal assistance by supplemental, any Federal funds provided under Pub. L. 93–288 for public assistance will be limited to 75 percent of total eligible costs in the designated area.

The time period prescribed for the implementation of Section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of Federal Emergency Management Agency under Executive Order 12148, and delegated to me by the Director under the Federal Emergency Management Agency Declaration of Authority, I hereby appoint Mr. David R. Ruby of the Federal Emergency Management Agency to act as the as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following area of the State of Missouri to have been affected adversely by this declared major disaster:

For Individual Assistance only, the Counties of:

Bolinger	Phelps
Cape Girardeau	Pulaski
Carter	Ripley
Franklin	St. Charles
Iron	Ste. Genevieve
Jefferson	St. Louis
Lincoln	Wayne
Perry

BILLING CODE 6720–01–M

FEDERAL MARITIME COMMISSION

[Independent Ocean Freight Forwarder License No. 1508]

Alas Cargo Service, Inc.; Order of Revocation

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.15(d) of Federal Maritime Commission General Order 4 further provides that a license shall be automatically revoked for failure of a licensee to maintain a valid bond on file.

The bond issued in favor of Alas Cargo Service, Inc., 7489 N.W. 7th Street, Miami, FL 33126 was cancelled effective December 5, 1982.

By letter dated November 9, 1982, Alas Cargo Service, Inc. was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 1508 would be automatically revoked unless a valid surety bond was filed with the Commission.

Alas Cargo Service, Inc. has failed to furnish a valid bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (Revised), § 10.01(f) dated November 12, 1981;

Notice if hereby given, that Independent Ocean Freight Forwarder License No. 1508 be and is hereby revoked effective December 5, 1982.

It is ordered, that Independent Ocean Freight Forwarder License No. 1508 issued to Alas Cargo Service, Inc. be returned to the Commission for cancellation.

It is further ordered, that a copy of this Order be published in the **Federal Register** and served upon Alas Cargo Service, Inc.

Albert J. Klingel, Jr.,

Director, Bureau of Certification and Licensing.

BILLING CODE 6730-01-M

[Independent Ocean Freight Forwarder License No. 2329]

Mia Forwarders, Inc.; Order of Revocation

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.15(d) of Federal Maritime Commission General Order 4 further provides that a license shall be automatically revoked for a failure of a licensee to maintain a valid bond on file.

The bond issued in favor of Mia Forwarders, Inc., 4733 N.W. 72nd Avenue, Miami, FL 33166 was cancelled effective December 1, 1982.

By letter dated November 12, 1982, Mia Forwarders, Inc. was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 2329 would be automatically revoked unless a valid surety bond was filed with the Commission.

Mia Forwarders, Inc. has failed to furnish a valid bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (Revised), § 10.01(f) dated November 12, 1981;

Notice is hereby given, that Independent Ocean Freight Forwarder License No. 2329 be and is hereby revoked effective December 1, 1982.

It is ordered, that Independent Ocean Freight Forwarder License No. 2329 issued to Mia Forwarders, Inc. be returned to the Commission for cancellation.

It is further ordered, that a copy of this Order be published in the **Federal Register** and served upon Mia Forwarders, Inc.

[Agreement No. 10461]

United States/Republic of the Philippines Ocean Liner Trade; Availability of Finding of No Significant Impact

Upon completion of an environmental assessment, the Federal Maritime Commission's Office of Energy and Environmental Impact has determined that the Commission's decision on Agreement No. 10461 will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 et seq., and that preparation of an environmental impact statement is not required.

The agreement is an equal access agreement in the United States/Republic of the Philippines Ocean Liner Trade. The parties include American President Lines, Ltd., Lykes Bros. Steamship Company, Inc., Sea-Land Service, Inc. and Waterman Steamship Corporation, Galleon Shipping Corporation, and Maritime Co. of the Philippines. Under the terms of the agreement, the parties agree to petition their respective governments to grant national flag vessels access to cargo covered by each nation's cargo reservation laws.

This Finding of No Significant Impact (FONSI) will become final within 20 days of publication of this notice in the **Federal Register** unless a petition for review is filed pursuant to 46 CFR 547.6(b).

The FONSI and related environmental assessment are available for inspection on request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, D.C. 20573, telephone (202) 523-5725.

BILLING CODE 6820-26-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Advisory Council on Social Security; Public Hearings

AGENCY: Health and Human Services Department.

ACTION: Notice of public hearings.

SUMMARY: The Secretary of Health and Human Services announced on September 16, 1982, the establishment of the Advisory Council on Social Security. The Council is charged to place particular emphasis on a review of the Medicare program, and to prepare and submit reports on its findings and recommendations.

In an effort to obtain the views of interested organizations and individuals, within the constraints of available time, the Council decided to conduct three public hearings in designated locations around the country. Notice is hereby given that one-day hearings will be held in Atlanta, on February 1, 1983, and in San Francisco on February 24, 1983. A hearing will also be held in Chicago on a date to be announced later.

ADDRESS: The Atlanta hearing will be held in the Strom Auditorium, Richard B. Russell Building, 75 Spring Street, Atlanta, Ga. 30303. The San Francisco hearing will be held in the Auditorium, Room 300, San Francisco Department of Public Health, 101 Grove Street, San Francisco, CA 94102.

FOR FURTHER INFORMATION CONTACT: Thomas R. Burke, Executive Director, 200 Independence Avenue, SW., Washington, D.C. 20201; telephone 202–755–8670 or 755–8671.

SUPPLEMENTARY INFORMATION: The hearings are open to the public. Attendance will be limited to the space available. Interested parties are invited to present testimony on Medicare issues; however, only those requesting in advance, preferably in writing, to appear will be permitted to present oral statements. Presenters should submit, five days in advance, 20 copies of their presentation, and should bring an additional 50 copies to the hearing to be made available to the public. Oral presentation should summarize the written statement, and will be limited to a maximum of 5 minutes. Other written material can be submitted for the record. Submit written requests specifying at which hearing location testimony is desired to be given to the Advisory Council on Social Security, Attn: Public Hearing, 200 Independence Avenue, SW., Washington, D.C. 20201, or telephone 202–755–8670 or 755–8671. The designated Chairperson or the Executive Director reserves the right to determine order of presentation, but will make every effort, within available time, to hear all who wish to be heard.

Sign language interpreting services will be provided if requested in advance.

Records will be kept of all public hearings and will be available for public inspection at the Office of the Administrative Officer, Advisory Council on Social Security, Room 317–H, HHH Building, 200 Independence Avenue, SW., Washington, D.C. 20201.

Thomas R. Burke,

Executive Director.

BILLING CODE 4120–03–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. N–82–1191]

Submission of Proposed Information Collection To OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirements described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office and Building, Washington, D.C. 20503

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410, telephone (202) 755–5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirement is described as follows:

Notice of Submission of Proposed Information Collection to OMB

PROPOSAL: Preliminary Site Report by Indian Housing Authority.
OFFICE: Housing.
FORM NUMBER: HUD-3188.
FREQUENCY OF SUBMISSION: On Occasion.
AFFECTED PUBLIC: State or Local Governments.
ESTIMATED BURDEN HOURS: 2600.
STATUS: Extension;
CONTACT: Patricia Arnaudo, HUD, (202) 755–6522 Robert Neal, OMB, (202) 395–6880.

(Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).)

Dated: November 29, 1982.

Judith L. Tardy,

Assistant Secretary for Administration.

[FR Doc. 82–34424 Filed 12–17–82; 8:45 am]

BILLING CODE 4210–25–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Indian Child Welfare Act; Grant Funds Distribution Formula

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Title II of the Indian Child Welfare Act of 1978 authorized the Secretary of the Interior to make grants to Indian tribes and Indian organizations for establishment and operation of Indian child and family service programs.

In order to ensure insofar as possible that all applicants approved for funding

receive a proportionate share of available grant funds under the provisions of 25 CFR part 23, "Application and selection criteria", established by the Bureau of Indian Affairs, the distribution of these funds will be accomplished in accordance with the following formula.

Grants will be awarded to individual tribes or organizations, or to consortia of tribes and organizations within the following categories:

A. A maximum of up to $50,000 for eligible applicants with a total service area population of less than 2,500;

B. A maximum of up to $150,000 for eligible applicants with a total service area population of more than 2,500 but less than 7,500;

C. A maximum of up to $300,000 for eligible applicants with a total service area population greater than 7,500.

Service area population means the total number of Indians eligible for service under 25 CFR 23.2(b)(2) and/or 23.2(d)(3) in the geographical area to which the tribe or organization can realistically provide the services proposed in the application.

These population figures will be based on identifiable statistical resources and the tribe's or organization's prior service records. Applicants will not be funded for more than their demonstrated need, as specifically addressed in 25 CFR 23.24 and 23.25.

A consortium, which is an agreement or association of two or more eligible applicants, may apply for the level of grant above the level which they would be eligible for due to their total service population. However, at no time may any Indian tribe or organization which is either an eligible individual applicant in accordance with 25 CFR 23.21 or a member of a consortium receive Indian Child Welfare Act grant funds greater than a maximum grant of $300,000 through a direct grant of through subgranting procedures with approved applicants.

An appropriation for this program has not been decided upon at this time. However, in anticipation of an appropriation a preliminary projection of percentage of funds which will be allocated to each of the Bureau of Indian Affairs' area offices follows:

	Percent
Aberdeen	7.1
Albuquerque	6.4
Anadarko	7.3
Billings	8.2
Juneau	10.8
Minneapolis	11.8
Muskogee	8.0
Navajo	3.0
Phoenix	8.1
Portland	11.0
Sacramento	12.7
Eastern	8.2

These preliminary allocations are meant for information purposes to the public. They were determined by averaging the following factors for each area office: the total Indian population based on the 1980 census figures and the 1981 estimates of Indian population and labor force statistics compiled by the Bureau of Indian Affairs. Adjustments were made considering number of grantees by area in previous years, and the structure of the grant program. Further adjustments may be made pending a final budget authorization.

Final allocations to the area offices for funding applications will be made at the Central Office.

Kenneth Smith,

Assistant Secretary, Indian Affairs.

December 13, 1982.

BILLING CODE 4310-02-M

Indian Child Welfare Act; Title II Grant Applications

The period for submitting grant applications is effective on the date of publication in the **Federal Register** and will end January 28, 1983. It is necessary that specific timeframes be established for submission of applications so that all applicants approved for funding under the provisions of 25 CFR Part 23 may be included in a competitive review and ranking process, and can receive a proportionate share of available grant funds.

Application materials and related information may be obtained from Bureau of Indian Affairs offices nearest the applicant. Applications are being accepted in anticipation of an appropriation. All grant application approvals will be subject to the availability of funds. Grant awards will be for a one-year period.

Grant applications will be accepted for the purpose of:

(a) Establishment and operation of Indian child and family service programs which promote the stability of Indian families; and

(b) Providing non-Federal matching shares for other Federal financial assistance programs for "on or near" reservation programs which contribute to the purpose stated in (a) above.

Applications must be received in the appropriate Bureau of Indian Affairs, Social Services Office, on or before 4:15 p.m. on the closing date of the application period. Applications sent by registered or certified mail not later than the closing date as evidenced by the U.S. Postal Service postmark or the original receipt from the U.S. Postal Service, will be considered.

Kenneth Smith,

Assistant Secretary—Indian Affairs.

December 13, 1982.

BILLING CODE 4310-02-M

Bureau of Land Management

[F-14902-A]

Alaska Native Claims Selection

The purpose of this decision is to modify page 13902 of the **Federal Register**, April 1, 1982 and item 2 of page 4 of the decision dated March 31, 1982, to include the following Sec. 17(b) easement reservation.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

(EIN 2 C3, D1) An easement for an existing access trail twenty-five (25) feet in width from a point in Sec. 26, T. 6 N., R. 73 W., Seward Meridian, southerly to the village of Eek. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement. This trail is limited to winter use only.

On October 15, 1982 the State Director Memo concerning navigability was amended to include an unnamed slough from its mouth on the Kuskokwim River in Sec. 1, T. 6 N., R. 73 W., Seward Meridian, easterly to a point on the easterly boundary of Sec. 25, T. 7 N., R. 71 W., Seward Meridian, as a navigable water body.

The submerged lands underlying the above unnamed slough are hereby excluded from the lands approved for conveyance to Napaskiak Incorporated.

Except as modified by this decision, the decision of March 31, 1982 stands as written.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in *The Tundra Drums*.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 *Code of Federal Regulations* (CFR), Part 4, Subpart E, as revised. However, pursuant to Pub. L. 96-487, this decision constitutes the final administrative

determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of this decision by personal service or certified mail, return receipt requested, shall have 30 days from receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who failed or refused to sign the return receipt and parties who received a copy of this decision by regular mail which is not certified, return receipt requested, shall have until January 19, 1983, to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

Napaskiak Incorporated, Via Bethel, Alaska 99557.

Calista Corporation, 516 Denali Street, Anchorage, Alaska 99501.

Ann Johnson,

Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-84-M

Office of Surface Mining Reclamation and Enforcement

Abandoned Mine Lands Reclamation Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Notice of availability of Findings of No Significant Impact (FONSI) addressing Environmental Assessments (EAs) for development of 4 abandoned mine land projects under the State of North Dakota Reclamation Plan.

SUMMARY: OSM has prepared EAs on projects submitted in the Federal Grant Application from the State of North Dakota to the Office of Surface Mining.

A FONSI has been made on the 4 reclamation projects indicated below and included in the grant application developed under Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), 30 U.S.C. 1231–1234.

ADDRESS: Copies of the EAs and FONSI are available for inspection or may be obtained at the following location between the hours of 8:00 a.m. and 4:00 p.m.: Office of Surface Mining Reclamation and Enforcement, Wyoming Field Office, P.O. Box 1420, 935 Pendell Boulevard, Mills, Wyoming 82644.

FOR FURTHER INFORMATION CONTACT: William Thomas, Director, Wyoming Field Office, (307) 328–5830. Same address as above.

Reclamation Projects included in the FONSI location and description:

1. Buechler Mine Site, Ward County, Underground tunnels and active subsidence.

2. Beulah Mine Site, Mercer County, Vertical openings and active subsidence.

3. Garrison Mine Site, McLean County, Active subsidence.

4. New Leipzig Mine Site, Grant County, Vertical openings and active subsidence.

Dated: December 12, 1982.

William B. Schmidt,

Assistant Director, Program Operation and Inspection.

BILLING CODE 4310-05-M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

[Redelegation of Authority No. 99.1.3]

Chief, Government Property Resources Division, et al.; Redelegation of Authority Regarding Contracting Functions

Pursuant to the authority delegated to me under Redelegation of Authority No. 99.1, from the Assistant to the Administrator for Management, dated May 1, 1973 (38 FR 12836), as amended, I hereby redelegate to certain offices the following authorities:

1. To the Chief, Government Property Resources Division, and to the Chiefs, Field Offices of the Government Property Resources Division:

a. With respect to the reconditioning by a contractor listed in the General Services Administration regional term contract price schedules or the Department of the Army National maintenance contracts of property acquired by the Agency for International Development pursuant to section 608(a) of the Foreign Assistance Act, the authority to:

(1) Execute purchase orders for services and supplies for reconditioning and spare parts support required in relation to an item being reconditioned;

(2) Approve the contractor's invoices for direct payment to the contractor; and

(3) Inspect and accept each item completed by the contractor.

2. To the Chief, Government Property Resources Division: the authority to execute purchase orders for small purchases as defined in § 1–3.6 of the Federal Procurement Regulations for services and supplies required to carry on the operations of the Government property resources programs.

The authorities delegated herein are to be exercised in accordance with the Federal Property Management Regulations (FPMR) promulgated by the General Services Administration and in accordance with regulations, procedures and policies established, modified, and promulgated within A.I.D.; and are not in derogation of the authority of the Director of the Office of Contract Management to exercise any of the functions herein redelegated.

The authorities redelegated herein may not be redelegated but may be

exercised by duly authorized persons performing the functions of the Chief(s) of offices named above in an acting capacity.

Any official actions taken prior to the effective date hereof by officers duly authorized pursuant to the delegation revoked hereunder are hereby continued in effect, according to their terms until modified, revoked, or superseded by action of the officer(s) to whom I have delegated relevant authority in this redelegation.

Redelegation of Authority No. 99.1.3 dated January 21, 1975 (40 FR 4160), as amended, is hereby revoked.

This redelegation of authority is effective on date of signature.

Dated: December 6, 1982.

Hugh L. Dwelley,

Director, Office of Contract Management.

BILLING CODE 6116-01-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F-222

The following applications were filed in region I: Send protests to: Interstate Commerce Commission, Regional Authority Center, 150 Causeway Street, Room 501, Boston, MA 02114.

MC 140349 (Sub-1-3 TA), filed December 3, 1982. Applicant: COPE/BESTWAY EXPRESS, INC., 2024 Harvey Road, Grand Island, NY 14072. Representative: D. Thomas Cope (same as applicant). *Contract carrier:* irregular routes: *Brake drums and disc brakes, rotors, new unfinished brake shoes and disc brake pads* between Erie County in the State of NY and States in the U.S. east of the Mississippi River, under continuing contract(s) with Aimco Div., International Telephone & Telegraph, Tonawanda, NY. Supporting shipper: Aimco Div., International Telephone & Telegraph Corp., 435 Creekside Drive, Tonawanda, NY 14150.

MC 164998 (Sub-1-1TA), filed December 3, 1982. Applicant: GENCARELLI OIL CO., INC., 110 Oak Street, Westerly, RI 02891. Representative: Charles R. Reilly, 391 Davisville Road, North Kingstown, RI 02852. *Gasoline* between East Providence, RI, and Mystic, Preston and Stonington, CT. Supporting shipper: Carlisle Oil Company, Inc., 141 Lowell Road, Concord, MA 01742.

MC 165030 (Sub-1-1TA), filed December 6, 1982. Applicant: LOBOSCO TRADING COMPANY, INC., 121 McBride Avenue, Patterson, NY 07501. Representative: Robert B. Pepper, 168 Woodbridge Avenue, Highland Park, NJ 08904. *Plastic and paper products, textile products, foodstuffs, and recycling materials, except in bulk* between New York, NY Commercial Zone, on the one hand, and, on the other points in CT, DE, MA, NH, NJ, NY, PA, RI and VT. Clark, 2417 Bank Dr., Ste. 8, Boise, ID 83705. *Fertilizer*, dry in bulk, between points in ID, CA, AZ, and NV, for 270 days. An underlying ETA seeds 120 day authority. Supporting shippers: J. R. Simplot Company, P.O.B. 27, Boise, ID, 83707 Simcal Chemical Co., P.O.B. 9460, Fresno, CA 93792.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 82–34398 Filed 12–17–82; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

In the matter of Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers.

The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those

where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted. Please direct status inquiries to Team 2, (202) 275–7030.

Volume No. OP2–317

Decided: December 13, 1982.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

W–643 (Sub-1), filed November 29, 1982. Applicant: RIEDEL INTERNATIONAL, INC., d.b.a. WILLAMETTE TUG AND BARGE COMPANY, 4555 N. Channel Ave., Portland, OR 97217. Representative: Russell M. Allen, 1200 Jackson Tower, Portland, OR 97205, 503–224–4840. Transporting by water, by towing vessels in the performance of *general towage;* and by non-self-propelled vessels with the use of separate towing vessels in the transportation of *general commodities,* between ports and points along the Pacific Coast and tributary waterways.

Note.—This application contemplates operations which should result in decreased energy consumption in comparison with existing energy consumption in the affected area. To the extent traffic will be diverted from existing transportation modes, greater energy efficiencies may be obtained without disruption to existing patterns of energy distribution or to development of energy resources. The application is, in all respects, consistent with prevailing goals and objectives of the National Energy Policy.

MC 147552 (Sub-15), filed December 7, 1982. Applicant: CAJUN CARTAGE AND WAREHOUSING CORPORATION, P.O. Box 96211, Houston, TX 77213–6211. Representative: Doyle G. Owens, P.O. Box 7735, Beaumont, TX 77706 (713) 898–8086. Transporting *general commodities* (except classes A and B explosives and household goods), between points in TX and LA.

MC 147553 (Sub-19(A), filed November 24, 1982. Applicant: DENNIS MOSS AND GARY MOSS, d.b.a., MOTOR WEST, P.O. Box 1405, Caldwell, ID 83605. Representative: Timothy R. Stivers, P.O. Box 1576, Boise, ID 83701 (208) 343–3071. Transporting (1)(a) *general commodities* (except classes A and B explosives and household goods), between points in the U.S. (except AK and HI), under continuing contract(s) with American Strevell, Inc., of Salt Lake City, UT; (2)(b) *shipments weighing 100 pounds or less* if transported in a motor vehicle in which no one package exceeds 100 pounds, between points in the U.S. (including AK and HI), and (3)(b) *as a broker of general commodities* (except household goods), between points in the U.S. (including AK and HI).

Note.—Part (2)(b) and (3)(b) are published in the **Federal Register**, this issue, with "fitness applications".

MC 159632 (Sub-1), filed December 6, 1982. Applicant: JACK D. BAILEY TRUCKING, P.O. Box 245, Dade City, FL 33525. Representative: Jack D. Bailey (same address as applicant) 904–567–9553. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in AZ, CA, OR, WA, ID, and FL, on the one hand, and on the other, points in the U.S. (except AK and HI).

MC 160192 (Sub-1), filed December 2, 1982. Applicant: DAN TERRELL TRUCKING, INC., 451 Tidewater Rd., Mooresville, IN 46158. Representative: Robert B. Hebert, One Indiana Square, Suite 1600, Indianapolis, IN 46204, 317–632–6262. Transporting *machinery,* between points in the U.S. (except AK and HI), under continuing contract(s) with John Jones Company, of Paragon, IN.

MC 165023, filed December 6, 1982. Applicant: M. DUCHARME TRANSIT LTD., 80 Turcot St., Auteuil Laval, Quebec Canada H7K 2K8. Representative: W. Norman Charles, P.O. Box 724, Glens Falls, NY 12801 518–792–0957. Transporting *lumber and wood products,* between ports of entry on the international boundary line between the U.S. and Canada in MI, NH, NY, VT, and WI, on the one hand, and, on the other, points in AL, CT, IL, IN, IA, KY, MD, MA, MI, MN, MO, NH, NJ, NY, OH, PA, RI, TN, VT, VA, WI, and DC.

Volume No. OP2–320

Decided: December 10, 1982.

By the Commission, Review Board No. 1, members Parker, Chandler, and Fortier. (Member Parker not participating.)

MC 52793 (Sub-115), filed November 22, 1982. Applicant: BEKINS VAN LINES CO., 333 South Center St., Hillside, IL 60162. Representative: David A. Gallagher (same address as applicant) (312) 547–2184. Transporting *household goods,* between points in the U.S. (except AK and HI), under continuing contract(s) with GPU Service Corporation, of Parsippany, NJ.

MC 98763 (Sub-5), filed November 19, 1982. Applicant: TED PETERS TRUCKING COMPANY, INC., 600 Fourth St., Gustine, CA 95322. Representative: Daniel W. Baker, 100 Pine St., #2550 San Francisco, CA 94111 (415) 986–1414. Over regular routes, transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), (1) between San Francisco and Roseville, CA, over Interstate Hwy 80; (2) between Sacramento, CA and junction Interstate Hwy 5 and CA Hwy 99 near Wheeler Ridge CA, over CA Hwy 99; (3) between junction of Interstate Hwys 580 and 5 near Tracy, CA, and Los Angles, CA, over Interstate Hwy 5; (4) between Los Angeles and Redlands, CA, over Interstate Hwy 10; (5) between San Francisco and Stockton, CA, over Interstate Hwys 580, 205, and 5; (6) between junction of Interstate Hwy 80 and CA Hwy 4, near Pinole, CA, and Stockton, CA, over CA Hwy 4; (7) between Tracy and Maricopa, CA, over CA Hwy 33; (8) between Santa Rosa and Los Angeles, CA, over U.S. Hwy 101; (9) between Los Angeles and San Ysidro, CA, over Interstate Hwy 5; (10) between San Fancisco and San Jose, CA, over CA Hwy 82; (11) between Montalvo and Capistrano Beach, CA, over CA Hwy 1; (12) between Roseville and Yuba City, CA, over CA Hwy 65; (13) between Yuba City and Chico, CA, over CA Hwy 99; (14) between Ygnacio and Vallejo CA, over CA Hwy 37; (15) between Riverside and San Diego, CA, over Interstate Hwy 15; (16) between Gilroy, CA, and the intersection of CA Hwys 99 and 152, near Califa, CA, over CA Hwy 152; and (17) between Oakland and San Jose, CA, over CA Hwy 17; serving all intermediate points over routes (1) thru (17) above, serving as off-route points in the following counties: Sonoma, Marin, Napa, Yolo, San Francisco, San Mateo, Santa Clara, Santa Cruz, Stanislaus, Alameda, Contra, Costa, San Joaquin, Sacramento, Solano, Verced, Yuba, Kings, Monterey, San Benito, Sutter, Butte, San Luis Obispo, Santa Barbara, Ventura, Orange, Los Angeles, points in San Diego County West of CA Hwy 79 and County Road S-2; points in that part of Fresno County west of a boundary line commencing at the Medera-Fresno County line at Friant, then southerly along the Friant Expressway to Pinedale, easterly along Herndon Avenue to Academy Avenue, southerly along Academy Avenue to CA Hwy 180, easterly along CA Hwy 180 to CA Hwy 63, southerly along CA Hwy 63 to Fresno-Tulare County line; points in Tulare County west of a boundary line commencing at the Fresno-Tulare County line, then southerly along CA Hwy 63 to CA Hwy 201, easterly along CA Hwy 201 to County Road J–27, southerly along County Road J–27 to CA Hwy 65, southerly along CA Hwy 65 to Tulare-Kern County line and Lindsay, Strathmore and Porterville; points in Kern County west and south of a boundary line commencing at the Tulare-Kern County line, then southerly

along CA Hwy 65 to CA Hwy 99, southerly along CA Hwy 99 to CA Hwy 204, easterly along CA Hwy 204 to CA Hwy 58, easterly along CA Hwy 58 to the Kern-San Bernardino County line; points in Madera County west of a boundary line commencing at the Madera-Mariposa County line, then southerly along the Atchison, Topeka and Santa Fe Railroad right-of-way to CA Hwy 145, easterly along CA Hwy 145 to County Road 145, southerly along County Road 145 and County Road 206 to the Madera-Fresno County line; points in Placer and Nevada Counties, west of CA Hwy 49; points in Glenn and Colusa Counties, east of Interstate Hwy 5; points in Riverside County, west of CA Hwy 79; and points in San Bernardino County, west of a line beginning at the Los Angeles-San Bernardino County line, then along CA Hwy 138 to Interstate Hwy 15; along Interstate Hwys 15 and 15E to junction with Interstate Hwy 10; along Interstate Hwy 10 to San Bernardino-Riverside County line.

Note—(1) The purpose of this application is to convert a Certificate of Registration authority to a Ceritificate of Public Convenience and Necessity.

(2) Issuance of a Certificate in this proceeding is subject to coincidental cancellation of carrier's existing Certificate of Registration in MC–98763 Sub 3, issued July 11, 1974, at applicant's written request.

MC 133172 (Sub-3), filed November 22, 1982. Applicant: GREAT SOUTHWEST WAREHOUSE, INC. d.b.a., SEATTLE TRANSFER & STORAGE, P.O. Box 2546, Spokane, WA 99220. Representative: James E. Wallingford, P.O. 2847, Spokane, WA 99220 (509) 534–5065. Transporting *general commodities* (except classes A and B explosives and commodities in bulk), between points in ID, MT,OR, and WA.

MC 139253 (Sub-11), filed December 2, 1982. Applicant: SOUTHEASTERN WAREHOUSING AND DISTRIBUTION CORPORATION, 102 Ashe St., Johnson City, TN 37061. Representative: Roland M. Lowell, 5th Floor, 501 Union St., Nashville, TN 37219 (615) 255–0540. Transporting (1) *automobile parts*, between points in IL, MS, OH, and TN, on the one hand, and, on the other, points in KY, MS, and TN, and (2) *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in Baldwin County, AL, Whitfield County, GA, and points in TN in and east of Greene and Hawkins Counties, TN, on the one hand, and, on the other, points in the U.S. (except AK and HI).

Note.—Applicant intends to tack points in (2) above to its existing regular route authority.

MC 136183 (Sub-5), filed December 2, 1982. Applicant: JOE COSTA d.b.a. TRINIDAD FREIGHT SERVICE, Santa Fe Yards, Trinidad, CO 81082. Representative: Joe Costa (same address as applicant) (303) 846–6433. Transporting *general commodities* (except classes A and B explosives, commodities in bulk, and household goods), between points in CO and NM.

MC 141382 (Sub-11), filed December 6, 1982. Applicant: DON'S MOVING & DELIVERY SYSTEM, INC., 527 South Fremont, Janesville, WI 53545. Representative: James A. Spiegel, Olde Towne Office Park, 6333 Odana Road, Madison, WI 53719 (608) 273–1003. Transporting *furniture and fixtures*, between points in Rock County, WI, on the one hand, and, on the other, those points in the U.S., in and east of MN, IA, MO, AR and LA.

MC 147173 (Sub-6), filed December 2, 1982. Applicant: C & T TRUCKING, 1050 Brookside Dr., Richmond, CA 94806. Representative: Brian S. Stern, 5411–D Backlick Rd., Springfield, VA 22151 (703) 941–6200. Transporting *metal products*, between points in the U.S. (except AK and HI). Condition: Applicant's permits under MC–147173 and Sub 2, issued January 28, 1980, and May 26, 1981, respectively, are revoked.

MC 147573 (Sub-5), filed December 6, 1982. Applicant: OAK ISLAND EXPRESS, 2 Sixth St., Jersey City, NJ 07302. Representative: Peter Wolff, 722 Pittston Ave., Scranton, PA 18505, (717) 342–7595. Transporting *general commodities* (except classes A and B explosives, commodities in bulk and household goods), between points in the U.S. (except AK and HI), under continuing contract(s) with J. C. Penny Company, Inc., of New York, NY.

MC 149472 (Sub-11), filed November 23, 1982. Applicant: INTER-COASTAL, INC., 131 Beaverbrook Rd., Lincoln Park, NJ 07035. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934, (201) 234–0301. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except AK and HI). Condition: The person or persons who appears to be engaged in common control of another regulated carrier must either file an application under 49 U.S.C. 11343(a), submit an affidavit indicating why such approval is unnecessary, or file a petition seeking exemption under 49 U.S.C. 11343(e). In order to expedit issuance of any authority please submit a copy of the affidavit or proof of filing the application(s) for common control to Team 2, Room 2379.

MC 152292 (Sub-2), filed November 26, 1982. Applicant: SUNBELT EXPRESS, INC., 255 Webb Chapel Village, Dallas, TX 75040. Representative: William Sheridan, P.O. Box Drawer 5049, Irving, TX 75062, (214) 255–6279. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in AZ, CA, CO, NM, OK, and TX.

MC 158052 (Sub-1), filed November 24, 1982. Applicant: J & E TRANSPORT, INC., P.O. Box 1418, Temple, TX 76503. Representative: Dorothy Smith (same address as applicant), (817) 771–0102. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except AK and HI).

MC 162572 (Sub-1), filed December 3, 1982. Applicant: TRUCK SERVICES, INC., 1590 Industrial Park Road, Mulberry, FL 33860. Representative: M. Craig Massey, 1701 South Florida Ave., P.O. Drawer 2787, Lakeland, FL 33806–2787, (813) 682–1178. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in FL, on the one hand, and, on the other, points in the U.S. (except AK and HI), under continuing contract(s) with Lykes Pasco Packing Co., of Dade City, FL.

For the following, please direct status inquiries to Team 1 at 202–275–7992.

Volume No. OP1–227

Decided: December 10, 1982.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 1940 (Sub-45) filed December 6, 1982. Applicant: TRAILWAYS OF NEW ENGLAND, INC., 625 8th Ave., New York, NY 10018. Representative: George W. Hanthorn, 1500 Jackson Street, Dallas, TX 75201, (214) 655–7937. *Over regular routes*, transporting *passengers*, (1) between Boston, MA and Lewiston, ME, from Boston over U.S. Hwy 1 to Portland, then over the Maine Turnpike to Lewiston, and return over the same route, (2) between junction U.S. Hwy 1 and Interstate Hwy 95 near West Peabody, MA, and Portland, ME, from junction U.S. Hwy 1 and Interstate 95 over Interstate Hwy 95 to junction Interstate Hwy 295, then over Interstate Hwy 295 to Portland, and return over the same route, and (3) between junction U.S. Hwy 1 and NH Hwy 101E near Hampton, NH, and Hampton Beach, NH, over NH Hwy 101E, serving all intermediate points in connection with routes (1) to (3) above.

Note.—Applicant intends to tack the sought rights to its existing authority.

Applicant seeks to provide regular-route service in interstate or foreign commerce and in intrastate commerce under 49 U.S.C. 10922(c)(2)B) over the same route.

MC 104881 (Sub-10), filed December 6, 1982. Applicant: GAY TRUCK LINE, INC., P.O. Box 134, Highway 15 S., Falkner, MS 38629. Representative: Thomas A. Stroud, 109 Madison Ave., Memphis, TN 38103, (901) 526–2900. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in AL, AR, FL, GA, IA, IL, IN, KY, LA, MI, MN, MS, MO, NC, OH, OK, PA, SC, TN, TX, VA, WI, and WV.

MC 144140 (Sub-61), filed December 6, 1982. Applicant: SOUTHERN FREIGHTWAYS, INC., P.O. Box 158, Eustis, FL 32726. Representative: John L. Dickerson (same address as applicant), (904) 357–1300. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except Ak and HI).

MC 148980 (Sub-2), filed December 3, 1982. Applicant: WESTERN CARGO, INC., P.O. Box 20489, Reno, NV 89515. Representative: Royal F. Miller (same address as applicant), (702) 329–0061. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in CA and NV, on the one hand, and, on the other, points in AZ, CA, CO, ID, MT, NV, OR, WA, and WY, under continuing contract(s) with K-Mart Corp., of Troy, MI. Condition: The person or persons who appear to be engaged in common control of another regulated carrier must either (1) state that a petition has been filed under 49 U.S.C. 11343(e) seeking an exemption from the requirements of 49 U.S.C. 11343, (2) file an application under 49 U.S.C. 11343(A), or (3) submit an affidavit indicating why such approval is unnecessary, to the Secretary's office. In order to expedite issuance of any authority please submit a copy of this filing to Team 1, Room 2379.

MC 152581 (Sub-2) filed December 7, 1982. Applicant: YOUNG MOVING & STORAGE, INC., 4000 Mayflower Dr., Lynchburg, VA 24501. Representative: Alan F. Wohlstetter, 1700 K St., N.W., Washington, DC 20006, (202) 833–8884. Mueller (same address as applicant), (612) 881–3378. Transporting *general commodities* (except classes A and B explosives and household goods), between points in the U.S. (except AK and HI).

Agatha L. Mergenovich,

Secretary.

[FR Doc. 82–34305 Filed 12–17–82; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

In the matter of Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an

application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49 Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team 1, (202) 275–7992.

Volume No. OP1–226

Decided: December 10, 1982.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 541 (Sub-11), filed November 19, 1982. Applicant: THE NEW BRITAIN TRANSPORTATION COMPANY, 257 Woodlawn Rd., Berlin, CT 06037. Representative: L. C. Major, Jr., Suite 304, Overlook Bldg., 6121 Lincolnia Rd., P.O. Box 11278, Alexandria, VA 22312, (703) 750–1112. Transporting *passengers*, in special and charter operations, between points in the U.S. (including AK, but excluding HI).

Note.—Applicant receives governmental financial assistance for the purchase or operation of buses, or is an operator for such a recipient.

MC 41581 (Sub-2), filed December 2, 1982. Applicant: WAGNER TOURS, INC., 865 Belmont Ave., North Haledon, NJ 07508. Representative: Ronald I. Shapss, 450 Seventh Ave., New York, NY 10123, (212) 239–4610. Transporting *passengers*, in special and charter operations, between points in the U.S. (except AK and HI).

Note.—Applicant seeks to provide privately-funded charter and special transportation.

MC 130271 (Sub-1), filed December 2, 1982. Applicant: PATRICK TOURS AND TRAVEL, INC., 21 Division St., New York, NY 10002. Representative: Ronald I. Shapss, 450 Seventh Ave., New York, NY 10123, (212) 239–4610. Transporting *passengers*, in special and charter operations, between points in the U.S. (except AK and HI).

Note.—Applicant seeks to provide privately-funded charter and special transportation.

MC 142011 (Sub-7), filed December 2, 1982. Applicant: LEISURE TIME TOURS, INC., 4 Houvenkoph Rd., Mahwah, NJ 07430. Representative: Ronald I. Shapss, 450 Seventh Ave., New York, NY 10123, (212) 239–4610. Transporting *passengers*, in special and charter operations, between points in the U.S. (except AK and HI).

Note.—Applicant seeks to provide privately-funded charter and special transportation.

MC 161291 (Sub-2), filed December 6, 1982. Applicant: BIG SKY TRUCKING, 8280 Finch, Dr., Helena, MT 59601. Representative: Randall D. Stewart (same address as applicant), (406) 458–9366. Transporting *food and other edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners* by the owner of the motor vehicle in such vehicle, between points in the U.S.

For the following, please direct status calls to Team 2 (202) 275–7030.

BILLING CODE 7035–01–M

Motor Carriers; Decision Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board No. 3, Members Krock, Joyce, Dowell.

Agatha L. Mergenovich,

Secretary.

Please direct status inquires to Team Four at (202) 275–7669.

Volume No. OP4–FC–073

MC–FC–81058. By decision of December 13, 1982 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1181, Review Board Number 3 approved the transfer to CAISSON FOUNDATIONS, INC., d.b.a. PRINCIPIO TRUCKING, York, PA, of Permit No. MC–136787 (Sub-No. 1), issued July 2, 1976, to BIBEY TRUCKING COMPANY, INC., Perryville, MD, authorizing the transportation of *sand and gravel,* in bulk, from the site of pits of Mason-Dixon Sand and Gravel Co., a division of York Buiding Products Co., Inc., at or near North East, MD, to Reading, Kennett Square, Chester, and Coatesville, PA, and Bear, Brookside Park, Dover, Middleton, Newark, and Wilmington, DE, under continuing contract(s) with Mason-Dixon. An application for temporary authority has been filed. Representative: Robert H. Stewart, 1020 N. Hartley St., York, PA 17405, for both transferee and transferor.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Decided: December 13, 1982.

90-Day Intrastate Motor Common Carriers of Passengers

The following applications, filed on or after November 19, 1982, are governed by Part 1168 of the Commission's Rules of Practice. See 49 CFR Part 1168, published in the **Federal Register** on November 24, 1982, at 47 FR 53275. For compliance procedures, see 49 CFR 1168.6 and 49 U.S.C. 10922(c)(2)(E).

Persons wishing to oppose an application must follow the rules under 49 CFR Part 1168. In addition to fitness grounds, applications may be opposed on the grounds that the transportation to be authorized would directly compete with a commuter bus operation and would have a significant adverse effect on all commuter bus service in the area in which the competing service will be performed. Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request

and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 25 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 30 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 2, Members Carleton, Williams, and Ewing.

AGatha L. Mergenovich,

Secretary.

NOTE.—All applications are filed under 49 U.S.C. 1092(c)(2)(A) for authority to operate as a motor common carrier of passengers in intrastate commerce on a route over which applicant has interstate, regular-route authority on November 19, 1982.

Please direct status inquiries to Team 3, (202) 275-5223.

MC 1934 (Sub-52), filed December 6, 1982. Applicant: THE ARROW LINE, INC., 105 Cherry Street, P.O. Box 387, East Hartford, CT 06108. Representative: Helen D. Smith (same address as applicant), (203) 289-1531. Applicant seeks authority in intrastate commerce to conduct service at all intermediate points on routes in No. MC-1934 (Sub-No. 46), as follows: To operate over the route between Bridgeport, CT, and Albany, NY, to provide intrastate service at all intermediate points between Bridgeport and Hartford, CT.

BILLING CODE 7035-01-M

[Volume No. 316]

Motor Carriers; Permanent Authority Decisions, Restriction Removals; Decision-Notice

Decided: December 13, 1982.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR Part 1137. Part 1137 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of these applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Shaffer, Williams, and Higgins.

Agatha L. Mergenovich,

Secretary.

MC 63390 (Sub-24)X, filed November 19, 1982. Applicant: CARL R. BIEBER, INC., Vine and Baldy St., Kutztown, PA 19530. Representative: L. C. Major, Jr., P.O. Box 11278, Alexandria, VA 22312. Subs 15 and 22F: authorize passenger service to all intermediate points on described routes between Reading, PA and New York, NY (Sub 15), between Kutztown and Allentown, PA, and between Kutztown an Bethlehem, PA (Sub 22F).

MC 83745 (Sub-12)X, filed November 17, 1982. Applicant: UNIVERSAL TRUCKING, INC., 6020 Hohman Avenue, Hammond, IN 64320. Representative: Joel H. Steiner, 135 South LaSalle St., Suite 206, Chicago, IL 60603. Sub-No. 9 certificate: (1) Broaden general commodities, with usual exceptions to "general commodities (except classes A and B explosives, household goods, and commodities in bulk)"; and (2) broaden Chicago, IL, to Kane, Lake, DuPage, Cook and Will Counties, IL and Lake and Porter Counties, IN.

MC 111397 (Sub-138)X, filed November 22, 1982. Applicant: DAVIS TRANSPORT, INC., 1345 South Fourth St., Paducah, KY 42001. Representative: H. S. Melton, Jr., P.O. Box 7406, Paducah, KY 42001. Sub 119 (1) broaden general commodities (except articles of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities requiring the use of special equipment, contractors' equipment, building, excavating, and mine machinery equipment, road building equipment, machinery, coal, limestone, lumber, wood products, motor vehicles, liquified natural gas, spent carbon, and fat, oils, and unprocessed gases to "general commodities (except classes A and B explosives and household goods)"; (2) broaden the site of Paducah-McCracken County Riverport Authority at Paducah, KY, TO McCracken County, KY; (3) eliminate restriction requiring "prior movement by water"; (4) remove the restriction against the transportation of (a) petroleum and petroleum products in bulk, in tank vehicles, to points in IL, IN, MO, AR, and TN; and (b) liquid chemicals, in bulk, in tank vehicles to points in VA, MO, AR, and points in Brooke, Hampshire, Kanawha, Marion, Marshall, Monongalia, Pleasant, and Wetzel Counties, WV; and (5) change one-way to radial authority.

MC 126472 (Sub-26)X, filed November 30, 1982. Applicant: WILLCOXSON TRANSPORT, INC. R.R. #2, Kahoka, MO 63445. Representative: Kenneth F. Dudley, P.O. Box 279, Ottumwa, IA 52501. Subs- 1, 2, 4, 12, 13, 16, 21F, 23F, and 24F; (1) broaden to (a) "chemicals and related products" from: liquid

fertilizer, in Sub 1; dry fertilizer and dry fertilizer compounds, in Sub 4; agricultural insecticides, fungicides, and herbicides, in Sub 12; anhydrous ammonia, in Subs 16 and 23F; dry fertilizer and fertilizer materials, in Sub 24F; (b) "petroleumn natural gas and their products" from liquefied petroleum gas, in Sub 2; (c) metal products" from new and used anhydrous ammonia nurse tanks and component parts thereof, in Sub 13; (d) "lumber and wood products" from used wooden pallets, in Sub 16; (e) "ores and minerals" from sand, gravel, and limestone, in Sub 21F. (2) change one-way to radial authority in all Subs. (3) expand specified facilities limitations and cities to counties: Gorydon, IA (Wayne County), in Sub 1; facilities at Cantril, IA (Van Buren County), in Sub 2; facilities at Fort Madison, IA (Lee County), in Sub 4; Janesville, WI (Rock County), in Sub 12; Fort Madison, Fort Dodge, Garner, Bellevue, and Early, IA (Lee, Webster, Hancock, Jackson, and Sac Counties, respectively), Sugar Creek and Selma, MO (Jackson and Jefferson Counties), Omaha, NE (Douglas and Sarpy Counties, NE and Pottawattamie County, IA), in Sub 16; facilities at Brunswick, MO (Chariton County), in Sub 24F. (4) remove: in bulk, in tank vehicles, and in containers limitations, wherever they appear; originating at and destined to restriction in Sub 12; precisely located facilities restrictions (Sub 21F).

MC 126709 (Sub-15)X, filed November 17, 1982. Applicant: SABER, INC., 514 Floyd Blvd., Sioux City, IA 51104. Representative: Edward A. O'Donnell, 1004 29th St., Sioux City, IA 51104. Sub 13F: (1) Broaden animal fats, animal oils, and animal greases to "food and related products and chemicals and related products"; (2) change one-way to radial authority; (3) expand Sioux Falls to Lincoln and Minnehaha Counties, SD; Sioux City, IA to Dakota County, NE, Woodbury and Plymouth Counties, IA, and Union County, SD; and Estherville, IA to Emmet County, IA: and (4) remove the in bulk, in tank vehicles restrictions.

MC 138730 (Sub-13)X, filed November 19, 1982. Applicant: CARAVAN COACH LINES, INC., RD 3 Box 451, Wharton, NJ 07885. Representative: L. C. Major, Jr., Suite 304, Overlook Bldg., 6121 Lincolnia Rd., Alexandria, VA 22312. Sub 10: Applicant holds interstate regular-route authority authorizing service on various routes in New Jersey including all intermediate points which are restricted to the transportation of pasengers originating at or destined to either the La Guardia or Kennedy International Airports, New York NY. Applicant seeks to remove that restriction on the basis that it precluded service at all intermediate points for passengers originating at or destined to any points other than the two named airports.

MC 145883 (Sub-4)X, filed November 29, 1982. Applicant: DANIEL B. ROEDIGER, Rt. 5, Box 205, St Rt 33, Wapakoneta, OH 45895. Representative: A. Charles Tell, 100 E. Broad St., Columbus, OH 43125. Sub-38F certificate: (1) broaden soy bean meal to "food and related products"; (2) remove facility limitation and expand Sidney to Shelby County, OH; (3) change one-way to radial authority; and (4) remove the in bulk restriction.

[Docket No. AB-6 (Sub-N 128)]

Rail Carriers; Burlington Northern Railroad Co.—Abandonment—in Grays Harbor County, WA; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that the Commission, Review Board Number 3, has issued a certificate authorizing the Burlington Northern Railroad Company to abandon its rail line between milepost 75.50, near Hoquiam, and milepost 96.36, at the end of the line near Aloha, a distance of 20.86 miles, in Grays Harbor County, WA, subject to certain conditions. Since no investigation was instituted, the requirement of § 1152.27(b) (formerly § 1121.38(b)) of the Regulations that publication of notice of abandonment decisions in the **Federal Register** be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (§ 1152.35 of the Regulations) (formerly § 1121.45). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed with the Commission and served concurrently on the applicant, with copies to Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. The offer, as filed, shall contain information required pursuant to § 1152.27 (formerly § 1121.38) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective 30 days from the service date of the certificate.

Agatha L. Mergenovich,
Secretary.

Agency Forms Under Review

December 16, 1982.

OMB has been sent for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. The list has all the entries grouped into new forms, revisions, or extensions. Each entry contains the following information:

(1) The name and telephone number of the agency Clearance Officer (from whom a copy of the form and supporting documents is available); (2) The office of the agency issuing this form; (3) The title of the form; (4) The agency form number, if applicable; (5) How often the form must be filled out; (6) Who will be required or asked to report; (7) An estimate of the number of responses; (8) An estimate of the total number of hours needed to fill out the form; (9) An indication of whether Section 3504(H) of Pub. L. 96-511 applies; (10) The name and telephone number of the person or office responsible for OMB review.

Copies of the proposed forms and supporting documents may be obtained from the Agency Clearance Officer whose name and telephone number appear under the agency name. Comments and questions about the items on this list should be directed to the reviewer listed at the end of each entry and to the Agency Clearance Officer. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer and the agency Clearance Officer of your intent as early as possible.

BILLING CODE 4410–01–M

Drug Enforcement Administration

Eleanor J. Fendler, Ph. D.; Revocation of Registration

On September 30, 1982, the Acting Administrator of the Drug Enforcement Administraton (DEA) directed an Order to Show Cause to Eleanor J. Fendler, Ph. D., Standard Oil Company, Warrensville Laboratory, 4440 Warrensville Center Road, Cleveland, Ohio 44128. Dr. Fendler was previously registered at Kimberly Clark Corporation, P.O. Box 999, 2100 Winchester Road, Neenah, Wis. 54956. The order sought to revoke DEA Certificate of Registration PF0200511 issued to Dr. Fendler as a researcher under 21 U.S.C. 823. The statutory ground for the order was the revocation on February 17, 1982, of Special Use Authorization #226 issued to Dr. Fendler by the State of Wisconsin Controlled Substances Board. That document was Dr. Fendler's authorization to handle controlled substances in Wisconsin. More than 30 days have elapsed since issuance of the Order and Dr. Fendler has not responded to it. The Acting Administrator deems Dr. Fendler to have waived her opportunity for a hearing in this matter, and enters this final order on the record as it appears (21 CFR 1301.57; 21 CFR 1301.54(d) 1301.54(e)).

Examining the record, the Acting Administrator finds that the Wisconsin Controlled Substances Board ("the Board") registered Dr. Fendler to conduct research in controlled substances. The Board accepted Dr. Fendler's surrender of her application for renewal upon learning that Dr. Fendler had submitted an application to conduct research at Kimberly-Clark in 1980 when Kimberly-Clark does not use controlled substances in any of its research and does not possess any controlled substances on its premises. Dr. Fendler had indicated to the Board that another researcher at Kimberly-Clark would verify her application and that this researcher authorized controlled substances to be used at Kimberly-Clark. In fact, the other researcher was unaware of the application filed with the Board by Dr. Fendler.

DEA Compliance Investigators contracted Dr. Fendler to obtain a voluntary surrender of DEA Certificate of Registration PF0200511, to no avail. On September 2, 1982, Dr. Fendler indicated she would mail the certificate to the DEA Chicago Office. The Acting Administrator finds that Dr. Fendler has never voluntarily surrendered the certificate even after being informed that she lacked statutory authority to possess it.

This agency has consistently held that termination of a registrant's state authority to handle controlled substances requires DEA to revoke its Certificate of Registration. See *Hardley Famous Sisters Inc., d.b.a. Yerba Santa Pharmacy*, 47 FR 3693 (1982); *Henry Weitz, M.D.*, 46 FR 34858 (1981); *David Sachs, M.D., Docket No. 77–22, 42 FR 29112 (1977)*. The Acting Administrator has no alternative but to revoke the DEA Certificate of Registration previously issued to Dr. Fendler. While this action is virtually automatic when a state agency terminates a registrant's controlled substance authority, the Acting Administrator is constrained to make an observation. Dr. Fendler acted, at best, unprofessionally in falsifying her application with the Wisconsin Board for controlled substance registration and in not surrendering her DEA certificate as she said she would. DEA registration is a trust that is not to be treated lightly. Researchers, as well as physicians, dentists and other practitioners, have an obligation to responsibly handle the controlled substances their DEA registration entitles them to handle. Dr. Fendler has not discharged that obligation.

Accordingly, pursuant to the authority vested in the Attorney General and redelegated to the Administrator of the Drug Enforcement Administration, the Acting Administrator hereby revokes DEA Certificate of Registration PF0200511 issued to Eleanor J. Fendler, Ph. D. The revocation is effective immediately.

Date: December 9, 1982.

Francis M. Mullen, Jr.,

Acting Administrator.

[FR Doc. 82–34460 Filed 12–17–82; 8:45 am]
BILLING CODE 4410–09–M

Ronald Wardell Andrews, M.D.; Denial of Application

On September 28, 1982, the Acting Administrator of the Drug Enforcement

Administration (DEA) directed to Ronald Wardell Andrews, M.D., (Respondent), 5308 North Broad Street, Philadelphia, PA. 19141, an Order to Show Cause seeking to deny Respondent's application for renewal of his DEA registration, AA9000629. The statutory basis for the order under 21 U.S.C. 824(a)(2) was Respondent's conviction in the United States District Court for the Eastern District of Pennsylvania of nine counts of knowing and intentional distribution of controlled substances in violation of 21 U.S.C. 841(a)(1). These were felony offenses relating to controlled substances.

Respondent, through counsel, waived his right to a hearing and submitted a written statement on the matters of fact and law raised in the Order to Show Cause, as he is permitted to do under 21 CFR 1301.54(c). The Acting Administrator has carefully considered Respondent's statement and the investigative file in this matter and enters his final order under 21 CFR 1301.57.

Respondent's position is that his conviction is not final since Respondent has taken an appeal from his conviction to the United States Court of Appeals for the Third Circuit. This Administration has long and consistently maintained that a revocation of registration or denial of application is lawful even if a conviction is on appeal. See, *Carl Oslin Ramsey*, Docket No. 71–2, 36 FR 24077 (1971); *Don Williams t/a WEWA Drugs*, 41 FR 52554 (1976); *Isadore I. Rosen, M.D.*, 43 FR 14748 (1978); *Joseph J. Godorov, D.O.*, Docket No. 78–8, 43 FR 36702 (1978); *Lamar T. Zimmerman, M.D.*, 45 FR 3405 (1980). In *Faunce Drug Store*, Docket No. 82–3, 47 FR 30122 (1982), the Acting Administrator concluded that "a registrant is convicted of a controlled substance related felony if there is a judgment of guilt, plea of guilty or *Nolo contendere*, or some other indication that he has been found guilty of a controlled substance related felony." This conclusion is based on judicial interpretations of 21 U.S.C. 824(a)(2) and similar statutes. The court in *Perry-Hooker, M.D. v. Four Unnamed Known Agents of the Drug Enforcement Administration*, Civil Action No. 75–273 (D.Vt. 1975) held that the plaintiff had been "convicted" for the purpose of section 824(a)(2) at the time a guilty verdict was returned and that the suspension of his DEA registration was proper. For cases defining finality of convictions, see *Berman v. United States*, 302 U.S. 211, 58 S.Ct. 164 (1937) and *Korematsu v. United States*, 319 U.S. 432, 63 S.Ct 1124 (1943). See also *United States v. Rosenstengel*, 323 F. Supp. 499 (E.D. Mo. 1971), where the court interpreted the term "convicted" in 18 U.S.C. 1202(d) (relating to possession of firearms by convicted felons) in its broadest sense, concluding that to narrowly construe the term would clearly frustrate Congressional intent. Based on this precedent, the Acting Administrator finds that Respondent is "convicted" of a controlled substance related felony as that term is used in 21 U.S.C. 824(a)(2).

Having examined the record in this case, the Acting Administrator concludes that the application for registration submitted by Respondent should be denied. The Acting Administrator finds that Respondent was convicted, following a jury trial, of nine counts of illegal distribution of controlled substances to DEA Special Agents operating undercover. Respondent wrote prescriptions for Quaalude (methaqualone), Seconal (secobarbital) and Desoxyn (methamphetamine), all heavily abused Schedule II controlled substances, as well as Tussionex (hydrocodone), a Schedule III controlled substance. There was no medical justification for these prescriptions. Respondent has submitted no evidence that would mitigate the denial of his application, and the Acting Administrator can discern none from the record.

It is the decision of the Acting Administrator to deny the Respondent's application for renewal of his DEA registration. Accordingly, pursuant to the authority vested in the Attorney General and redelegated to the Administrator of the Drug Enforcement Administration, the Acting Administrator hereby denies the application for renewal of DEA registration AA9000629 executed by Ronald Wardell Andrews, M.D., on June 3, 1982. This action is effective January 19, 1983.

Dated December 9, 1982.

Francis M. Mullen, Jr.,

Acting Administrator.

BILLING CODE 4410–09–M

Office of Justice Assistance, Research and Statistics

Regional Information Sharing System (RISS)

AGENCY: Office of Justice Assistance, Research, and Statistics, Justice.

ACTION: Request for public comment.

SUMMARY: The Office of Justice Assistance, Research and Statistics (OJARS), pursuant to Attorney General Order Number 886–80, proposes to issue a guideline for the award of funds to support regional information sharing system projects. OJARS invites interested persons to comment on the proposed guideline for the Regional Information Sharing System (RISS) Program. Comments received will be considered by OJARS before the final publication of this guideline. The period for public comment is 30 days. After publication of the final guideline following the comment period, participating projects may apply for refunding or may revise application on file in accordance with the final guideline.

As defined by Executive Order 12291, this proposed notice does to constitute a "major" notice because it does not result in: An effect on the economy of $100 million or more, (b) a major increase in any costs or prices, and, (c) adverse effects on competition, employment, investment, productivity, or innovation among American enterprise.

This proposed notice if promulgated, will not have "significant economic impact on a substantial number of small entities", as defined by the Regulatory Flexibility Act (Pub. L. 96–354).

DATES: Comments are dues on or before January 19, 1983.

ADDRESS: Send comments to H. T. Tubbs, Director, Program Management Division, Office of Policy and Management, OJARS, 633 Indiana Avenue NW., Washington, D.C. 20531, 202/724–5961.

FOR FURTHER INFORMATION CONTACT: H. T. Tubbs, Director, Program Management Division, Office of Policy and Management, OJARS, 202/724–5961.

Robert F. Diegelman,

Acting Director, Office of Justice Assistance, Research and Statistics.

Program Announcement

Subject: Announcement of the availability of financial assistance to continue support of the provisions of multijurisdictional intelligence information sharing services to state and local member agencies.

Summary: The Office of Justice Assistance, Research and Statistics announces its intention to award grants to seven projects participating in the Regional Information Sharing System (RISS) Program as authorized by Attorney General Order Number 886–80. Applicant eligibility is limited to existing projects which are in compliance with the legal, administrative and program requirements for finanical assistance.

Date: Applications will be reviewed upon receipt and financial assistance grant awards issued within 90 days from receipt. The closing date for receipt of applications for Fiscal Year 1983 funds is July 1, 1983.

Scope of Program Announcement

Funding and Administration of the Regional Information Sharing Systems (RISS) Program

1. *Purpose.* The purpose of this manual is to provide information and guidance concerning the funding and administration of the Regional Information Sharing Systems (RISS) Program. This manual is complemented by additional regulations, guidelines, instructions, and policies such as 28 Code of Federal Regulations (CFR) Part 23, 28 CFR Part 18, M7100.1B, Financial and Administrative Guide for Grants I4062.7, Standards for Equipment to be Acquired with LEAA Grant Funds, and G7100.5, Control and Use of Confidential Funds Under the RISS Program.

2. *Scope.* This manual is of interest to state and local criminal justice agencies, institutions, and organizations involved in the administration and implementation of the RISS Program.

3. *Introduction.*

A. *Authority.* Attorney General Order No. 886–80 authorizes the Director, Office of Justice Assistance, Research and Statistics (OJARS), after appropriate consultation with the Administrator of the Drug Enforcement Administration and the Assistant Attorney General in charge of the Criminal Division, to exercise the power and authority to administer the State and Local Drug Strike Force Grant Program, hereafter named as the Regional Information Sharing Systems Program (RISS). This authorization provides the authority to promulgate such regulations as are necessary for effective administration of this program.

B. *Oversight and Administration.* The Executive Group, composed of the Assistant Attorney General in charge of the Criminal Division, the Administrator of the Drug Enforcement Administration, and the Director, OJARS, exercises responsibility for the oversight and overall administration of the RISS Program. To assist the Executive Group in its responsibilities, the OJARS Intelligence Systems and Policy Review Board makes recommendations to the Executive Group concerning funding of applications and policy issues dealing with intelligence information and systems, and develops and implements oversight procedures to ensure compliance with the Standards for Criminal Intelligence Operations (28 CFR Part 23). Daily management of the RISS Program is conducted through the Program Management Division, Office of Planning and Management, OJARS.

4. *Program Goals and Objectives.* The goal of the RISS Program is to enhance the ability of state and local criminal justice agencies to identify, target, and remove criminal conspiracies and activities spanning jurisdictional boundaries. The primary objectives of the program are to encourage and facilitate the rapid exchange and sharing of information pertaining to known or suspected criminals or criminal activity among federal, state and local law enforcement agencies, and to enhance coordination/communication among those agencies in pursuit of criminal conspiracies determined to be interjurisdictional in nature. Secondary objectives are to provide technical and financial resources to augment existing multi-jurisdictional enforcement resources/operations. These technical and financial resources may include specialized equipment, training and investigative funds.

5. *Program Description.*

A. *Problem Analysis.* Major criminal offenses, including traditional and non-traditional organized crime, drug trafficking and major white collar crime, often span jurisdictional boundaries to the extent that two or more state or local jurisdictions may be required to respond to the same offense or conspirators. This multi-jurisdictional characteristic can pose significant problems for state and local law enforcement in target identification, allocation of enforcement resources, and coordination of those resources to affect successful multi-jurisdictional investigations and prosecutions. Many of these problems stem from the fact that, although state and local enforcement agencies individually may have pieces of information concerning multi-jurisdictional conspirators and their activities, they lack a mechanism by which this information can be exchanged and/or collected to support multi-jurisdictional investigations and prosecutions. Consequently, the enforcement community's response to the conspiracy/offense may be fragmented, duplicative, counterproductive, and limited. In addition to the lack of information exchange, many law enforcement agencies are deficient in specialized equipment, training, and investigative resources to mount successful multi-jurisdictional operations commensurate with the sophistication of the conspiracy/offense.

B. *Results Sought.* It is expected that successful implementation of the RISS Program will achieve some or all of the following results:

- Operation of a modern regional communication system capable of the controlled receipt, analysis, evaluation, storage, dissemination and updating of information concerned with organized criminal activity, drug trafficking, and white collar crime.
- Established system of coordination and communication among enforcement agencies for targeting and investigating criminal conspiracies and activities as a means to overcome problems associated with multi-jurisdictional enforcement operations.
- Allocation of technical and financial resources to participating state and local enforcement agencies in their investigation of multi-jurisdictional organized crime, drug trafficking, and white collar crime.
- Increased opportunity for arrest and successful prosecution of conspirators targeted by participating state and local enforcement agencies.
- Recovery of criminal assets (i.e., contraband, stolen equipment) by multi-jurisdictional enforcement operations evolving from services provided by the project.

6. *Program Strategy and Project Components.*

A. *Strategy.* The strategy of the RISS Program is to maintain operational centers throughout the United States to service state and local criminal justice agencies. Specifically, the strategy for the program, provided congressional appropriations continue, is to continue the six regional information system centers: the Middle Atlantic-Great Lakes Organized Crime Law Enforcement Network, the New England States Police Administrator's Conference, the Mid-States Organized Crime Information Center, the Regional Organized Crime Information Center, the Rocky Mountain Information Network, and the Western States Information Network. Support will also be given to continue the LEVITICUS Project, an investigative/prosecutorial information sharing project directed against major white collar criminals involved in various criminal enterprises affecting the acquisition and mining of coal in the Appalachian region.

B. *Activity Components.* The following are either required or optional components/activities of projects funded under this program. Optional components must be designed to support the required information-sharing component.

1. *Information Sharing Component (Required).* Every project will maintain and operate either a manual and/or -

automated information-sharing component that is responsive to the needs of participating enforcement agencies in addressing multi-jurisdictional offenses/conspiracies. This component must be capable of providing controlled input, dissemination rapid retrieval, and systematized updating of information to authorized agencies. This component must also possess the ability to perform analysis of information provided to the project/component. (See Para. 13.B, Special Requirements).

2. *Investigative Support Component (Optional).* Projects may establish and operate an investigative support component by providing financial assistance to participating agencies for their conduct of multi-jurisdictional investigations. Financial resources may include funds for the purchase of information, contraband that may be used as evidence, services, investigative travel and per diem, and overtime compensation. The LEVITICUS project is permitted to pay salaries and overtime for investigative personnel. (See Para. 13.A, Special Requirements).

3. *Specialized Equipment Component (Optional).* Projects may establish and maintain a pool of special investigative equipment for loan to participating agencies. (See Para. 13.D, Special Requirements).

4. *Technical Assistance Component (Optional).* Projects may establish and maintain a component to provide technical assistance to member agencies. Through use of project personnel and others in participating agencies, consultation, advice, and information may be made available to member agencies concerning use of specialized equipment, investigative procedures, accounting of project funds if provided by the project in support of investigations, and information analysis. This component will emphasize use of technical resources among the projects as necessary and available.

5. *Training Component (Optional).* Projects may establish and maintain a training component to upgrade investigative skills of personnel from participating agencies. Such training assistance may consist of financial support to send personnel to training courses, seminars, and conferences or design and delivery of special training courses by project staff.

C. *Administrative Components.* Each project must be comprised of three basic administrative components: an oversight group, project staff, and, member agencies.

1. *Oversight Group.*— Each project must have an established oversight group, i.e., Policy Board, Executive Committee, Supervisory Board, that is comprised of representatives from participating state and local agencies. The primary purpose of the oversight group is to provide policy and direction affecting project operations and administration.

2. *Project Staff.* Each project must contain a core group of staff that is of sufficient size and expertise to accomplish the stated objectives of the grant. An organizational structure must be developed that reflects the ability of the project to administer and operate the project with regard to the project components discussed in Para. 6.B.1 through 5.

3. *Member Agencies.* Each project must be made up of selected state and local criminal justice and/or regulatory agencies within the project's service area.

7. *Eligibility to receive grants.* The Policy Board or Executive Committee for each Riss project will select the state or local criminal justice agency eligible to apply for funding under this Program. Final approval of the applicant will remain with the Office of Justice Assistance, Research and Statistics (OJARS).

8. *Deadline for Submission of Applicantions.* Applications must be received by OJARS at least 90 days prior to the anticipated start date of the new award.

9. *Dollar Range and Number of Grants.* The award of seven grants is anticipated annually, ranging from $500,000 to $2 million per 12 month period of award.

10. *Matching Requirements.* Projects/grants may be funded up to 100 percent of total project/grant costs. Projects are encouraged to obtain and utilize other resources to the maximum extent possible for the purpose of augmenting project operations.

11. *Application Requirements.*

A. *Preparation.* All applications must be prepared on Standard Form 424, Application for Federal Assistance with Attachment OJARS Form 4000/3 (Appendix 1).

B. *Content.* The following information must be included in the application to OJARS:

(1) *Budget Narrative.* Applicants for grants must submit on separate sheets a budget narrative. The budget narrative should detail by budget category the Federal share. The purpose of the budget narrative is to relate items budgeted to project activities and to prövide justification and explanation for budget items, including criteria and cost data used to arrive at the estimates for each budget category. The following information is provided to assist the applicant in developing the budget narrative.

(a) *Personnel Category.* List each position by title (and name of employee if available), show annual salary rate and percentage of time to be devoted to the project by the employee. Compensation paid for employees engaged in Federally assisted activities must be consistent with that paid for similar work in other activities of the applicant.

(b) *Fringe Benefits Category.* Indicate each type of benefit included and the total cost allowable to employees assigned to the project.

(c) *Travel Category.* Itemize travel expenses of project personnel by purpose (e.g., staff to training site, advisory group meetings, etc.) and show basis of computation (e.g., "Five trips for 'x' purpose at $80 average cost $50 transportation and two days per diem at $15" or "Six people to 3-day meeting at $70 transportation and $45 subsistence"). In training activities where travel and subsistence for trainees is included, this should be separately listed indicating the number of trainees and the unit costs involved. (See Para. 13. E, Special Requirements).

(1) Identify the tentative location of all training sessions, meetings, and other travel whenever possible.

(2) Applicants should consult such references as the Official Airline Guide and the Hotel and Motel Redbook in projecting travel costs to obtain competitive rates.

(d) *Equipment.* List each type of equipment to be purchased or rented with unit or monthly cost. (See Para. 13. D, Special Requirements).

(e) *Supplies.* List items within this category by major type (office supplies, training materials, postage, etc.) and show basis for computation. Provide unit or monthly estimates.

(f) *Contractual Category.* State the selection basis for any contract or subcontract or prospective contract or subcontract (including equipment).

(1) For individuals to be reimbursed for personal services on a fee basis, list by name or type of consultant or service, the proposed fee (by day, week or hour), and the amount of time to be devoted to such services.

(2) For other types of contracts indicate the type of services to be performed and the estimated contract cost data.

(g) *Construction Category.* Describe construction or renovation which will be accomplished using grant funds and the method used to calculate cost. Allowable costs will be limited to project site modifications.

(h) *Other Category.* Include under "Other" such items as rent, reproduction, telephone, janitorial or security services and investigative expenses as defined in Para. 4, G7100.5 (See Appendix 3). List items by major type with basis of computation shown. (Provide square footage and cost per square foot for rent. Provide local and long distance telephone charges separately).

(i) *Indirect Cost Category.* The Administration may accept any indirect cost rate previously approved for an applicant by a Federal agency. Applicants must enclose a copy of the approved rate agreement with the grant application.

(j) *Program Income.* If applicable, provide a detailed estimate of the amount of program income to be generated during the grant period and its proposed application (to reduce the costs of the project or to increase the scope of the project). Also, describe the potential source of program income. (Refer to Para. 42., OJARS M7100.1B).

(2) *Project Narrative.* Each applicant will present its project narrative in the following format, which will be used in lieu of the format reflected in page 11 of SF 424.

(a) Description of the problems and needs to be addressed by the project.

(b) Summary of past accomplishments since project inception and their relationship to previously identified goals and objectives.

(c) Description of types of files, as approved by the projects' supervisory boards, that comprise the project's information sharing system, i.e., primary subject, associates, M.O., etc. and a description of the purpose of these files in relationship to the information-sharing system.

(d) Description of project goals and objectives to be achieved.

(1) The project goals should be consistent with the program goal set forth in Para. 4, of this Guideline.

(2) Objectives msut describe quantifiable achievements to the extent possible for each goal and take into consideration each of the project components set forth in Para. 6. B. of this Guideline.

(e) Description of project operations to include administrative and decisionmaking structure (including organizational chart).

(f) Description of milestones/major achievements to be accomplished.

(g) Summary of all assessments, evaluations and/or audits, other than those initiated by the Department of Justice.

(h) List of member agencies.

(3) *Supporting Documents.* The following documents must append the application:

(a) A current Equal Opportunity Employment Program (EEOP) which meets the requirements of 28 CFR 42.301, *et seq.* This requirement applies to applicant agencies that have fifty or more employees, which have received grants or $25,000 and which have a service population with a minority representation of 3% or more. (See Appendix 2.)

(b) A copy of a letter transmitting notification of project activities to state legislatures in those jurisdictions being serviced by the project. (See Para. 13.F, Special Requirements).

(c) Certifications signed by the appropriate authorities indicating:

(1) Compliance with G7100.5, Control and Use of Confidential Funds Under the RISS Program. (See Appendix 3).

(2) Compliance with 28 CFR Part 23 (See Appendix 4).

(3) State Criminal Justice Council (CJC) review, if CJC is serving as grantee.

(d) Constitution and/or bylaws adopted by the project.

(e) Procedures developed by the project for the administration of confidential funds if such funds are being requested in the application. (See Appendix 3).

(f) Procedures developed by the project for the administration of the information system as required in 28 CFR Part 23. (See Para. 13B, Special Requirements, and Appendix 4.)

(g) All assessments, evaluations and/or audit reports, other than those initiated by the Department of Justice, describing project activities.

12. *Reports.* Reporting requirements for grants/projects awarded under the RISS Program are articulated in Chapter 2, M7100.1B, Financial and Administrative Guide for Grants. The six regional information-sharing systems will use the quarterly narrative report format shown in Appendix 6. The Leviticus Project will use the format shown in Appendix 7.

13. *Special Requirements*

A. *Confidential Funds.* Approval by the Grantor Agency is required for all grantees/subgrantees prior to the use of funds for confidential expenditures. Confidential expenditures are herein defined as funds used for purchase of services, purchase of evidence (physical), and purchase of information. (See Appendix 3, OJARS Guideline G7100.5, "Control and Use of Confidential Funds Under the RISS Program").

(1) *Confidential expenditures* will be considered in all grants funded under this program provided that the process and procedures to be utilized by individual projects are included as part of the grant application and comply with G7100.5.

(2) *A signed certification* must be submitted by the Project Director that indicates he has read, understands, and agrees to abide by the conditions pertaining to confidential fund expenditures as set forth in OJARS' Guideline G7100.5. For a sample of the required certification, refer to Appendix 3.

(3) *Funds that are seized and revert* to the project as a result of the use of confidential funds shall be deemed program income pursuant to OMB Circular A102 up to the total amount of confidential funds used under the grant. (Refer to Para. 42, OJARS M7100.1B.).

(4) *The budgeting for and use of* confidential expenditures under this program is considered a support service to the primary objective of sharing information. These funds should only be allocated:

(a) When the particular merit of a case warrants the expenditure of these funds;

(b) to support multi-jurisdictional investigations in which two or more agencies are actively involved;

(c) where the user agency agrees that information obtained will be furnished to the project data base; and,

(d) when no other source of funds exists.

B. *Criminal Intelligence Systems Operating Policies (28 CFR Part 23).* All projects funded under the RISS program will be subject to the provisions of 28 Code of Federal Regulations (CFR) Part 23. "Criminal Intelligence Systems Operating Policies." (See Appendix 4).

(1) *Written procedures* for individual project compliance with these "Operating Policies" must accompany each application for funding. Specific application requirements for each of the Operating Policies of 28 CFR 23.20 are as follows:

(a) Application must describe the process by which information submitted is evaluated to ensure compliance with "reasonable suspicion of criminal activity" standard, and that the information has not been obtained in violation of applicable Federal, state or local laws and ordinances [§ 23.20(a), (b), (c)].

(1) Description must define what constitutes "reasonable suspicion of criminal activity" as a predicate for collecting, maintaining, and entering information [§ 23.20(a)].

(2) Description must explain system of controls to ensure that no information is

entered that violates applicable Federal, state or local laws and ordinances [§ 23.20(a)].

(b) Application must describe the procedures by which incoming information is received, processed, and stored [§ 23.20(f)].

(1) Procedures must indicate date of receipt (for purge purposes), the identity of submitting agency and the assignment of levels of sensitivity and confidence of the information [§ 23.20(f)].

(2) Description must discuss administrative, technical and physical safeguards (including audit trails) to ensure against unauthorized access and against intentional or unintentional damage [§ 23.20(f)].

(c) Application must describe the process by which information is disseminated [§ 23.20(d), (e), (f)].

(1) Description must discuss procedures for ensuring that access to the information is based on the "need to know/right to know the data in the performance of a law enforcement activity" [§ 23.20(d)].

(2) Description must discuss process used to ensure that information is disseminated only to other law enforcement authorities who agree to follow procedures regarding data entry, maintenance, security, and dissemination that are consistent with 28 CFR 23.20. Sample certification forms should be attached [§ 23.20(e)(1)].

(d) Application must describe procedures used to ensure that all information retained has relevancy and importance [§ 23.20(g)].

(1) Description must explain how information is screened for relevancy and to ensure that it is not misleading, obsolete, or otherwise unreliable [§ 23.20(g)].

(2) Description must discuss purging process and how reviewed material is annotated to reflect name of reviewer, date of review and explanation as to decision to retain. Any information that has been in the system but has not been reviewed for a period of two years must be reviewed and validated before it can be utilized or disseminated [§ 23.20(g)].

(3) Description must discuss how any recipient agencies are notified that information has been changed or purged [§ 23.20(g)].

(e) Application must describe sanctions to be used to control unauthorized access, utilization, or disclosure of information contained in the system [§ 23.20(1)].

(2) *The Criminal Intelligence Systems and Operating Policies Review Board* and/or the OJARS Program Manager will perform onsite visits during the project period to assess compliance with the Operating Policies.

(3) *Noncompliance with Operating Policies* is sufficient justification for project termination. Project activities determined to be noncompliant will be formally communicated to the grantee for redress. If the issues of noncompliance are not satisfactorily resolved by the established deadline date, OJARS may suspend all or part of the grant. If the issues still remain unresolved past the deadline date attached to the suspension action, OJARS may notify the grantee of an intent to terminate the grant. The grantee will have up to ten (10) working days from the date of the notice to file a written request for a compliance hearing pursuant to 28 CFR Part 18. If no request for a hearing is received by OJARS, the grant will be terminated.

(4) *The following Special Conditions* will be added to each award.

(a) Grantee agrees to be in compliance with the Criminal Intelligence Systems Operating Policies (28 CFR Part 23). Compliance will include all certifications required by § 23.30(a)(1)–(4) of these policies. The Criminal Intelligence Systems and Operating Policies Review Board, or its individual or group designees, may visit the project in order to determine compliance with these policies.

(b) Grantee/subgrantee agree that if automated equipment for use in connection with a criminal intelligence system is to be obtained with grant funds, then:

(1) Direct remote terminal access to data shall not be made available to system users; and,

(2) No modifications to system design shall be undertaken without prior OJARS approval [§ 23.20(h)].

(c) OJARS shall be notified prior to initiation of formal information exchange procedures with any Federal, state, regional, or other information system not indicated in the grant documents as initially approved at time of award [§ 23.20(i)].

(d) Grantee/subgrantee agree that no electronic, mechanical, or other device for surveillance purposes will be purchased, rented, or used in the course of this project that is in violation of the provisions of Title III of Pub. L. 90351, as amended, or any applicable state statute related to wiretapping and surveillance [§ 23.20(j)].

(e) Grantee/subgrantee agree that there shall be no harassment or interference with any lawful political activities as part of the intelligence system operation [§ 23.20(k)].

C. *Field Personnel.* Field personnel are defined as project employees (either direct or by formal contract) whose primary job function is to provide liaison services between the project and member agencies and who generally represent the project interests in assigned States throughout the service area.

(1) *It is the policy of OJARS to allow* the funding and utilization of field personnel provided that their activities are confined to liaison with and support of member agencies. Authorized liaison and support activities include:

(a) Dissemination of information collected by member agencies to other agencies requesting same;

(b) Provision of fixed site technical assistance to member agencies;

(c) Consultation and advice to member agencies in the completion of required reports and evaluations;

(d) Recruitment of new member agencies and liaison with existing members; and,

(e) Provision of training to law enforcement and prosecutorial agencies in project related law enforcement practices and techniques.

(2) *It is the policy of OJARS to prohibit* the involvement of field personnel in operationsl or investigative functions normally associated with the duties of a sworn law enforcement officer. These prohibited functions include:

(a) Handling informants (including paying informants; briefing or debriefing informants);

(b) Participation in any fixed or mobile surveillance (including providing fixed or mobile radio coordination);

(c) Participation in any other investigative activity, including collection of new intelligence from overt or covert sources, purchase of evidence, and undercover operations, such as drug buys or sting operations; and,

(d) Use of or carrying any firearm or other dangerous weapon while in the performance of project duties.

(3) *Each project that utilizes field personnel must develop* and submit to OJARS procedures that govern the use of and supervisory controls over its field personnel. These procedures must include:

(a) Specific job descriptions against which field personnel activities can be compared. These job descriptions must include:

(1) Duties;

(2) Supervisory Controls;

(3) Scope and Effect; and,

(4) Work Environment.

(b) A system of supervisory controls that is designed to manage and account for the activities and time of field personnel.

D. *Equipment.* Purchase or lease of equipment that specifically relates to the

achievement of the project goals and objectives, including repairs which materially increase its useful life, is an allowable expenditure of grant funds. The need for and acquisition of equipment in general is governed by the provisions of Instruction I4062.7, "Standards for Equipment to be Required with LEAA Grant Funds." See Appendix 5). The following further defines equipment acquisition and usage as it applies to the RISS Program.

(1) *All equipment purchases must receive the prior approval* of OJARS. Prior approval may be obtained either through inclusion in the grant application or, subsequently, by a prior written request.

(2) *Each application must contain a certification* governing the acquisition of equipment. (See Appendix 5).

(3) *No electronic, mechanical, or other device* may be purchased, rented, or used in the course of the project that is in violation of Title III, Pub. L. 90–351, as amended, and applicable state statutes related to wiretapping and surveillance.

(4) *Helicopters and airplanes* may not be purchased with grant funds. However, the rental of such equipment is allowable on an as needed basis provided that such rental is included as a line item in the approved grant application and is confined to ongoing investigations being performed by member agencies.

E. *Travel.* Travel must be categorized and described as either Administrative or Investigative. Administrative travel should be budgeted within the "Travel" category and is defined as travel performed by project employees or advisory board members to attend or participate in meetings, conferences, training, etc., to receive or provide technical assistance, or to perform liaison services to other projects or member agencies. Investigative travel should be budgeted within the "Other" category and is defined as travel performed by member agencies in the furtherance of ongoing investigations being supported by the project.

(1) *Each project must develop* and submit to OJARS internal travel procedures that:

(a) Document the project's official travel policies;

(b) Define the travel request, approval and voucher process;

(c) Explain the system of advances and reimbursements; and

(d) Describe the documentation necessary for approval and payment of travel vouchers.

(2) *Grantee may follow their own* established travel policies or the Federal travel rates. If a grantee does not have established travel rates, the grantee must abide by the Federal travel regulations.

(3) *Subgrantees may follow their own* established travel rates. If a subgrantee does not have an established travel rate, then:

(a) The subgrantee may follow the grantee-established travel policies; or,

(b) The subgrantee may abide by the Federal travel regulations.

(4) *Management attitudes towards travel* should be designed to minimize travel costs and eliminate nonessential travel. The following guidance should be observed by project management.

(a) Use alternatives. Travel should be permitted only when the matter cannot be handled via conference call or other mode of communication.

(b) Limit number of persons traveling. Only the minimum number of persons necessary to accomplish the purpose of the trip should be authorized to travel.

(c) Conference travel should be limited. Travel to conferences, seminars and meetings should be limited to those which directly further project goals and objectives. Whenever possible, limit attendance to a single individual who would then be responsible for summarizing and reporting results to other staff members.

(d) Examine location of meetings/conferences. Carefully consider cost benefits for all attendances prior to selecting sites for meetings or conferences.

(e) Utilize local training courses. Whenever possible, local training courses should be used to minimize travel costs.

(f) Minimize duration of trips. Trips should be as short as possible to accomplish their official purpose.

(g) Consolidate trips. To the extent possible, travel should be performed for more than a single purpose and visits to more than one location made in a series without returning to the official duty station.

(h) Assess alternate modes of common carriers. Consider all costs associated with different types of common carriers. This is especially true in the Northeast corridor where train service may provide the most cost beneficial method of travel.

(i) Use special fares. Utilize special excursion fares of other discount fares whenever possible.

(5) *All noninvestigative, out-of-region travel* must receive the written prior approval of OJARS on a trip-by-trip basis. The request for approval of each trip must provide specific information concerning the purpose of travel, who will be traveling, the dates of travel, and a certification that sufficient funds exist within the travel category of the approved project budget to accommodate the requested travel.

F. *Legislative Notification.* The State legislature in each State included in a RISS project must be notified that a RISS project is operating within its boundaries. Notification may be either directly to the legislature or to a body designated to act while the legislature is not in session. Each project, therefore, must provide evidence that the requisite notification has occurred. Evidence may take the form of a sample letter of notification to be included in the grant application. Copies of all letters of notification must be kept in file at the project headquarters.

G. *Prohibition Against Lobbying.* All activities under the grant, including oral and written grantee or subgrantee actions and direct or indirect congressional contact, shall be made in accordance with the anti-lobbying provision of the LEAA Financial and Administrative Guide for Grants (OJARS M7100.B, Chapter 5, Para. 75, October 2, 1980) as interpreted by OJARS Office of General Counsel Legal Opinions No. 74–1, No. 75–45, and 77–30.

BILLING CODE 4410-18-M

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Physics; Subcommittee for Review of NSF Gravitational Physics Program

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463 the National Science Foundation announces the following meeting:

Name: Advisory Committee for Physics, Subcommittee for the Review of the National Science Foundation Gravitational Physics Program.

Date and time: January 10–11, 1983; 9:00 a.m. to 5:00 p.m., each day.

Place: Room 341, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. Margrete S. Klein, Staff Associate, Division of Physics, Room 341, National Science Foundation, Washington, D.C. 20550. Telephone (202) 357–7611.

Purpose of subcommittee: To provide oversight concerning NSF support and planning for research in gravitational physics.

Agenda: To review NSF Gravitational Physics program documentation as part of the program oversight function.

Reason for closing: The meeting will deal with a review of grants and declinations in which the Subcommittee will review materials containing the names of applicant institutions and principal investigators and privileged information from the files pertaining to the proposals. The meeting will

also include a review of the peer review documentation pertaining to applicants. These matters are within exemption (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, National Science Foundation, on July 6, 1979.

M. Rebecca Winkler,

Committee Management Coordinator.

December 15, 1982.

[FR Doc. 82–34441 Filed 12–17–82; 8:45 am]

BILLING CODE 7555–01–M

Advisory Panel for Behavioral and Neural Sciences; Subpanel on Neurobiology Group "B"; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Subpanel on Neurobiology of the Advisory Panel for Behavioral and Neural Sciences.

Date and time: January 13 and 14, 1983; 9:00 a.m. to 5:00 p.m. each day.

Place: The Board Room of the Holiday Inn, Fisherman's Wharf, 1300 Columbus Avenue, San Francisco, CA 94133.

Type of meeting: Closed.

Contact Person: Dr. Nathaniel G. Pitts, Associate Program Director, Neurobiology Program, Room 320, National Science Foundation, Washington, D.C. 20550, telephone 202/357–7471.

Purpose of panel: To provide advice and recommendations concerning support for research in neurobiology.

Agenda

To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing

The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to Close Meeting

This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, National Science Foundation, on July 6, 1979.

M. Rebecca Winkler,

Committee Management Coordinator.

December 15, 1982.

BILLING CODE 7555–01–M

Advisory Panel for Biotic Systems and Resources; Subpanel on Ecology; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Subpanel on Ecology of the Advisory Panel for Biotic Systems and Resources.

Date and time: January 13 and 14, 1983—8:30 a.m. to 5:00 p.m. each day.

Place: Room 1141, National Science Foundation, 1800 G St., NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. Gary W. Barrett, Program Director, Ecology (202) 357–9734, Room 1140, National Science Foundation, Washington, D.C. 20550.

Purpose of subpanel: To provide advice and recommendations concerning support for research in Ecology.

Agenda

Review and evaluation of research proposals and projects as part of the selection process of awards.

Reason for Closing

The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to Close Meeting

This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, National Science Foundation, on July 6, 1979.

M. Rebecca Winkler,

Committee Management Coordinator.

December 15, 1982.

[FR Doc. 82–34443 Filed 12–17–82; 8:45 am]

BILLING CODE 7555–01–M

Advisory Panel for Biotic Systems and Resources; Subpanel on Population Biology and Physiological Ecology; Notice of Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Subpanel on Population Biology and Physiological Ecology of the Advisory Panel for Biotic Systems and Resources.

Date and time: January 20 and 21, 1983—8:30 a.m. to 5:00 p.m. each day.

Place: Room 1141, National Science Foundation, 1800 G. St., NW., Washington D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. Robert E. Cook, Program Director, Population Biology and Physiological Ecology (202) 357–9728, Room 1140, National Science Foundation, Washington, D.C. 20550.

Purpose of subpanel: To provide advice and recommendations concerning support for research in population biology and physiological ecology.

Agenda

Review and evaluation of research proposals and projects as part of the selection process of awards.

Reason for Closing

The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to Close Meeting

This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, National Science Foundation, on July 6, 1979.

M. Rebecca Winkler,

Committee Management Coordinator.

Advisory Panel for Biotic Systems and Resources; Subpanel on Systematic Biology; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Subpanel on Systematic Biology of the Advisory Panel for Biotic Systems and Resources.

Date and Time: January 10 and 11, 1983—8:30 a.m. to 5:00 p.m. each day.

Place: Room 1141, National Science Foundation, 1800 G St., NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact Person: Dr. Wallace E. LaBerge, Program Director, Systematic Biology (202) 357–9588, Room 1140, National Science Foundation, Washington, D.C. 20550.

Purpose of subpanel: To provide advice and recommendations concerning support for research in systematic biology.

Agenda

Review and evaluation of research proposals and projects as part of the selection process of awards.

Reason for Closing

The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to Close Meeting

This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, National Science Foundation, on July 6, 1979.

BILLING CODE 7555-01-M

POSTAL RATE COMMISSION

[Docket No. A83–10]

Liberty Farms, Calif.; Order of Filing of Appeal

December 15, 1982.

In the matter of: Liberty Farms, California 95647; Beverly Brownell, Petitioner.

On November 30, 1982, the Commission received a Mailgram from Mrs. Beverly Brownell ("Petitioner") expressing her concern about the Postal Service's plans to close the Liberty Farms, California, post office. It was unclear whether Mrs. Brownell wanted the Commission to consider this an appeal of the Postal Service's determination. Consequently, the Secretary of the Commission, Mr. David F. Harris, wrote to Mrs. Brownell on November 30, 1982, and asked whether it was her intention to file an appeal. On December 10, 1982, the Commission received Mrs. Brownell's second letter in which she clearly stated her intention to appeal the Postal Service's determination to close the Liberty Farms post office. Her letter effectively requests the review provided by section 404(b) of the Postal Reorganization Act [39 U.S.C. 404(b)].[1]

The petition sets out the Postal Service action complained of in sufficient detail to warrant further inquiry to determine whether the Postal Service complied with the applicable law and its regulations for the closing of post offices.[2]

Upon preliminary inspection, the Petitioner's letter of December 10, 1982, appears to present as issues of law all of the factors considered by the Postal Service in making a determination to close a post office, namely:

1. The effect of such closing on the community served by such post office [39 U.S.C. 404(b)(2)(A)];
2. The effect of such closing on an employee of the Postal Service employed at such office [39 U.S.C. 404(b)(2)B)];
3. Whether such closing is consistent with the policy of the Government, as stated in section 101(b) of this title, that the Postal Service shall provide a maximum degree of effective and regular postal services to rural areas, communities, and small towns where post offices are not self-sustaining [39 U.S.C. 404(b)(2)(C)];
4. The economic savings to the Postal Service resulting from such closing [39 U.S.C. 404(b)(2)(D)].

Other issues of law may become apparent when the Commission has had the opportunity to examine the record made by the Postal Service. The record may be found to resolve adequately one or more of the issues presented by the Petitioner's letter.

In view of the above, and in the interest of expediting this proceeding under the 120-day decisional deadline imposed by section 404(b)(5), the Postal Service is advised that the Commission reserves the right to request a legal memorandum from the Service on the issues described above and/or any further issues of law disclosed by the record in this case. In the event that the Commission finds such memorandum necessary to explain or clarify the Service's legal position or interpretation on any such issue, it will make the request therefor by order, specifying the issues to be addressed.

When such a request is issued, the memorandum shall be filed within 20 days of the issuance, and a copy of the memorandum shall be served on the Petitioner by the Service.

In briefing the case or in filing any motion to dismiss for want of prosecution, in appropriate circumstances the Service may incorporate by reference all or any portion of a legal memorandum filed pursuant to such an order.

The Commission orders:

(A) The appeal letter from Mrs. Beverly Brownell be accepted as a petition for review pursuant to section 404(b) of the Act [39 U.S.C. 404(b)].

(B) The Secretary of the Commission shall publish this Notice and Order in the **Federal Register.**

By the Commission.

David F. Harris,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 12891; 812-8386]

Chicago Partners I et al.; Application

December 10, 1982.

In the matter of; Chicago Partners I, Chicago Partners II, Winthrop Financial Co., Inc. and Linnaeus-Hawthorne Associates, 225 Franklin Street, Boston, Mass. 0210, (812-8386).

Chicago Partners I and Chicago Partners II (the "Partnerships"), each of which is a District of Columbia limited partnership, and their general partners, Winthrop Financial Co., Inc., and Linnaeus-Hawthorne Associates ("Linnaeus-Hawthorne") (collectively referred to hereinafter as ("Applicants")) filed an application on November 30, 1982, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") for an order exempting the Partnerships from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that the Partnerships were formed on July 1, 1982, under the District of Columbia Limited Partnership Act, and are designed to provide private investors with a means of acquiring equity interests in government-assisted housing and to otherwise implement the policy of Title IX of the Housing and Urban Development Act of 1968 (the "1968 Act"). Each Partnership has acquired a limited partnership interest in a separate Illinois partnership (the "Operating Partnership") which will construct, own and operate a portion of a multi-use high-rise complex ("Ontario/Erie"). Ontario/Erie, located in an area of government-assisted urban renewal, is receiving financing assistance from federal governmental agencies. Applicants contend that each Partnership will exist and be operated as a "two-tier" limited partnership in accordance with Investment Company Act Release No. 8456 (August 9, 1974) ("Release No. 8456").

Applicants state that each Partnership is organized as a limited partnership because a limited partnership is the only form of organization which provides an investor with both liability limited to his capital investment and the ability to claim on his individual tax return the deductions, losses, credits, and other tax items a partnership can pass through to its partners. Applicants further state that each Partnership's investment objectives are to invest in its respective Operating Partnership, provide tax benefits on a current basis, obtain reasonable protection for its investment in the respective Operating Partnership, provide potential for appreciation, and provide potential for cash distributions from operations (on a limited basis), refinancing, or sale of Ontario/Erie.

According to the application, Chicago Partners I was formed to invest as a 98.998 percent limited partner in Ontario Place Associates, A Ltd. Partnership ("Operating Partnership I"), an Illinois limited partnership. Operating Partnership I will construct, own and operate 470 rental apartment units and a ground level garage (the "Residential Project") in Ontario/Erie. Applicants state that tenants of 20 percent of the apartment units in the Residential Project will be eligible for rental assistance from the United States Department of Housing and Urban Development ("HUD"). Chicago Partners II was formed to invest as a 98.998 percent limited partner in Erie Place Associates, A Ltd. Partnership ("Operating Partnership II"), which will construct, own and operate the first 6 floors of Ontario/Erie with approximately 111,000 net rentable square feet of office and retail space (the "Commercial Project"). Applicants further state the investment by each Partnership in its respective Operating Partnership (other than short-term interim investments made prior to the making of all capital contributions to the Operating Partnership and which are not subject to the discretion of management) will be its only investment; Chicago Partners I and Chicago Partners II will not acquire interests in any other entities or property.

Applicants state that although the Residential Project and the Commercial Project are considered two legally separate interests in real estate and will be operated as separate real estate enterprises, all financing, HUD mortgage insurance, and construction commitments relating to Ontario/Erie were executed by Operating Partnership I and Operating Partnership II as co-borrowers. Ontario/Erie is receiving permanent financing from the Government National Mortgage Association ("GNMA"), and HUD is insuring the construction loan and permanent mortgage.

Applicants state that Winthrop Financial Co., Inc. ("Managing General Partner") is the managing general partner of each Partnership. Linnaeus-Hawthorne, an affiliate of the Managing General Partner, is also a general partner of each Partnership.

According to the application, each Partnership will be controlled by the Managing General Partner, and the limited partners, consistent with their limited liability status, will not be entitled to participate in the control of the business of the Partnership. Applicants state, however, that limited partners owning a majority of Partnership interests will have the right to amend their respective partnership agreement, dissolve the Partnership, remove any general partner and elect a replacement therefor. Any amendment to the respective partnership agreements may not allow the limited partners to take part in the control of the Partnership's business or otherwise affect their limited liability. Applicants represent, in addition, that under each partnership agreement, each limited partner is entitled to review all books and records of the Partnership at any and all reasonable times.

Applicants state that Chicago Partner I will offer 85 units of limited partnership interest (the "units") at $154,000 per unit to investors meeting certain suitability standards described below, pursuant to Section 4(2) of the Securities Act of 1933, as amended (the "Securities Act") and Regulation D promulgated thereunder. Applicants further state that Chicago Partners II will offer 30 units of limited partnership interests at a price of $159,500 per unit to investors meeting the same suitability standards. Although the offerings of units in Chicago Partners I and Chicago Partners II will be conducted as separate offerings, they will be treated as a single offering for certain purposes of the Securites Act, including, for example, determining the number of permitted purchasers of units under Regulation D. Applicants represent that subscriptions for units must be approved by the Managing General Partner, and such approval will be made conditional upon representations as to suitability of the investment for each subscriber.

Applicants state that although the Partnerships' direct control over the management of the respective Operating Partnerships is limited, the Partnerships'

ownership of interests in the Operating Partnerships will be the economic equivalent of direct ownership of the Commercials Project and Residential Project themselves. The interests in the Operating Partnerships will have no value other than the Projects themselves.

Applicants state that the general partners and their affiliates will receive various fees and reimbursements as compensation for formation and operation of the Partnership. Applicants further state that the substantial fees and other forms of compensation that will be paid to these persons will not have been negotiated through arm's length negotiations. Applicants assert, however, that insofar as the Release No. 8456 requirement of fair dealing by the general partners with the limited partners of the Partnership is concerned, as reflected by the basic organizational docucments of the Partnership, the partnership agreements and the memorandum relating to the offering of units contain numerous provisions designed to insure such fair dealing. For example, with respect to the above described compensation, Applicants represent that the terms of all such compensation will be fair and not less favorable to the Partnership than would be the case if such terms had been negotiated with independent third parties. Applicants further represent that they believe such compensation meets all applicable guidelines necessary to permit the units to be offered and sold in the various states which prescribe such guidelines, including the statement of policy adopted by the North American Securities Administration in respect of real estate programs. Applicants also state that no fees will be payable to the Managing General Partner, or any of its affiliates, if all units offered to investors are not sold.

Although the Applicants believe that neither Partnership is an investment company, Applicants request that the Partnerships be exempted from the provisions of the Act pursuant to Section 6(c) of the Act. Section 6(c) of the Act authorizes the Commission to exempt any person, security, transaction, or any class or classes of persons, securities, or transactions, from the provisions of the act and the rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants contend that the exemption of the Partnerships from the provisions of the Act is both necessary and appropriate in the public interest because the form of organization of each Partnership (*i.e.*, a limited partnership), which is necessary to provide private investors with certain tax advantages without which investment in government-subsidized housing would not be attractive, does not conform to the regulatory framework of the Act.

Applicants contend that to defeat the limited partnership arrangement by application of the Act would be to eliminate the primary means of attracting private equity capital into government-assisted housing and would frustrate the national policy declared by Congress in Section 901 of Title IX of the 1968 Act: "to encourage the widest possible participation by private enterprise in the provision of housing for low or moderate income families. . . ."

Applicants also contend that the exemption would be consistent with the protection of investors and the purposes and policies underlying the Act because interests in each Partnership are being sold only to sophisticated investors as contemplated by Release No. 8456. In addition to representing that he or she is either an "accredited investor" as prescribed by Regulation D or one of up to 35 "qualified investors" who meet certain suitability requirements, each prospective investor in each Partnership will be required to represent in his or her subscription agreement that: (a) he or she meets any special requirements of his or her state of residence and/or state in which the transaction occurs; (b) his or her overall commitment to investments which are not readily marketable is reasonable in relation to his or her net worth; (c) he or she is willing and able to bear the economic risk of his or her investment in the units, has no need for liguidity in such investment and is able to sustain a complete loss of such investment; (d) he or she has read the partnership and operating partnership agreements and the memorandum for purposes of evaluating the risks of investing in the units; (e) he or she has substantial experience in making investment decisions of this type or is relying on his or her qualified adviser in making this investment decision; and (f) is purchasing units for his or her own account, for investment, and not with a view to resale. Furthermore, Applicants state, it is anticipated that comparable suitability standards will be imposed by each Partnership in connection with any transfer of units, and any such transfer will be subject to various restrictions. In addition, under the laws of certain states, an investor may transfer units only to persons who meet similar standards, and each Partnership will require assurance that such standards are met.

Applicants state that the general partners are required to act in a fiduciary capacity with respect to each Partnership and its limited partners. Finally, Applicants represent that although the general partners are engaged in other transactions independent from those involving the Partnerships, the Partnerships will not acquire or lease properties or interests therein to the general partners or their affiliates.

Notice is hereby given that any interested person may, not later than December 31, 1982, at 5:30 p.m., submit to the commission, in writing, a request for a hearing on the application accompanied by a statement as to the nature of his/her interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or such person may request notification should the Commission order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such reguest shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application herein will be issued as a matter of course following said date unless the commission thereafter orders a hearing, upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 12892-5366]

Merchants Bancorporation; Application

December 10, 1982.

In the matter of Merchants Bancorporation, 8th and Jackson Streets, Topeka, Kans. 66112, (812-5366).

Merchants Bancorporation ("Applicant"), a Kansas corporation, filed an application, and an amendment thereto, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") for an order of the Commission exempting four corporations to be formed by Applicant from all of the provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it was incorporated under the laws of Kansas in 1981 and is a one-bank holding company registered under the Bank Holding Company Act of 1956, as amended. Applicant's principal subsidiary is the Merchants National Bank of Topeka (the "Bank"), which is engaged in the commercial banking and trust business in Topeka, Kansas. Applicant's stock is held of record by 480 stockholders and is registered under the Securities Exchange Act of 1934.

Applicant states that under Kansas law a bank holding company may not acquire 25 percent or more of the voting shares of more than one bank. Thus, applicant represents that until such time as the Kansas law is changed to permit multi-bank holding companies, Applicant cannot acquire more than 24.9 percent of the stock of any bank other than Bank.

Applicant notes that due to the fact that the Kansas law does not restrict the ownership by individual stockholders, singly or collectively, of more than one bank or bank holding company, various means have been employed to create privately-owned chain-bank systems under which each bank in the system is held by a one-bank holding company that is under common control with others in the system.

Applicant states that because of the loss of public deposits, the lack of growth in the Topeka economy and the competition of money market funds, Bank's deposits have declined in recent years. Applicant believes that in order to compete effectively for deposits with money market funds and other financial institutions, it must, in the long term, have the ability to acquire banks in other communities. With the continuing expansion and growth of privately owned chain-bank systems and the recent entry into the bank acquisition marketplace of larger competitors, Applicant represents that its need to secure this capability has become immediate. Without an early capability for expansion, Applicant's management believes that many attractive acquisition opportunities could well be lost and that the stockholders will not be able to take advangages of opportunities to maximize the value of their banking investment.

Applicant has developed a proposed plan which it states will provide a vehicle for the acquisition by Applicant of a significant interest in other banks located in Kansas and give Applicant the right to acquire the remaining interest at such time as multi-bank holding companies are permitted in Kansas. Applicant believes that the proposed plan is superior to the alternative means of acquiring significant interests in other Kansas banks because it will enable all of its stockholders to participate in the benefits of such acquisitions.

Applicant states that the proposed plan involves the creation of four new subsidiaries ("Corp. A", "Corp. B", "Corp. C", and "Corp. D", collectively the "Corps.") which initially be capitalized by the sale of stock to Applicant in exchange for the assignment of separate time deposits in the Bank. Applicant further states that each Corp. will attempt to purchase a bank whose principal office is located in Kansas with the funds provided from its initial capitalization together with the proceeds of additional stock sales to Applicant and bank borrowings. In order to ensure the availability of consolidated tax returns, Applicant represents that no acquisition will be effected unless at least 80 percent of a bank's outstanding stock can be acquired.

Applicant states that its shareholders will initially receive temporary, non-transferable certificates representing their interests in the Corps. ("temporary certificates"). These certificates will be issued together with a letter explaining that they should be turned over to an escrow agent, the Bank, and that any transfer by them of their holdings in Applicant's stock will constitute a transfer of their interests in the Corps. Applicant represents that at such time as an agreement in principal or a binding agreement has been reached with respect to the purchase of at least 80 percent of the outstanding stock of a bank (but in any event prior to the closing of such acquistion), the stock of the acquiring Corp. will be distributed to the persons who are stockholders of Applicant at the date for the distribution of the Corps.' stock. Applicant further represents that it anticipates that the Corps. will acquire their respective banks within three years from the date of the order and, therefore, the Corps. will cease to fall within the defintiion of investment company under Section 3(a)(1) of the Act at that time. Applicant states that, due to the difficulty of finding suitable acquistion targets in the current competitive environment, it would be unable to represent with certainty that such acquistions would occur within three years.

Following the distribution of the temporary certificates, Applicant will own 4.9 percent of the stock of the Corps. However, Applicant states that it will be obligated under a subscription agreement entered into with each of the Corps. to purchase enough newly issued shares to make it the owner of up to 24.9 percent of their outstanding stock. Applicant represents that the closing for a subscription would take place contemporaneously with a purchase of at least 80 percent of the outstanding stock of a bank by the acquiring Corp.

Applicant states that the subscription agreement will grant an option to it to purchase all of the assets of the issuing Corp., which would include the bank stock held by the issuing Corp. Applicant represents that the option will not be exercisable until multi-bank holding companies become legally permissible in Kansas. According to the application, the exercise price of the option will be equal to the net book value of the issuing Corp. and will be payable solely in stock of the Applicant having an equivalent net book value.

Applicant states that one of the key components of the proposed plan is to ensure that stockholders of Applicant acquire ownership for Federal income tax purpose of the Corps. stock upon transfer to them of the temporary certificates during the Applicant's current fiscal year, ending December 31, 1982. Applicant anticipates that the realization of losses in Bank's bond portfolio arising from sales of a portion thereof will eliminate all consolidated earnings in the current year. Since the Applicant was recently organized and has no accumulated earnings and profits for tax purposes and will have none in the current year, Applicant has sought a ruling from the Internal Revenue Service confirming that the distribution of the temporary certificates will constitute a non-taxable return of capital to Applicant's shareholders rather than a taxable dividend if completed during the current year. Applicant states that but for this tax factor, the distribution of the stock of a particular Corp. by Applicant to its shareholders could be timed to coincide with obtaining an agreement in principle to acquire a bank's stock. Applicant points out that in such case, the period during which that Corps.' assets would need to be invested to preserve their value would be eliminated almost completely. Applicant

submits that it would be unfair to impose such a tax burden on its shareholders (who it should be noted will also be the Corps.' shareholders) merely in order to avoid the potential costs and burdens of registration and regulation under the Act.

Rule 3a–2 under the Act provides an exclusion from the definition of an investment company under Section 3(a)(1) during a period of time not to exceed one year, provided that the issuer has a bona fide intent to be engaged primarily, as soon as is reasonably possible (in any event by the termination of such period of time), in a business other than that of investing, reinvesting, owning, holding or trading in securities.

According to the application, during the period between the sale of stock of each Corp. to Applicant and the use of the proceeds of such sales by each Corp. (together with certain additional funds ro be provided from the sources described above) to acquire at least 80 percent of the stock of a bank, those proceeds will remain in time deposits. Applicant states that although time deposits such as those held by the Corps. are cash items for purposes of Section 3(a)(3) of the Act, they may be "securities" for purposes of Section 3(a)(1). Without necessarily agreeing, Applicants states that the Corps. therefore potentially constitute "investment companies" within the meaning of Section 3(a)(1) of the Act notwithstanding the fact that the interest form those time deposits will not be reinvested, and such deposits will not be liquidated until acquistions are made.

Applicant states that it believes that Corps. could avoid registration and regulation under the Act by holding their assets in cash or in non-interest bearing bank accounts. Applicant notes, however, that unless such assets are appropriately invested there will be a depletion of those assets by a discount factor equal to the time value of money. Applicant submits that the imposition of such a burden on the Corps.' shareholders would not only be unfair but would raise a question as to whether such action would be consistent with management's fiduciary obligations.

Applicant represents that each of the Corps. would be able to meet the requirements of the exemption form Section 3(a)(1) provided by Rule 3a–2 under the Act with the exception that the length of the period during which their assets are invested in time deposits may, depending upon the availablity of suitable acquisition candidates, exceed one year. Applicant is therefore requesting that the Commission issue an order pursuant to Section 6(c) of the Act exempting each of the Corps. from all of the provisions of the Act.

Section 6(c) of the Act permits the Commission, among other things, to grant an exemption by order upon application from any provision or provisions of the Act provided such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant submits that its requested exemptive order should be granted because the Corps. will have a bona fide intent to be engaged primarily, as soon as reasonably possible, and in any event in less than three years, in a business other than that of investing, reinvesting, owning, holding or trading in securities. Applicant states that this intent is evidenced by the purpose for the formation of the Corps. as well as the competitive factors outlined above. Applicant further states that this intent is evidenced by the purpose for the formation of the Corps. as well as the competitive factors outlined above. Applicant further states that this intent will also be evidenced by ths same objective standards set forth in Rule 3a–2. Applicant represents in this regard that the predominant activity of the Corps. during the period prior to consummation of an acquisition will be to locate suitable acquisition candidates and negotiate the terms of an acceptable acquisition agreement. Applicant further represents that there may be regulatory waiting periods and other factors outside of its control. While each Corps.' assets will be invested in time deposits, Applicant represents that such investment will be made solely in order to preserve the value of the capital of the Corps. pending an acquisition and that there will be no speculative activity in such investments. In view of the limited purposes of the investment, its temporary nature, and the lack of speculative actiivity, the Applicant submits that the Corps. should not be deemed to be engaged primarily in the business of investing, reinvesting or trading in securites for purposes of evaluating the appropriateness of exemptive relief under Section 6(c) of the Act.

Applicant points out that in compliance with Rule 3a–2 under the Act, the bona fide intent discussed above will be evidenced by the adoption by each Corp.'s board of directors of a series of resolutions to the effect that, prior to the acquisition of 80 percent or more of the outstanding stock of a bank: (i) The Corps.' assets will be held solely as time deposits; (ii) such investments will be made solely in order to preserve the value of the Corps.' capital and the Corps. shall not engage in any sort of speculative activity in such securities; (iii) the sole purpose and business activity of the Corps. during such period (other than the making of investments to preserve the value of its capital) shall be to locate a bank whose main office is in Kansas and which is a suitable candidate for acquisition by the Corps. and to take such steps as are necessary or appropriate to effectuate such acquisition; (iv) the Corps.' management will be authorized, empowered and directed to use their best efforts to accomplish the foregoing purpose as soon as reasonably possible; and (v) the Corps. shall not hold itself out as being engaged primarily in the business of investing, reinvesting, owing, holding or trading in securities. Applicant submits that the limitations placed on the Corps.' business activities by such resolutions should also ensure that those activities are consistent with the policies underlying Rule 3a–2 and the standards for granting exemptive relief under Section 6(c).

Notice is hereby given that any interested person may, not later than December 31, 1982, at 5:30 p.m., submit to the Commission, in writing, a request for a hearing on the application accompanied by a statement as to the nature of his/her interest, the reasons for such request and issues, if any, of fact or law proposed to be controverted, or such person may request notification should the Commission order a hearing therein. Any such communication should be addressed: Secretary, securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application herein will be issued as a matter of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 12890; 812-5358]

Prime Cash Fund; Application

December 10, 1982.

In the matter of: Prime Cash Fund, 200 Park Avenue, New York, N.Y. 10017; (812-5358).

Prime Cash Fund ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application requesting an order of the Commission pursuant to Section 6(c) of the Act exempting Applicant from the provisions Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 therunder to the extent necessary to permit Applicant to compute its net asset value per share, for the purposes of effecting sales, redemptions and repurchases of its shares, to the nearest one cent on a share value of one dollar. Applicant represents that in all other respects, portfolio securities held by Applicant will be valued in accordance with the views set forth in Investment Company Act Release No. 9786 (May 31, 1977) ("Release No. 9786"). All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is organized as a Massachusetts business trust, and that it is a "money market" fund, the investment objective of which is to achieve as high a level of current income as is consistent with high stability and liquidity of capital, through investment in a portfolio of "money market" securities meeting specified quality standards. According to the preliminary prospectus filed on October 8, 1982, with Applicant's N-1 registration statement under the Securities Act of 1933, Applicant proposes to invest in (1) Obligations issued or guaranteed by the United States government or its agencies or instrumentalities ("U.S. Government Securities"); (2) time deposits, certificates of deposit, bankers' acceptances and other bank instruments, if they are obligations of a domestic bank subject to regulation by the U.S. Government and having total assets of at least $1.5 billion (but not including obligations issued by foreign branches of these banks), and instruments secured by any such obligation; (3) commercial paper, including variable amount master demand notes, rated A-1 by Standard & Poor's Corporation ("S&P") Prime-1 or by Moody's Investors Service, Inc. ("Moody's") or, if not rated, issued by a corporation the debt obligations of which Applicant is permitted to acquire; (4) corporate debt obligations if they are rated AAA or AA by S&P, or Aaa or Aa by Moody's; and (5) certain other obligations accompanied by a guarantee of principal and interest by either a bank the obligations of which Applicant may acquire, or by a corporation the commercial paper of which Applicant may acquire; and (6) repurchase agreements relating to the foregoing classes of securities. Applicant's preliminary prospectus states that the collateral under any repurchase agreement will be marked to market every business day so that the value of the collateral is at least equal to the value of the loan, including the accrued interest earned thereon, plus sufficient additional market value as is considered necessary to provide a margin of safety. The preliminary prospectus also states that Applicant's investment adviser will regularly review the financial strength of all vendors of repurchase agreements to Applicant. Finally, Applicant's preliminary prospectus states that Applicant will not enter into a repurchase agreement which will cause more than 10% of its assets to be subject to repurchase agreements having a maturity of more than seven days.

Applicant states that its net asset value per share will remain constant at $1.00 except under extraordinary circumstances, as capital changes are reflected in dividends declared rather than in net asset value. Applicant states further that the maintenance of a constant net asset value per share is a crucial factor in attracting and retaining investors. Applicant believes that by valuing its shares in accordance with the "penny-rounding" valuation method it will be able to maintain a constant share value for its shareholders together with full liquidity and a statisfactory investment yield.

Rule 22c-1 provides, in pertinent part, that no registered investment company or principal underwriter therefor, issuing any redeemable security shall sell, redeem, or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to purchase or sell such security.

Section 2(a)(41) of the Act defines value to mean (i) with respect to securities for which market quotations are readily available, the market value of such securities and (ii) with respect to other securities and assets, fair value as determined in good faith by the board of directors.

Rule 2a-4 adopted under the Act provides, as here relevant, that the "current net asset value" of a redeemable security issued by a registered investment company used in computing its price for the purposes of distribution, redemption and repurchase shall be an amount that reflects calculations made substantially in accordance with the provisions of that rule, with estimates used where necessary or appropriate. Rule 2a-4 further provides that portfolio securities with respect to which market quotations are readily available shall be valued at current market value, and that other securities and assets shall be valued at fair value as determined in good faith by the board of directors. The Commission has expressed the view that, among other things, (1) Rule 2a-4 under the Act requires that portfolio instruments of "money market" funds be valued with reference to market factors, and (2) it would be inconsistent generally, with the provisions of Rule 2a-4 for a "money market" fund using a "floating" net asset value to "round off" calculations of its net asset value per share to the nearest one cent on a share value of $1.00 (Release No. 9786). Although Applicant does not use a floating net asset value, it believes that an exemption from the above-cited provisions is necessary to enable Applicant to use the penny-rounding method of valuation in circumstances in which Applicant's capital depreciation on a particular day exceeds its current income for that day. Under such circumstances, Applicant would want to be able to maintain its net asset value per share at $1.00 notwithstanding the effect which capital depreciation would have upon the net asst value for that day.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of the Act or of any rule or regulation under the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In suppport of the exemptions requested, Applicant states that the

issuance of the requested order is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. It is asserted that shareholders who purchase Applicant's shares with the expectation of receiving high current income and stability of principal would be unfairly treated should there be a deviation from the $1.00 price per share. Applicant represents that prior to adopting the penny-rounding valuation method, Applicant's Board of Trustees shall have determined, in good faith based upon a full consideration of all material factors, that, absent unusual circumstances, such valuation method will fairly reflect the value of each shareholder's interest in Applicant; and Applicant has agreed that it will continue to use the penny-rounding valuation method only so long as its board of Trustees believes that such method fairly reflects the value of each shareholder's interest. In addition, applicant submits that by adhering to the conditions set forth immediately hereinafter it will substantially reduce the likelihood of significant variations from a constant share price and of any dilution of the assets and returns of incoming or outgoing shareholders:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, Applicant's Board of Trustrees undertakes—as a particular responsibility within its overall duty of care owed to Applicant's shareholders—to assure to the extent reasonably practicable, taking into account current market conditions affecting Applicant's investment objective, that the price per share as computed for purposes of distribution, redemption and repurchase, rounded to the nearest one cent, will not deviate from one dollar.

2. Applicant will maintain a dollar-weighted average portfolio maturity[1] appropriate to its objective of maintaining a stable price per share. Applicant will not purchase any instrument with a remaining maturity of more than one year; nor will it maintain a dollar-weighted average portfolio maturity that exceeds 120 days.[2]

3. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments which the Board of Trustees determines present minimal credit risks, and which are of "high quality" as determined by any major rating service, or, in the case of any instrument that is not rated, of comparable quality as determined by the Board of Trustees.

Notice is hereby given that any interested person may, not later than January 4, 1983, at 5:30 p.m., submit to the Commission, in writing, a request for a hearing on the application accompanied by a statement as to the nature of his/her interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or such person may request to be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter including the date of the hearing and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[1] In determining the dollar-weighted average portfolio maturity and the maturity of any individual instrument, Applicant will use the definition of "maturity of an instrument" contained in proposed Rule 2a-7 set forth in Release No. IC-12206 (January 29, 1982), whether or not the proposed rule is withdrawn, or upon the effectiveness of a final rule, the definition contained in such final rule. Applicant will also treat instruments called for redemption in one year or less as maturing within one year.

[2] In fulfilling this condition, if the disposition of a portfolio instrument results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

[Release No. 12889; 812-536.]

Trinity Liquid Assets Trust; Application

December 10, 1982.

In the matter of; Trinity Liquid Assets Trust; 200 Park Avenue, New York, N.Y. 10017; (812-5360).

Trinity Liquid Assets Trust ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application requesting an order of the Commission pursuant to Section 6(c) of the Act exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to the extent necessary to permit Applicant to compute its net asset value per share, for the purposes of effecting sales, redemptions and repurchases of its shares, to the nearest one cent on a share value of one dollar. Applicant represents that in all other respects, portfolio securities held by Applicant will be valued in accordance with the views set forth in Investment Company Act Release No. 9786 (May 31, 1977) ("Release No. 9786"). All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is a "money market" fund organized as a Massachusetts business trust, the investment objective of which is to achieve as high a level of current income as is consistent with high stability and liquidity of capital, through investment in a portfolio of "money market" securities meeting specified quality standards. According to the preliminary prospectus filed with Applicant's N-1 Registration Statement under the Securities Act of 1933 on October 8, 1982, Applicant proposes to invest in (1) Obligations issued or gruaranteed by the United States government or its agencies or instrumentalities ("U.S. Government Securities"); (2) time deposits certificates of deposit, bankers' acceptances and other bank instruments if they are obligations of a domestic bank subject to regulation by the U.S. Government and having total assets of at least $1.5 billion (but not including obligations issued by foreign branches of these banks), and instruments secured by any such obligation; (3) commercial paper, including variable amount master demand notes, rated A-1 by Standard & Poor's Corporation ("S&P") or Prime-1 by Moody's Investors Service, Inc ("Moody's") or, if not rated, issued by a corporation the debt obligations of which Applicant is permitted to acquire; (4) corporate debt obligations if they are rated AAA or AA by S&P or Aaa or Aa by Moody's; (5) certain other obligations accompanied by a guarantee of principal and interest by either a bank the obligations of which Applicant may acquire, or by a

corporation the commmercial paper of which Applicant may acquire; and (6) repurchase agreements relating to the foregoing classes of securities. Applicant's preliminaray prospectus states that the collateral under any repurchase agreement will be marked to market every business day so that the value of the collateral is at least equal to the value of the loan, including the accrued interest earned thereon, plus sufficient additional market value as is considered necessary to provide a margin of safety. The preliminary prospectus also states that the Adviser will regularly review the financial strength of all vendors of repurchase agreements to Applicant. Finally, Applicant's preliminary prospectus states that Applicant will not enter into a repurchase transaction which will cause more than 10% of its assets to be subject to repurchase agreements having a maturity of more than seven days.

Applicant states that its net asset value per share will remain constant at $1.00 except under extraordinary circumstances, as capital changes are reflected in dividends declared rather than in net asset value. Applicant states further that the maintenance of a constant net asset value per share is a crucial factor in attracting and retaining investors. Applicant believes that by valuing its shares in accordance with the "penny-rounding" valuation method it will be able to maintain a constant share value for its shareholders together with full liquidity and a satisfactory investment yield.

Rule 22c–1 provides, in pertinent part, that no registered investment company or principal underwriter thereof, issuing any redeemable security shall sell, redeem, or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to purchase or sell such security.

Section 2(a)(41) of the Act defines value to mean (i) With respect to securities for which market quotations are readily available, the market value of such securities and (ii) with respect to other securities and assets, fair value as determined in good faith by the board of directors.

Rule 2a–4 adopted under the Act provides, as here relevant, that the "current net asset value" of a redeemable security issued by a registered investment company used in computing its price for the purposes of distribution, redemption and repurchase shall be an amount that reflects calculations made substantially in accordance with the provisions of that rule, with estimates used where necessary or appropriate. Rule 2a–4 further provides that portfolio securities with respect to which market quotations are readily available shall be valued at current market value, and that other securities and assets shall be valued at fair value as determined in good faith by the board of directors. The Commission has expressed the view that, among other things, (1) Rule 2a–4 under the Act requires that portfolio instruments of "money market" funds be valued with reference to market factors, and (2) it would be inconsistent generally, with the provisions of Rule 2a–4 for a "money market" fund using a "floating" net asset value to "round off" calculations of its net asset value per share to the nearest one cent on a share value of $1.00 (Release No. 9786). Although Applicant does not use a floating net asset value, it believes that an exemption from the above-cited provisions is necessary to enable Applicant to use the penny-rounding method of valuation in circumstances in which Applicant's capital depreciation on a particular day exceeds its current income for that day. Under such circumstances, Applicant would want to be able to maintain its net asset value per share at $1.00 notwithstanding the effect which capital depreciation would have upon the net asset value for that day.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of the Act or of any rule or regulation under the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of the exemptions requested, Applicant states that the issuance of the requested order is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. It is asserted that shareholders who purchase Applicant's shares with the expectation of receiving high current income and stability of principal would be unfairly treated should there be a deviation from $1.00 per share. Applicant represents that prior to adopting the penny-rounding valuation method, Applicant's Board of Trustees shall have determined, in good faith based upon a full consideration of all material factors, that absent unusual circumstances, such valuation method will fairly reflect the value of each shareholder's interest in Applicant; and Applicant has agreed that it will continue to use the penny-rounding valuation method only so long as the Board of Trustees believes that such method fairly reflects that value of each shareholder's interest. In addition, Applicant submits that its adherence to the conditions set forth below will substantially reduce the likelihood of significant variations from a constant share price and of any dilution of the assets and returns of incoming or outgoing shareholders:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, Applicant's Board of Trustees undertakes—as a particular responsibility within its overall duty of care owed to Applicant's shareholders—to assure to the extent reasonably practicable, taking into account current market conditions affecting Applicant's investment objective, that Applicant's price per share as computed for the purposes of distribution, redemption and repurchase, rounded to the nearest one cent, will not deviate from one dollar.

2. Applicant will maintain a dollar-weighted average portfolio maturity [1] appropriate to its objective of maintaining a stable price per share. Applicant will not purchase any instrument with a remaining maturity of more than one year; nor will it maintain a dollar-weighted average portfolio maturity that exceeds 120 days. [2]

3. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments which the Board of Trustees determines present minimal credit risks, and which are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by the Board of Trustees.

---

[1] In determining the dollar-weighted average portfolio maturity and the maturity of any individual instrument, Applicant will use the definition of "maturity of an instrument" contained in proposed Rule 2a–7 set forth in Release No. IC–12206 (January 29, 1982), whether or not the proposed rule is withdrawn, or upon the effectiveness of a final rule, the definition contained in such final rule. Applicant will also treat instruments called for redemption in one year or less as maturing within one year.

[2] In fullfilling this condition, if the disposition of a portfolio instrument result in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

Notice is hereby given that any interested person may, not later than January 4, 1983, at 5:30 p.m., submit to the Commission, in writing, a request for a hearing on the application accompanied by a statement as to the nature of his/her interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or such persons may request to be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (be affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advise as to whether a hearing is ordered, will receive any notices and orders issued in this matter including the date of the hearing and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 19327; File No. SR—MCC—82—19]

Midwest Clearing Corp.; Filing of Proposed Rule Change

December 13, 1982.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on November 26, 1982, the Midwest Clearing Corporation filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change would amend MCC's By-Laws to increase the number of members of the Board of Directors by two, from 25 to 27. The two additional positions will be filled by public governors, i.e., governors not affiliated with a broker or dealer.

In its filing, MCC stated that the participation and added perspectives provided by public governors is valued by MCC's Board of Directors. With the expectation that the changes in the securities industry will continue at a rapid rate, and indeed may accelerate, the Board will be required to consider and act upon a much broader range of policy matters than ever before. The additional public governor positions will benefit the Board by their added participation in handling such policy matters. MCC stated that the proposed amendments to the By-Laws are consistent with Section 17A(b)(3)(C) of the Securities Exchange Act of 1934 in that it helps assure fair representation of its shareholder (the Midwest Stock Exchange) in the selection of its directors and administration of its affairs.

In order to assist the Commission in determining whether to approve the proposed rule change or institute proceedings to determine whether the proposed rule change should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Reference should be made to File No. SR-MCC-82-19.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19323; File No. SR-OCC-82-25]

Options Clearing Corp.; Self—Regulatory Organizations; Proposed Rule Change Relating to OCC's Options Pledge Program

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 9, 1982, the Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by OCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Proposed Rule Change

The proposed rule change implements OCC's Options Pledge Program. Proposed new Rule 614 would permit OCC's Clearing Members to pledge excess long market-maker option positions as collateral to support loans from banks or other Clearing Members. The proposed rule change would also add a new interpretation to Rule 601 to make it clear that long option positions which are pledged as collateral cannot be paired with short option positions contained in any other account of the Clearing Member or otherwise used to reduce the amount of margin which the Clearing Member is required to pay under OCC's rules. In addition, Rule 1106 would be amended to specify the procedures to be used by OCC to close out pledged option positions in the event that the Clearing Member is suspended.

II. Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of, and basis for, the proposed rule change. The text of these statements may be examined at the places specified below. OCC has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to implement OCC's Options Pledge Program as authorized by Article VI, Section 3(d) of OCC's By-Laws. The Options Pledge Program is intended to facilitate the ability of OCC's Clearing

Members to finance their positions by permitting them to pledge excess long market-maker option positions as collateral to support loans from banks or other Clearing Members.

The Options Pledge Program would operate as follows. A Clearing Member may establish a Pledge Account which would be associated with another specific account ("Primary Account") of the Clearing Member which must be either (i) a combined Market-Makers' or specialists' account or (ii) a separate Market-Maker's or specialist's account which is confined to the Clearing Member's transactions as a Market-Maker or specialist. Whenever the Clearing Member desires to pledge a long option position to a Pledgee, the Clearing Member shall file a form instructing OCC to transfer such position from the Primary Account to the Pledge Account. If certain specified conditions are satisfied, OCC will effect the transfer on the next business day and will confirm in writing to the Pledgee and the Clearing Member that such position has been transferred into the Pledge Account. OCC will subordinate its lien on the options in the Pledge Account ("Pledged Options") to the security interest of the Pledgee, thus enabling the Pledgee to use the Pledged Options as collateral to support a loan to the Clearing Member. A Pledged Option shall continue to be pledged to the Pledgee until it is exercised, sold, transferred back to the Primary Account with the written consent of the Pledgee, or until the day before it expires.

A Clearing Member would be permitted to exercise or sell Pledged Options without the consent of the Pledgee because such transactions may need to be effected in response to rapidly changing market conditions, in which case it would be too time consuming to obtain the Pledgee's prior consent for each such transaction. If the Pledgee needs additional security following the sale or exercise of Pledged Options, it is expected that the Pledgee and the Clearing Member will arrange for the loan balance to be paid down or new collateral to be deposited. However, as a last resort, the Pledgee will have the right under Rule 614(i) to demand payment of the profit resulting from an exercise transaction (measured by the difference between the exercise price of the option and the closing price of the underlying stock on the day of exercise) or, in the case of a sale transaction, the closing price of the option on the day of sale. If the Pledgee makes a timely demand for such payment, the Clearing Member will be obligated to make such payment. If the Clearing Member does not, then OCC will take certain specified steps to attempt to collect such payment from the Clearing Member on behalf of the Pledgee.

The proposed rule change is consistent with the purposes and requirements of Section 17A of the Securities Exchange Act of 1934 because it promotes the prompt and accurate clearance and settlement of options transactions. It facilitates the ability of OCC's Clearing Members to finance their positions by permitting them to pledge excess long market-maker option positions as collateral to support loans from banks or other Clearing Members and reduces their borrowing costs by allowing such loans to be secured by pledged options rather than handled on an unsecured basis. Moreover, the proposed rule change contains a number of protective provisions designed to insure that OCC's system of financial safeguards would not be jeopardized.

(B) Burden on Competition

OCC does not believe that the proposed rule change will have any material impact on competition.

(C) Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments were not and are not intended to be solicited by OCC with respect to the proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to be proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 10, 1982.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 19321; File No. SR-PCC-82-5]

Pacific Clearing Corp.; Filing of Proposed Rule Change

December 10, 1982.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on July 12, 1982, the Pacific Clearing Corporation ("PCC") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change would amend Article XI of PCC's By-Laws, with regard to the indemnification of PCC's directors, officers, employees and agents, to conform to recent amendments to the California Corporation Law. Under the propsed rule change, PCC would indemify its "agents" to the maximum extent permissible under California law against all reasonably incurred fines, settlements, expenses, judgments and other fees. The proposal generally adopts the definition of "agent" in the California Corporation Law by including in that category, among others, past or present directors, officers, employees or other agents of PCC or of another entity, if serving in that capacity at PCC's request. PCC believes that the proposal is consistent with Section 17A of the Act because it will assure fair representation

of members of PCC in the selection of directors by removing impediments to serving in such capacity.

In order to assist the Commission in determining whether to approve the proposed rule change or institute proceedings to determine whether the proposed rule change should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register.** Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Referecne should be made to File No. SR–PCC–82–5.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[Release No. 19322; File No. SR–PSDTC–82–2]

Pacific Securities Depository Trust Co.; Filing of Proposed Rule Change

December 10,1982.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on July 12, 1982, the Pacific Securities Depository Trust Company ("PSDTC") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change would amend Article XIII of PSDTC's By-Laws, with regard to the indemnification of PSDTC's directors, officers, employees and agents, to conform to recent amendments to the California Corporation Law. Under the proposed rule change, PSDTC would indemnify its "agents" to the maximum extent permissible under California law against all reasonably incurred fines, settlements, expenses, judgments and other fees. The proposal generally adopts the definition of "agent" in the California Corporation Law by including in that category, among others, past or present directors, officers, employees or other agents of PSDTC or of another entity, if serving in that capacity at PSDTC's request. PSDTC believes that the proposal is consistent with Section 17A of the Act because it will assure fair representation of members of PSDTC in the selection of directors by removing impediments to serving in such capacity.

In order to assist the Commission in determining whether to approve the proposed rule change or institute proceedings to determine whether the proposed rule change should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register.** Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street NW., Washington, D.C. 20549. Reference should be made to File No. SR–PSDTC–82–2.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[Release No. 19294A, SR–Phlx–82–10]

Philadelphia Stock Exchange, Inc.; Proposed Rule Change

December 10, 1982.

In the matter of Philadelphia Stock Exchange, Inc., 1900 Market Street, Philadelphia, PA 19103, (SR–Phlx–82–10), Order Approving Proposed Rule Change.

On December 3, 1982, Securities Exchange Act Release No. 19294 was issued providing approval of a proposed rule change by the Philadelphia Stock Exchange, Inc. ("Phlx") to, among other things, require specialists and alternate specialists to file daily reports with the Phlx under Phlx Rule 236 setting forth the closing position in each Phlx primary issue in which such specialist or alternate specialist is registered. The Release misidentifies the relevant Phlx rule as Rule 274; the correct number is Rule 236.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[Release No. 19325; SR—Phlx—82—13]

Philadelphia Stock Exchange, Inc.; Proposed Rule Change

December 10, 1982.

In the matter of Philadelphia Stock Exchange, Inc.; 1900 Market Street, Philadelphia, PA 19103; (SR–Phlx–82–13).

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on November 10, 1982, the Philadelphia Stock Exchange, Inc. ("Phlx") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change further modifies Phlx option rules regarding delivery of disclosure documents and dissemination of educational materials to conform them to the revised disclosure system for standardized options recently adopted by the Commission.[1] In particular, under the proposed rule change, references to the Options Clearing Corporation ("OCC") prospectus in various Exchange rules

[1] The revised disclosure system was proposed in Securities Exchange Act Release No. 18836 (June 24, 1982), 47 FR 28688 (July 1, 1982) and approved in Securities Exchange Act Release No. 19055 (September 16, 1982), 47 FR 41950 (September 23, 1982).

are replaced, where appropriate, with references to the basic and supplemental options disclosure documents.[2] Also, Exchange Rule 1029 would be amended to apply to "educational materials" as well as to advertisements and sales literature.[3] Finally, Exchange Rule 1044 would be amended to make clear that the time frame for performing delivery and payment obligations for exercised foreign currency options must correspond with the time periods specified in OCC rules.[4]

[2] On October 19, 1982, the Commission approved a proposed rule change filed by the Phlx which replaced references to the current OCC prospectus with references to the current options disclosure document. Securities Exchange Act Release No. 19156; File No. SR–Phlx–82–11. The present proposal makes clear that the delivery requirements pertaining to the core disclosure document also pertain to supplemental disclosure documents, such as the disclosure document covering foreign currency options.

[3] The proposed change modifies Rule 1029 of the Exchange so as to conform to Commission Rule 134a under the Securities Act of 1933, which was adopted as part of the revised disclosure system for standardized options. Rule 134a provides that written materials relating to standardized options shall not be deemed a prospectus under Section 2(10) of the Securities Act provided that certain prescriptive requirements are met and provided that the materials are limited to explanatory information describing the general nature of the standardized options markets, one or more options strategies, as well as the correlative risks involved. The proposed rule change specifies that educational material pertaining to foreign currency options may only be used it it meets the requirements of Rule 134a. The proposed rule change also specifies that, along with advertisements and sales literature, educational material must be approved in advance by the member organization's Compliance Registered Options Principal or his designee and that, along with every advertisement, educational material must be submitted to, and approved by, the Exchange prior to circulation.

[4] In particular, OCC Rule 1607 provides that OCC and the individual broker/clearing member must establish and maintain bank accounts in correspondent banks in each issuing country for purposes of receiving or delivering the foreign currency underlying options contracts. Phlx Rule 1044 provides that the holder exercising a put option, "as promptly as practicable" after exercise, and the writer of a call option, "as promptly as practicable" after assignment of an exercise notice, must arrange for the deposit of the requisite units of foreign currency underlying the exercised option into a designated bank account in the issuing country. Phlx's proposed rule change further provides, however, that the payment of the option exercise price or the deposit of the underlying foreign currency "must be required to occur in correspondence with the timetables specified in the rules of the [OCC]. * * *" Under OCC Rule 1604(a), the exercise settlement date between a broker/clearing member and OCC is the third business day after an exercise notice is properly tendered to OCC. Thus, currently, "customer-side" settlement under the "as promptly as practicable" provision in Phlx Rule 1044 must occur no later than three business days after exercise so as to allow for "street side" settlement under OCC Rule 1604(a) on the third business day after exercise.

Interested persons are invited to submit written data, views, and arguments concerning the proposed rule change within 21 days from the date of publication of the submission in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Reference should be made to File No. SR–Phlx–82–13.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of the filing and of any subsequent amendments also will be available at the principal office of the above-mentioned self-regulatory organization.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 of the Act and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the rule change simply implements the immediate use of the new disclosure system for standardized options as well as the immediate start-up of trading on foreign currency options, both of which were the subject to extensive notice prior to adoption or approval by the Commission. In addition, the portions of the proposed rule change relating to the delivery of the disclosure document and dissemination of educational materials are substantially similar to other self-regulatory organization proposed rule changes recently approved by the Commission.[5]

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change referenced above be, and hereby is, approved.

[5] *See* Securities Exchange Act Release Nos. 19160 (October 19, 1982) and 19309 (December 8, 1982).

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[License No. 05/05–0098]

Doan Resources Corp.; Filing of Application for Approval of a Conflict of Interest Transaction

Notice is hereby given that Doan Resources Corporation (DRC), 110 East Grove, Midland, Michigan 48640, a Federal Licensee under the Small Business Investment Act of 1958, as amended (Act), has filed an application with the Small Business Administration (SBA) pursuant to section 312 of the Act and covered by § 107.1004 of the SBA Rules and Regulations, governing Small Business Investment Companies (13. CFR 107.1004 (1982)) for approval of a conflict of interest transaction falling within the scope of the Section of the Act and Regulations.

Subject to such approval, DRC proposes to provide funds to Sequoia Turner Corporation (STC), for the purpose of providing additional working capital.

The proposed financing is brought within the purview of Section 107.1004(b)(1) of the Regulations because Mr. James R. Weersing, a stockholder of STC, is an Investment Advisor to the Licensee, and therefore is considered an Associate of Doan Resources Corporation as defined by § 107.3 of the Regulations.

Notice is hereby given that any interested person may, not later than ten (10) days from the date of publication of the Notice, submit written comments on the proposed transaction to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: December 14, 1982.

DEPARTMENT OF STATE

[CM-8/585]

Secretary of State's Advisory Committee on Private International Law; Study Group on Arbitration; Meeting

There will be a meeting of the Study Group on Arbitration, a study group of the subject Advisory Committee, at 10:00 a.m. on Friday, January 28, 1983, at the United States Mission to the United Nations in New York City. Members of the general public may attend up to the capacity of the meeting room and participate in the discussion subject to instructions of the Chairman.

The primary purpose of the meeting is to consider the draft model law on international commercial arbitration which is being prepared by a working group of the United Nations Commission on International Trade Law (UNCITRAL). Other matters concerning United States participation in conventions and treaties concerning international commercial arbitration will be discussed as time permits.

The United States Mission is located at the corner of 45th Street and First Avenue. Participants in the meeting should use the auditorium entrance on 45th Street. As entry is controlled and will be facilitated by advance arrangements, members of the general public planning to attend are requested no later than January 26, 1983, to notify Ms. Rochelle Renna, Office of the Assistant Legal Adviser for Private International Law, Department of State, Washington, D.C. (telephone (202) 632-8134), of their name, affiliation, address, and phone number.

Robert K. German,

Executive Director, Secretary of State's Advisory Committee on Private International Law.

Secretary of State's Advisory Committee on Private International Law; Study Group on Negotiable Instruments; Meeting

There will be a meeting of the Study Group on Negotiable Instruments, a study group of the subject Advisory Committee, at 10:00 a.m. on Friday, January 14, 1983, at the United States Mission to the United Nations in New York City. Members of the general public may attend up to the capacity of the meeting room and participate in the discussion subject to instructions of the Chairman.

The primary purpose of the meeting is to consider the draft conventions on international bills of exchange and promissory notes, and on international checks. Both conventions were prepared by a working group of the United Nations Commission on International Trade Law (UNCITRAL). The Study Group will also examine draft comments on the draft conventions for ultimate submission to UNCITRAL by the United States Government.

The United States Mission is located at the corner of 45th Street and First Avenue. Participants in the meeting should use the auditorium entrance on 45th Street. As entry is controlled and will be facilitated by advance arrangements, members of the general public planning to attend are requested no later than January 12, 1983, to notify Ms. Rochelle Renna, Office of the Assistant Legal Adviser for Private International Law, Department of State, Washington, D.C. (telephone (202) 632-8134), of their name, affiliation, address, and phone number.

Peter H. Pfund,

Vice Chairman, Secretary of State's Advisory Committee on Private International Law.

[CM-8/583]

Shipping Coordinating Committee; Committee on Ocean Dumping; Meeting

The Committee on Ocean Dumping, a subcommittee of the Shipping Coordinating Committee, will hold two open meetings during January 1983. The purpose of these meetings is to discuss U.S. positions for the provisional Agenda of the Seventh Consultative Meeting of Contracting Parties to the Convention on the Prevention of Marine Pollution by Dumping of Wastes and Other Matter, to convene February 14-18, 1983 in London.

The first meeting will be held on Wednesday, January 5, 1983 from 2:00 to 5:00 P.M.; the second will be held on Thursday, January 27, 1983 commencing at 9:30 A.M. Both meetings will take place in room 2814 (Mall) Waterside Mall, Environmental Protection Agency, 401 M Street, SW, Washington, D.C.

On January 5, the meeting will focus on the agenda item regarding the proposals to amend the Annexes of the Convention to prohibit the dumping of all radioactive wastes into the ocean. Copies of the documents transmitted by the Secretariat in regard to these proposals have been circulated to the members of the Committee. Comments received from the members and draft working papers prepared by EPA will be discussed in preparation for the development of a formal U.S. position on this issue.

The January 27 meeting will be for the purpose of discussing draft U.S. position papers on the Provisional Agenda items, other than the radioactive waste issue. Prior to the Committee meeting, copies of the draft position papers and related background documents will be distributed to the members for review.

Members of the public may attend up to the seating capacity of the room.

For further information contact Ms. Norma Highes, Executive Secretary, Committee on Ocean Dumping (WH-585), Environmental Protection Agency, Washington, D.C. 20460. Telephone: (202) 755-2927.

The Chairman will entertain comments from the public as time permits.

Dated: December 10, 1982.

Samuel V. Smith,

Executive Secretary, Shipping Coordinating Committee.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. PE-82-26]

Petitions for Exemption; Summary of Petitions Received Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before January 10, 1983.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Petition Docket No. , 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-204), Room 916, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on December 14, 1982.

John H. Cassady,

Assistant Chief Counsel, Regulations and Enforcement Division.

PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought
[redacted]	Mid Pacific Airlines, Inc.	14 CFR 121.371(a), and 121.378	To permit petitioner to utilize Tom Domestic Airlines, an FAA-certified foreign repair station, and Nitto Maintenance Co. for the inspection, overhaul, and repair of its YS-11 aircraft.
23441	Vought Corp.	14 CFR 91 70(a)	To permit petitioner to operate various versions of the A-7 and F-8 aircraft at speeds in excess of 250 knots IAS below 10,000 feet MSL. Operations would be conducted within specified areas.
23442	Harold J. Cutler	14 CFR 61 187(b)	To permit petitioner to instruct certificated flight instructor students prior to having held petitioner's flight instructor certificate for 24 months.

BILLING CODE 4910-13-M

Research and Special Programs Administration

[Docket Nos. IRA-13, 14, 15]

Inconsistency Ruling, IR-5, City of New York Administrative Code Governing Definitions of Certain Hazardous Materials; Correction

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: Correction of inconsistency ruling.

SUMMARY: This document corrects amendments to the Inconsistency Ruling, IR-5, that was published in the Federal Register on November 18, 1982, FR Doc. 82-31395. The purpose of this correction is to correct typographical and citation errors.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Vita A. Simon, Office of the Chief Counsel, Research and Special Programs Administration, Washington, D.C. 20590, (202) 755-4972.

SUPPLEMENTARY INFORMATION: This correction is necessary because some grammatical errors in the published document may cause confusion in the interpretation of the ruling. In addition, some citations contained errors and required correction.
